At the annual meeting of shareholders of the Northern Securities Company in Hoboken on the 9th inst. the five directors were re-elected for a term of three years. They are as follows: Samuel Thorne, Jacob H. Shiff, James Stillman, W. H. Clough and Geo. C. Clark.

Mercantile Summary.

The Massey-Harris Company are about to build a new warehouse and general office building at Calgary, Alta., at a cost of $20,000. The International Harvester Company have also fixed upon this point as a distributing centre for Alberta, and will in the spring build a large warehouse. The Canadian Pacific Railway has recently made a reduced freight schedule for Calgary shippers, which is now having its influence.

PORT ARTHUR & FORT WILLIAM.
Post Office Address—Port Arthur, Ont.

It is stated that John Ritchie's shoe factory in Quebec may be removed to some other place, largely in view of the unsatisfactory labor conditions prevailing in the former city.

An assignment has been made by W. G. Keyes grocer and victualler, at Sydney, N.S. He was formerly a farmer in Hants County, Nova Scotia, and began business in the spring of 1901.

The Canadian Telephone and Telegraph Company, Ottawa, has been organized with the following officers: President, Charles Robinson, Scranton; vice-president, Robert Bickerdike, M.P., Montreal; directors F. J. Stegmaier, Wilkesbarre; W. F. McCreary, M.P., Winnipeg; George Fowler, M.P., Sussex, N.B.; treasurer, James R. Mears, Scranton; secretary, John T. C. Thompson, Ottawa; manager, F. J. Leonard, New York. The company is endeavoring to obtain a franchise from Ottawa council, and if they succeed will conduct a system at once in that city.

Mercantile Summary

Already the aggregate of the year's building operations in Vancouver, B.C., is over $1,300,000, though they have been considerably hampered by labor troubles.

Mr. L. D. Shafner, of Annapolis, N.S., has given a contract to Foley's shipyard at Salmon River, N.S., to build two large three-masted schooners, both to be launched next year.

Word comes that C. J. Willis, of C. J. Willis & Co., in the lumber trade at Amherst, N.S., is an absentee, and attachments have been recorded to the amount of $10,000. He represented H. & G. Curwen, of Preston, England, to whom he is said to be much in arrears, and he was also employed in connection with the management of a lumbering business in Newfoundland.

Work on the new Soo line between St. Paul and Minneapolis and Winnipeg is making good headway. On the section to Glenwood, already a distance of twenty-five miles is in operation. The route followed is from Minneapolis along the main line to Glenwood, thence northeasterly to the Red Lake country, passing east of Crookston, then bearing northwesterly straight on to Winnipeg.

The Grand Trunk Railway's example in establishing a combined telegraph and telephone system between outside points and the head office has been followed by the Canadian Pacific who have installed such a service between Montreal and Ottawa. It is not claimed that the principle can be utilized all over the system, but it is thought that for comparatively short distances it will prove a success.

The weekly failure list among country traders in the Province of Quebec comprises the following: Mrs. E. Duplessis, doing a grocery business at St. Janvier, has assigned. Her husband has also been carrying on a small sawmill business in his own name.—Three demands in insolvency having been made upon Magnan & Freres, dry goods dealers at Sorel, they have assigned, and owe, it is said, about $12,000. Both were formerly clerks in the town, and began business as principals little more than a year ago.—An extension of three, six, nine and twelve months is sought by Miller & Riopelle, general storekeepers at Ville Marie, in the Temiscamingue country. They bought out E. Belanger in the summer of 1902, but it is reported that the partners have not been working together harmoniously, and their affairs have been undergoing investigation by a Montreal accountant. Liabilities are stated of about $13,000, and an apparent surplus is shown of $4,300.—A. Chouinard, of L'Anse and Grisponds, lately reported failed, has arranged to pay fifty cents on the dollar.—F. A. Bedard, a shoemaker of St. Ambroise de Lorette, who has also been keeping a small general stock, has made an assignment of his estate. His liabilities will not exceed $1,000.—At Les Grandes Bergeronnes, in the Saguenay district, B. Larouche has been running a sawmill, getting out spoolwood principally, and also doing a small store business. His affairs are apparently in bad shape, for he owes about $5,000, and shows assets of a little over $1,000. A Quebec assignee has assumed charge of the estate.

A. L. BROWN, - PRINCIPAL.

J. B. MILLER, of Sault Ste. Marie, who owned a seven-eighth interest in the Shakespeare gold mine, near New Webbwood, Ont., has sold his property, it is said, to Duluth and Brainard, Minn., capitalists for $676,666. The latter have formed a two million dollar company to develop it.

Mercantile Summary.

THE Hudson's Bay Company will next season put on a modern freight and passenger stern-wheel steamer on Peace river.

THE extension of the Bay of Quinte Railway from Tweed to Bannockburn, connecting at the latter place with the Central Ontario Railway, is now completed.

DOMINION Line passenger steamships on their westward voyages from Liverpool will in the winter call at Halifax, where probably the majority of the passengers will land.

WINNIPEG city council has decided to submit $1,000,000 money by-laws to the ratepayers for the purpose of developing Assiniboia water power and starting a municipal gas plant.

THE New Brunswick Legislature has, it seems, decided to increase the stumpage dues on spruce and pine cut in the province from $1 to $1.50 per thousand, and a proportionate advance for other timber.

THE Ottawa Government has granted a charter to the Dominion Contracting Company, Limited, at Montreal; capital stock, $120,000. They will do business as contractors on works of every description, acquire and deal in real estate, timber limits, mines and mining rights, water powers, build and operate sawmills, etc. Messrs. J. D. & E. D. Porcheron, of Montreal, are among the charter members.

THE Siche Light Company, Limited, has been authorized to carry on business with a capital stock of $100,000, and with headquarters in Montreal. It will manufacture and deal in acetylene and other gas generators and machines, instal gas plants in cities, etc. Messrs. T. F. Mackay and J. S. Clunie, of Westmount, and G. A. Forbes, of Montreal, are among the charter members.

THE Dominion Coal Company purposes to open up three new mines on their areas, and engineers are now surveying the outcrops with a view to determining their most satisfactory location. They will be operated on the slope plan, and equipped with the most modern appliances for raising coal economically. It is expected that the company's output will be increased by 40 per cent., and that within the next three or four years it will reach the 5,000,000 mark.

A MOVE, in which Sir Wm. Van Horne and some other Canadians are said to be interested, is being made in the direction of giving better railroad facilities to Central America. The enterprise involves the completion of the Guatemala Northern Railroad through to the Pacific Coast and the establishment of terminals which will undertake to handle cargoes from Europe and America to Asia and to the west coasts of North and South America. The railroad will endeavor to capture the trans-isthmian traffic now handled by the railroad from Colon to Panama.

THE Levis County Railway Company, Que., offers for sale the unsold portion of its issue of $250,000 worth of $1,000 bonds.

THE Locomotive and Machine Company, Limited, of Montreal, has been authorized to increase its capital stock from $1,000,000 to $3,000,000.

DELORIMIER (near Montreal) council is having built some new municipal buildings, including a large assembly hall. The cost is estimated at $30,000.

LIVERPOOL harbor interests are ruffled by a threat on the part of the Allan Steamship Line to transfer the latter's Canadian cargo steamers to Manchester, the ship canal to which city has already offered space. It is claimed that the Mersey Dock and Harbor Board neglects to afford sufficient accommodation, thus causing delay in docking and undocking.

LONDON GUARANTEE & ACCIDENT CO.,

(LIMITED), of London, Eng.

D. W. ALEXANDER, - Gen. Mgr. for Canada.

42 King Street West, Toronto.

Mercantile Summary.

WINGHAM, Ont., ratepayers have carried a by-law to purchase Mr. Walter Green's electric light plant for $28,000.

THE Hamilton (Ont.) Brass Manufacturing Company's works were yesterday morning badly damaged by fire, the loss being estimated at $30,000.

MESSRS. Ryrie Bros., the Toronto jewellers, have purchased a building adjoining their present premises, and will overhaul and add it to their present establishment, thus doubling their present floor space.

THE steamship Melville, which leaves Montreal direct for South Africa next week, will take amongst other cargo 42,000 bushels of Manitoba wheat and several thousand sacks of flour. Shippers are agitating a two-weekly instead of the present monthly service.

THE ground wood pulp mill of the Consolidated Lake Superior Company at Sault Ste. Marie, Ont., started operations on the 11th, giving employment to 125 men. The veneer and sawmills are likely to begin work shortly. It is expected that a statement as to the negotiations concerning the future organization of the company will be forthcoming next week.

A. LEITCH, of Cranbrook, one of the best-known lumber manufacturers and dealers of British Columbia, states that he is employing now in the neighborhood of five hundred men altogether in East Kootenay in this business. The demand for British Columbia lumber in the North-West is steadily growing, and apparently is not likely to stop. He thinks the coming winter will see a continuance of busy times there, with consequent prosperity for the towns and camps that have grown up in the vicinity of the mills.

WE have to report the following assignments: Skeates & Dinsley, of Collingwood, who commenced furniture selling in February, 1903, investing a thousand dollars cash. Strong competition and the lack of necessary means have resulted in their assignment.—A. W. Warren, a tailor in Ingersoll, opened in September, 1900. In July of this year he made a statement showing assets of $1,000 and liabilities of $250. He now assigns.—D. J. McKinnon, agent for agricultural implements at Chesley, is the third assignment.

THE first shareholders' meeting of the Imperial Food Supplies, Limited, took place at the company's offices, 16 West Smithfield, London, Eng., on Wednesday, the 28th October, at three o'clock. A good attendance of shareholders was present. The meeting was called particularly to comply with the law and to ratify the election of the two new directors to the board, one having resigned. The meeting was most satisfactory. The chairman, Mr. Geddes, explained in a clear and concise manner the different items in the balance sheet submitted, which was unanimously adopted. The re-election of Messrs. Price, Waterhouse & Co. and W. G. Rayner was also adopted, as was

W. T. WHITE, GENERAL MANAGER.

the confirmation of the appointment of the two new directors, Mr. A. Baker, European traffic manager of the Canadian Pacific Railway, and Mr. H. W. Williams, who for so many years has conducted the business of the London and India Joint Dock Committee. These gentlemen, from their extensive business experience, should be of great value to the board.

T. LUDGATE, a well known coast lumberman, who is now opening up an immense plant at Arrowhead, B.C., considers the outlook there for the winter very good. He will draw his supply of timber from along the north-east arm of Arrow Lake, and also from the banks of the Columbia river, between Arrowhead and Revelstoke. Over a hundred men are employed at present on the construction and handling of this plant, and in getting things ready at the lumber camps for the season's work.

LUMBERMEN IN THE FAR WEST.

We mentioned the other day a pronouncement of the British Columbia lumber and shingle makers as to the inroads being made by United States manufacturers of these goods upon the trade of our western makers. We now copy from a Vancouver paper some of the proceedings of a special meeting of the members of the Mountain Lumbermen's Association which was held in the Board of Trade rooms, and was in session for two days. Besides the members of the association who were in attendance there were also delegations from the British Columbia Lumber and Shingle Manufacturing Association, the Western Retail Lumber Dealers' Association, and the Canadian Manufacturers' Association. Among those present were: President, A. Leitch, Cranbrook; vice-president, J. W. Robinson; secretary-treasurer, W. F. Gurd; D. V. Mott, Fernie; F. W. Jones, Golden; F. H. Duggan, F. Manning, Revelstoke; W. R. Beattie, T. T. Ludgate, Arrowhead; J. Genelle, Nakusp; J. Deschamps, Rossland; F. Coleman, Cranbrook; P. Lund, J. Rogers, H. Cameron, Moyie; W. P. Sloan, Creston; G. Moffatt, Morrissey; A. McDougall, Fernie; J. P. Billings, P. Genelle, I. C. Shermerhorn, J. Dewar, Nelson.

The coast delegation included P. D. Roe, Port Moody; H. DePencier, E. H. Heaps, T. Kirkpatrick, R. H. Alexander, J. G. Scott, Vancouver.

In the prairie delegation were J. Cockburn, Winnipeg; J. S. G. Vanwart, Calgary; G. Rogers, Lethbridge, W. T. Stein represented the Canadian Manufacturers' Association. It will be seen, therefore, that the trade was represented in great numbers and strength.

Representatives of the press were not admitted, but from statements of members it appears that the first part of the day was occupied with private business, including setting the standards of measurements for dressed lumber, discussing freight rates, and technical matters generally. After this there were a number of speeches on the position of Canadian lumbermen at present owing to the absence of a duty on American lumber. It was finally decided to memoralize the Government in regard to the situation and ask for a duty to protect the Canadian manufacturer.

NEW YORK MONEY MARKET.

Henry Clewes & Co., Wall Street, New York, said in a letter under date of November 7th that speculative conditions in the stock market show moderate improvement and increasing resisting powers. Confidence revives slowly, but there is a marked absence of the unsettling rumors which affected the stability of values during the last two or three months. Now that the weakest spots in the situation have been eliminated the market is more likely to be under the influence of natural conditions and its future to be more safely gauged by ordinary judgment. High grade securities have already shown a fair recovery, but their further improvement is temporarily impeded by the monetary outlook and by the pernicious effect on the general market caused by the excessive weakness in the United States Steel shares. During the next few weeks good rates for money are likely to prevail, and it is quite conceivable that occasional flurries may be encountered meanwhile. It must be remembered that the crop movement is two to three weeks late in most localities, and even four weeks late in some; so that these demands have appeared later than usual, and funds will be correspondingly late in returning. The only source of relief to the monetary situation in case of stringency is in gold imports. Europe is rather disposed to retain surplus funds, although the best opinion is that if New York needs gold it will come. That is assuring, and probably true. Our foreign trade movement is growing more favorable to gold imports, for the reason that exports hitherto backward are increasing while imports are decreasing. The latter is a new feature, the result of depression here and a lessened demand for luxuries, and is having the effect of decreasing national revenue at a time when national expenses are at high-water mark. Railroad earnings continue satisfactory, both gross and net, although decreases in the latter grow more frequent. Railroad managers, however, are often making strenuous efforts at retrenchment, not only in improvements, but also in ordinary operating expenses. Whether this is due to increased costs of labor and materials or to an anticipated decline in business does not yet appear.

MIDDLESEX

Four per Cent. Debentures.

Sealed tenders endorsed "Tenders for Debentures" will be received at the office of the undersigned up to two o'clock p.m. on Monday, December the 7th, 1903, for the purchase of $38,000 County of Middlesex Consolidated Debt Debentures, bearing interest at Four per cent. payable semi-annually, on the 9th of June and the 9th of December Principal payable in gold on the 9th of December, 1923.

Each tender must state a lump sum, payable in London, Ont., on the 10th of December, 1903, where and when the debentures will be delivered Highest or any tender not necessarily accepted.

TENDERS FOR SUPPLIES, 1904.

The undersigned will receive tenders up to noon on MONDAY, 23rd instant, for supplies of butchers' meat, creamery butter, flour, oatmeal, potatoes, cordwood, etc., etc., for the following institutions during the year 1904, viz. :—

At the Asylums for the Insane in Toronto, London, Kingston, Hamilton, Mimico, Brockville, Cobourg and Orillia; the Central Prison and Mercer Reformatory, Toronto; the Reformatory for Boys, Penetanguishene; the Institution for Deaf and Dumb, Belleville, and the Blind, at Brantford.

Exception—Tenders are not required for the supply of meat to the Asylums in Toronto, London, Kingston, Hamilton and Brockville, nor for the Central Prison and Mercer Reformatory, Toronto.

A marked cheque for five per cent. of the estimated amount of the contract, payable to the order of the Honorable the Provincial Secretary, must be furnished by each tenderer as a guarantee of his bona fides. Two sufficient sureties will be required for the due fulfillment of each contract, and should any tender be withdrawn before the contract is awarded, or should the tenderer fail to furnish such security, the amount of the deposit will be forfeited.

Specifications and forms of tender may be had on application to the Department of the Provincial Secretary, Toronto, or to the Bursars of the respective Institutions.

The lowest or any tender not necessarily accepted.

Newspapers inserting this advertisement without authority from the Department will not be paid for it.

J. R. STRATTON,
Provincial Secretary.

Parliament Buildings, Toronto,

FORESTRY COMPETITION.

At the St. Louis Exposition a novel form of competition is to be inaugurated. The German and the United States Governments will place their exhibits in forestry in such a manner as to test each nation's methods of preserving forest growths, one against the other, in a practical manner. Two tracts of land, already partially covered with trees, and each about five acres in extent, have been assigned to the respective Governments as the laboratory for their tests. No trees will be cut from either tract. Rather transplanting will be resorted to, and when the Exposition opens miniature forests, perfect in every detail, with narrow gravel walks winding in and out, may be seen. In one respect the exhibits will be the same. Each display will embrace practically the same number of trees, and they will be practically of the same varieties. Here the similarity ceases, however. The treatment will accord with the practices in vogue in the respective countries. In the American arboretum the trees will be planted, trained and pruned according to the American idea. In the German forest garden will be reproduced, in miniature, the effects that obtain in the forests of the Fatherland, and the story of how the wonderful forests of Germany have been preserved through ages, and renewed from time to time, will be told by practical demonstrations. The exhibits will be in charge of the most expert foresters to be found in the two countries. Practical demonstrations and tests will be made every day during the Exposition. Trees will be transplanted, and the most approved apparatus for this work will be shown in actual operation. Trees will be pruned and trained, and all the implements used will be a part of the exhibit. Trees will be inoculated with disease, and when the disease is fully developed the most approved treatment will be accorded the affected trees. Careful data will be kept on all such experiments, and the results will be made known, together with a full description of the treatment, in order that the preservation of the forests may be accomplished. This novel plan shows with what interest the science of forestry is regarded in Germany and now in the States. It suggests a lesson also to Canadians that their own interest in the subject has not begun any too early.

LIFE COMPANY FUNDS AND EXPENSES.

The Editor Monetary Times:

Sir,—On my return from a business trip to British Columbia my attention was called to a letter in your issue of September 18th under the heading, "Life Company Funds and Expenses." If this letter had been referred before publication to any actuary or competent insurance authority I am sure it would never have been published.

Your correspondent either wilfully or ignorantly entirely overlooks Mr. Deu-

char's words, "on the average," and because his theory will not fit in to Mr. Deuchar's illustrations he assumes that when Mr. Deuchar mentions "a company" that he must have intended to say, "an old-established company," instead of seeing at once that his own theory must be at fault.

A letter just received from an eminent actuary referring to the alleged criticism says: "Undoubtedly the statement of Mr. Deuchar was made with direct regard to the reserve called for at about the period of average duration on fairly persistent policies; and to my mind it is quite fair to apply it to the interest of the policyholders of the Great-West Life, inasmuch as the reference to the gain from surplus interest cannot reasonably be supposed to attach to the earlier years of a policy's existence, but relates to the effect that it will have on their interests at the end of, say, a twenty-year dividend period, the bulk of the business being written upon that plan. It stands to reason that a company, operating and being able to make and secure investments in a territory where from one to two per cent. above the normal rate of interest can be obtained, does unquestionably secure an infinite advantage to its policyholders—an advantage which more than offsets many other considerations which might be in favor of a longer organized company."

The results of compound interest do not depend, as your correspondent appears to imagine, upon the age or size of a company, and when Mr. Deuchar prepared his illustration he meant just what he said in stating in one case "a company," i.e., any company, and in another place "an office," i.e., any office. The illustrations used by Mr. Deuchar would be worse than absurd if the clause, "on the average," which is entirely ignored by your correspondent, had been omitted. It is difficult to believe that your correspondent, or any intelligent life insurance agent, could fail to understand Mr. Deuchar's illustration, or imagine that the "effect" referred to by Mr. Deuchar "on the average" should appear within the first few years of the investment instead of being the average result of the whole term.

The correspondent not only ignores Mr. Deuchar's words, "on the average," and interprets "a company" and "an office" to mean "old established companies," but he changes the wording used by us in applying the illustrations to the Great-West Life from "exactly describes the happy position of its policyholders" to "exactly describes the position of the Great-West Life."

It appears to me most unfair that such a bitter and abusive letter, based on a misconception, or worse, should be published without an opportunity being given to answer it in the same issue, as many will see the letter, and perhaps be influenced by its publication in a respectable journal, who will never see the reply.

Yours truly,

J. H. BROCK,

Managing Director Great West Life Company.

Winnipeg, Man., Nov., 9, 1903.

Reduced Cost of Production

is the goal all are striving for.

One of our Band Mill customers in comparing the **Band** with the **Gang** said:

"It's quality, not quantity, I'm after. I have stood over my men this year and insisted on quality. In selling my cut I arranged for an advance of 25c. per M for every 1% advance in quantity of the cutup and better grades By the use of the Band I have secured 8% advance, which means $15,000 extra profit this season."

Several gangs have been discarded for the Pony Band double cutting, adding much to quality while only slightly reducing quantity. Many hundred single and double cutting bands running in Canada. Simple—easily managed—it's worthy of investigation.

THE HARDWARE TRADE.

During the course of the present year fears have been expressed on more than one occasion by men in the trade who are conservative, though not pessimistic, that the autumn of this year would show a considerable falling off in hardware activity. The grounds upon which their fears were mainly based, the growing uneasiness in the United States, have to some extent been realized, for there is little doubt that the situation across the line is by no means so promising as was the case a year ago, and the iron trade, which is often looked upon as the commercial barometer of this continent, has for some time past been especially out of gear. Nevertheless so far as Canada is concerned, the prophesied slackness of trade which was to come about October, did not make its appearance. It may be admitted that the quantity of goods sold so far this fall has not been greater than last year; but it is certainly true that it shows no diminution.

Even iron which, as mentioned above, has fallen in value so materially in the States, is holding its own fairly well here, and though prices have little of that strength and buoyancy which distinguished them not so many months ago, it is believed that the broad-based consumption in this country will be sufficient to keep up with the supply for some time to come. Of course, should the situation across the border become really bad, prices will be affected sympathetically here, especially if the Americans do much of their well-known dumping process in the Dominion: but we think the bridge is still some distance away and the trade need not cross it until it is reached. At any rate, constant talk about coming hard times is liable to do more harm than good, and largely to produce the very evil which is feared. So far, the demand for pig iron has been, for all practical purposes, so nearly equal to the supply, that we would not be surprised in the event of heavy buying ahead, which, however, it must be confessed is an unlikely contingency, to see a difficulty in keeping up with orders. In bar iron, business keeps up pretty well, though some slight cutting in prices has been indulged in this month. Most orders are at $1.95, though quotations stand for $2 or even a little higher. In black sheets and Canada plates a good trade is going on, while the demand on the part of the building trades for galvanized sheet iron, may be described as particularly good. As regards tin and copper, it may be said that they have both reached a normal basis of value, and the movement is very fair. Zinc and lead are improving.

As to the trade in ordinary shelf and miscellaneous hardware, certainly no complaint can justly be made. All seasonable goods, such as guns and ammunition, sleigh bells, skates, traps, cutlery, and so forth, are being asked for and shipped out in large quantities. Most lines of nails and other hardware required in building are in good demand. A steady trade is being done in window glass, although in Montreal it is claimed that some reduction in price can sometimes be obtained upon large orders. Plumbing supplies are meeting with good enquiries; and brass goods especially are in request. There have been some pretty heavy importations of cement from the United States lately, indicating activity in construction, and domestic manufacturers are a little easier in their quotations. Screw manufacturers are rushed with orders, while in rivets, nuts and bolts, trade continues steady. One feature worth noting this fall is the almost unprecedented call for stoves and furnaces, the makers of which are almost hopelessly behind in their orders. This is not so much the fault of their methods, as of the labor troubles during the course of last summer. Retailers, too, have put off sending in their orders until the last possible moment, with the present congestion as a result. Now they are indulging in scrimmages to get their own special needs executed before those of others.

THE ONTARIO TOBACCO CROP.

Having seen some days ago a communication on the subject of leaf tobacco in the counties of Essex and Kent, forwarded to the Mail and Empire, stating that the crop of leaf in those counties would not be more than 1,000,000 pounds, instead of 3,000,000 pounds previously estimated, we wrote to different points in those counties, asking about the truth of the

later estimate. One of our correspondents has seen Mr. Auld, M.P.P. for South Essex, on the question, as that gentleman has been through the county during the last ten days. Mr. Auld, it appears, interviewed the Empire Tobacco Company's manager in Leamington, Mr. Gregory, also their buyer, Mr. Lewis Wigle, and they have the crop figured out better than any body in the county, for indeed these two men went from farm to farm this fall, examined everybody's crop, and making an estimate of it. They both told Mr. Auld that the tobacco crop would amount to at least three million pounds, and they pronounced it the best crop, as to quality, ever grown in Essex County. The crops of the last two years not being as good in quality as the present is their reason for paying such high prices for this year's; but there are several growers that have refused to sell them at 12c. believing that they would receive a better price later on. The tobacco, which has been bought up at these prices, is, we are told, all of the choicest quality. Some farmers who would be quite anxious to sell have not been offered any such price, because their crop did not warrant the figure. There seems to be no doubt that the choicest portion of the crop has been purchased, but the inferior grade will not bring in more than it has done in the last few years, viz., from 5c. to 7c. Mr. Auld also interviewed Mr. Moss, buyer for the McAlpin Consumers' Co., of Toronto, who is of the opinion that there is three million pounds in Essex County alone.

"There is only one farmer in our immediate neighborhood," says an Amherstburg letter, "who has sold his crop, that I know of, receiving 11c. per pound for it; another grower near here was offered 11c. but refused to sell. Outside of these two lots, I do not think the offer has been made. The crop consists, with very few exceptions, of the variety known as Burley, and I think the reason the buyers are so anxious to get the choice lots is, in addition to its being all a good color, it is very free from wormholes." The statement of the Mail's informant, that the crop has been practically all bought up by the plug manufacturers at from 10½ to 12 cents per pound, must certainly be wide of the mark. The best quality may be "practically all bought up," but there is a lot of tobacco leaf which is by no means first quality, and if holders get 6c. or 8c. the pound for that they will do well.

One of our correspondents expresses surprise that such an inadequate estimate as one million pounds of tobacco for the 1903 crop of both Essex and Kent should ever have been made: he thinks three millions much nearer the truth. In explanation of this low estimate, however, it is to be kept in mind that there are at least two holders of leaf bought at high prices, one in Kingsville and one in Amherstburg, who are interested in bulling the market. These holders, and any others similarly situated would of course be disposed to minimize the supply and so keep up the price so that they may get rid of their high-priced stocks. In any case, it appears likely that the two counties named will realize a quarter-million dollars from leaf tobacco this year.

OCTOBER FIRE WASTE.

The aggregate loss caused by fires in Canada and the United States during the month of October was, according to returns made out by the New York Journal of Commerce, $10,409,800, or an increase, compared with same month last year, of $816,500. For the first ten months of the present year, the destruction by fire has been to the amount of more than a million and a quarter dollars greater than last year, though this, of course, may be accounted for, partially at any rate, by the increase in value of insured property throughout the two countries. The following table will show in summarized form the losses for the three last years:

	1901.	1902.	1903.
January	$16,574,950	$15,032,800	$13,166,350
February ...	13,992,000	21,010,500	16,090,800
March	15,036,250	12,056,600	9,907,650
April	11,352,800	13,894,600	13,549,000
May	22,380,150	14,866,000	16,366,800
June	9,590,000	10,245,350	14,684,350
July	15,740,000	10,028,000	12,838,600
August	8,334,000	7,425,550	8,428,350
September ...	7,645,200	9,945,000	9,939,450
October	14,749,900	9,593,300	10,409,800
Totals ..	$135,395,250	$124,097,700	$125,381,450

It will be observed that for the last six months, from May to October, the destruction has been ten millions greater than in the same period of 1902, although during the first four months of the ten the losses were so low as to give rise to the hope of a year of great comfort to underwriters.

THE BACHRACK-MARGOLIUS CASE.

Something disappointing is always felt when the participators in an especially barefaced fraud are let off with a light sentence. The natural disposition of any merchant is to "put a man through," as far as the law will go, if found trying to swindle his neighbors by conspiracy or otherwise. And we must assume that a high-minded judge, who has to try a case of the kind described, does not feel otherwise than a layman when he sees fraud laid bare. While, in the case of Bachrack and Blackley of Toronto, and Margolius of Montreal, months ago arrested for conspiracy to defraud wholesale dry goods houses on a large scale, these precious rascals got off with a punishment which equalled only a small fraction of their deserts, it was through no mistaken leniency or misplaced sympathy on the part of the judge. It is some satisfaction to know, however, that all three were sentenced to gaol, as well as condemned to pay fine. Would that the term of imprisonment had been longer and the fine fifty times as heavy. We give below the judgment of Mr. Justice Desnoyers, at the Court of Special Sessions in Montreal on Tuesday last, when he sentenced George Margolius, who pleaded guilty to a charge of obtaining goods under false pretences. And we are informed that the persistence of Mr. S. A. Jacobs, of Montreal, in following the tracks of the precious trio from Toronto to Montreal and from

New York to Chicago and Detroit, had much to do with securing the measure of punishment accorded them.

Mr. Justice Desnoyers said:

"You pleaded guilty on June 13th last to the charge of having, on or about January 15th last, 1903, at Montreal, unlawfully by false pretences, obtained from Jacob M. Jacobs, goods and merchandise of the value of $1,200, with intent to defraud.

"Sentence was deferred until the result of a case of conspiracy to defraud your creditors, instituted at your suggestion, against Morris Bachrack and William Blackley, and which was then pending, to be determined by the Court of Kings Bench of this district. You were examined as a witness in that prosecution, and supported by your clerks made out a prima facie case against the defendants.

"Bachrack and Blackley, by clever wire-pulling and postponements, managed to drag a case from appeal until this term of the Court of Kings Bench, when they finally pleaded guilty, and by begging for mercy and with the assent of the Crown had the good fortune to be let off with a nominal sentence.

"In your evidence you referred to certain transactions in New York that would have made a case of conspiracy much stronger against them; that evidence was procured in New York at the expense, not of the Crown, but of your creditors, by means of a commission regularly issued by the Chief Justice of the Court of Kings Bench, but was not put before His Lordship, Judge Hall, who presided at the trial of Bachrack and Blackley.

"It is usual, and I think it is right, that an accused turning Crown's evidence should have some consideration at the hands of the court dealing with him; such is your case. You have denounced those who incited you and helped you to defraud your creditors. It was not necessary that your testimony should be corroborated, and it was corroborated by the New York merchants, but as I said before, that corroboration was not brought to the knowledge of His Lordship presiding at their trial, and they had the benefit of it.

"Now, in your case, I cannot ignore that corroboration, because I myself, acting as commissioner, received it in New York. They, Bachrack and Blackley, committed an offence which is punishable by several years' imprisonment (maximum), whereas you committed one punishable by three years. It is not fair that you should suffer more than those who allured you into committing the fraud, quite the reverse. They were sentenced to pay a fine of $100 each and be imprisoned in the common jail for the space of two hours.

"Now, taking into further consideration the fact that you were preventively imprisoned during the space of upwards of three months, I feel justified in condemning you to pay a fine of $50."

LIFE INSURANCE BENEFICIARIES.

It was desirable in many respects that recent legislation in Canada should have materially modified a condition of things under which the proceeds of an insolvent man's life assurance could be seized by creditors and his wife and children left destitute. True, there is needful provision made to protect the rights of creditors in cases of fraud where a man has desired to feather the nest of his widow and family at the expense of those to whom he owed money. But the more recent alterations in the statute law are in a reasonable direction. This is well brought out in a pamphlet, entitled "Existing Legislation in the Dominion of Canada and the United States of America for the protection of wives and children as life insurance beneficiaries against the claims of creditors," by L. Goldman, A.I.A., F.C.A. This is a reprint of a paper presented at the International Congress of Actuaries in September. Naturally enough, after a resume of the common law of England on the subject, the author gives most time and space to the state of life insurance legislation in Ontario. From the date of the Act of 1865 until now, says Mr. Goldman, there have been amendments made enlarging the scope of the Act, and also permitting others than wives and children to hold interest in policies on lives of husbands or parents free from the claims of creditors. Formerly the mother and the children were the only preferred beneficiaries, or beneficiaries not being beneficiaries for value, against whose interest in policies on the lives of husbands or parents creditors had no claims. The present statute on the subject is found in Revised Statutes of Ontario, Chapter 203, Section 154, Sub-section 1:

"When the insurance money becomes due and payable, it shall be paid within the time prescribed by Section 80 (which refers to a time-limit of 60 days after proof), and according to the terms of the policy or of any declaration or instrument, as aforesaid, and shall, in the case of preferred beneficiaries, be free from the claims of any creditors of the assured, except as in Section 151 provided."

Section 151 provides in Sub-section 2 that

"If the policy was effected and premiums paid by the assured with intent to defraud his creditors, the creditors shall be entitled to receive out of the sum secured an amount equal to the premiums so paid."

Broadly it may be stated that the tendency of decisions in Ontario has been to protect the wife and children as far as possible, and see that their interests in insurance contracts are paid over to them. On pages 10 and 11 of the pamphlet the author cites interesting cases showing peculiar phases, such as that of the Toronto General Trusts Co. vs. Sewell. In this case the defendant was single when he took out life policies, but married afterward, assigned the insurance and left creditors. It was at that time decided that he could not withdraw the fund from the payment of his debts, because the Act at that time only referred to married men taking out policies on their lives for the benefit of their wives and children. This disability was afterward removed by legislative enactment, so that now it is immaterial whether the policy was originally payable to them, or later on, by endorsement, assignment or declaration attached, or by will, made subsequently payable to them or for their benefit; and what applies to wives and children of course now applies to all the other preferred beneficiaries.

A page is devoted to the Province of Quebec. In that province the Revised Statutes of 1888 are quoted. Under Section 5604, policies effected or appropriated under this section are exempt from attachment for debts due either by the insured or by the persons benefited, and shall also be unassignable by either of such parties. In that province, the insolvency of the husband does not render him incapable of appropriating his policy for the benefit of his wife, but the creditor would be protected under Article 5606. Peachy vs. Riverin, 1895 (7 Q.O.R., S.C. 519). By statutes in 1898 Article 5604 has been amended so that the insured and parties benefited may join in assigning any policy.

The provisions of Maritime Province laws governing the disposition of a life assurance estate appear to have been for the most part assimilated to those of

Ontario. In Nova Scotia, after the original statute of 1884 on that subject, came the statute of 1900. In New Brunswick the latest enactment appears to have been made in 1895, and in Prince Edward Island in 1895. Manitoba, the Territories and British Columbia have their statutes bearing upon the beneficiary question briefly dealt with. There appears, the pamphlet tells us, to be no provision preserving the rights of creditors where policies are effected or paid in fraud of creditors as in the other provinces. The Newfoundland Act, which has just come into force in that colony, is modelled largely after that of Ontario. The insurance laws in force in the United States, where each individual State controls its own legislation on this subject, are briefly noticed in the last three or four pages.

In this pamphlet, which covers a good deal of ground in brief space, the author gives full credit to the late William McCabe, F.I.A., for much of the information it contains. In his position as actuary and manager of the North American Life, Mr. McCabe had accumulated a good deal of matter, controversial, legal and otherwise, relating to the subject. But we cannot help thinking that Mr. Goldman has put the essence of it into smaller compass than his predecessor's able but more prolix pen could possibly have done.

INSTRUCTION ABOUT INSURANCE.

As stated in a recent circular to members, the council and educational committee of the Insurance Institute of Toronto are awake to the need of insurance education, which is engaging in a practical way the attention of officers of companies and insurance institutes throughout Great Britain and the United States. It is now recognized by the most noted insurance men that every person engaged in insurance should specially prepare himself for the important duties involved in that work. The Toronto Institute has prepared a syllabus of examinations to be conducted under its supervision in April of each year, in both fire and life branches of the profession. We are glad to observe that in addition to the more abstruse subjects connected with the business, such as rules, tariffs, average and co-insurance clauses, algebra, life assurance law, logarithms, investments and the statutes, the examinations are to include such more simple matters as arithmetic, penmanship, spelling and grammar.

It is not to be denied that many young persons in insurance offices in Canada are more in need of instruction in these elementary subjects at the present day than in what may be termed higher education. Correspondence, too, has been very sensibly included, not for the sake of handwriting alone, but for office practice in the proper expression of a writer's meaning. And the addition of chemistry to the list of subjects to be studied is a plain requisite of to-day. The same may be said of electricity, for the fire risk of electric lighting and heating is being demonstrated in novel forms almost every week. The construction of buildings is yet another subject upon which up-to-date knowledge is necessary. Insurance clerks and students, nay not only these but insurance employees of maturer age, who are year by year adding to their experience, may well thank the insurance institutes of Montreal and Toronto for the opportunity afforded them by means of classes, of lectures, and of libraries, to acquire a more thorough knowledge of life assurance and fire assurance in both theory and practice than was formerly possible to them.

THE ONTARIO SCHOOL SYSTEM.

In spite of much self-praise of the excellence of Ontario Public Schools, more especially in past years, recent statistics suggest reasons for considerable disquietude concerning the school system of this province. In 1887, the number of children enrolled in the Public Schools of Ontario was 491,242, while in 1901, notwithstanding an increase in population in the interval, the number had dwindled to 457,436. In the intervening period, however, the attendance in Separate Schools had increased from 30,373 to 43,987, though, so far as we know, the proportion of Roman Catholics to Protestants remained practically the same. In other words, Separate Schools gained 13,614 scholars, and the Public Schools lost 34,806 in fourteen years. That the Ontario school system, in spite of much that is good, does not compare favorably on the whole even with that of some other parts of Canada, is evidenced by the fact that the British Commissioners for the Transvaal, after an exhaustive investigation into the merits of several educational methods decided upon that of New Brunswick as being calculated to give the best results. Of course, this fact does not necessarily prove that the New Brunswick system, because it is better adapted for the conditions in South Africa, is therefore better than the present system for this province; but it does afford food for thought. Then we may also recall that the delegation sent out from the Old Country to examine into education in Canada did not report at all so favorably about the Ontario system as our self-love made us think they should.

The above figures suggest, however, either that the parents of Ontario children are becoming singularly remiss in their duty, or that they are dissatisfied with the results of the schooling, as it is at present conducted. Probably, the latter suggestion is the correct one; and, if this be the case, it behooves us all to make very careful enquiry into the causes of the discontent. Twelve or fifteen years ago, perhaps more, Ontario was in possession of educational facilities upon which, comparing itself with many other countries, it could justly take pride. Since then, however, the world has moved, but Ontario, it seems to us, has allowed present well-being to blind it to the possibility of constant improvement and future perfection. It has become fixed in a rut of self-complacency; and while the educationalist should live the strenuous life, if anybody should, he has become an adept at laisser faire.

The idea seems to have become prevalent in the land that anyone is good enough for a school teacher. True, this is by no means acknowledged; but how otherwise is the fact to be accounted for that men-teachers are gradually but surely dropping out of the profession, and that the average salary of a male

teacher in Ontario's rural districts to-day is only about $359 per year, while that for females is only about $262. Leaving out for the present any attempt to show that the morale, as well as the mental training of children, beyond a certain age, are liable to suffer under a continued course of women teachers, what inducement, we would ask, do such salaries offer to men qualified to be employed in the work of training the minds of the rising generation? Than this, surely, no task can be of greater importance. The qualifications needed for the profession are high; the attractions it offers should be in proportion. For the sake of inducing the right men to undertake the education of Canadian youth, the work of instilling into them the sense of responsibility for the future welfare of their country, surely no question of mere present expense should stand in the way; governments could afford to retrench in many other outlets for expenditure rather than that this great duty should be sacrificed or dealt with penuriously. And something more than a mere grading up of salaries is needed; to meet the real necessities of the case, radical changes must be made, it seems to us, in the whole basis and structure of the teaching profession, putting it on an altogether higher plane.

MONTREAL LETTER.

I apologize for not writing in October, as you requested, but really there seemed little to write about except continued activity in business and a general level of prosperity and happiness, either up-town or down-town. This good old city flourishes along with the rest of Canada in spite of Alaska awards or the attempted tyranny of labor unions, although we do not know when our turn may come to be throttled by unreasoning labor, for the news from Quebec is that one shoe factory has shut down and another is threatening to leave that place because of the exactions of the unions. Surely Quebec must have a short memory. The frightful harm that the 'Longshoremen's Union did to Quebec shipping a few years ago ought not to be so soon forgotten.

Something important to this harbor has just come into prominence. And that is the advantage of the gas buoys recently placed in the channel between Sorel and Montreal. By means of these a steamer which reaches Sorel at dark can easily be brought into port by means of these buoys, where formerly it was needful to anchor for the night. Three or four steamers, I am told, have already made the night trip in safety. The fact is of great moment to the harbor; and it is not too much to expect that in a few years more the whole route, not only through Lake St. Peter but down to Quebec may be lighted in the same manner.

You do not appear to have received the report of the harbor traffic in time for last week's paper, so I will give it to you now—not the whole report, but the gist of it. For October the number of seagoing vessels visiting the port was 734, of which 713 were steamers, as against 685, of which 657 were steamers, in the like period of last year. The total tonnage of seagoing vessels for the present season was 1,725,693, of which steam represented 1,718,787 and sail 6,906 tons. In the similar period of 1902 the total tonnage was 1,385,365, of which steam represented 1,376,,123, and sail 9,242 tons. The total tonnage of inland vessels this year has been 2,157,510, as against 1,664,096 in 1902, an increase of 493,414 tons, or nearly 23 per cent. As regards the revenue of the harbor, which is always a weighty consideration, it has gone up from $240,524 from the opening of navigation to the end of October last year to $265,646 this year. Both import and export traffic have grown, for I see that the total imports for the season represent $165,000, as against $155,550 in 1902; exports, $75,000, as against $66,500, and local traffic, $25,646, as compared with $18,534. It seems a dreadful waste of time, by the way, that the commissioners are still shilly-shallying over the sheds in the harbor whether they shall be one storey or two, whether built of this or that.

It has been estimated that the quantity of grain shipped from the West through the port of Montreal this year will be 25,000,000 if not 30,000,000 bushels, an increase of one-third compared with last year. The increase would very likely have been much larger had it not been for the fact that the farmers have this year held back their grain so much longer than usual with the idea of obtaining better prices. Owing to the keen competition, freight rates have been very low. For instance, while last year the lowest rate at which the Canada Atlantic Railroad handled grain was 4¼c. per bushel, this year the average price has been 3½c., and in some cases it had to drop to 3c.

Visiting Rosemount the other day, which, in case you do not recognize it, is far away in the north-west quarter of Montreal, I was greatly surprised at the extent of the new C.P.R. shops. The railway have 340 acres here, and have put up shops and offices "by the mile," as you might say. There are sixteen or eighteen shops, I was told. If they had said sixty or eighty I could almost have believed it, the array of bricks and mortar is so bewildering. There are fitting shops, repair shops, paint shops. Fancy, if you can, a place called the locomotive building shop, which is twelve hundred feet long, the roof supported by enormously heavy pillars on rock foundation concrete. There are three pits, each 900 feet long, for joining and testing locomotives, and there will be three travelling cranes, each with a lifting capacity of 100 tons, for lifting locomotives. Then you see the power-house in the middle of all, for the whole of the machinery is, I am told, to be driven by electricity, and each shop is to have a number of motors. The multiplicity of railway track throughout, to facilitate the handling of locomotives and material, is already bewildering.

In former years you have taken some interest in our interesting residential suburb of Westmount. I may tell you that the valuation of that place for 1903-4 has reached $12,692,765, of which $11,444,925 is taxable property and $1,247,840 exempt. This shows an increase of half a million over last year. The appropriations for the town come to $82,000 a year, e.g., police, fire and health, $14.000; water and light, $10,500 each; interest and sinking fund, $12,000; roads. $15,000; council salaries and expenses, $6,000, etc.

Montreal, 10th Nov., 1903. MOUNT ROYAL.

INSURANCE INSTITUTE OF TORONTO.

Members of the Institute had what may without impropriety be styled a good time at their banquet in the King Edward Hotel last month. But the November circular from the secretary advises that a campaign of hard work is to be expected in the fall and winter season. Reference is made elsewhere to the Syllabus of Examinations for students of insurance. We have only space to notice briefly the meeting which was held in the rooms on Wellington street on Monday evening last, 9th instant. On that occasion, the president, Mr. P. H. Sims, secretary of the British America Assurance Company, occupied the chair. A large number of members were present, amongst whom were several managers and secretaries of insurance companies. The secretary, Mr. J. K. Pickett, in making the announcements, read extracts from communications received from managers of local companies, and others connected with some of the American Fire Insurance Companies' offices, congratulating the Council upon providing such excellent educational courses for the members and asking for information concerning the same.

The president, Mr. Sims, in the course of his remarks, referred to the gratifying condition of the affairs of the Institute. He reported an increase of sixty in the membership, which now totals three hundred and twenty-seven, and stated that all the fees for the current year had been paid—a condition hitherto unknown in the history of the body. In referring to the educational work of the Institute, he enlarged upon the responsibility which rests upon each one to grasp

every opportunity to increase his knowledge. He went further, pointing out the responsibility and obligation which rests upon the managers and chief officials of offices in respect to the younger members of the staff. Frequently, he said, a junior is taken in and placed under the charge of older clerks who give him some training in the mechanical work of the office, but he is left to his own unaided efforts to determine as best he may the relative importance of his duties to the whole, and the reasons why it is necessary to perform his work in a certain way. Such a training, he said, tends to develop only the mechanical side of his life, and should be accompanied by corresponding mental development. He urged the managers to point out to the members of their staffs the opportunity afforded by the Institute in its educational courses.

After the President's address, Mr. Arthur J. Hughes, secretary and actuary of the Crown Life Insurance Company, read a paper on "A Method of Ascertaining the Cost of an Agency." This paper, which is on a subject of very practical bearing, was listened to with great interest. The paper, after being printed and distributed amongst the members, will be brought up for discussion at the next meeting of the Institute, to be held on December 8th, 1903. Mr. C. D. Cory will also read a paper at that meeting on the subject, "Fire Insurance as an Exact Science."

CANADA CYCLE AND MOTOR CO., LIMITED.

In our last issue, brief reference was made to this company, of which we had the day before received the report for the twelve months ended with July, 1903. The annual meeting was called for 29th October, but on the morning of that day a lawyer acting for the estate of the late Henry Cargill, a shareholder, had an injunction issued to prevent the carrying on of such meeting, and to prevent the passing of a by-law for the reduction of the capital stock of the company. We submit below the statement prepared for that meeting. The balance-sheet, it will be observed, is drawn up on a different basis from those of former years. This, it is explained, is by reason of changes in the company's organization:

ANNUAL STATEMENT, ASSETS AND LIABILITIES JULY 31ST, 1903.

ASSETS.

Cash on hand and in banks	$	24,708 52
Accounts and bills receivable		551,790 31
Stock on hand—Bicycles, motor vehicles, parts and accessories		324,178 19
Raw material and supplies		143,380 50
Insurance, duty, freight, stationery and office supplies		53,305 45
Real estate and buildings		73,558 03
Machinery, tools, patterns, furniture and fixtures		148,718 19
		$1,319,639 19

LIABILITIES.

Accounts and bills payable	$	777,565 90
Contingent account		42,073 29
Capital stock on basis of reorganization		500,000 00
		$1,319,639 19

We have audited the accounts of The Canada Cycle and Motor Company, Limited, and certify the foregoing balance sheet to be an accurate statement of the company's position on the 31st July, 1903, effect having been given to the plan of reorganization to be submitted to the shareholders at the annual meeting of the company.

EDWARDS & COMPANY,
Chartered Accountants.

In the Monetary Times of 7th November last year, we went somewhat fully into the affairs of this company, floated with so much flourish of trumpets in 1899, with share capital $6,000,000 of which the public was kindly permitted to subscribe $2,000,000. It was stated that where profits of $300,000 were shown in its first year, they declined in the second to $195,000 and in the third to $2,000; while in the fiscal year, 1902, there were no profits, but a loss of over $130,000.

The present statement shows a remarkable reduction of obligations to the public, for where they were $1,092,900 in 1902, they are only $777,565 this year. This implies retrenchment, cutting off useless agencies established to do a huge business, and getting things down to "hard-pan" generally. But we must also presume it to imply a reduced manufacture. Factory plants have been consolidated, surplus machinery disposed of, and stocks of bicycles in the hands of manufacturers and dealers cleared out. The tendency in the bicycle business is now towards higher grade bicycles at better prices. Indeed, the average price of wheels in 1903 is higher, we are told, than in 1902. The company's Australian business, while larger, is done on long credit, and at stationary prices. The European branch being unprofitable has been closed, but the miscellaneous foreign business is maintained. The Motor branch of the company's business has grown in importance during the past year, the volume being larger than ever. It handles automobiles made in the United States and has had the exclusive agency for Canada of the leading types. Besides, the manufacturing plant of Canadian Motors, Limited, was purchased during the year, and a number of electric vehicles made and sold.

It was stated a year ago that the holders of $2,850,000 of the common stock had offered their common stock for cancellation in a reorganization of the company "as soon as legal difficulties are removed"—which meant, the suits then pending by small shareholders against the directors and underwriters. According to the present statement, "this litigation has been withdrawn," (we assume that the above-mentioned suits are referred to), and the directors, therefore, framed By-law No. 7, to be submitted at the October meeting. This by-law provided for the reduction of the capital stock to $600,000, of which $100,000 was to remain in the treasury. That is, the common stock was to be all cancelled, and the par value of the preference shares reduced from $100 each to $20 each, such shares having no priority. But the injunction we have mentioned has interfered with this procedure.

It is so far satisfactory to observe that the loss on the previous year's business of $133,000 has been changed to a profit this year of nearly $30,000. And the statement of assets and liabilities as made out now shows the value of the assets owned by the company without placing any valuation whatever on the patents, trade marks and other franchises which are its property.

This statement shows a clear surplus of assets over liabilities of $500,000. This makes the company, so far as outside parties are concerned, a quite solvent concern, giving this surplus as the value of the share stock of the company. The reduction of the capital to $500,000 would mean then that the shares which would have a face value of $20 should be worth par. In addition to this the directors of the company last year surrendered, as we stated at the time, a million dollars of preference stock to a trustee, this sum to be distributed among the small shareholders and those least able to bear the loss just as soon as this reorganization could be effected. If this be done the smaller investors will probably come out of the bicycle business better than the majority of the people who have put their money into it during the past ten years.

As far as can be seen, the worst is now known of this unfortunate and over-capitalized venture, and it is a question how far any further litigation will advantage the shareholders. One cannot wonder that smaller holders still feel embittered against the sanguine and incautious management which floated the concern on such a gigantic scale. But, then, the public are always too ready to jump at a venture which promises big profits, especially when the prospectus contains "big" names. These very provisional directors, however, have suffered a heavy financial loss by the Canada Cycle and Motor Co. besides the shock to their self-confidence and to the public's belief in their shrewdness; and

the present more economical and practical management has succeeded in putting the company on a much improved basis.

CONFERENCE OF INCORPORATED ACCOUNTANTS (ENGLAND).

The Liverpool papers recently received give interesting particulars of the autumnal conference of the Society of Accountants and Auditors (incorporated) held at the city hall on October 15th, 16th and 17th. The members were formally received by the Lord Mayor, Mr. Rutherford, M.P., who addressed the visitors. In his speech he pointed out that the president of the Incorporated Law Society in his official conference address in the city hall during the conference of British solicitors, had stated that all members of the legal profession ought to have their accounts audited every year. Besides this, in the opinion of the Lord Mayor, there ought to be a compulsory annual audit of a good many concerns, particularly every limited company; and the certificates of the auditors ought essentially to be filed annually with the Registrar of Joint Stock Companies. When one thought of the immense masses of money, funds and property vested in trustees, and of the interests of widows, orphans and families dependent upon the proper administration of those trusts it suggested itself that a compulsory registration of all such trusts, together with a regular audit, would do a great deal towards securing the immunity of such concerns from peculation, loss and disaster in different directions. . . . When responding to the civic welcome the president of the society, Mr. Charles H. Wilson, J.P. (Leeds), presented to the mayor a handsomely bound copy of the Society's Year Book. The roll contained the names of 2,050 members——1,592 in England and Wales, 128 in Scotland, 36 in Ireland, and 294 in the colonies and abroad. The society, said Mr. Wilson, was Imperial in its scope. The business of the conference was opened by Mr. C. Hewetson Nelson (Liverpool) with his paper, entitled "The Future of the Accountancy Profession." The paper attracted much attention outside of the profession, and The Liverpool Daily Post summarizes its impressions in an editorial, entitled "Accountants and their Profession," which may interest our readers following the profession of public accounting in the Dominion. We append the article.

"The question raised at the conference of incorporated accountants, held in the town hall yesterday, is one of moment, not only to accountants, but also to the commercial public. That accountants should still be without statutory recognition is, in view of the important duties which devolve upon them, surprising. Considering the responsibilities of the 'profession,' it is somewhat perplexing to the commercial world that the members should be content to allow matter to remain in so unsatisfactory a position. Probably the reason is to be found in the fact hinted at by Mr. Hewetson Nelson, in the paper read by him at yesterday's conference. If the energies of the various bodies of accountants had not been impaired by internal differences, there can be little doubt that before now the 'profession' would have received that recognition at the hands of the Imperial Parliament which its growing importance demands. It is certainly not to the interest of commerce that persons without a proper qualification should be permitted to style themselves (public) 'accountants'; and we believe that the existing bodies, which have undoubtedly done much to increase the status of their 'profession,' would have the sympathy and receive the support of Chambers of Commerce generally if they united their forces, with the object in view that we have indicated. We are aware that there is a healthy rivalry between some of the existing bodies; and we do not see why this should not continue under such a Registration Act as that suggested, precisely in the same manner as it exists at the present time between the various universities. The great gain of an 'Accountants' Registration Act' would be that no one could describe himself as a (public) accountant until he had obtained the qualification which would entitle him to be placed on the roll."

In so far as we can judge at this distance, the editorial opinion of our contemporary is well worthy the attention of all practising accountants in the Empire.

The proceedings of the second day were commenced by Mr. Frederick Walmsley, F.S.A.A. (chairman of the Finance Committee of the city of Bolton), who read a paper upon "Depreciation and Sinking Funds in Municipal Undertakings." He stated that a debt exceeding £300,000,000 sterling had been created by corporate bodies in the United Kingdom, and that public accountants might profitably consider the whole question from the aspect of the present and future incidence of its burden on the whole community. Regarding the differences of opinion among municipal experts concerning the treatment of depreciation, Mr. Walmsley's judgment is that "depreciation" and "sinking funds" are in origin, principle and object absolutely separate and distinct. The sinking fund is a contribution towards and in repayment of capital borrowed, whilst depreciation is a fund for the restoration and preservation of assets so as to prevent the raising of further capital for the maintenance and continuance of the status quo. These two accounts should be kept separate and distinct, so that at any time the position of the total capital expenditure and the total depreciation fund should be clearly shown. Other points were raised, and a spirited discussion followed, during which a colonial member, Mr. Thomas Davis, J.P. (Sydney, Australia), remarked that after an absence of thirty years from England he was impressed upon his return by the enormous strides made, most of which, in his opinion, was due to the magnificent undertakings possessed by each town and city, particularly the sanitation works. In conjunction with this question it is to be noticed that the incorporated and chartered societies in Great Britain have been invited by the "Parliamentary Joint Committee on Municipal Trading" to confer and report to Parliament as to whether it would be possible to prescribe a standard form of keeping accounts for all municipal and other local authorities, having regard to the varying conditions existing in different districts. At the banquet in the evening over two hundred members were present. Among the guests were the Mayor and Lady Mayoress, Lord Stanley, M.P. (Postmaster-General), the Bishop of Liverpool, and several members of Parliament and public men of local note. Replying to the toast given by Sir Edward Russell, "The Society of Accountants and Auditors (incorporated)," the president of the society said they hoped before long that Parliament would give to the profession of public accountancy its rightful status, and place on the statutes of the Imperial Parliament a measure to that end.

A reception and civic ball to delegates were subsequently given by the Mayor, when upwards of 900 guests accepted the invitation. The council chamber and crypt were used as supper-rooms. The industrial undertakings visited included Messrs. Lever Bros., Limited, soap works, and the Salt Union, Limited, salt mines. The lighter invitations included visits to the school-ship Conway, Cunard liners, the University and Walker Art Gallery, with a trip to Eaton Hall and the quaint old town of Chester, so well known to the numerous Canadians who arrive and depart from Liverpool. It would be novel reading to hear of our own Dominion Chartered Accountants receiving civic honors on this princely scale from our leading Canadian municipalities and cities.

TORONTO CLEARING HOUSE.

A change in the method of its management is announced by the Bank Clearing House of Toronto. It has hitherto been the custom for each bank in turn to appoint a manager, who held office for one month at a time. This system did not always give satisfaction, and at a meeting of bank local managers on Monday last, M. Morris, of the Bank of Commerce in the chair, it was decided to appoint a permanent salaried manager. The choice of a man for the position fell upon Mr. G. W. Yarker, who will act as manager of the Toronto Clearing House, as well as secretary of the Bankers' Section of the Board of Trade. Mr. Yarker's duties commence, we understand, on the first of January next, by which time it is thought the Clearing House will have a permanent home of its own, probably occupying the first floor of the

improved building of the Bank of British North America, a very suitable and central location. The salary attached to the position is necessarily small, as the duties will not take up very much of his time; but, no doubt, Mr. Yarker will value this recognition of many of his old bank friends with whom he was so long and so closely associated when manager of the Bank of Montreal in Toronto, and later general manager of the Federal Bank of Canada.

FINANCIAL AND BANKING ITEMS.

G. P. Hughes, of Tottenham, Ontario, private banker, has suspended payment, consequent upon a run.

It is stated by an Eastern Townships paper that Mr. W. A. Dorais, assistant manager of La Banque Nationale at Montreal, has been appointed manager in St. John's, in succession to Mr. Audet, who has resigned.

Messrs. R. C. Brown & Company's new offices in the Standard Stock Exchange building, Toronto, are a great improvement on their former location for handsome appearance and commodiousness. The firm continues to do a general stock business, and to make a specialty of house options.

A correspondent of the London Westminster Gazette suggests that the British income tax be doubled on all foreign investments, thus providing a substantial inducement to English investments in the colonies, and a check to the present habit of investing in the railways and manufactories of the United States and other countries. He argues that the principle of this proposal was admitted, when colonial stocks were made trustee investments, and that this proposal would make a very useful addendum to Mr. Chamberlain's preferential scheme.

The Bankers' Association of the Dominion met yesterday in Montreal, and elected officers. They are as last year with one exception, namely that D. R. Clarke, cashier of the People's Bank of Halifax, succeeds Chas. McGill upon the council. The officers are as follows: Honorary presidents, Lord Strathcona and George Hague; president, E. S. Clouston; vice-presidents, Duncan Coulson, George Burn, H. Stikeman and M. J. A. Prendergast; council, B. E. Walker, Thomas Fyshe, D. R. Wilkie, Thomas MacDougall, James MacKinnon, W. E. Stavert, James Elliot, P. A. La France, G. P. Reid, T. G. Brough, E. L. Pease, E. B. Webb, D. R. Clarke and H. S. Strathy.

The Standard Stock and Mining Exchange of Toronto, whose quarters were formerly in the Board of Trade building, has removed into the lately reconstructed building at the corner of Scott and Colborne streets. A large sum of money has been expended in fitting up its new offices, and they may now be said to be among the most convenient and the best lighted stock rooms in town. This exchange makes a specialty of dealing in broken lots of New York stocks, and has a membership of forty-two. New York business is executed on the floor of the Consolidated Stock Exchange in that city, while orders for grain, to which particular attention is paid, are carried through on the Chicago Board of Trade.

Sir Thomas Gresham, the founder of the British system of finance, the founder of the Royal Exchange, and one of the greatest financiers the world has ever known, made a singular provision in his will, providing for what is known as "Gresham College." It is a hall at the corner of Basinghall street, near Guildhall, in the centre of the money markets of London, where since 1579 a lecture has been delivered at six o'clock every evening by some distinguished man on law, finance, divinity, medicine, or political economy. The ablest writers and scholars in the United Kingdom are asked to deliver these lectures, and frequently men are brought from Germany and France. The fee is $250, and trustees use the money to give a little honorarium to eminent men of small incomes. Nobody ever goes to hear the lectures, although the hall will seat five hundred people, except their particular friends. Formerly the addresses were delivered at noon, when everybody was busy, and nowadays at six o'clock that part of the city is entirely deserted. But the lectures are published in book form and widely distributed free of charge like the reports.

The Bankers' Section of the Toronto Board of Trade met a few days ago, and elected Mr. Robert Inglis, manager of the Bank of British North America, chairman for the year, and Alexander Laird, assistant general manager of the Bank of Commerce, vice-chairman.

According to a Victoria paper, an amalgamation of the Chamber of Commerce and the Board of Trade of Victoria has lately taken place. The members of the former body join the latter and receive due representation upon the council of the Board of Trade. The accession of the Chamber of Commerce men brings up the membership of the Board of Trade to over 300 persons.

The Bank of Montreal will establish a sub-agency at the corner of Sherman avenue and Barton street, Hamilton. We are also informed that Mr. Francis J. Hunter, late manager of the branch of the Bank of Montreal at St. John's, Nfld., has been appointed assistant inspector of that bank for the branches in Manitoba, the Territories, and British Columbia, with headquarters in Winnipeg for the present.

Notice is given by the reorganizing committee of the Consolidated Lake Superior Company that in consequence of requests, and in order to permit every stockholder to enjoy the benefits of the plan, the Reorganization Committee extends the time to underwrite, subscribe to bonds or deposit stock as required under the Reorganization Agreement, until the close of business hours on Tuesday, November 17th, 1903. Subscriptions and deposits will be received by The Fidelity Trust Company, Philadelphia, with the first payments as per the first notice of the Committee. The second payments of stock are postponed and will be payable with the last instalment on or before December 1st, 1903. A large proportion of the required subscription has already been made, but more is necessary. It is much to be hoped that the necessary sum can be raised. We note with satisfaction that the ground wood pulp mill of the company at the Soo is at work again, and that there is a likelihood of the veneer mill being also started.

DRY GOODS ITEMS.

Some surprised comment in business circles is heard upon the recent decision in the Margolius-Bachrack case of a fraudulent transfer of goods. Morris Bachrack and Wm. Blackley, of Toronto, were sentenced merely to pay a fine of $100 each and to be imprisoned for the space of two hours, and Margolius, who was looked upon as merely the tool of the others accused, was condemned to pay a fine of $50.

In New York the drooping shoulder is everywhere to be seen in the better class of waists. This is frequently obtained even in the most expensive styles by means of the yoke extending over the upper arm and made of a different material. For instance, in a painted mousseline de soie waist the upper portion is of unlined white net, made with corded shirrings, while two-thirds of the sleeves and the body of the waist are of the painted mousseline. In the wool crepes, albatross and similar light-weight wool waistings shown by the retailers at from $3 to $5 the same general style idea prevails.—N.Y. Dry Goods Economist.

The decline in exchange in China and price concessions on Japans have stimulated fairly active buying in all three of the principal Asiatic silk markets, says a cable to New York. In Yokohama prices declined about $10 (Mexican) and the purchases for shipment to this country aggregated over 500 bales. Business in Canton and Shanghai was even more active than at Yokohama. The latest advices from the Far East indicate that prices have touched bottom for the present and are tending against buyers. The possibility of war between Russia and Japan has had little effect on the market, yet banks in the Far East are now demanding the insurance of war risks. This means a rise in the "lay down" cost of raw silk.

The important topic of the movement in Paris, according to a letter recently received from that fashion centre, is the possibility of a revival of the crinoline. Some papers have spoken of it as an accomplished fact, others as a sure thing for the immediate future. The truth is that there is a tendency to wear a somewhat wider skirt, giving slightly more importance to the hipline and standing out more stiffly in the lower edge than was customary during last season These effects are obtained in a quite satisfactory way by increasing the weight and volume of volants on the under skirt, especially at the back. Some couturiers have already produced skirts with a thin hoop of featherbone at the bottom.

The woolen market in Boston continues slow, and, on the whole, disappointing. Trade has not materialized to the extent anticipated on territorial wools, which are in quite large stock, and while prices are largely nominal, on some grades the situation certainly favors the buyer. There is, however, no general pressure to force wools on consumers, for the latter, in spite of the quietness which has so long prevailed, do not find it an easy matter to secure concessions from holders which amount to very much. A good cash customer on certain lines of wool which are in good supply here would naturally find it possible to do slightly better than he could have done a few weeks ago, but there is no general giving way in prices. Manufacturers, except on quarter-bloods and low wools and on strictly fine wools, are with difficulty induced to buy at any price. That is to say, it is not a matter of price which is determining their action. They are simply not buying because, as they say, they do not need the wools.

ABOUT GROCERIES AND PROVISIONS.

The New York coffee exchange calculates that there was an increase in the world's visible supply of coffee during October, of 147,702 bags.

Canadian fruit exporters are warned to slacken the export of apples to Great Britain by the 14th of December, as trade in that line usually falls off materially from then until early in January.

A London cable states that an American syndicate is being formed, with a capital of £3,000,000, to transport British food fish to the United States market. The scheme is said to include the purchase of a number of Aberdeen trawlers to convey catches to Glasgow, where they will be packed in refrigerators on line steamers.

The Canadian Pacific Steamship line has now made 29 sailings across the Atlantic, and its shipments of cattle have been enormous, the steamer "Mount Temple" having conveyed the record number of 1,361 head at one trip. On other occasions she took over 1,256 cattle and 848 sheep. Direct sailings from Liverpool to St. John are being inaugurated this week.

One of the subjects discussed at the convention of dairy experts in Ottawa, last week, was the proposition to make the price of cheese and butter in tenths of a cent rather than halves, quarters, and so forth. And the proposition was to adopt a third grade in both cheese and butter. Much stress was laid by many speakers upon the necessity for cleanliness and absolute sanitation in factories, and for pure water, good drainage, etc.

It looks as if the St. Louis Exposition will have to do without an exhibit of Canadian live stock, such as added materially to the value of that part of the Buffalo and Chicago Fairs. The live stock breeders of the Dominion complain that their interests have been unfairly treated in many ways by the United States Government, and state that unless these objections be rendered unnecessary, and the tariff restrictions against the importation of cattle from this country be permanently removed, they will refuse to exhibit They insist that under present circumstances it would be better to use the money required at home.

COTTON COMPANIES' AMALGAMATION.

For some time past rumors have been extant to the effect that three of the large Canadian cotton manufacturing concerns were carrying on negotiations with a view to an amalgamation. Now these rumors have been revived, and from present appearances there is considerable likelihood of the deal being consumated. The three companies interested are the Dominion Cotton Company, the Merchants' Cotton Company, and the Colonial Bleaching & Printing Company. The first of these large corporations possesses several mills in various parts of Canada; it has a capital stock of $3,033,000, and a bond issue of $3,700,000, of which $1,388,000 is held in escrow against a sterling issue due in 1906, and of which $174,000 was recently exchanged for preference stock. The Merchants' Company is capitalized at $1,500,000, and has a bond issue of $650,000. Its mill is located at St. Henri, (near Montreal), and employs nearly 2,000 hands. The Colonial is a younger company, capitalized at $300,000, with a bond issue of $200,000; its mill, also, is situated at St. Henri. The basis on which the proposed combination will be effected, it is supposed will rest upon a careful valuation of the plants and other property, on the completion of which the three corporations will be brought into one organization. There would then be a new stock issue, and each stockholder of the old concerns would be given new stock in exact proportion to the value of the plant owned by his original company. The advantages expected to occur to the companies themselves are manifold, chiefly in the shape of great reductions in expenses of managing, selling, etc. To the trade as a whole, however, the advantage is somewhat problematical.

TRADE OPPORTUNITIES.

Canadian Government Offices,
London, 30th October, 1903.

A firm in the Midlands would get into touch with Canadian makers of hay-forks. An English firm asks for basswood glued-up panels for piano key-boards. An agent at Marseilles, France, would represent Canadian exporters of canned meat and lobsters, fresh and dried apples, preserved fruits, etc. A London agent wishes for the agency of firms requiring steam tonnage for carrying grain from Canada to the United Kingdom. An Ontario firm would correspond with firms in Great Britain who desire representation in Canada in the glove and mitt business.

Imperial Institute, London,
30th October, 1903.

Addresses wanted of Canadian vinegar makers. A Glasgow house wishes to communicate with packers of Canadian gallon apples of finest quality. They could take large quantities; and would require cans to be labelled with their own brand. A London import firm wishes to get into touch with Canadian shippers of graphite of good quality.

BOOKS RECEIVED.

Le Prix Courant.—This Montreal journal, the English title of which is The Price Current, has issued a handsome and unusually large autumn number. It consists of 172 pages and illuminated cover, and contains a great variety of reading matter, as well as much advertising. Full pages or illustrations are devoted to such concerns as the Frontenac Cereal Co., of Kingston; Christie, Brown & Co., of Toronto, and William Clark, of Montreal. A portrait appears of M. Damase Masson, president of the Chambre de Commerce, and of several directors of the Grocers' Association of Montreal. There are also views of the city and harbor, and notably a recent illustration of the new grain elevator of the harbor commission. Among the works illustrated outside the city are those of the Montreal Cotton Co., at Valleyfield, and of Vessot & Co., of Joliette, and the Edwardsburg Starch Company.

Incorporated Accountants' Year Book.—We have received, with the compliments of the Council of that body, a copy of the Year Book of the Society of Accountants and Auditors for 1903-04. We have, in noticing a previous issue, described this serviceable volume, which gives not only alphabetical and topographical lists of the members, home, colonial and foreign, and a list of students, but gives the report and accounts for 1902; the by-laws of the council and the rules of the benevolent fund, examination papers, etc. The catalogue of the library of this English body, we may remark, occupies 120 pages of a 540 page book.

ANSWERS TO ENQUIRERS.

R. B., Cornwall.—I have been asked the meaning of the letters "N.B.," placed upon letters addressed to places in Scotland; and I have myself a business letter, the printed heading of which is "Perth, N.B."; and I have seen letters addressed Aberdeen, N.B. Why should this be? Is it not confusing to Canadian post-office authorities, who recognize "N.B." as meaning New Brunswick, Canada?

[Since receiving our Cornwall correspondent's letter, a lady of my acquaintance writes from Rothesay, New Brunswick (which is near Saint John), saying that a letter from Toronto, addressed to her at Rothesay, N.B., had gone across the Atlantic to Rothesay, Scotland (which is on the Isle of Bute) before being delivered to her in New Brunswick, Canada. The meaning of "N.B." affixed to the addresses of letters intended for places in Scotland is "North Britain." —Editor Monetary Times.]

S. S., Winnipeg.—The last compilation of Boards of Trade in Canada was made by the Monetary Times in June, 1902, and distributed to the delegates to the conference held at that time in Toronto of Boards of Trade. We forward you one of these, not knowing of any later one.

Merchant, Ottawa.—There is no place named St. Peter's in Ontario, so far as we know. There is St. Peter's in Richmond County, Nova Scotia, and St. Peter's in King's County, P.E.I. Several St. Pierres (the French name for St. Peter) exist in Quebec Province, and there is also a St. Pierre in Manitoba.

—The most impressive graveyard is that of the assessment associations. The hopes that have been buried there were at a price that would "stagger humanity."—T. I. F.

—For the first ten months of the present year, the arrivals of immigrants into Canada numbered 121,115, of whom 47,541 were from the United Kingdom, 39,046 from the United States, and 34,528 from the continent of Europe. The Dominion Government will make efforts for a still larger immigration from Britain next year, and will also inaugurate a campaign in France and Belgium in the rural districts, with a view of inducing immigration.

—Grain shipments from the West seem to be increasing. For the first few weeks after the harvest they were considerably behind the quantity for last year, but in the month of October last they amounted to 966,000 bushels, as compared with 886,000 bushels for that month of last year. However, between September 15th and November 4th, the total was 12,089,000 bushels, as compared with 15,876,000 bushels for the same period of 1902. Is wheat being held back for higher prices?

—The annual meeting of the Canadian Fruit Growers' Association will be held at Leamington, Ont., on the 24th, 25th, and 26th inst. So far as we can learn, one of the most important subjects which will be discussed is the question of standard packages for the export of apples, pears, etc. An increasing number of advocates is being found for the idea of packing the finer grades of apples in boxes rather than in barrels, as they are more convenient for shipping in cars, and better adapted for household use, for storage, and for inspection.

—British advices speak of a falling-off in receipts of butter; chiefly in Canadian, which showed a reduction of 11,000 cwt. In Russian, the decrease was 3,000, and in Australian, 4,000 cwt. Referring to cheese, large stocks of Canadian were already in hand, and the demand was only fair.

—The United States Fidelity and Guaranty Company, of Baltimore, has supplied its agents with a set of leaflets, one for every day in the week, including Sunday, which they should be able to distribute with good effect. The little treatises bear the following suggestive titles: "Simpson the Surety," "Parker the Politician," "The Banker Bondsman," "Briggs Breeds Bankruptcy," "Minutes of the Supreme Council of the Regal Shield," "Bill the Burglar," and "Lovelace the Lawyer."

CLEARING HOUSE FIGURES.

The following are the figures for Canadian Clearing House for the week ended with Thursday, November, 12th 1903,co mpared with those of the previous week:

Cities	Nov. 12th, 1903.	Nov. 5th, 1903.
Montreal	25,252 281	25,083,834
Toronto	16,040,724	15,202,949
Winnipeg	7,293,667	7,192,438
Halifax	2,468,548	1,930,952
Hamilton	1,081,545	1 161,657
St, John	1,000,732	1,152,205
Vancouver	1,485,928	1,659,430
Victoria	808,295	652,601
Quebec	1,924,516	2,074,433
Ottawa	2,467,218	3,473,475
London	836,425	950,225
	$60,669,579	$60,534,199

PETERBOROUGH

"The Water Power City."

An American milling concern recently erected in Peterborough a Canadian branch factory—having a capacity of ten million bushels of grain per annum.

THE FOLLOWING LETTER, addressed to the "Peterborough Examiner," gives the reason why.

"We notice in your issue of Saturday, September 27th, 1902, a "statement by Mr. ——— at the meeting of the Peterborough Board "of Trade, that we were induced to locate here through the influence "of one man.

"Please permit us to state that Mr. ——— is incorrect in making "a statement of this kind, privately or publicly, and evidently speaks "without full knowledge, or, in fact, without any knowledge whatever "on the matter, and in correcting this mis-statement permit us to "assure you and the public that our Company came here **on account of the natural advantages of Peterborough,** which are the **geographical location, railways,** the **water power,** and **the Trent Canal,** which, "we were assured would be shortly completed, and which, when "finished and in operation, will in our opinion secure to Peterborough "all the industries that your city can comfortably take care of."

Peterborough now offers in addition FREE FACTORY SITES AND LOW TAXATION.

Electric Power—Lowest Rentals.

Is located on main line of Can. Pac. Ry., G. T. Ry. and the Trent Valley Canal. Has a population of 15,000.

APPLY TO—

The CENTRAL ONTARIO POWER CO., Limited

J. ALEXR. CULVERWELL, Man. Director.

Address Branch Office, 9 Toronto St., Toronto.

The Enormous sale of

OLD CHUM

Cut Plug

Smoking Tobacco

Proves its Superior Quality.

Sold by all leading wholesale houses.

FINANCIAL CONDITIONS.

Aemilius Jarvis & Co., Toronto, in their weekly letter, dated November 6th, said:

Some improvement has taken place in prices during the past week, although this is more marked on our own exchange than in New York. This is not unreasonable, as there is amongst financial men a feeling that, although we undoubtedly have troubles of our own here, we are in a more favorable position financially and commercially than our neighbors to the south. The large increase in the population of the Canadian North-West, and the extension of railways all over Canada, together with the good yield of crops harvested for the past three years, have necessitated a very great increase in the producing power of all commercial enterprises. In the States supply has to a certain extent eclipsed demand, and in several lines manufacturers are now drawing in their horns. We do not think the signs are evident here that such a course is necessary, and we trust that such will not be the case for a long period. It is not unreasonable, therefore, that the prices on our exchange should, in the case of stocks not listed internationally, break away to a certain extent from the control of Wall Street. It is unfortunate that our market should be so completely controlled by sentiment in New York. The best sign of the week's dealings seems to us to be the cessation of liquidation. The market has not regained confidence to any great extent, certainly not sufficiently to disregard unimportant adverse news. Such news, however, two weeks ago would have caused a break, where to-day the market merely becomes dull, with perhaps a reasonable reaction. The United States Steel securities look as though they were being left to take care of themselves, and have made new low levels.

THE Consumers' Gas Company's coal and coke house in Toronto was on the 10th inst. badly damaged by fire. There were 8,000 tons of coal in the building, but this for the most part escaped serious damage. The loss is estimated at something over $30,000, covered by insurance.

As an evidence that Canadian products are attracting attention in Continental Europe, a letter received by Secretary Morley, of the Toronto Board of Trade, is of interest. The epistle is from Dott. Frederico Malvano, Turin, Italy, and the writer's aim is to establish connection with Canadian firms who are exporters of sulphate of copper, and who "are not included in the American trust." He states that he is prepared to receive large quantities. He adds that he can also "attend to other Dominion articles."

AMERICANS in London are always struck with the queer phrases used in the advertisements in the newspapers. For example, instead of "For Sale," they use the more dignified term, "Articles for Disposal." Instead of damages they speak of "decays and dilapidations" in rented houses. Houses that are fully furnished are "self-contained," a liveryman is a "job master," the office of an express company is a "baggage and goods removals office," and down on Finsbury street I saw the extraordinary sign painted on a window: "The Royal Liver Friendly Society."

THE CANADIAN CASUALTY AND BOILER INSURANCE COMPANY

Full Government Deposit Paid.

President.
ALEXANDER SUTHERLAND, D.D., Toronto.
Vice-Presidents.
H. N. BATE, Ottawa, Director Bank of Ottawa.
W. S. DINNICK, Toronto, Vice-Pres. and Mng.-Dir. Standard Loan Co.
A. G. C. DINNICK, - Managing Director.

This Company having deposited $30,000 with the Treasury of the Ontario Government, has been duly licensed to transact the following classes of Insurance

Boiler Inspection
Boiler Insurance
Consulting Engineers
Personal Accident Insurance
Sprinkler Insurance
Elevator Insurance

The patronage of the public is respectfully requested. Correspondence with Insurance Agents and those wishing to engage in the business is invited, and will receive prompt and courteous consideration.

Chief Engineer, - - - A. M. WICKENS.
Superintendent of Agencies, - J. G. BEAM.

HEAD OFFICES:
N. E. Cor. Adelaide and Victoria Sts., TORONTO, - Ont.
BRANCH OFFICES:
Temple Building, - - MONTREAL, Que.
43½ King Street W., - - HAMILTON, Ont.

—The lake marine insurance companies are up to the last five weeks of the season in which the question of the profit for the year will be decided. So far the season has been a profitable one, says the New York Journal of Commerce, although there have been a number of heavy losses in the closing days of October. The Gilchrist fleet has suffered specially, having lost seven of its seventy-five steamers during the season, with a valuation of $200,000 on hulls alone. Heretofore the fleet had carried its own insurance, but this year it has been placed in the stock companies just in time to involve them in heavy losses. The losses on wooden hulls alone so far this season have been over $600,000, and on their cargoes $250,000. These would have been greater had not so large a proportion of the vessels been insured. The United States Steel Corporation fleet, for instance, with 128 vessels, carries its own insurance.

ARE YOU PUZZLED

about the most satisfactory Gas and Electric Lighting Fixtures? If so, let us help you out by submitting our line to your attention. — It contains the most beautiful, artistic and perfect designs of any line ever sold in Canada. Besides that our facilities give us special advantages for executing any special designs from specifications.

MONTREAL MARKETS.

Montreal, Nov. 11, 1903.

Ashes.—Business continues of a limited character. Some few small lots of pots have come to hand of late, and as the likelihood of any active British enquiry is now rather remote, owing to the advanced season, quotations are a little easier at $5.85 to $5.90 for first quality of pots. In pearls there has been no recent business, and a quotation of $6 to $6.25 is entirely normal.

Cements and Firebricks.—Receipts for week ending to-day are 3,050 bbls. of Belgian cement and 191,000 firebricks. We quote: Belgian cement, $1.70 to $1.95; English, $2.05 to $2.15; German, $2.05 to $2.25. Firebricks, $16 to $22.

Dairy Products.—Cheese exports last week were figured at 65,778 boxes, as against 106,372 boxes for the same week in 1902, but the total aggregate for the season to date is still much ahead of last year's figures, being as 2,240,612 is to 1,951,932. Butter shipments are just moderate, last week's figures being 13,412 packages, as compared with 20,814 packages for the corresponding week of last year. The cheese market has shown decline since last writing, and the prices of to-day show a difference of nearly 2c. a lb. from the quotations of several weeks ago. English buyers now seem more disposed to trade, and quotations are fairly steady at 10½ to 10¾c. for finest Westerns; Townships, 10¼ to 10⅜c., and Quebecs at 10 to 10¼c. Butter is slightly firmer under lesser receipts and fair demand. We quote fine Townships creameries at 21½ to 21¾c., and good dairy at about 16½c.

Dry Goods.—Full returns with regard to 4th November payments proved of generally gratifying character, one local house which does a business of three to four millions a year reporting that 90 per cent. of its customers' paper was provided for. Despite the remarkably fine open weather, city retailers report a good trade. With country dealers business is not so active. Travellers are now carrying pretty full lines of spring samples, and are doing well with the same. No changes in values have developed since last writing.

Fish.—There is a fair demand for pickled fish, for which quotations are as follows: New salt herrings, in barrels, $5.50, half-barrels, $3; No. 1 salt mackerel, in kits, $2; No. 1 green cod, $6; No. 2 ditto, $5; new B.C. salmon, $13.50; halves, $7; dry cod, $4.75 per cwt; boneless fish in 25-lb. boxes, 4c. per lb.; boneless cod in bricks, 6c. per lb; haddies, smoked, 7½c. per lb.; bloaters, $1.25 to $1.50 a box.

Groceries.—The trade report lots of goods as moving out, particularly heavy goods, by boat, and collections are satisfactory on the whole. The demand for sugars at the refineries is a very fair one, and prices remain steady at $4.10 for standard granulated in bbls., with yellows ranging from $3.40 upwards; bags, 5c. less. There is not the usual seasonable demand for molasses, but the goods are not here, and this article is being displaced to some extent by corn syrups at 2¾c. per lb. by the bbl. Tea values are firm, and London advices report an advance in Ceylon blacks of a halfpenny, and of from a halfpenny to three farthings in Ceylon greens. With the arrival of the second direct fruit boat stocks in all lines are full. Prices of Valencias, Sultanas and currants are steady at former quotations. Of Malaga fruit importations are comparatively light; London layers are quoted at $2; connoisseur clusters, $2.25 to $2.50, with finer grades ranging up to $4. Coffees are firmer. New evaporated apples are quoted at 6 to 6¼c.; gallon apples at $1.90.

7 and 9 ADELAIDE STREET EAST, TORONTO.

J. J. W. Deuchar, F.F.A., F.I.A., General Manager and Actuary of the Norwich Union Life Assurance Company, speaking of investments says:

"It may serve to indicate the great importance of obtaining a good return on the investments, if it is realized that one per cent. of increased interest on the funds of a company will, on the average, have as great an effect as a saving in expenditure equal to 10 per cent. on the premium income, while, if an office could count on realizing 5 per cent. interest in place of 3, it might reduce its premiums some 30 per cent., or double its bonuses."

Mr. Deuchar does not name THE GREAT-WEST LIFE; but the above statement exactly describes the happy position of its policy-holders.

SCOTT & WALMSLEY,

ESTABLISHED 1858

Managers and Underwriters

Metals and Hardware.—The movement in these lines continues of an active character, and no important changes are noted. Pig iron quotations are somewhat easier, No. 1 Summerlee being now quoted at $20, and No. 2 at $19.50; these are net prices ex wharf. Carnbroe is quoted at $18.75, though a 100-ton lot was sold a few days ago at something lower. English iron is quoted at $17 to $17.50. Domestic brands are not being offered in this market. Bars incline to easiness, and $1.90 appears to be now the general price, though some still ask $1.95. Prices of plates, sheets, etc., are without change. Ingot tin is a little firmer if anything, but 30½c. is still the quotation for Straits in ordinary jobbing lots; copper easier at 14 to 14¼c.; lead steady at $3.20, and spelter firm at late quotations: Antimony easy at 7c.

Oils, Paints and Glass.—Orders keep coming in well, and there is considerable activity in getting shipments to river

It Leads Them All.

As applied to the gain in net amount of life insurance in force in Canada for the FIVE YEARS ending December 31st, 1902.

Head Office—Waterloo, Ont.

The Mutual Life OF CANADA

has once more established its right to the above claim. It stands to-day

At the Head Of All

life companies doing business in Canada in the NET AMOUNT IN FORCE GAINED OVER all its competitors during the past five years, as shown by the Government Reports.

points off before close of navigation. Linseed oil shows no signs of stiffening, and fish oils remain very dull. Turpentine rules steady to firm. Leads continue to be sold at close prices. Single barrels, raw linseed oil, 47 to 48c.; boiled, 50 to 51c., net 30 days, or 3 per cent. for 4 months' terms. Turpentine, 84 to 85c.; single barrels. Olive oil, machinery, 90c. to $1; cod oil, 35 to 37½c. tine, 85c.; single barrels. Olive oil, machinery, 90c. to $1; cod oil, 35 to 37½c. per gal.; steam refined seal, 50 to 55c. per gal.; straw ditto., 45 to 47c.; castor oil, 7½ to 8c., for machinery; pharmaceutical ditto, 8½ to 9c.; lead (chemically pure and first-class brands), $4.75; No. 1, $4.50; No. 2, $4.25; No. 3, $4; No. 4, $3.75; dry white lead, 4¼ to 4½c. for pure; No. 1 ditto, 4 to 4¼c.; genuine red ditto, 4 to 4¼c.; No. 1 red lead, 4c.; putty in bulk, bbls., $1.80; bladder putty in barrels, $1.90; ditto, in kegs or tins, $2.65; London washed whiting, 45c.; Paris white, 75 cents; Venetian boxes, $2.40; 23-lb. tins, $2.55; 12½-lb. red, $1.50 to $1.75; yellow ochre, $1.25 to $1.50; spruce ochre, $1.75 to $2; Paris green, 14c. in bulk, and 15c. in 1-lb. packages; window glass, per 100 ft., $3.25 for first break; $3.45 for second break, and $4.20 for third break; per 50 feet, $1.70 for first break, and $1.80 for second break.

TORONTO MARKETS.

Toronto, Nov. 12, 1903.

Chemicals and Drugs.—Except for quinine, which is experiencing an upward movement owing to speculation in primary market, there is no special feature worthy of notice. Opium is quiet. A normal business is going on in general drugs.

Dry Goods.—The only section of the dry goods trade which has benefited by the long continuance of summer weather conditions has probably been millinery, and this has been quite active. Other lines, especially where heavy woolens are involved, have dragged considerably. Two or three really cold days, however, would serve to reverse this state of things in short order, so wholesalers are not having much complaint. Travellers are now taking orders for spring goods, and are meeting with good success, several fair-sized orders having already come to hand. Prints and ginghams seem to be in particularly good demand. There seems to be a prevalent belief that many lines of staple cotton goods will be higher in the spring, and retailers are acting accordingly. Considerable interest is being manifested in the reported negotiations for the amalgamation of cotton manufacturing companies in Montreal. More advances are reported in the raw cotton market owing to recent revised estimates of the southern crop, which place it at about 10,500,000 bales, or slightly over. Wholesalers report good payments.

Flour and Grain.—A somewhat easier market prevails for flour, and ninety per cent. patents are quoted now at $3.07½ in buyers' bags, east or middle freights. Oatmeal is steady, while millfeed is firm. Wheat keeps steady at unchanged prices from those quoted last week. Barley is from 1 to 2c. lower, and is dull at the decline. Rye, oats and buckwheat are nominal. Little business in grain is being done, and receipts are light, farmers being engaged, no doubt, on their fall work.

Fruits and Vegetables.— Not much business is being done for the moment in fruit circles and no great briskness can be expected until the opening of the Christmas season. One feature is the scarcity of lemons, prices for which are advancing. With the exception of pears and apples but little domestic fruit is coming forward now. A few grapes and tomatoes are still making their appearance, however. Apples sell at $1.50 to $2.50 for good stock.

Groceries.—Sugars remain at quotations printed last week, and there is little or no change in the situation. Dried fruits are now established on the market, but business in them has scarcely started. In most lines of groceries a fair business is being done, but new features are scarce. Canned vegetables are beginning to move more freely.

Workman's Rights

In Canada a workman may proceed against his employer under the Workman's Compensation for Injuries Act, and at common law. That means untold annoyance and inconvenience to an employer An employer is even liable for damages to an employee for injury resulting from the negligence of a fellow employee. Oft-times a workman will get back at an employer in this way. The employee may or may not win. Whether he does or not it means a great deal of anxiety to you as an employer. Let us relieve you of all this. Our liability policies are designed to do this very thing.

Will be glad to explain our plan.

EMPLOYERS' LIABILITY ASSURANCE CORPORATION
MONTREAL —— TORONTO
GRIFFIN & WOODLAND, MANAGERS.

Hides and Skins.—The hide market continues weak, with little business passing. The same may be said of Chicago. For sheepskins the demand is fairly good at 70c. Calfskins have experienced no change. Tallow is quiet and unchanged. Leather is quiet, but a change to colder weather is expected to stimulate the demand.

Live Stock.—Few export cattle were offered at the cattle market this week, at any rate any of good quality, and the demand was very draggy. Butchers' animals sold more readily. Good grades of stockers and feeders sold readily at prices which had a firmer tendency. Calves were dull. Milch cows of good grades sold well. Trade in sheep was not up to the mark, but lambs were in pretty good request.

Provisions.—Really good dairy rolls find no difficulty in selling, but many of the offerings are off flavor. For cheese a fair demand exists, though it is perceptibly easing off. Eggs continue to be maintained at somewhat high prices, but the demand for anything but the choicest is affected by the warm weather. Of poultry the same may be said, but it is in light supply. The hog product trade is in a healthy condition, and sales are brisk. Dressed hogs fetch $6 75.

Wool.—Practically no export demand can be said to exist for fleece, and country holders ask higher prices than dealers feel it safe to pay. Pulled wools are asked for with some degree of freedom.

TORONTO ENGRAVING CO.,

92-94 Bay Street,

'Phone Main 2893. TORONTO

A laundryman in Montreal named Omer Lafortune, under the style of the Imperial Steam Laundry, has made an offer to his creditors of twenty-five cents on the dollar of their claims, which has not been favorably entertained, and a sale of his assets is advertised.

Mercantile Summary.

The failure is reported of Charles Mead, restaurant keeper, in Ottawa. The liabilities are small.

Joseph Pigeon, general merchant, Beloeil, Que., recently reported as insolvent, makes a compromise offer of sixty-five cents on the dollar.—C. W. Ross, a contractor for electrical work in a small way at Quebec, has assigned voluntarily, and shows an indebtedness of about $1,200.

The Peoples Building and Loan Association,

LONDON, Ont.

PORT ARTHUR & FORT WILLIAM.
Post Office Address—PORT ARTHUR, ONT.

ARTHUR FOSTER, of St. John, N.B., has carried on a grocery business in a limited way for the past quarter of a century. He has now assigned, owing about $1,100 to local dealers.

O. BLANCHARD, of Granby, Que., has assigned. He was formerly clerking in Worcester, Mass., and started business as a grocer about three years ago.—A demand of assignment has been made upon L. A. Leveque & Co., dealing in hardware, at Ville Marie, Que., on Lake Temiscamingue. He has been operating in his present line under cover of his wife's name since the spring of last year.

THE Lancaster Company's boot and shoe factory at Maisonneuve, near Montreal, was on the 15th inst. completely destroyed by fire, by which disaster about a hundred employees are thrown out of employment. Loss estimated at $60,000, upon which the insurance is $22,000. About the same time a storehouse of the Montreal Woolen Mills was gutted at a loss of $10,000; fully insured.

Mercantile Summary

THE Bell Telephone Company, owing to the rapid expansion in its business in Winnipeg during the last year or two, will build a large new exchange building there.

THE Orpheum building in Dawson City, Y.T., occupied by several more or less important business firms, has been destroyed by fire, caused by a defective flue. Loss, $15,000.

A COMPANY with a capital of $40,000 has been formed in Winnipeg to take over the laundry business of M. E. Davis and develop it Messrs. H. Pollard and A. Merrill are among the provisional directors.

THE Great Northern Mining Company is putting in a stamp mill and power plant at Poplar Creek, B.C., at a cost of $15,000. They will also construct a short tramway for conveying ore at a cost of $11,000.

THE Ontario Portland Cement Company at Blue Lake, according to a telegram from Paris, Ont., has about completed its factory and equipment. Some parts of the machinery have already been started and tested.

AN Ontario charter has been granted to the Stark, T. L., & P. Lystern, Limited, whose object will be to generate and supply electricity on the patents held by Alex. McM. Stark, of Toronto. The capital authorized is $1,000,000.

THE price of lighting gas in Winnipeg has been reduced to $1.70 per thousand feet. For fuel gas the price up to 2,000 feet per month will be $1.60 per thousand; from 2,000 to 4,000 feet, $1.50 per thousand, and for over 4,000 feet, $1.40 per thousand.

A COMPANY is being organized under the name of the Western Machinery and Iron Company, Limited, for the purpose of carrying on in Winnipeg a general blacksmiths' and machinists' supply business, and are building a factory with that aim. Messrs. Merrill & Vermilyea Bros. are the promoters, and Hon. R. P. Roblin will be president.

THE Brandon, Man., Binder Twine Company held a shareholders' meeting last week and decided to change the name of the concern to the Consumers' Co-operative Co., Limited, to authorize the management to buy and sell all farmers' needs, except dry goods and drugs, and to extend the co-operative principle by paying at the end of each year the balance of the profits to the company's customers in proportion to their purchases and other means.

MONTREAL Street Railway Company applied to the city council for an extension of its franchise for thirty years, and in return offered to water and sweep the streets and to remove the snow, and also to grant ten tickets instead of eight during working hours for a quarter. The majority of the members of the council, however, wanted the company to give ten tickets for a quarter during working hours and eight tickets for a quarter the remainder of the day, and finally the application was rejected.

In a fire at Rossland, B.C., on the 14th, some $19,000 worth of damage was done by a fire which damaged Empty Bros.' clothing stock, Thos. Ebleton's grocery and other stores.

On Wednesday in New York a meeting was held of the principal manufacturers of structural material and steel plates in the United States, and it was decided, so it is said, not to make any reduction in the price of either class of production. It is also understood that no further reduction in any of the principal steel products is contemplated at this time by the United States Steel Corporation, and also that the output of wire products by the American Steel and Wire Company during October was 115,000 tons, the high record for a single month in the history of the business.

Mercantile Summary.

William Jessop & Sons, steel manufacturers, of Sheffield, Eng., are asking what inducements Toronto would offer them to locate here a plant employing 2,000 hands.

A writer in the New York Sun, on apparently good authority, expresses his confidence that within a very short time, perhaps in three months, there will be direct telegraphic communication without intermediate speaking stations between New York and London, and that telegrams will be exchanged at a speed of more than four times the previous capacity of any cable.

The Dominion Dump Car Company, Limited, Ottawa, has received from Ottawa a charter authorizing them, with a capital stock of $2,500,000, to purchase from H. S. Hart and S. Otis, of Chicago, the patents held by them for certain kinds of railroad and tramway cars, as well as all kinds of supplies for use in connection with railways, tramways and shipping. Mr. J. F. Smillie, of Ottawa, is acting in the company's interests.

An assignment has been made to the court by Filteau freres, of Fecteau's Mills, Que., saw and grist millers. They succeeded to the business of their late father about January, 1900. He was considered to have left quite a fair estate, though largely tied up in mill property, timber lands and village lots. In 1902 the brothers claimed a surplus of some $23,000, but they have shown distress in financial matters during the past twelve months, frequent suits having appeared against them.

The following is a record of the patents recently granted to Canadian inventors in Canada and the United States: Canadian—R. H. Guthrie, anchors for fences; W. A. Grant, acetylene gas generator; D. J. Thorne, nut locks; J. H. Blaney, straining attachments for milk cans; J. F. Bouchard, heater or cooler for liquids; P. Mallwood, steam boilers; L. Lacaille, locks; H. R. Mellicke, snap hooks; J. B. McLaughlin, grain doors for box cars; E. Labelle, des perfectionnement nouveaux et utiles as fer a cheval; S. Strout, machines for washing shelled green peas; D. McLean, locomotive feed water heaters and purifiers; W. Gilmour and A. Lindon, process of hardening and tempering cast iron; A. E. Wilson, freezing boxes; W. R. Bell, grain elevators; H. H. Mercantile Summary.

THE Ledoux Carriage Company, Ltd., has been organized under a Dominion charter to take over the business of manufacturers of carriages, waggons, automobiles, etc., so long carried on by B. Ledoux & Co., in Montreal.

LA FONDERIE DE THETFORD, capital $30,000, will establish a foundry, machinery and engineering business in Kingsville, Que. The promoters are J. Lemieux and others of that village, which lies due south from Quebec.

THE Shevlin-Carpenter Company, of Minneapolis, has bought a large tract of timber land on Vancouver Island, and will erect a sawmill. Mr. W. S. Durnnell, of the same city, is reported to have arranged with the Dominion Government for the purchase of some hundreds of thousands of acres of timber land in the Saskatchewan valley, and will erect a mill in the vicinity of Edmonton.

AMONG the Ontario concerns which are sharing in the industrial activity of to-day may be mentioned the woodworking machinery firm of Clark & Demill, of Galt. An addition, sixty by eighty feet in extent, is being made to their factory. Mr. Demill tells us that the present is the fourth time since commencing business, in 1901, that they have been compelled to make addition to shops in order to keep pace with the demand for their goods.

THE St. John Street Railway Company are increasing their power and lighting plant very considerably. Two of the new engines are of the Robb-Armstrong type, one being 500 h.p. and the other 450 h.p. They will be used for lighting purposes. Then there is a big Laurie engine, horizontal cross-compound, of 900 h.p., having cylinders 23 and 44 inches respectively. It will be directly connected with a 650 K.W. generator for street railway purposes.

BRITISH supplies of graphite threaten exhaustion, and the attention of British manufacturers is being drawn to the Canadian deposits, which, so far as discovered at present, are practically all in Ontario. It is believed possible that, though the article which so far has been produced in Canada, is of a somewhat inferior quality, this has been due to the fact that it has come largely from surface samples. It is used mostly for paints, crucibles and lubricants.

SCARCITY of the delicious little oysters of Prince Edward Island is reported this year, and it is suggested that the oyster beds of Richmond Bay, in that province, ought to have a rest. Says the Summerside Pioneer: "A new chapter has been opened in the oyster business of Summerside by the importation last week of oysters from New Brunswick. While the imported article is inferior to the Richmond Bay and Bedeque oyster, it still counts, as the demand must be filled somehow. So far, only a few barrels have been brought over, but if the scarcity experienced here continues it is probable that more will follow.

A MARITIME Province journal says that the Midland Railway of New Brunswick, running sixty miles, from Windsor to Truro, is to be extended thirty miles from Truro to Brule, on the Strait of Northumberland.

THE New Brunswick Department of Agriculture is preparing to operate a number of orchards or direct the operators, with the object of encouraging and bettering the fruit industry in the province. Arrangements have been made with the owners of several farms, and the idea is ultimately to have one in every county. For the first year, however, but four or five will be conducted. One will be at Buctouche, Kent County; another, Florenceville, Carleton County; another, St. John; and probably a fourth will be near Sussex.

Mercantile Summary.

A PROPOSITION is on foot in Portage la Prairie, Man., to install a waterworks system under the municipal ownership plan.

AT the municipal elections in January next a by-law will be submitted to the ratepayers to raise $50,000 for the purchase of the gas works by the city.

LAST February J. H. Shields succeeded to the grocery business of his father at Palmerston. The last report is to the effect that the sheriff is now in possession.

PRIOR to opening a grocery store at Norwich, William Gould conducted a hotel at Cataract. In 1900 he removed to Simcoe, and thence last January to Norwich. Being unable to make a success of storekeeping, he disposed of the stock, receiving $300 cash for it, and is now offering to compromise with his creditors.

THE Dominion Commercial Travellers' Association held a meeting in Montreal on Saturday evening last, and nominated several gentlemen for officers, the election for whom will be held on the 12th prox., when the annual banquet will also be held. Mr. D. M. Lefebvre was elected (by acclamation) vice-president, and Mr. F. L. Cains, treasurer.

PREVIOUS to commencing in the general store business at Milverton, H. Dierlamm was a German clergyman at Port Elgin. He made some money, and opened shop at Milverton in October, 1889. A statement made in January, 1901, shows a surplus of $4,850 over liabilities of $5,400. A later and recent statement shows liabilities of $9,000, and he is offering to compromise at 65 cents on the dollar. Preaching may possibly be more in his line than selling goods.

THE Chapman Double Ball Bearing Co., of Toronto, which made a very creditable showing at the recent Toronto exhibition, is getting ready to manufacture, and to this end is fitting up a machine shop at 39 Pearl Street. This location is well adapted to their needs; the shop is roomy, light and cheerful. It is the intention to make a specialty of line shafting bearings for the present. A number of the most improved machine tools have been installed, and ere long the place will be in full working order.

THE LABOR PARLIAMENT.

At Boston last week there assembled the twenty-third annual convention of the American Federation of Labor representing practically every industry on the continent. In the course of his address President Gompers stated that never in the history of the labor movement, or, for that matter, never in the history of any movement for the uplifting of the toiling masses, had there been such a uniform growth in the number of unions formed, or in the number of wage-workers becoming members of existing unions, as had been the case within

Alberta, N.W.T., Canada.

the past year. Referring to the evident signs of coming depression, though he did not think it would equal previous similar reactions in intensity, the president stated his opinion that no industry or country had ever become great founded upon the poverty of its workers, and advised working people to resist any attempt to reduce their wages or increase their hours of labor. They were better organized, he said, and better prepared to resist encroachments than ever before, and even if some of their efforts might be lost, it was better to resist and lose than not to resist at all. Mr. Gompers spoke very encouragingly of the progress made by trades unionism in Canada. Mr. John Mitchell of coal strike fame, kept to a line of argument more likely to result in good. He expressed the belief that the conflict between labor and capital is not irreconcilable. He had no panacea, but he believed that if men and employers would apply the same common-sense in considering the relations between capital and labor as in the other avenues of human relations the strife of lockouts, boycotts, etc., would largely pass away.

TRADE IN GERMANY.

In a report just published on the condition of German trade during the first half of the present year the British Consul-General remarks upon a notable improvement in several of its branches in continuation of that which started over a year ago. The dearth of employment is much less, and a number of industries, more especially the textile, the building,

TENDERS FOR SUPPLIES, 1904.

The undersigned will receive tenders up to noon on MONDAY, 23rd instant, for supplies of butchers' meat, creamery butter, flour, oatmeal, potatoes, cordwood, etc., etc., for the following institutions during the year 1904, viz.:—

At the Asylums for the Insane in Toronto, London, Kingston, Hamilton, Mimico, Brockville, Cobourg and Orillia; the Central Prison and Mercer Reformatory, Toronto; the Reformatory for Boys, Penetanguishene; the Institution for Deaf and Dumb, Belleville, and the Blind, at Brantford.

Exception—Tenders are not required for the supply of meat to the Asylums in Toronto, London, Kingston, Hamilton and Brockville, nor for the Central Prison and Mercer Reformatory, Toronto.

A marked cheque for five per cent. of the estimated amount of the contract, payable to the order of the Honorable the Provincial Secretary, must be furnished by each tenderer as a guarantee of his bona fides. Two sufficient sureties will be required for the due fulfillment of each contract, and should any tender be withdrawn before the contract is awarded, or should the tenderer fail to furnish such security, the amount of the deposit will be forfeited.

Specifications and forms of tender may be had on application to the Department of the Provincial Secretary, Toronto, or to the Bursars of the respective Institutions.

The lowest or any tender not necessarily accepted.

Newspapers inserting this advertisement without authority from the Department will not be paid for it.

J. R. STRATTON,
Provincial Secretary.

Parliament Buildings, Toronto,
November 9th, 1903.

and several branches of the iron and steel industries, have given more employment. Prices have, however, only improved slightly. Conspicuous among those industries which suffer from low prices are the electrical, the Portland cement, and several branches of the iron and steel trades, notably the machine, building and the mechanical tool industries. Harvest prospects being favorable over the greater part of the German Empire, the consuming power of the agricultural population may be expected to improve still further. Foreign trade was much larger than last year, for both imports and exports. Engine builders and manufacturers of mechanical tools complain of bad trade. The export trade is severely affected by the industrial crisis in Russia and high duties in Austria-Hungary. American competition made itself felt in a lesser degree, American works being fully occupied with home orders. The figures of the German foreign trade in iron and ironware show a decline in imports and an enormous increase in exports. The electrical industry has been severely affected by the depression. No other industry expanded so much in the years of commercial prosperity until 1900, and ever since the tide turned and the demand shrunk it has been often impossible to keep the large new plant employed, and the cutting of prices has not ceased yet. Since 1899 profits in the textile industry have diminished considerably. In the first half of 1903, however, business has, on the whole, been satisfactory, and at the end of June continued so active in most districts that the customary dead season was hardly perceptible.

GRATEFUL DELEGATES.

We observe that within the last few days resolutions of thanks have been sent out by the Canadian Committee of Arrangements in connection with the fifth Congress of Chambers of Commerce of the Empire. The recipients of them have been the Canadian Pacific, the Grand Trunk, and the Intercolonial Railway Companies, the Richelieu & Ontario and the Ottawa River Navigation Companies, all of whom are warmly thanked for the hospitality they showed the delegates during their tour through Canada.

Both the resolutions to the C.P.R. and G.T.R. closed with a strong expression of opinion as to the value of the trip to the Dominion. We append one or two extracts from different resolutions. That to the C.P.R. said:

"That the trip through the grand scenery of the north shore of Lake Superior, across the immense wheat plains of Manitoba and the Northwest Territories, and through the beautiful and extensive ranching country, was keenly enjoyed by the delegates, who were greatly impressed with the vast resources of Western Canada, while the magnificent scenery of the Rockies, the Selkirks and the Fraser Canyon, together with the beauties of the Pacific coast cities and their surroundings, were declared by the visitors to be a glorious climax to their long yet thoroughly enjoyable journey."

In a sort of general statement the committee say: "The committee has been gratified to learn that the knowledge of the resources and beauties of

our country thus obtained by the delegates will be widely disseminated by them through the various parts of the Empire, from which they came, for it is the intention of many of the delegates to communicate to the members of their respective chambers, and to other audiences by illustrated lectures and other means the information they have gathered during their visit to Canada."

And the resolution to the Grand Trunk says:

"That the size and sumptuous appointment of the special train provided by the Grand Trunk Railway Company for the conveyance of the party of 225 delegates was a revelation to them, and that the comfort and convenience of travelling thereon and the high speed maintained were greatly appreciated."

STATISTICS FROM THE NEW BRITISH BLUE BOOK.

Though it is true that the United Kingdom's exports of manufactures to the principal protected countries and colonies were only £87,062,000 in 1902, as compared with £94,504,000 in 1900, £101,696,000 in 1890, and £93,349,000 in 1880, it is also a fact that its exports to all other countries and colonies were £140,538,000 in 1902, against £130,696,000 in 1900, £127,104,000 in 1890, and £104,851,000 in 1880. If any conclusion at all can be drawn from these Blue Book figures, it is that natural causes are deflecting Great Britain's exports of manufactures in some measure from old customers to new. The figures relating to tin plate are worth a moment's notice. The average annual export of tin plate to the United States in 1887-90 (the four years preceding the McKinley law) were £4,278,667, from which amount they diminished to £887,432 in 1902. But the exports to other markets rose in the same period from £1,403,974 to £3,445,734, showing how far gains in one quarter may be relied upon to counteract losses in another.

The astonishing thing is not that British trade with the principal protected nations should have decreased so much, but that the shrinkage should have been no larger. In view of the textile development of Germany and the United States in recent years, it is really surprising to find the United Kingdom actually increasing its exports of cotton manufactures to both between 1890 and 1902—in the case of Germany from about £2,800,000 to £3,800,000, and in that of our own country from £2,800,000 to £3,600,000. And in this connection it is worth noting that the Kingdom's consumption of raw cotton increased from 6,900,000 cwts. in 1854 to 15,700,000 cwts. in 1899 (the maximum figure). The consumption of raw wool was at its maximum in 1898. The production of pig iron was at its height in 1899, and the consumption of this commodity was at its greatest in the same year. In the face of such facts it is absurd to talk about Great Britain's declining industry. —N.Y. Evening Post.

RECIPROCITY WITH THE UNITED STATES.

A correspondent on the United States frontier, opposite Detroit, whose letter appears elsewhere, expresses some surprise that the Monetary Times has not dealt recently with the subject of reciprocal trade between Canada and the United States, and asks: "Don't you think it worth advocating?" He closes with a reference to the importance of reciprocity, and the stir that is being made about it in the States; and declares it is a matter of interest to the people who live along the Detroit frontier.

No doubt, the subject is one of considerable moment, as is shown by the efforts long ago made by Canadians to secure a reciprocity treaty with the Government at Washington. We were, and still are, well enough aware that there is a great business to be done with Uncle Sam in addition to the two hundred and odd millions a year we already do with that usually shrewd personage. We might sell much more to him, and would possibly buy much more from him if he chose to reciprocate in certain directions. But if he expects us to bother ourselves more upon the matter he is quite mistaken as to the temper and self-respect of the Canadian people. We made every reasonable overture to the United States Government, for years in succession, by means of duly accredited commissioners, to bring about a reciprocity treaty between the two countries. And it is only fair to say that our efforts were seconded by many boards of trade and representative bodies as well as the press in the States along the St. Lawrence and the Lakes, who perceived that much benefit would accrue to their country as well as ours by such an arrangement.

But our advances were coldly received. The United States authorities gave us no encouragement towards fair play: they wanted "the long end of the stick." Nay, their commissioners (with one exception), showed so petty and huckstering a spirit, and seemed so incapable of breadth of view, or else so contemptuous of the claims and resources of this country, and mistaken as to its spirit, that it only remained for us to withdraw from the negotiations. And it is doubtless the feeling of an overwhelming mass of Canadians that we do not care to renew them. We know when we are snubbed; and any emissaries from the United States Government appealing to us for reciprocity, at this late day, and under our altered circumstances, will be extremely likely to receive the sort of bitter answer that Lord Chesterfield's proffers of patronage received from sturdy old Sam Johnson. Canada is in no hurry for another meeting of the High Commission—if it ever does meet again.

OUR MARITIME PROVINCE PORTS.

It has already been noted in these columns that altered traffic conditions on the Intercolonial Railway and other circumstances have combined to make it likely that Halifax may become an active grain-shipping port. The city authorities have not been idle in view of such a possibility, but have had conferences with the powers that be in Ottawa. For some days, last week and this, Hon. W. S. Fielding, Minister of Finance, and Acting Minister of Railways, was in Halifax, and in company with Intercolonial Railway officials and the members of the Board of Trade, spent a good deal of time inspecting the harbor and terminals, with a view to extensive improvements such as have been urged for some time by the business interests of the city. Tenders have been called, we are told, for dredging at deep water, but further than this nothing seems to have been definitely determined upon.

The new immigrant schedule made by the Canadian Pacific Railway, which appears likely to favor the port of St. John, has given offense to Halifax, which sees in the move, according to our correspondence from that city, discrimination against Halifax. It is worth while to read the letters from both cities, for both deal with the matter, but differently. Saint John says, for example, that "the new C.P.R. rate of $12 instead of $10 on immigrants going from St. John to Winnipeg, will mean a large growth in immigrant business at this port, * * * and will help to divert passenger traffic from Europe

from the Hamburg-American line to the C.P.R. London and Antwerp steamers." And the St. John attitude seems to suggest the question: Why should Halifax have a discriminating rate in its favor? There appears a discrepancy in the statement of the case made by letters from the two cities. But it is worth while to observe that the Halifax argument is that "it is more convenient to land immigrants here," which is a mere matter of opinion, and depends on various circumstances. Unquestionably, however, our correspondent is right in saying that passenger traffic landed at Halifax for mere transfer to a train "is of little material benefit to a port." It is the freight transfer which pays.

It may help to explain the action of the Canadian Pacific Railway if it be borne in mind that out of the $12 per head it received for immigrants landed at Halifax, bound for Winnipeg, the C.P.R. had to pay the ocean steamship company ten per cent., which is $1.20; and the Intercolonial $2 to bring them over to St. John; which left $8.80 to pay for carrying the immigrant to Winnipeg, some eighteen hundred miles. This, in the view of the C.P.R., is an inadequate rate. Besides, it is out of all proportion to that obtained by the Intercolonial, which receives $2 for carrying an immigrant from Halifax to St. John, two hundred and seventy miles. However, if the C.P.R. can divert some of the Hamburg-American line immigrant traffic to our shores, Canadians will not enquire too closely at what Dominion port they are landed.

OVERBEARING UNIONISM IN QUEBEC.

Another blow to the industrial interests of the city of Quebec has fallen, and it menaces the principal manufacture of the city. It affects the whole boot and shoe industry, employing probably five thousand hands, and the number of establishments directly involved is from eighteen to twenty. The situation is of the nature of a lock-out by the employers, which was caused by the action of a group of five machinists in W. A. Marsh & Co.'s employ, who left their work on 31st October, over a matter of wages, when, according to agreement, they should have arbitrated their case before the Claims Committee. This they did not do, and were ordered by both the Claims and Conciliation committees of the trade to go back to work on November 2nd. They failed to do so, and the preferential clause of their agreement of 1901 was cancelled. This clause meaning that the employers should give preference to union machinists before all others. Of course the rebellious attitude of these men enlisted the sympathy of other unionists.

It is to be borne in mind that the present attitude of the Shoe Machinists' Fraternity, as is called, involves a distinct breach of the very reasonable agreement reached more than two years ago between the employers and the men under the management, as go-between, of Monsigneur Begin. It was then agreed that union labor was to conduct the boot and shoe business of Quebec, but if any dispute arose it was to be referred to a committee composed of three employees and three manufacturers, and if they failed to agree, it should be taken before an arbitration committee composed of one member chosen by the manufacturers, one by the employees, and the third by the Chief Justice of the Superior Court. A week ago the arbitration committee decided against a complaint of the Leather Cutters' Union, who asked more wages, and they had to pay the cost of the reference. And the arbitration committee, having later considered the case of the five men mentioned in our first paragraph, decided on Wednesday night, 11th November, that the men were wrong, and the Shoe Machinists' Fraternity must pay the cost of the reference. But the men thought they had the whip-hand, and were determined to do as they pleased, *coute qui coute.*

Thus conciliation has failed, and it appears necessary to teach faithless and unreasonable men a lesson, It must now, we think, be resolved upon that, since fair dealing cannot be had from the men upon the basis of the preference granted to union hands in 1901, the Quebec shoe shops shall be open shops, and any man who is competent and faithful to his job shall be protected in it, union or no union. The employing firms have given notice that they have suspended operation of their factories from Friday last, and that they will resume operations when they "have engaged a sufficient number of machinists to run a set of machines in each factory." The firms who are members of the Quebec Boot & Shoe Manufacturers' Association are: The W. A. Marsh Co., Limited, J. S. Langlois & Co., The John Ritchie Co., F. Schryburt & Co., Thos. Migner, C. F. McKeen, Goulet & Garant, The James Muir Co., Paul Tourigny, Dominion Shoe Co., Vermette & Thivierge, Thos. Duchene, J. B. Drolet, J. S. Larochelle, B. Crepeault, Jobin & Rochette, J. M. Rochette, Derome & O'Brien, Alf. Poirier and Luc Routhier. And the number of their employees has ranged about 4,800. The outcome of the present lock-out is observed with alarm by the tanners, leather dealers, and other trades in Quebec, to whom it means so much.

LUMBER MATTERS.

Very little change has taken place in the lumber situation since our last report on the subject. In many parts of the country, building operations have been perhaps more than usually active, and this has rendered the demand for lumber, as for other construction needs, quite steady, in some places brisk. This is true of both Quebec and Ontario. In Manitoba and the Territories the demand for lumber of all kinds is extremely good, for there have been houses needed on the prairies, not only by the hundred, but by the thousand. Prices kept firm, with no appreciable change. The cut in the northern districts of Ontario will be materially smaller than was anticipated a few months ago, owing to recent happenings at the Soo, but recent reports say that men are working again at that point, in comparatively large numbers, so that perhaps after all the deficiency will not be so marked.

We gather from the circular of Farnworth & Jardine, that the wood market in Liverpool is generally firm and the demand steady. It appears that

imports of Canadian square timber and sawn lumber at Liverpool, have been some 30,000 tons less this year than in either of the two navigable seasons preceding. Waney pine is very firm there, and stocks moderate; of square pine there is an increased stock, but values are steady. Pine deals are quiet, even dull; the stock in Manchester of Maritime Province spruce and pine is large. Of British Columbia and Oregon pine the stocks are heavy and the demand limited. Pitch pine, both hewn and sawn, is in ample supply, with prices not improved.

At the London wood auctions early this month a languid tone pervaded the bidding, and prices showed no improvement. A large parcel of Quebec oak which was offered without reserve, was disposed of at from 70s. to 110s. per load, according to size and specification. Spruce and pine remained fairly firm however, and prospects are held out for higher values next year. The Timber Trades Journal calls attention to the fact that nearly all grades of sawn and planed wood are in considerably less stock in London than was the case a year ago. This may be accounted for in some measure by the sluggish course of trade last year, which left on hand then a more than usual proportion of the year's imports. The receipts in London for last month, however, according to Board of Trade returns, were heavier than in the same period of last year, the increase being both in sawn and hewn timber. The imports of lumber at other British ports have varied, from rather large for Bristol and Manchester, to small at Grimsby and Sunderland. At Dublin several cargoes from Canada came to hand.

FRANCE AND ENGLAND.

That excellent and outspoken weekly English journal, Commercial Intelligence, has issued, on 28th October, a special number, abounding in information of value, conveyed in some instances in a novel and interesting way. For example, it is shown on page 21 that the imports of France from the United Kingdom *declined* from £24,087,000 in 1901, to £22,672,000 in 1902, whereas the exports of France to the United Kingdom *increased* from £48,029,000 in 1901, to £51,204,000 in 1902; and, on page 25, "Britain takes almost one-third of the total exports of France." Such facts as these appear, to a man at a distance, to support Mr. Chamberlain's statement as to something unsatisfactory in the trend of British trade. One of the frequent maps of Commercial Intelligence shows the consular stations of that country and the population of its cities. It also exhibits by a series of diagrams her chief iron and coal districts, the proportions of the country devoted to the culture of wheat, grapes, olives; the distribution of her trade, the occupations of the people which are overwhelmingly agricultural and industrial.

The importance of the wine trade to France is illustrated by the fact that the area occupied by the vine in that republic is larger, according to a contributor, than that of the joint wheat and barley crops in the United Kingdom. In the district of the Gironde alone 336,056 acres are planted with vines. With between two and three million acres in wheat, the year's harvest of that grain is forty million bushels or thereabout. Barley, rye, and oats, are further large field crops while beet root covers hundreds of thousands of acres. It is used not only for sugar-making but in the production of alcohol.

Silk is the most important of French manufactures of silk fabrics, the city of Lyons, which is the centre of the trade, alone produced in 1902, to the value of £17,778,000. Rheims, Roubaix, Troyes, are other well-known manufacturing towns. Lille, a very important one in the north for textiles, Rouen, Calais, St. Etienne, have each their specialties. Cambrai is where they make cambric. Creuzot is a centre of metal industry, widely famed for its locomotives and other machinery. Lyons, too, produces metal goods and chemicals in a large way. The commerce of Marseilles is world-wide, but its manufactures not so extensive apart from soap, oil cake and olive oil. There remains Paris, whose manufactures embrace a wide extent—furniture, jewellery, porcelain, silks, laces, perfumes, artificial flowers, fancy goods giving her, as every one knows, great repute. She also makes a variety of articles that used to come to France from the factories of Birmingham and Sheffield, for, owing to high protective duties, the trade has been taken away from the British, and now is done within her own borders.

THE BOOT AND SHOE TRADE.

The weather since the beginning of the fall cannot be described as propitious, so far as the boot and shoe trade is concerned. Notwithstanding this fact, however, the amount of business transacted has been distinctly good, both in regard to Ontario and Quebec. In the West, too, seeing that returns for crops are only now beginning to make their influence felt, it has been even better than anticipated. This applies both to the sorting trade and to spring orders, upon which travellers are now working. As to the former, some houses describe it as the best that they have experienced for years, notwithstanding that the somewhat higher schedule of prices which has been pushed through during the last month or two, at first met with some rebellion on the part of retailers. However, the general confidence possessed by business men generally, in both city and country districts, in spite of the rising clouds across the border, seems to have inspired them with the idea of making liberal purchases before prices become higher. This it is by no means certain they will not do, during the next few months, owing to the scarcity of good labor, and the tendency to advance on the part of materials.

So much for the trade under its general aspects. Coming to closer particulars, there are two pieces of news which are causing a good deal of interest. One is the case question, the other the announcement of a general lock-out in Quebec factories. The first matter is one which has caused much discussion on various occasions for years past. The Quebec manufacturers, who are banded together in a particularly strictly-organized association, have heretofore made a habit of charging 40c. for cases. Now, they have issued very peremptory circulars, stating that the minimum charge in future will be 60c., and not only

this, but they want to bring this latter rate into force for goods ordered some time ago. Jobbers object strongly to paying the increased amount in any event, since they claim that if the Quebec manufacturers have a real reason for the change, it must be because they are being "held up" by the box makers; but they practically refuse to pay the surcharge on back-orders under any circumstances. Meanwhile, the old enquiry raises its head again: why not do away with such an obsolete extra as cost of cases altogether, and include it in the quotations for the merchandise offered for sale. This plan would doubtlessly do away with a source of much trouble and bickering.

The other important happening during the past week was as mentioned above, the closing down of no less than twenty boot and shoe factories in Quebec, this industry being one of the mainstays of that city. Trouble has been in the air for some weeks past—it may be said, indeed, counting former threats and former settlements, for some years, as we elsewhere notice. Even now the real causes of the present difficulty are not easy to trace; but so far as has transpired, five cutters refused to work at the wages given, and the factories concerned forthwith closed down. It is stated by the firms concerned, that they are constantly placed in difficulties by the non-appearance of some of the employees whose absence, owing to the fact that boots and shoes in the making pass through many hands, causes delay in the operation of their whole business. It is announced that operations will not be resumed until employees individually engage themselves in sufficient number to run a set of machines in each factory.

—That Imperial sentiment does not totally govern business relations, in Britain any more than Canada, is evidenced by the fact that a director of one of the largest of the English iron companies has written a strongly-worded letter to one of the London papers, calling on the Government to prohibit the importation of Canadian bounty-fed pig-iron. He quotes figures to show that Canada dumped into England in the years 1901-2 nearly as much iron as Germany, Holland, Belgium and America put together. This is called "dumping with a vengeance."

—Mr. Seddon, premier of New Zealand, has introduced into the Legislature a bill for preferential trade with Great Britain. It provides, after next March, for a surcharge of 20 to 50 per cent. over existing duties on specific articles not manufactured in the Old Country. This form of preference probably is one which would have found more favor in the eyes of some manufacturers in this country, than the one now in existence. Mr. Seddon's bill, according to the brief reports which have come to hand by cable, includes proposals for reciprocal agreements with foreign countries.

The first shipment, on an extensive scale, of British Columbia apples to Great Britain was a full carload last week from the Okanagan district, the fruit being principally of the Northern Spy variety. It was sent by fast freight to Montreal, whence it was shipped to Glasgow.

A WELL MORTGAGED ESTATE.

A meeting of the creditors of James Harrison, planing mill proprietor, at Burlington, Ont., was held 12th of November at the office of F. H. Lamb, assignee, Hamilton. A statement of affairs was presented to the meeting. A motion was made by William Laidlaw, of Toronto, to appoint a new assignee. Four creditors, representing claims of $3,500, voted for it; eleven creditors, representing claims of $10,762, voted for the retention of the present assignee.

The statement shows eleven judgment creditors for an aggregate of $6,613; three privileged creditors for $5,754; nine ordinary creditors for $1,845; total liabilities, $14,212. Assets consisted of lumber and chattels, $7,129; outstanding accounts, $900; cash on hand ($1,914, less due bank $691), $1,233. Here we have $9,252.40. But the equities in real estate amounted to $5,849 more, and there are some creamery and canning factory shares put down at $212.50, making the total assets say $15,314. So here is a surplus of about $1,100. Mr. Harrison was not prepared with any offer, so the estate was ordered to be wound up.

The following inspectors were appointed: C. Bartlett, Bank of Hamilton; C. A. Birge, of the Canada Screw Co.; W. J. Aitchison, of Aitchison & Co.; and James Chisholm, of Chisholm & Logie, who, with the assignee, F. H. Lamb, of Hamilton, will proceed to wind up the estate.

This insolvency case might not have called for any especial notice if it were not for the extraordinary condition in which the real estate of the concern was found. Besides the planing mill and lumber-yard, office and dwelling, valued at $4,600, but mortgaged to Mrs. Morgan for a sum, including interest, of $1,832, there are four other dwellings and a vacant lot, and not one of them is free from mortgage. Here is one dwelling in the list, value $1,250, under mortgage to the I.O.O.F. lodge for $615; another dwelling, value $2,200, under mortgage to James Reid for $1,350; a third dwelling worth say $2,000, but mortgaged to somebody for $1,417 (with interest); still a fourth dwelling, in which James Harrison himself resided, and which is put down at the handsome valuation of $2,600, is found to be mortgaged to the Federal Life Company for $1,200, to T. C. Haslett for $400, and to be in arrears of interest on both for say $36. Fifth and lastly, "Lot 8 in block X." value $150, is found to bear a mortgage to Mrs. McCann for $100. Here, therefore, is landed property of a presumed value of $12,800 burdened with no fewer than seven mortgages, the aggregate of which is almost $7,000. What an excellent customer must Mr. Harrison have been for mortgagees. Why, he could mortgage anything, from his mill machinery to a vacant lot. and there was plenty of people close at hand to lend him money; he did not need to go to the big loan companies, he could borrow from the Oddfellows' Lodge or from individuals. He must have positively liked paying interest. We shall be glad to learn by and by what success Mr. Lamb and the inspectors have had in realizing anything out of the $5,849 estimated value of the equities in these real properties, and meanwhile venture the opinion that they will not realize $5,849. Unhappily, experience teaches us that the surplus shown by such an estate cannot be depended on. It would be a relief to think that the average country insolvent does not show such a dreary burden of "The Dead Pledge," the mortgage, as this at Burlington.

THE CANADIAN MANUFACTURERS' EXCURSION TO THE PACIFIC.

Fifth Paper.

"West of Regina"—so run my brief notes—"antelopes, prairie dogs, coyotes, wild swans and geese, may be seen." These are the things that many a man comes all the way from the British Islands to see (and shoot), and we don't particularly want to discourage him; albeit we would rather see, for the future good of the country, ten farmer settlers, each with ten pounds in his pocket, than one la-de-da huntsman with a hundred pounds undrawn in his cheque book.

"Southern Alberta, the Colorado of Canada." Such was

the characterization of the region around Lethbridge and MacLeod and the Porcupine Hills, given in some of the pamphlets, either municipal or governmental, which are abundantly circulated, respecting this wonderful country. And really, judging from the ruddy looks and the stalwart proportions of the ranchers whom we saw, and from the testimony given by delicate former residents of Eastern Canada to improved health on the part of themselves or their families resulting from residence in Alberta, the dry and stimulating air of that western region is a great health-giver.

Our visit was, to use a phrase employed by one of the speakers whom we heard in the Territories, to the "Granary of the Empire." Doubtless he meant the future granary of the Empire, for we must, in the words of Sanford Evans at Winnipeg, "use our imaginations" to discern by prevision the day when these great prairie stretches shall be so filled with producers as that their surplus grain shall supply the needs of not only the United Kingdom, but such outlying portions of the British Empire as cannot supply their own. That preparation is being made for much greater productive days in the future is nowhere more apparent than in the numerous farmers' elevators and storehouses to be seen along the track, erected by the railways or by the great milling companies or by private, possibly associated, farmers at every considerable village or town in the wheat areas. Indeed, these are necessary already, since there must be some place to store the grain until such time as the railways can haul it away Eastward. What, then, may we expect to be necessary in the way of elevators and grain stores ten years hence!

While, however, there was abundant evidence in the West of local spirit and decidedly widespread enterprise in local advertising, perhaps I should rather say advertising to the world places or particular districts, there was yet shown upon occasion a wider spirit, and a disposition to take a broader outlook and to regard, reciprocally as it were, the advantages or claims of other localities. An example of such breadth occurs in the address presented to the officers of the Association by the Brandon Board of Trade. The speeches on the occasion of that presentation were noteworthy; and the address itself, while not forgetting to praise Brandon, as it well deserved, as a good point for commerce or for branch factories and warehouses, went further afield, in a direction which renders the reproduction of a part of the address interesting:

> "There was a time when the East looked upon the West as somewhat of a burden, and that public money spent in its development was likely to be wasted and yield nothing in return, in so far as the Dominion as a whole was concerned.
>
> "It is, however, needless to say that we in the West never shared these opinions, but felt sure that the time would come when any feeling of sectionalism or uncertainty as to the future of the country would be removed, and we are pleased to know that this has come about sooner than we expected, and find that former doubts have been replaced by confidence, and that Easterners now are as much concerned in the development and prosperity of the West as we ourselves are. This is the good-will that should exist, and we entertain the hope that it may continue to grow, because our development and prosperity must mean your prosperity; and although our Western wheat fields are far removed from your industrial centres, we have many interests in common and are afforded many opportunities, not only in the improvement of our own individual positions, financially and otherwise, but in the wider field of doing something towards the improvement of the community in which we live and in the upbuilding of a nation of which we shall have every reason to be proud."

Quite appropriately, I find among the accumulation of literature descriptive of the West, a folder, containing map, showing the irrigated lands of the Northwest Irrigation Co., in Southern Alberta. These lands, as I discover from the map, are south and west of Lethbridge, irrigated by canals from the St. Mary's river, close to the boundary of the American State of Montana. The folder states that

> The climatic conditions are most favorable, the district being marked by an equable temperature, with freedom from rapid and extreme fluctuations in the growing season. The predominant feature is the great dryness and clearness. "The absence of rainfall in the summer months accounts for the application of irrigation to agriculture, and a certainty of crops is assured by reliance on the steady, uniform and abundant supply of water in the St. Mary's river." "The United States Census Report of 1890 shows the average production of wheat under irrigation in Montana and Colorado to have been 50 per cent. more than in the States of Illinois, Iowa and Indiana. . . . Irrigation, where the source of supply, as in this instance, is a never-failing stream like the St. Mary's river, gives certainty of crop, protects against drouth, places the farmer in the position of regulating the rainfall. There is no agricultural region, even in districts of normal rainfall, where the possibility of resorting to irrigation would not be occasionally beneficial, for, even in such countries, drouth is not unknown. . . . The soil of the plains is generally rich and deep, and varies from a rich sandy to a clay loam. All of it is thoroughly adapted to the growth of all classes of cereals, cultivated grasses and vegetables in great abundance.

RECIPROCITY.

Editor, Monetary Times,—

Sir,—I have been looking for an article, or a series of articles, from your pen on the subject of reciprocity with the United States. But you seem to have very little to say on the subject. Don't you think it worth advocating? You must be aware of the interest that is being taken in the subject by people in the Northern and Northwestern States, and I can assure you that we who live along this frontier are decidedly interested in the matter.

Canadians might, I think, show some interest in what is going on in Detroit and Chicago and many other American cities looking out towards freer trade between the two countries. Our trade is already so large with our great and rich neighbor to the south, that we may just as well try and make it larger. Let us hear from you on the subject. If we Canadians cannot break down the tariff walls between these two countries, we can still do more business on a fair basis of reciprocity, if we can get it. Yours,

Windsor, Ont., 16th. Nov. Onward.

HALIFAX LETTER.

After consultation with the officials of the Dominion Iron and Steel Co. and the Dominion Coal Co., and two days' deliberation, the Nova Scotia Government has decided to call a special session of the Provincial Legislature on Dec. 3rd to consider necessary legislation to make effective the separation of the above-named companies. Pending the release of the money now locked up in the coal interests, and which, after the separation, will be available for the completion of the plate mill and other enterprises by the Steel Company, over two hundred machinists have been laid off. The vicissitudes of these enterprises is beginning to be felt at Sydney and business houses report a very great falling off in trade since the passing away of the boom. There is no despondency, however, as it is believed the natural resources will triumph in the end, and that a stop will be put to mismanagement. When the separation is effected, Mr. Austen King, of Pittsburg, who is described as one of the leading coal experts of the United States, is to become superintendent of the Dominion Company's mines.

With regret Halifax parts with Mr. F. A. Huntress, general manager of the Electric Tramway Company, who leaves next month to become general manager of the Worcester Consolidated Street Railway, which has a system of

about 140 miles, and is the third largest street railway in New England. Mr. Huntress has been in charge of the Halifax system for six years, previous to which he was electrical engineer of the Montreal Street Railway. The vacant position here will be filled by the advancement of subordinate officials.

The directors of the Midland Railway, which runs across the country from Windsor to Truro, held their annual meeting last week. This road, though only in operation a little over a year, has paid working expenses and something more. It has been decided to extend the line from Truro to Brule, on the Northumberland Strait, a distance of thirty miles, thus affording a short route to Prince Edward Island. It is probable that the Windsor end of the line will be eventually extended to the ocean, affording an alternate route to the United States. There is one thing that is much needed in connection with this road and that is some arrangement for the through carriage of express matter.

The report of the Acadia Sugar Refining Co. for the year ending September 30th, 1903, shows the company to have had a very successful year. The net profit was $143,-103.57. Out of this amount, which includes a balance brought forward of $1,922.73, an interim dividend on preference shares declared on June 1st was paid, amounting to $54,506.67, and a further dividend of 6 per cent., amounting to $81,760, is ordered to be paid on December 21st. This will leave a balance of $6,836.90 to be carried forward.

While the town council of Port Hood was boring for water the drill, at a depth of 500 feet, struck a valuable seam of coal seven feet in thickness. The find is on the property of the Port Hood Mining Company, and ensures the permanent establishment of collieries at Port Hood, which is the capital of Inverness County, and will no doubt give a great impetus to the advancement of that most westerly town of Cape Breton.

There has been a good deal of comment regarding the discrimination against Halifax in this season's immigration passenger rates by the C.P.R. The rates for immigrants landing at Halifax and routed to points in the West will be $2 higher than if landed at St. John or Portland. The effect of this will be that the Allan and other steamers will be compelled to land immigrants at the latter ports, although it is more convenient to land them here. This will not affect Halifax, as this class of traffic is of little material benefit to a port, but it will affect the I.C.R., which formerly received the $2 a head for conveying the immigrants to St. John. The C.P.R. claimed that this was too much in proportion to what the latter received for the balance of the journey; and as no other agreement was arrived at, the reduced rate was made via St. John and Portland to cut the I.C.R. out of the business.

Halifax, 16th November.

OUR ST. JOHN LETTER.

The decision of the Canadian Pacific Railway Company to demand a rate of $12 on all immigrants carried from St. John to Winnipeg, whether those immigrants come direct to St. John or are landed at Halifax, will likely mean a large growth in the immigrant business at this port. Heretofore only $10 has been got by the Canadian Pacific for immigrants landed at Halifax, while the $12 rate was obtained from those coming to St. John. The $2 went to the Intercolonial. Now the Government road must get its share at the expense of somebody else than the C.P.R. The steamship companies cannot well make a difference in the rates to Winnipeg in favor of Halifax over St. John, so they will have to choose between coming to St. John to land their passengers or paying the I.C.R. for hauling them. It is figured that the extra cost of bringing 500 immigrants to St. John, instead of Halifax, will be less than 50 cents a head. The steamers presumably will prefer to lose this than $2 per head to hand them over to the I.C.R. at Halifax. The Garrison City people are endeavoring to get Hon. Mr. Fielding to fix a rate of $1 per head on these passengers to offset the C.P.R. move in favor of St. John. If this is done, it will mean carrying the business at a loss. The C.P.R. move, which will benefit St. John, will, it can be seen, also benefit the great corporation, and those who know say it will have a far-reaching effect in diverting Continental immigration from the Hamburg-American line to the Canadian Pacific's London and Antwerp steamers.

The St. John civic delegation that went to Montreal to talk improved harbor facilities with the Canadian Pacific managers, returned home to-day. They were unfortunate in reaching Montreal the very day that the death of his father in Milwaukee, called Sir Thomas Shaughnessy to that city. The delegation had but a brief conference with him, but it is understood to have been satisfactory, and he promised to come here at a very early date to continue the conference. The committee's plans are for a three-berth pier to the north of the present piers. The Dominion Government will at once be interviewed to see if it will do the dredging, and if so, the city will build the wharves, and it is believed the Canadian Pacific will pay a fair rental.

Work has been commenced on the erection of three large buildings in the Strait Shore. Two of the structures are for the Maritime Nail Works, and the third is for the Portland Rolling Mills. The Maritime Nail Works intends to double its capacity and will instal additional machinery as soon as the new buildings are completed. The Rolling Mill is going into the manufacture of spikes, screws and other articles. These two industries are managed by a local company and the present signs of growth are believed to be but the forerunners of still greater extensions.

Another sign of the times, and a further evidence of the development taking place in St. John is the engagement by Messrs. Manchester, Robertson, Allison, Limited, of Walter H. Golding, one of the brightest of the young newspaper men of St. John, to take entire charge of their advertising. This firm is the first in the city, if not in the Maritime Provinces, to put their advertising in the hands of an expert, but it is believed others will follow their lead.

The annual meeting of the Macadamite Company was held a few days ago, and the old board of directors was re-elected. Very little of the actual business of the meeting has leaked out, but it is known that the company's factory here has not been in operation for some time, and there are rumors that the metal is a failure, and that several of those who invested have lost heavily. Some of the interested ones admit that this is the situation, and others declare that the inventor is making improvements or has made improvements, that will put everything right and give "big money" to the stockholders. The man on the street believes that there is a good story to be told in connection with this company, but whether it ever will be told remains to be seen.

The Government of New Brunswick increased the stumpage to $1.50 per thousand, a jump of 50 cents, and this will mean a very large increase in the provincial revenues even though there should be some falling off in the cut of lumber. Another source of revenue that has been profitable this year is the issue of game licenses. Never in the history of the province has there been such an influx of sportsmen from the United States. All have to take out licenses, and the amount of money left in the province by these people will aggregate hundreds of thousands.

Some local capitalists have organized The Canada Bank Note Company, and on a charter from the Provincial Legislature will begin a lithographing and engraving business. The large building at one time used by the Queen Biscuit Company has been purchased and a plant will be installed.

It is likely that the influential merchants in Restigouche County will join with merchants in Bonaventure County, Quebec, in putting a boat on the route from Dalhousie, along the Bay Chaleur and up the coast to Gaspe. The service now being performed by Michael Connolly's steamer, "Restigouche," is not satisfactory.

An English syndicate has asked the town of Woodstock, New Brunswick, for concessions in return for the erection there of a factory to make broom and other handles and similar articles from hardwood. The company's whole export will be sent to England. Negotiations are now pending.

It will likely be the first of the year before Messrs. William Thomson & Co. get the new steamer, "Senlac," on

the route along the south shore of Nova Scotia between St. John and Halifax. When launched, the new steamer will be about ready for the service. It was intended to launch her some time ago, but an accident to another vessel on adjoining blocks made this impossible, and while the wreck is being cleared up, the Messrs. Thomson & Co. have been putting the machinery and fittings into the "Senlac," and she is now almost a finished craft. Very little time will be lost in fitting up after she gets afloat.

* * *

St. John, N.B., 17th November.

SITUATION AT THE SOO.

In conversation with a gentleman, who has returned from Sault Ste. Marie, and who is thoroughly acquainted with that town and the country surrounding it, we were told that conditions are much better than might have been expected under the circumstances. Excepting men who make a regular business of roaming from "job to job" in any case, comparatively few workmen, at any rate among those with families, have left the town of Sault Ste. Marie, and as a consequence the vacant houses are few. Before the employees of the consolidated companies were paid their overdue wages, trade thereabout was very depressed, due to the fact not only that it had been carried on largely on a credit basis, but that suddenly the hope of receiving hundreds of thousands of dollars, due for housekeeping expenses and stores of all sorts, suddenly went down to almost zero. Then, when the money was paid, it came into the hands of the local tradesmen with a rush, for the latter naturally took the precaution to keep their debtors well in sight, so that the losses on what proved to be a long line of credit were comparatively small. Under the circumstances, it is strange, indeed, that the population of the Soo has held together so well as it has done, for we are told that at one time there were at least a hundred agents on the ground, offering employment of various kinds to those who wanted it. Now, some of the factories have started up, and others appear to be getting into readiness for doing so in order to reap the benefits accruing from the completion of work already started, if for nothing else. All in all, then, the prospects for this section are fairly good, and wholesale business houses in Toronto and elsewhere have already felt the result of the improvement. One consequence, however, of the past situation may be noted and that is the great diminution in the cut of lumber. Along the north shore of Lake Huron, the decrease for this season, as compared with that of last year, is estimated at 200,000,000 feet.

BANKING AND FINANCIAL ITEMS.

We are informed that the Merchants' Bank of Canada has opened a branch at West Lorne, Ont.

The growth of business in Canada is illustrated by, among other things, the comparative statement for October, 1903, and October 1902, issued by the Sovereign Bank of Canada. The assets of that bank had gone up from $3,855,000, at the close of October, 1902, to $7,209,000, at the close of October, 1903. The deposits went up in that period of twelve months from $1,681,000 to $4,300,000, and the circulation from $759,000 to $1,237,000. Such growth is very remarkable.

In John Morley's Life of Gladstone occurs this story, which possibly made that statesman smile while relating it: Mr. Gladstone told us of a Chinese dispatch which came under his notice when he was at the Board of Trade. A ship laden with grain came to Canton. The administrator wrote to the central Government at Pekin to know whether the ship was to pay duty and land its cargo. The answer was to the effect that the central Government was quite indifferent as a rule to the goings and comings of the Barbarians, whether they brought a cargo or no cargo was a thing of supreme unconcern. "But this cargo, you say, is food for the people. There ought to be no obstacle to the entry of food for the people. So let it in. Your younger brother commends himself to you," etc

By the amalgamation of the two largest financial institutions in Berlin, the Dresdener Bank and the Schaffhausen Bankverein, the strongest banking aggregation in Europe, after the Bank of England, has been formed. The capital of the former is $32,000,000, while that of the latter is $25,000,000.

Mr. C. A. Crosbie, who was lately appointed manager of the Royal Bank's branch, at Vancouver, and supervisor of the British Columbia business of the bank, has left Halifax for the scene of his new labors. Before his departure, the head office and Halifax branch staffs presented him with an address and testimonial. Mr. Crosbie was secretary to the board of directors, and during his occupancy of that office enjoyed great confidence among Halifax business men.

We are notified by the Royal Bank of Canada of the following changes in their staff: Mr. F. H. Arnaud having resigned, Mr. R. H. Foster, of Fredericton, has been appointed manager in his stead. Mr. A. E. Brock, assistant manager in Montreal, becomes manager of the Fredericton branch, and the former's position will be occupied by Mr. H. J. Gardiner, formerly of Montreal West End branch. The management of the latter will in future be carried on by Mr. B. G. Winans, formerly accountant in the same city. The manager of the Ottawa branch will be Mr. G. Kydd, of Nelson, B.C., where the vacancy has not, we understand, yet been filled. Mr. E. E. Neill, formerly the Vancouver manager, has been appointed inspector at Montreal, and his position in the former city will be occupied by Mr. C. A. Crosbie, of Halifax.

Shareholders of the Southern, the Southwestern and the Star Loan Companies, St. Thomas, Ont., held meetings on the 17th inst. and ratified the agreement made by their respective directors providing for the amalgamation of the three corporations. The new concern will be capitalized at $1,000,000 in 20,000 shares of $50 each, and will be known as the Southern Loan and Savings Company. The manager will be Mr. John W. Stewart, and the provisional directors mentioned are Messrs. W. Mickleborough, Dr. E. W. Gustin, Robert Kains, C. B. Spohn, George K. Crocker, Marwood; A. Gilbert, J. P. Finlay, J. A. Bell, St. Thomas; Skelton Weldon, of London, and Reuben Haight, of Yarmouth. The subscribed capital stock of the three companies affected is as follows: Southern, $400,000; Southwestern, $193,800, and Star, $270,000, of which all but $16,182.53 is paid up in full. The value of the paid-up stock has been agreed upon as follows: Southern, $432,000; Southwestern, $201,552; Star, $253,871.47.

The Bowery Savings Bank, of New York City, which was founded about 1830, is called the largest savings institution in the world. We are told that it has more than 140,000 depositors, with present deposits of about $83,000,000, and assets of nearly $93,000,000. The president of this institution is Mr. Wood. The welfare of its depositors is carefully looked after—almost paternally, one might say. Any sum of more than $1,000 drawn by a depositor is referred to the president or controller for approval, and in each instance the depositor is asked to state what the money is to be used for. Frequently it is learned that depositors are taking out savings to speculate on margins in Wall Street, knowing practically nothing of financial matters. How a depositor spends money is no legal concern of the bank, and in a general way none of its business, and money is paid without hesitation if explanation is refused. But by this bit of precaution the Bowery's depositors are saved tens of thousands of dollars yearly. Hardly a day goes by, says an exchange, but some misguided man or woman is invited into President Wood's office to listen to a kindly, fatherly talk about stock speculations and Wall Street—which is no place for a poor man.

From the latest issue (September, 1903), of the Bankers' Encyclopedia, by Chas. R. Williams, published in Chicago, (Tacoma Building), we obtain some particulars of the number of banks in existence in the United States. The number of National Banks is 4,706; but of State Banks there are no fewer than 7,708. Then there are savings banks and private banks besides. New York State heads the whole list with 1,775 banks of all sorts, 986 of them private, 370 national,

312 state. Next in number of banks, and this is somewhat surprising, comes Iowa; 600 of hers, however, are state banks, as 575 of Missouri's and 420 of Nebraska's are. Pennsylvania has 1,191, and there are 570 of them National; but Pennsylvania has been a long time in the banking business, and knows something about it in both theory and practice. The like may be said of Massachusetts and of others of the older states. Mr. Williams has arranged this directory of banks with laborious skill. Not only are the different states alphabetically arranged as to town and country, but the principal cities of each state are conveniently indexed. The maps of various states, indexed for reference, are a great convenience; and the list of names of cashiers and assistant cashiers, which occupies some fifty pages, is a curiosity. There must be twenty or thirty thousand of them.

MINERAL DISCOVERIES IN ONTARIO.

The Ontario Government has, under the provisions of the Mines Act, by an order in council, dated 11th inst., withdrawn from sale, lease or exploration, a belt of land ten miles wide on each side of the Temiskaming and Northern Ontario Railway, extending from the north boundary of the Township of Widdifield to the town of New Liskeard, the present terminus, as important discoveries of the ores of nickel, cobalt, silver and arsenic have recently been made in that region. Some of the ores seem to be different from those previously discovered in any quantity. For example, the Kupfer-nickel, which contains about 44 per cent. of nickel, and which hitherto has been found only in the form of a few small specimens, seems to exist, judging from surface indications, in commercial quantities. The value of these discoveries, if they prove to be extensive, can be realized by a comparison with the famous Sudbury deposits. In the latter, we understand that 3 per cent. of nickel in the ore is the average, and 5 per cent. is exceedingly rich. In the new discoveries the ore, it is said, carries 44 per cent. of nickel.

INSURANCE MATTERS.

Some months ago the general manager of the Travelers' Insurance Co. was in Nova Scotia organizing the business thereabout and seeking a suitable provincial manager. The appointment has been given to R. F. Merlin, who a year ago gave up the work of a commercial traveller to sell life insurance for the Equitable in which, we are told, he met with good success.

We hear from Montreal that Mr. George Caverhill, of Caverhill, Learmont & Co., hardware merchants, of that city, has joined the board of directors of the Royal-Victoria Life Insurance Co., his election having taken place at a meeting of the board held on the 9th inst. Mr. Caverhill is already a director of the Richelieu & Ontario Navigation Co., and of the Montreal Loan and Mortgage Co.

Cruelest of all, perhaps, among the pangs that come from loss of health is the sense of inability to carry on the work of life as it has been carried on before. The requirements of living are not likely to decrease, but the means of meeting those requirements are more and more difficult of attainment as disease weakens the worker. The only wise man is he who provides against this worst of evils by securing in time a policy of life insurance.—The Statement.

The Accident Insurance Underwriters' Association of Canada held a meeting in Toronto on Friday last. Mr. D. Murphy, M.L.A., of Ottawa, was elected honorary president of the association. A long discussion took place on the general principles of accident insurance. Mutual arrangements for joint action by the various companies were considered, and the work of the association was arranged on a new basis. Among those who attended the meeting were F. F. Perkins, Senator Desjardins, I. H. Hutchins, J. I. Godbout and R. J. Griffin, of Montreal, and D. Murphy, of Montreal.

Carman, Man., ratepayers have passed a by-law to raise $6,000 for fire protection purposes.

The Fire and Light Committee of the Montreal city council are, at the request of the fire underwriters, preparing a definite statement as to what improvements have been made in the fire-fighting equipment of the city since the Board of Trade building was burned. The additions and improvements during the last two years in fire stations, appliances, hose length, alarm boxes, etc., have been very considerable, and the council and business men of the city are agitating for a reduction in insurance rates, which two years ago were raised 25 per cent.

Says the London Review, referring to the United States, and to some American criticisms of English insurance regulations as harsh and arbitrary: "We respectfully beg to state that, in our opinion, there is no other place in the world where frauds, in the shape of fraternal and assessment organizations, are so successfully carried out. Companies which would not be tolerated for three months in this country appear to flourish undisturbed under the Stars and Stripes, that is to say, under the free and independent organizations of the different States, organizations which, we trust, will be finally disestablished, and insurance placed under the control of a bureau at Washington."

The Canadian Casualty and Boiler Insurance Company, Toronto, are issuing an accumulative accident policy on the plan of an ordinary life policy, by means of which, until the end of the tenth year, the amount insured increases at the rate of 5 per cent. per year, and, after that, at a permanent increase of 50 per cent. without any extra premium whatever. Provision is made for loss of sight, or of one or more limbs, also for double benefits for some classes of accidents. The policy provides, too, for a continuous income during beneficiary's lifetime after the payment of twenty annual premiums. We believe that this company is making highly satisfactory progress in both its accident and boiler insurance branches. It has recently issued some very readable literature explaining its methods.

TRADE OPPORTUNITIES.

Canadian Offices, London, 6th November.—A firm in Scotland asks for prices of samples of Canadian wood pulp paper; and some also from Canadian makers of felts supplied in rolls. A London firm is open to represent Canadian exporters of woodenware and other goods for ship-chandlers. They are also looking for a market in Canada for marine life-saving apparatus, life belts, mooring buoys, etc. The owners of a mine in Canada are looking for parties in Great Britain who will take the output of mica and phosphate which run together on the property, or who would purchase the mine outright.

FOR GROCERS AND PROVISION DEALERS.

The new beet sugar factory, at Raymond, Alberta, started operations on 5,000 tons of beets on the 10th inst. About 150 men are employed.

A feature of the provision trade in Vancouver last week was the price of new-laid eggs, which, coming into the city direct from the ranches, was 60 cents per dozen.

The Senate of Toronto University has decided to prepare a curriculum in veterinary science, attached to the successful study of which there will be given a diploma at the end of three years.

Jamaica manufacturers are trying to induce the Canadian Government to reduce the duties on their cigars and cigarettes to 10 per cent., and promise, in return for such a step, to obtain a preference of a shilling per barrel on Canadian flour.

According to reports received from Zanzibar, the crop of cloves this year will be very short. The present large receipts are due to high prices, merchants being willing to pay almost anything. It is said that the crop will be considerably under 50,000 bales, which Bombay can consume by itself.

A recent report of Mr. J. S. Larke, the Canadian Government commissioner in New South Wales, says that Canadian breadstuffs have obtained a strong footing on the Pacific Islands, which should be a legitimate market. The last steamer from Vancouver landed about 175 tons at Suva, Fiji, and 100 tons of Manitoba flour was sold in the Sydney market last month for island trade. A number of island firms have become so interested in the Canadian trade that it seems likely to grow.

According to reports last to hand by mail from London, Eng., Canadian butter maintained its value, and the demand showed a further improvement. For cheese there was a fair consumptive demand at a reduction of a shilling, compared with the previous week's prices. Stocks in hand in London of all cheese on 31st ult. were 192,000 boxes, against 88,000 last year, the total increase in stocks for the whole United Kingdom being 155,300 boxes. Our informant says, however, that it should be remembered that this year stocks are visible while a year ago they were largely invisible.

The following letter, received by the fruit division of the Department of Agriculture, at Ottawa, from a prominent British importing firm will explain itself: "If your Department, through a circular, could induce shippers to use some common sense in sending apples, you would do them much good financially. For instance, yesterday, the "Tunisian" was cleared up, the bulk having been disposed of earlier in the week, and in the catalogues there were over 1,250 lines under 10 barrels each (we should guess averaging two and three barrels), of different varieties. We do not know of any trade where so much money is being thrown away."

The output of the cider industry of Normandy depends, of course, upon the crops of apples yielded. In bad years American dried apples have been imported to supplement the native crop; and when it is possible to ship the fruit directly to France, thus securing the minimum tariff, there will be an excellent opening for Canadian apples for the same purpose. An old custom prevailing in cider districts is that of permitting farmers growing grapes or apples for wine or cider to distill a certain quantity of spirits for household use. The sale of this spirit is forbidden, yet large quantities somehow find their way into the market, and the loss to the Government through this illicit trade has amounted to nearly £4,000,000.—Paris correspondence of Commercial Intelligence.

ABOUT DRY GOODS.

Some of the hosiery manufacturers are withdrawing quotations until further notice.

The Bagley & Wright Mfg. Company, wholesale dealers in dry goods, tailors' trimmings, etc., of Oldham, Eng., have opened a branch office in Winnipeg.

The beginning of November finds several of the important silk centres of the world still much depressed, Paterson, New Jersey, having been slack, Zurich on short time, and Crefeld working to stock. Lyons, however, with its enormous variety of fabrics, has kept fairly busy.

The wages of all cotton cloth operatives in New Bedford, Mass., have been reduced by 10 per cent. About 10,000 hands are affected. A similar cut is being made at one of the Blackstone, Mass., mills, by which 700 employees will be touched. At Fall River, in the same State, negotiations are now going on for a return to the wage schedule in force before March, 1902, since when they have been increased.

The epidemic for "walks" which has broken out in Paris is very curious. There are walks of all kinds and categories. The walk of the "Midinettes"—as the Parisians affectionately call the little dressmakers' apprentices—brought out nearly eleven hundred entries, and an enormous crowd witnessed the event. The course was from the Place de la Concorde to Nanterre, a distance of seven and one-half miles. The competitors were dressed, some in outdoor costume and others in short skirts. The first girl arrived at Nanterre at noon, having covered the distance of seven and one-half miles in an hour and a half.

The movement in the West Indies to grow cotton for the British manufacturers is gaining momentum. A few days ago Sir Daniel Morris, Imperial Commissioner for Agriculture, addressed a large and influential gathering in Kingston, and so strongly urged the establishment of a cotton industry in Jamaica, that many of the planters have expressed their intention of following the advice given, as soon as their arrangements can be made.

During the year ended with June last, the great thread concern of J. & P. Coats, Limited, show a large increase in profits. From the accounts lately made public, the total increase in net profits is £85,277. The net profits amounted to £2,684,531, after providing £36,965 for depreciation. The sum of £700,000 has been placed to the reserve fund, £100,000 to suspense account against depreciation of investments, £50,000 to employees' pension fund, and £420,720 carrried forward. During the year, four quarterly dividends of 1s. per share have been paid on the ordinary shares, amounting to 20 per cent., and absorbing £900,000, while the 20 per cent. dividend on the preferred ordinary stock has absorbed £600,000, and the distribution on the 6 per cent. preference shares £150,000. To the disappointment of some people, no bonus was declared.

The Textile Mercury, one of the foremost of English journals devoted to that industry, in a recent article on the West of England woolen trade, gives the manufacturers some hard knocks. It says it is quite true that not nearly so many mills are running in the West of England as there were twenty years ago, and that the condition of those now being worked is by no means as satisfactory as could be wished. Few years go by, without seeing one or more mills closed, and they are seldom replaced by new concerns. These ominous signs of decay result from various influences, but lack of up-to-date machinery and methods, and bad management, are too often the principal among them. West of England manufacturers really made too much money in the old days, and allowed themselves to lapse into a state of prosperous satisfaction, without any incentive to entertain new ideas or bestir themselves about adopting new methods of production. It was this unfortunate optimism which caused them to allow the worsted trade to go to Yorkshire, when it might have found a permanent home in the West of England.

It is stated by the Bradford correspondent of the Drapers' Record that the situation there at the end of October was extremely difficult to comprehend, as, although there are features of the trade which must affect the consumption of both fine and coarse wools, there appears to be no giving way in prices, and holders continue quite confident that present rates will be upheld for some time to come. . . "The depressed condition of the agricultural districts, caused by the bad harvest weather and the short time in the cotton and shipbuilding trades, is compelling retailers in the home trade to limit their purchasing to absolute necessities; but to meet this falling off in consumption, there has been a corresponding curtailment of production amongst manufacturers, who have been allowing part of their looms to stand idle when they could not obtain profitable business. The true facts of the case are that we have only recently begun to feel the real pinch of the reduced output of wool from Australia, due to the many years of disastrous drought there."

It is said in Berlin that the maintenance of its three great ocean flyers has proved so unremunerative, except for a short period each summer, that the North German Lloyd Company is unable to declare a dividend for the current year. On the other hand, the Hamburg-American line, which abandoned the construction of six-day boats will pay from 5 to 6 per cent. The operating expenses for fast boats eat up practically all the profits from other sources, such as steerage passengers and freight. Believing that slow boats are the real money makers, the Hamburg-American line has, we understand, just contracted with Harland & Wolff, of Belfast, for a 20,000 ton nine-day vessel, which will enter the transatlantic trade next spring.

BOOKS AND PAMPHLETS RECEIVED.

A remarkable issue of the Maritime Merchant has just been made in the shape of Christmas goods number. It reaches 220 pages, with handsome colored cover. The pleasing effect of careful typography is well shown by this Halifax journal. Pains are taken to make each advertisement attractive—each page varied: and the result ought to be satisfactory to advertisers. We would cite, as specimens of the loyalty with which wholesale houses support a local journal, the eight pages of one issue filled by Kenney & Co.—the four pages of Smith Brothers—the eight pages of Craig Bros. & Co.—the Stanfield-Smith Co., and the Archibald Co., of Truro—the tea pictures on pages 78 to 81. A neat as well as sensible advertisement is that of Henderson & Potts. Limited.

There comes to us from Montreal the first issues of two new commercial papers, a fact which goes to show that wholesale business is active and competition still keen. These are the Dry Goods Record, monthly, and the Hardware Dealer, weekly. The first-named has received advertising support from a number of prominent houses: Greenshields Limited, Brophy, Cains & Co., Tooke Brothers, the Watson-Foster Co., the Corticelli Silk Co., and others. It has a very good share of reading matter and numerous illustrations. The latter is, of course, a smaller paper, but with some sensible contents and a fair show of advertising. The publishers of both are the Burnside-Smith Publishing Co., who repudiate on the first page the story that they are backed by a New York dry goods publishing company.

Toronto city council has agreed to give out contracts for the building of a new fire hall on Berkeley street, at a cost aggregating $35,255, including architect's fees.

It is proposed by Mr. Henry M. Sutherland, who was general manager of the Temperance and General Life Insurance Company up to the time the company was absorbed by the Manufacturers' Life, to start a new company, which will deal only in "strictly temperance life insurance;" that is, only risks on people who are total abstainers will be accepted. The new venture is intended to be capitalized at $500,000, and Mr. Sutherland thinks there is room for a company which shall insure the lives of abstainers only.

—The quantity of coal shipped from the eastern provinces to Montreal this season has exceeded any previous record, and it is calculated that before the close of navigation it will exceed a million tons. From the opening of navigation to the 1st of November, the total amount coming into the port by means of the coal-carrying steamships was 959,098 tons, as compared with 958,661 for this season last year.

—Parrsboro, Nova Scotia, on the Bay of Fundy, shows a handsome shipbuilding list for the year. The shipyards of that place have turned out this season eight three-masted schooners, two large barges, one two-masted schooner and two tugs, representing in round figures a value of two hundred and fifty thousand dollars. Parrsboro now claims to own the finest fleet of tern schooners in the Dominion of Canada, and bids fair to control a large amount of the Bay of Fundy coasting trade.

—Following the universal rule that things eventually find their level, whether a "boom" be long or short, properties and rents of Sydney, Cape Breton, are coming down. Land in the town has depreciated by ten per cent. from former prices, and rents have fallen, on an average, twenty per cent. In the urban sections, says the Post, the decrease may be greater. "The terms on which land can be purchased in Sydney now practically lie with the purchaser, and the expectations are that real estate will come down very materially before the winter season is over. It appears that things in Sydney are coming down to a normal condition, and that people who are paying rent or buying land will find Sydney as cheap a place to live in as other province towns."

—The second supplement accompanying this Birthday Double Number of Commercial Intelligence is devoted to "Canada—its Broad Lands and Vast Mineral Wealth," as the legend runs at the top of the map. On the face of the map are indicated the products of certain districts, as timber, wheat, coal, furs, gold, in the West, pulpwood, nickel, phosphates, grain, coal, fish, in the East. There are diagrams indicating the proportions of our trade and an illustration of the new Alaskan boundary. Our exports for the fiscal year 1902 are shown to be £42,328,000, of which Great Britain took 55¾ per cent.; the United States, 34 per cent., and the rest of the world 10¼ per cent.—instructive figures. Imports of Canada for the same twelve months were £42,454,000, divided as follows: Purchased from Great Britain, 23¾ per cent.; from the United States, 63 per cent.; from Germany and France, 9 per cent.; from the rest of the world, 4¼ per cent.

—The apple warehouses along the line of the Dominion Atlantic Railway, through the Annapolis Valley in Western Nova Scotia, are filled with fruit awaiting transit to the English markets. The crop of apples is so large that many of the shipping agents feel the need of increased warehouse facilities. In addition to the Furness-Withy line, which is this year affording a very excellent service from Halifax, the steamships of the Canadian Pacific, sailing from St. John, will call at Halifax, we are told, for apple cargoes commencing with the "Lake Champlain," on November 28th. The great display of apples now being made in the Canadian Court of the Crystal Palace, London, by the Nova Scotia Government is attracting much attention; in fact is proving an eye-opener to the crowds of visitors. The present display is to be continued for about one month, when its place will be taken by other Canadian exhibits.

—A Kansas Congressman is preparing a bill the object of which is to provide an elastic currency for the United States. Its introducer argues that the bank cheque currency is ideal whenever it can be used, as in cities, but cheques are only available where both the issuer and the holder are known, and cannot be used to pay off, for instance, gangs of harvest hands, who rarely come to town, or to buy cattle at a distance from the home bank where the buyer is unknown. What is wanted, he says, is a form of currency generally acceptable, "with ultimate redemption made absolutely secure, and yet contrived, like cheques, to appear instantly when needed, and to disappear when their office is fulfilled; not to lie about after being spent, as 'national currency' does, crying to be spent again, and so promoting extravagance, speculation and sometimes panic.

CLEARING HOUSE FIGURES.

The following are the figures for Canadian Clearing House for the week ended with Thursday, November, 19th 1903,co mpared with those of the previous week:

Cities	Nov. 19th, 1903.	Nov. 12th, 1903.
Montreal	24,014,302	25,252,281
Toronto	15,975,057	16,040,724
Winnipeg	6,776,844	7,293,667
Halifax	1,876 875	2,468,548
Hamilton	1,247,458	1,081,545
St, John	1,019,817	1,000 732
Vancouver	1,702,593	1,485,928
Victoria	833,013	808,295
Quebec	1,788,855	1,924,516
Ottawa	.....	2,467,218
London	816,479	836,425
	$.....	$60,659,879

The Enormous sale of

OLD CHUM

Cut Plug

Smoking Tobacco

Proves its Superior Quality.

Sold by all leading wholesale houses.

THE FINANCIAL SITUATION.

Henry Clews & Co., in their weekly circular, dated November 14th, say:

Disturbing influences, some natural and some artificial, keep the stock market in an unsettled condition. The natural influences are those included in the readjusting process forced by lessened business activity and by collapse of the late industrial combination boom. These forces work quietly, and are sometimes hidden or counteracted by surface conditions, but in the long run they are the most powerful of any, and are chiefly responsible for the continued downfall of prices. Our stock market is not only paying the penalty for past excesses, but it is also discounting in advance the effects of a business reaction; so that when the latter actually arrives security values are likely to show greater stability than now. As for the artificial influences, they are chiefly speculative and the result of the efforts of powerful operators to take advantage of or protect themselves from consequences of the larger movements, which are altogether beyond their control. Personal controversies do not creat such fluctuations as the market has lately witnessed; yet one party or the other may, and usually does, seize upon just such opportunities to intensify depression in order to carry out long contemplated plans. Big men wait patiently for such crises; hence the belief that recent market movements will later on show important changes of balance of power in the financial world. United States Steel and Pennsylvania Railroad shares have experienced significant declines. The recent additional drop in Steel was attributed to lower prices for products and a consequent shrinkage in profits, though in some quarters it was intimated that the decline was stimulated for the purpose of securing preferred stock for conversion purposes. It was the decline in Pennsylvania stock, one of the most substantial railroads on the continent, that excited most surprise. By some it was attributed to liquidation by numerous holders for the purpose of protecting less marketable securities; by others, to an attack from hostile interests, and by some to the timidity of holders who disliked the policy of expansion which the company has lately pursued. Outside of these two features the week's developments were not of an unfavorable nature.

—"I assure you, madam," said he, "that I would not be begging my board from door to door if I could but procure employment at my profession."

"Poor man!" replied the good woman, as she handed out a pie, "what is your profession?"

"I am an air ship pilot, madam."—Tit-Bits.

COLLEGE MEN IN BUSINESS.

Mr. Francis H. Leggett, the well-known grocer of New York, tells Printer's Ink something of his long and varied experience with college men who applied for positions in stores or mercantile offices. Their failings seemed to be of two sorts. First, the college graduate believes his education fits him to begin at the top of the business at a good round salary. He disdains the suggestion that he begin somewhere near the bottom at wages. Second, his education has dealt with things so far removed from business life and practice that he is hardly on a par with a boy from the public schools so far as useful knowledge is concerned, while he is hampered by whatever foppish illusions his college life may have given him.

"He knows algebra, but nothing of arithmetic," said Mr. Leggett. "Business is founded largely on arithmetic—quick mental arithmetic—that will yield results in a moment. There is no time to work out problems. But plain, old-fashioned addition and multiplication are not taught in the colleges. It is taken for granted that the student mastered them when he was twelve years old. The college graduate knows something of Greek, and he can read Caesar, but these acquirements are as useless in daily business life as his smattering of the sciences. Business is nothing more than cause and effect. A public school boy has dealt with cause and effect all his life. The college graduate has carefully been kept away from them. He has generally only a small percentage, or none at all, of the public school boy's willingness and common sense. He is past the age when he can be trained, for it is not easy to mold a young man after he has passed twenty-

THE CANADIAN CASUALTY AND BOILER INSURANCE COMPANY

Full Government Deposit Paid.

President:
ALEXANDER SUTHERLAND, D.D., Toronto.
Vice-Presidents:
H. N. BATE, Ottawa, Director Bank of Ottawa.
W. S. DINNICK, Toronto, Vice-Pres. and Mng.-Dir. Standard Loan Co.
A. G. C. DINNICK, - Managing Director.

This Company having deposited $30,000 with the Treasury of the Ontario Government, has been duly licensed to transact the following classes of Insurance

Boiler Inspection — Personal Accident Insurance
Boiler Insurance — Sprinkler Insurance
Consulting Engineers — Elevator Insurance

The patronage of the public is respectfully requested. Correspondence with Insurance Agents and those wishing to engage in the business is invited, and will receive prompt and courteous consideration.

Chief Engineer, - - - A. M. WICKENS.
Superintendent of Agencies, - J. G. BEAM.

HEAD OFFICES:
N. E. Cor. Adelaide and Victoria Sts., TORONTO, - Ont.

BRANCH OFFICES:
Temple Building, - - MONTREAL, Que.
43½ King Street W., - - HAMILTON, Ont.

INSURANCE HUMOR.

Hugh C. Munday tells the story in the Insurance Press of an enterprising broker in Brooklyn, who, upon being informed that a certain man had died, and that the brother of the deceased was now carrying on the business, wrote the latter a long letter to the effect that he, the broker, would like to have charge of the insurance, and mentioning certain ways whereby the rate could be reduced. The brother in question had been, before he came to Brooklyn, a green-grocer out on Long Island. It is worth one's while to read the reply which followed:

"Dear Sir,—I have before me your very interesting letter on fire insurance. You certainly know what you are writing about. I must confess, though, there are many things in it I do not understand

"You say I can get my rate reduced five cents for sole occupancy. Do I understand by this that I must dispossess the tenant upstairs, who is paying me $60 a month rent? This sounds nonsensical besides I often spend five cents foolishly.

"You further state if I had an automatic alarm connected with fire headquarters, ten cents would come off of the rate. It would cost over $100 to have this done, so I think it advisable to keep the hundred and pay the ten cents. It would be cheaper to keep Willie, my son, in the office, and, if a fire should occur, give him five cents to take a car to fire headquarters on Smith Street, tell them about it, and bring the engine and men back with him. The ride on the hook and ladder would compensate Willie for his patience and time spent in the office.

"A Watchman and Clock" would be, you say, to my benefit. I have a large clock on the wall now. Is yours a patent clock which stops when the fire occurs; so that, when I give my report to the insurance company, the exact time of the conflagration will show by the clock? Wouldn't they believe me without the clock?

"What salary do I have to pay the watchman? If the insurance company think I am a suspicious person (not believing me without the patent clock) why do they not have the regular policeman on the beat detailed now and then to watch my building? Would he not take the place of the watchman you mention?

"You speak in glowing terms of the automatic sprinkler. What is it? Some sort of a watering can holding gallons of water? I used to have a small can when I was in the grocery business to sprinkle the vegetables with when they looked dried up and lifeless.

"You also mention having fire-pails throughout the building. All these things, you must understand, cost money, and is there not a possibility, having all these improvements, the rate thereby being reduced at a five, ten and thirty per cent. clip, eventually there would be no rate left? I better have a rate, for if I haven't I should think it would be impossible to get insurance.

"I notice on the policy I have before me as I write, the lightning clause. Would I get anything off of the rate for lightning rods, like they have on the houses in the country?

"When time permits, please call on me and we will talk it over."

MONTREAL MARKETS.

Montreal, Nov. 18, 1903.

Ashes.—There is little new. What few offering there are of No. 1 pots bring about $5.90. Quotations for pearls are entirely nominal.

Cements and Firebricks.—Business in these lines is quieter with the approach of winter. Deliveries from the wharves are still being made at old prices. Receipts for the week ending to-day are only 300 barrels of English cement and 239,000 firebricks.

Dairy Products.—The cheese making season being now practically over, and, though stocks are reported apparently larger than at this time a year ago, there has been a distinctly stiffening tendency in quotations, which are from ¼ to ⅜c. firmer than a week ago. Prime Ontarios are held at 10¾c.; Townships, 10½ to 10⅝c., and Quebecs at 10⅜ to 10½c. The present demand for butter is mainly for local consumption, but offerings and stocks are moderate, and quotations are steady at 21½ to 21¾c. for fine Townships, ordinary at 21c., while 17 to 17½c. is quoted for dairy rolls. Last week's shipments of cheese were 50,896 boxes, as against 30,996 boxes for the same period of last year, and of butter 5,606 packages, as against 5,269 packages last year.

Dry Goods.—Trade among city retailers appears to be excellent, and wholesalers report money as coming in from this quarter exceedingly well, January payments being anticipated in a good many cases. Country collections are not so free, and, judging from travellers' letters, the late fine, open weather may be held accountable for this to some extent, but failures are only remarkable by their absence. Quotations in all lines continue firm. The Kingston Hosiery Co. announces this week the withdrawal of all quotations, and the Penman Manufacturing Co. also advises the withdrawal of quotations on half-hose and underwear until further notice.

Furs.—Quotations for new catch of furs have not yet been fully fixed. It is not expected that prices will greatly vary from those of last year. Nothing of consequence is yet coming in; a few fall lots are offering, 16c. being paid for choice skins.

Groceries.—Nothing of special interest has developed since last week, except a marked scarcity of canned corn. The combination has none to offer, and some sales are reported between houses of fair lots at 92½c. Sugars have undergone no change for some weeks, factory quotations remaining at $4.10 for standard granulated, with yellows ranging from $3.40 upwards. Molasses is held very firmly at 42c. for good Barbadoes in single puncheons. In other lines there is nothing new.

Hides.—Quotations are unrevised since last report, but beef hides are dull, tanners being slow buyers just now on account of the troubles in the Quebec shoe trade, and dealers, who are still paying 9c. for No. 1, may shortly be disposed to cut prices. Lambskins are still quoted at 70c. each, and calfskins at 10 and 8c. for Nos. 1 and 2 respectively.

Leather.—The lockout of the shoe operators at Quebec is felt to some extent in the leather trade, and the present local demand cannot be called active. Last steamers are, however, taking out considerable quantities of sole, there being a good demand in Britain for heavy leather. Some moderate lots of splits are also being exported. Prices generally are steady.

Metals and Hardware.—Though winter rail freight rates went into effect Monday, business is not reported as showing any falling off as yet. No special changes are reported in values of pig iron, and last quotations will likely hold for several months, especially as navigation will close in a week or so. Bars are easy at $1.90, with some fair sized transactions reported at

J. J. W. Deuchar, F.F.A., F.I.A., General Manager and Actuary of the Norwich Union Life Assurance Company, speaking of investments says:

"It may serve to indicate the great importance of obtaining a good return on the investments, if it is realized that one per cent. of increased interest on the funds of a company will, on the average, have as great an effect as a saving in expenditure equal to 10 per cent. on the premium income, while, if an office could count on realizing 5 per cent. interest in place of 3, it might reduce its premiums some 30 per cent., or double its bonuses."

Mr. Deuchar does not name THE GREAT-WEST LIFE; but the above statement exactly describes the happy position of its policy-holders.

ESTABLISHED 1858

Managers and Underwriters

$1.85. Boiler plates and sheets generally are unaltered in price. Ingot tin is weaker at 27¾ to 28c. for Straits; lead, steady at $3.20; copper, easier at 13¾c.; spelter, firm at $5.75.

Oils, Paints, etc.—There is no apparent falling off in the movement as yet. A good deal of cutting is complained of in glass, leads, etc., and it is said pure lead is being sold as low as $4.50. Turpentine is a little easier at 83½ to 84c. Linseed oil still weak. Single barrels, raw linseed oil, 47 to 48c.; boiled, 50 to 51c., net 30 days, or 3 per cent. for 4 months' terms. Turpentine, 83½ to 84c., single barrels. Olive oil, machinery, 90c. to $1; cod oil, 35 to 37½c. per gal.; steam refined seal, 50 to 55c. per gal.; straw ditto., 45 to 47c.; castor oil, 7½ to 8c., for machinery; pharmaceutical ditto, 8½ to 9c.; lead (chemically pure and first-class brands), $4.75; No. 1, $4.50; No. 2, $4.25; No. 3, $4; No. 4, $3.75; dry white lead, 4¼ to 4½c.

Head Office—WATERLOO, ONT.

The Mutual Life OF CANADA

has once more established its right to the above claim. It stands to-day

At the Head Of All

life companies doing business in Canada in the NET AMOUNT IN FORCE GAINED OVER all its competitors during the past five years, as shown by the Government Reports.

for pure; No. 1 ditto, 4 to 4¼c.; genuine red ditto, 4 to 4¼c.; No. 1 red lead, 4c.; putty in bulk, bbls., $1.80; bladder putty in barrels, $1.90; ditto, in kegs or tins, $2.05; London washed whiting, 45c.; Paris white, 75 cents; Venetian boxes, $2.40; 23-lb. tins, $2.55; 12½-lb. red, $1.50 to $1.75; yellow ochre, $1.25 to $1.50; spruce ochre, $1.75 to $2; Paris green, 14c. in bulk, and 15c. in 1-lb. packages; window glass, per 100 ft., $3.25 for first break; $3.45 for second break, and $4.20 for third break; per 50 feet, $1.70 for first break, and $1.80 for second break.

TORONTO MARKETS.

Toronto, Nov. 19, 1903.

Chemicals, Drugs, etc.—The situation in local drug circles may be described as one of normal activity. Prices remain very much as before. For quinine the demand has been stimulated lately by reports of greater firmness in primary markets. Advices from Britain report that the chemical market is distinguished by considerable dullness, the domestic trade being purely of a hand-to-mouth nature. Exportation is a little brisker.

Dry Goods.—Retailers are beginning to feel the effects of more seasonable weather, and wholesalers will no doubt follow suit to a more marked degree very shortly. Dress goods are in good request, and one feature which may be noted is that generally a rather more than usually good quality is asked for. Staple goods are very firm, which applies both to woolens and cottons, more particularly the latter, owing to the persistent holding of raw material. Travellers report good prospects for practically all sections of the country.

Flour and Grain.—The quotation for ninety per cent. patents in buyers' bags, middle freights, continues to be around $3.05; with choice brands a little higher. Manitoba flour is steady. Bran and shorts are both firm, with $13.50 the usual quotation for the former and $17 to $17.50 for the latter. Wheat is in fair demand, but prices have not appreciably altered since last week's quotations. Oats are a little firmer than they were, while corn, buckwheat and rye remain about the same.

Fruits and Vegetables.—A quiet market prevails for fruit, the present being more or less between seasons. Probably not much business will be done until the beginning of the Chritmas season. We quote: Apples, $1 to $2.50 per bbl.; cocoanuts, $4 per sack; oranges, Floridas, $3.50 to $4 per case, Jamaicas, $5 per bbl.; lemons, Verdelli, $4 per case; California, $5 to $5.50; Floridas, $4 to $5; bananas, 8's, $1.25 to $1.50 per bunch; 1st, $2 to $2.50; sweet potatoes, $2.75 to $3 per bbl.; celery, 20 to 30c. per doz.; cranberries, $10 per bbl., $1.25 per basket; Spanish onions, $2.75 to $3 per large case, and $1 for small. Malaga grapes, $5 to $6 per bbl.

Groceries.—The general grocery trade continues good, a state of things accentuated by the good brisk weather. Considerable movement has begun in currants and dried fruits. Currants are said to be of especially good quality, and their price is not above normal. In teas there is still considerable strength, though actual transactions apparently do not aggregate to any very high value.

Hides and Skins.—The continued easiness in Chicago still affects this as well as other markets, and little actual trading is being done. Sheepskins are firm, and have advanced 5c. since last week. Not much is doing in calfskins. Tallow is steady.

Provisions.—The supplies of really new-laid eggs are very scanty, being mostly used up in the districts of origin. For ordinary good stock 18 to 20c. is the usual price asked. Fair offerings of butter are coming in. For first-class choice dairy the demand is good, but much of that offered is off flavor. Creameries also sell well. Prices for cheese are quite steady, for large sizes the price being 11¼c., and 11¾c. for twins. Poultry is in improved demand now, the weather is more wintry. Fair supplies of venison are in the market at 6 to 8c. for carcasses and 8 to 10c. for saddles. Prices for hops are firmer, and Canadian new crop is quoted at 29 to 30c.

Seeds.—The export enquiry for alsike and other seeds is slow. Receipts in the country are not very large, but are about equal to the demand.

Wool.—The business being done in fleece wools is very scanty, there being practically no enquiry from export sources. At the same time we believe stocks throughout the country districts are by no means large. As to pulled wools, the home mills are showing a continued interest, and the movement is brisk.

The Metropolitan Life INSURANCE CO. OF NEW YORK.

"The Leading Industrial Company of America."

Is represented in all the principal cities of the United States and Canada

THE METROPOLITAN is one of the oldest Life Insurance Companies in the United States. Has been doing business for over thirty-five years.

THE METROPOLITAN has Assets of over 89 Millions of Dollars Liabilities of 78 Millions, and a Surplus of over 10 Millions.

THE METROPOLITAN pays Death Claims, averaging one for every minute and a half of each business day of eight hours, and has nearly Seven Million Policy-holders.

THE METROPOLITAN offers remunerative employment to any honest, capable, industrious man, who is willing to begin at be bottom and acquire a knowledge of the details of the business. He can by diligent study and practical experience demonstrate his capacity and establish his claim to the highest position in the field in the gift of the Company. It is within his certain reach. The opportunities for merited advancement are unlimited. All needed explanations will be furnished upon application to the Company's Superintendents in any of the principal cities.

The Canada Life's New Business

For the first half of 1903 exceeded that of any similar period in the Company's record of 56 years. Compared with over 100 similar periods in its history, the Company on this occasion

Surpassed All Previous Records

A prominent Montreal business man recently gave an agent of another company a proposal for a large policy, with the condition that it would be given to the Sun Life of Canada. This is unusual. It shows that business men have a knowledge of the merits of life companies.

Continued Progress

During the last few years the North American has made marvellous strides in all Departments tending to its upbuilding, which can readily be seen by the following figures, showing a comparison of

Three SEPTENNIAL Periods

Year	Cash income	Assets	Policies in force
1881.....	$ 39,613....	$ 88,763....	$ 1,221,712
1888.....	263,691....	666,919....	7,927,564
1895.....	581,478....	2,300,618....	15,779,385
1902...	1,270,846 ...	5,010,813....	30,927,961

A strong progressive Canadian Company giving excellent returns to its policy-holders, therefore making it a desirable Company for agents to represent. Three active agents wanted.

Abraham and Louis Blumenthal, doing business at Sydney, N.S., as the Newfoundland Furnishing Co., have been sued several times lately, and they are now seeking to effect a general settlement at 50 cents on the dollar. The business has only been established since the spring of 1903.

Mercantile Summary.

A company recently formed in Vancouver, B.C., with the aim of developing the natural gas fields at Steveston, in the Fraser valley, is said to have made several rich strikes of oil.

The Ontario Mining and Smelting Company have resumed work on the Wolf Head mine at Bannockburn, Ont. The vein is alleged to be thirty inches wide, and is said to run 85 per cent. of almost pure lead.

The Peoples Building and Loan Association,

George Moody, a prospector, is reported to have discovered some rich placer ground in Pitt Lake district, near New Westminster, B.C.

We hear of the failure of Charbonneau & Fils, doing a small grocery business at Magog, Que. Their affairs are in the hands of J. P. Royer, Sherbrooke, for liquidation. The liabilities are stated at just about $1,000.

The Toronto Bedding Company has been authorized by the Ontario Government to increase its capital stock from $15,000 to $50,000, and the Standard Chemical Company from $450,000 to $1,000,000.

The Commercial Travellers' Mutual Benefit Society of Western Ontario held a meeting in London, Ont., on Saturday last and elected the following officers: President, A. E. Barbour, London; vice-presidents, A. Anderson, Robert Tait, London; treasurer, F. H. Crabbe, London.

Mercantile Summary

John Sykes & Son's planing mill and sash and door factory at Oshawa, Ont., were destroyed by fire. Loss, $5,000; not insured.

A record cargo of grain was shipped from Fort William, Ont., recently. It comprised 248,000 bushels of wheat consigned to Buffalo on the steamship Princeton.

The New York and Ottawa Railroad was to have been sold at St. Regis Falls, N.Y., on November 18th, but the sale was postponed till some time next month.

Consent to assign has been filed by J. A. Riendeau, dry goods retailer, Montreal. With some moderate experience as a clerk, he began business "on his own hook" last January, but his career has been a brief one.—A demand of assignment has been made upon H. A. Houle, grocer, in the same city.

A project is on foot to develop the water power at Mississippi Falls, and bring power to Kingston, Ont., which is about fifty miles distant. It is thought possible that 10,000 horse power can, perhaps, be developed, and that manufacturers would be able to save something like 35 per cent. upon the present cost of power.

The Standard Coal and Railway Company, of Halifax, N.S., has purchased fifty miles of coal area adjoining their present property in the Cumberland basin. A new board of directors will shortly be elected, and development work is to be carried on on an extensive scale. The company possesses a valuable charter for a railway to extend from Maccan to Parrsboro', thence along the shore of Minas Basin to Truro, touching at Folly Village and Five Islands.

The general store firm of Price Bros., at Iberville, Que., recently reported as first offering their creditors 25 cents, and later 35 cents on the dollar, have been unable to complete a settlement, and have assigned.—An assignment has been made by J. E. Lessard, general merchant, at St. Remi de Tingwick, Que. He was formerly a commercial traveller, and began on his own account in the spring of 1900. A lack of steadiness is said to have contributed to his downfall, and several suits by Montreal houses finally led to his assignment.

The Brockville, Westport and Northwestern Railway Company, which was formed the other day to take over the old Brockville, Westport and Sault Ste. Marie Railway, has elected the following officers: President, John Torken, New York; vice-president, Clarence R. King, Philadelphia; treasurer, Henry W. Germerick, New York; secretary, Charlesten Heilshorn, New York; directors, Valentine Schmitt, M. Zimmerman, W. H. Comstock, and R. Bowie, of Brockville; James Cumming, of Lyn, and W. C. Fredenburg, of Westport. Arrangements are being made for the preliminary survey of the proposed route.

A NEW corporation has been formed under the name of the Edmonton Investments, Limited, with a capital of $500,000, and headquarters at Toronto. Messrs. R. Secord and E. D. Grierson, of Edmonton, are among the charter members. They are authorized to deal in real estate, but will not have the right to loan money for any purpose. They may also construct and operate tramways, telegraph and telephone companies and steamship lines.

Mercantile Summary.

THE Canadian Government has purchased the buildings of the defunct Prescott Brewing and Malting Co., to be used as storehouses for marine and military supplies. The purchase was made from the John Labatt Brewing Co., of London, Ont.

A VOLUNTARY assignment has been made by Hercule Girard, storekeeper, at Baie St. Paul, Que. He is a young man, formerly working on the farm with his father, and two years ago he ventured into trade without any business experience or training. The result usual in such cases has naturally followed.

THE Lindsay Collegiate Institute lecture course for the season 1903-1904 contains, as has been the case for years, some subjects of interest and some well-known names. Sir Frederick Borden will speak about the Militia, Col. Denison on Preferential Tariffs, Dr. Drummond on The Habitant, Mr. Whitney, leader of the Ontario Opposition, on Current Events. The subject of Mr. Tarte's lecture is not yet announced. The jubilee of the institute is to be celebrated on 30th June next year.

THE citizens of Cornwall, Ont., are awaiting the decision of the Singer Sewing Machine Co. as to whether that large concern will build their new Canadian factory in the town. Cornwall has offered the Singer Company some tempting inducements in the way of freedom from taxes, unlimited power, cheap electric light and some thirty acres of land. The new factory would, it is said, employ about 700 hands, and cost for plant in the neighborhood of $80,000.

A GOOD story is told at Pembroke, Ont., about that canny Scotch member of Parliament, Thomas Mackie, who has represented North Renfrew in the Dominion House since 1896. At one of his first meetings during the campaign of 1896, when the Manitoba School Question was the prime issue, Mr. Mackie was talking upon almost every subject except the school question. Somebody in the audience called out, "What about the School bill?" Mr. Mackie immediately replied, "Bring the confounded bill to my office and I'll pay it."

Mercantile Summary.

SHERBROOKE new courthouse is to be built of red granite from the Argenteuil quarries, the trimmings to be in white Stanstead granite.

THE North Vancouver, B.C., Ferry and Power Company are building a ferry steamer to accommodate 800 passengers. She will be 148 feet in length over all, with a beam of 39 feet of hull.

THE Canadian Pacific Railway Atlantic Steamship Company have established a new line to run during the winter from New Orleans to Havre, Bremen, and other European ports. The cotton trade will be made a specialty. Four steamers probably will be used in this service.

MR. GRAHAM FRASER, vice-president and managing director of the Nova Scotia Steel and Coal Co., has been appointed to join the management of the Dominion Iron and Steel Company. He will, we understand, continue to act for the former company in the capacity of consulting engineer and adviser.

THE annual meeting of the shareholders of the Hampstead Steamship Company, Limited, was held at Oak Point, N.B., on the 12th inst., and the following directors elected for the ensuing year: Lemuel A. Currey, R. Keltie Jones and Frederick S. Mabee, St. John; James N. Inch, of Oak Point, and James E. Waddell, of Kingston. Lemuel A. Currey was elected president; R. Keltie Jones, vice-president, and Frederick S. Mabee, managing director and secretary-treasurer. The company have purchased the steamers "Elaine" and "Hampstead," which they will utilize the coming summer in providing facilities for suburban travel and freight accommodation for farmers, etc., on the lower part of the St. John river.

THE following is a record of the patents recently granted to Canadian inventors in this country and the United States: Canadian Patents—C. W. Vollman, freezing tanks; H. W. Smith, pneumatic straw stackers; W. Maloney, shocking attachment for binders; C. Morin, tombstone and process of making same; M. Powers, convertible car; J. J. McLaughlin, apparatus for dispensing aerated liquid; A. McRae, pump valves; M. G. Bristow, paper files; A. G. Ronan, raw liquid fuel measures for explosive engines; M. McKellar, cloth measuring machine. United States Patents—F. K. Bell, oil can; R. J. Chowan, warping reel; G. C. Corbett, cuff holder; J. Frye, eyelets for boots and shoes; J. Frye, sieves or strainers; G. Graham, device for shifting threshing machine bodies; H. E. Hibshman, musical instruments; W. J. Mitchell, bobbin winder; J. A. Proulx, linotype leader; R. N. Riblet, bucket grip for rope; tramways; J. Waldbrook, drive or master wheel dividers for harvester binders; J. A. Whyte and G. C. Edwards, combined signaling and telephonic intercommunicating system for railways; F. W. Wolfe, lawn mower.

Mercantile Summary.

It is understood that the Dominion Government has agreed to subsidize the new floating dry dock at Vancouver, B.C., at the rate of 3 per cent. of the cost up to one million dollars. The dock proposed is to be capable of raising 11,000 tons.

The Hudson's Bay Company is reported to be about to build a flour mill at Great Slave Lake, on the Peace River. Wheat has been successfully raised in this vicinity for some years past, and the proposition to build a flour mill in such a far northern locality gives a hint as to the wonderful extent of Canada's North-West.

The annual meeting of the Canadian Coal and Railway Company, whose properties are in Cumberland county, Nova Scotia, was held in Montreal last week, when the following officers were elected: Mr. Edwin Hanson, president; Mr. S. H. Ewing, vice-president; William Hanson, R. Wilson-Smith, W. C. Finley, James Roger and D. W. Wilson, directors; A. G. Watson, secretary-treasurer.

Owing to a serious fire last week in their factory premises at Maisonneuve, a suburban municipality of Montreal, Messrs. Laniel & Co., boot and shoe manufacturers, have had to call their creditors together, and propose a 30 per cent. compromise. They were only partially insured, namely, to the extent of $21,000, which insurance money is all held by the town as a guarantee for the due fulfilment of a bonus arrangement. They owe about $20,000 of merchandise liabilities, with available assets of only $5,000 to $6,000. Here is a feature which illustrates the unnaturalness of the bonus system.

We observe the issue of some $16,000 in debentures of the town of Wetaskiwin, Alberta, part having seven years and part twenty-one years to run; $12,000 is for fire protection and $4,000 for local improvements, both of which purposes show that the inhabitants are prudent people. Wetaskiwin is a town about ten years old, incorporated in May, 1902, having now about 2,000 inhabitants, and increasing rapidly in size and population. It is situated on the Calgary and Edmonton Railway, some 100 miles north of Calgary. The municipal assessment for this year was $479,084, and total assessment, including school farm lands outside the town, $641,084. The rate levied was 17½ mills on the dollar, viz., 5 mills municipal assessment and 12½ mills school assessment. The public debt of the town is something under $1,000 (one thousand dollars). We have seen the place. It is a very solid little town, with flour mill, three elevators and some five stores and hotels, and a large number of them being constructed of brick. There are agencies of three chartered banks. The surrounding country which supports the town is well settled for nearly 100 miles in mixed farming, ranching and grain raising. And the prospects of the place are good.

Principal payable in gold on the 9th of December, 1923.

Each tender must state a lump sum, payable in London, Ont., on the 10th of December, 1903, where and when the debentures will be delivered. Highest or any tender not necessarily accepted.

A. M. McEVOY,
County Buildings, Treasurer.
London, Ont., Nov. 3rd, 1903.

THE Standard Oil Company has declared a quarterly dividend of $12 on its stock, which makes $44 per share paid this year in dividends.

A NEW and reduced schedule of wages is being proposed by the Dominion Iron and Steel Company, which, it is believed, will be accepted by the men without trouble.

A SYNDICATE composed of Belgian and French capitalists, and headed by M. Duret, has purchased the timber limits and sawmills of Alex. Baptist at Three Rivers, Que.

THE Richelieu and Ontario Navigation Company express the intention of reconstructing the steamer Montreal, which was burned some months ago. The old hull will be used, and the old design followed in nearly every way.

THE PRODUCE EXCHANGE IN FAVOR OF RECIPROCITY.

President Burgess, of the New York Produce Exchange, on Saturday telegraphed John Miller, president of the Minnesota branch of the Reciprocity League of the United States, that the Board of Managers had received the invitation of the League too late to send representatives to the Interstate Conference on Reciprocity with Canada, to be held at Chicago. Mr. Burgess, however, added: "The New York Produce Exchange is in favor of a proper reciprocal treaty with Canada, and being in sympathy with any movement in that direction wishes success to the conference."

The invitation for the Produce Exchange to send delegates read in part: "During the last year a number of organizations aiming at reciprocity with Canada have been formed in various parts of the country. These organizations have undertaken to attend to their own proper local work and also work of a national nature. The time has come when, in the opinion of those who have been doing this work in different sections, there should be an interstate organization to direct the campaign for reciprocity with Canada, so far as its

interests or national aspects are concerned. There should be an organization in each State charged with moulding public opinion in that State and influencing its Congressmen and Senators, but there should be also an interstate organization that should look after the presentation of our case to the Joint High Commission and before Congress, and that should have authority to represent in a national way all of the friends of reciprocity with Canada. The Joint High Commission is likely to meet ere long, and it is quite probable that in the near future whether we shall have reciprocity with our northern neighbor or not will depend largely on whether the overwhelming sentiment in favor of it shall be efficiently organized and ably directed—which can only be through the agency of concrete special organization charged with the responsibility and endowed with authority. It is impossible to overestimate the importance of exerting ourselves to cultivate and hold a market that yearly takes $130,000,000 worth of American goods. There has been within a year a tremendous growth of popular sentiment in favor of reciprocity with our northern neighbor. The time is ripe for a pull altogether.—N.Y. Journal of Commerce.

UNITED STATES FINANCIAL CONDITIONS.

Henry Clews & Co., in their circular letter, dated New York, November 21, 1903, say:

Despondency is gradually disappearing in Wall Street, and a more confident tone is taking its place. This is because heavy, forced liquidation is over, and unfavorable developments have been so thoroughly discounted that bear operations are becoming less profitable and increasingly dangerous as evidences multiply that values are down as low, if not lower, than intrinsic conditions warrant. Some of our very best securities are now selling on a 5 to 5½ per cent. basis, and their market value has shrunk fully one-third or more within a few short months, while their dividend capacity, be it noted, remains unimpaired. Even if dividends on the best stocks were reduced from 6 to 5 or from 5 to 4 per cent., which is not at all likely, the declines would still be greater than security reductions could justify, simply because recent prices represent emergency or panic sales. Undoubtedly the strong have been protecting themselves at the expense of the weak; hence the late decline has been not only abnormally rapid but abnormally steep; and it naturally follows that as soon as the crisis is passed a recovery to the normal will be in order. One of the most favorable influences towards recovery will be the forthcoming improved financial situation. Before long funds sent to the interior will begin to return, and the increasing supplies of grain, cotton and security bills are almost certain to continue bringing gold from Europe. The present downward tendency of values in many of the merchandise markets has the twofold effect of stimulating exports and checking imports, thus strengthening our trade balance and encouraging an influx of gold. As for the iron and steel trade, lower prices for products are still predicted; but this will result in increased orders, and it now seems as if these conditions had been fully reflected in present prices of steel securities. Steel stocks, and a great many other securities also, have been steadily passing from weak into stronger hands, where they will find a safe lodging place, at least until better figures can be had.

DIVISION OF RAILWAY EARNINGS.

Slason Thompson, head of one of the bureaus of the General Managers Association, recently addressed a letter to the railway companies, asking the question, "Are there a million owners of railway securities in the United States"

"Thirty-nine of the leading railway companies of the country responded," said Mr. Thompson to-day. "They represent 107,040 miles out of the 202,471 of the entire track mileage in the United States. They gave the total number of stockholders on their books as 191,387. This is pretty nearly equal to two stockholders of every mile of railway. The ratio on the Illinois Central, as given by Mr. Stuyvesant Fish, is a little over two to one. On some of the roads the ratio rises to three to one, and in two cases as high as eight to one, and in one case the ratio swung as far as one to six the other way. Applying two to one as the ratio, approximately, the total would give 400,000 stockholders in round numbers for the 200,000 miles of railway in the United States as owning $6,024,201,295 of capital stock as reported June 30, 1902. Assuming that the $6,109,981,659 funded debt is as widely distributed among bondholders, and the railway ownership would appear to be held in something like 800,000 hands.

"But large as these figures are, and approaching the total of railway employees as they do, they by no means represent the total of those interested in railway ownership. The figures given are for registered stock, and as the comptroller of one of the largest systems wrote: 'It is very probable that the number of actual stockholders is twice as great as the number of registered stockholders.' Then there is the holding of railway stock by insurance companies, extending their ownership among thousands. And what is true of these institutions as to stocks is also true as to railway bonds—only more so. In one way or another the people of the United States own the railways of the United States, and something like 2,000,000 persons, through wages, interest and dividends, divide two-thirds of their gross earnings of $1,726,380,267 among them, and the other third goes for fuel, taxes, supplies and equipment." — Rand-McNally Bankers' Monthly.

—There has been considerable trouble between the Canadian Pacific and Canadian Northern Railway companies, and the Canadian Underwriters' Association over the doubling of rates on grain stored at the terminal elevators at Fort William and Port Arthur. The companies have submitted, so far as the ordinary elevators are concerned, but have so far refused to insure grain stored in the C.P.R. elevator at Fort William, and the C.N.R. elevator at Port Arthur. Grain men, who in the past wished to raise money on grain stored in these elevators were asked by the banks to produce their insurance policies. Owing to the new arrangement this plan is being interfered with, and the discussion waxes hot.

FINANCIAL REVIEW.

In our last review, we noticed that the movement of the crops this year seemed to be slower than usual inasmuch as the movement of circulation in September this year was not much more than half of what it was in September last year. But the month of October is making up for this; the increase during that month being nearly $7,000,000. This gives evidence of a more active movement of circulation than has ever taken place in any one month. The circulation on the 30th of October amounted to $70,480,000, leaving a margin of only $7,000,000 before the whole circulating power of the banks was reached. But the increase in October was $6,700,000; and if circulation has increased during this month of November, or part of it, as it has in some former years, the margin would practically all be gone. It is true that for the whole month, the circulation generally shows a decrease in November; but during this very month before a decrease set in, there must have been an expansion to some extent, leaving the margin almost exhausted. This increase of circulation to nearly the amount of capital is by far the most extraordinary feature of the banking of recent years. There used to be always so large a margin that the circulating power of the banks as a whole, was never subject to serious consideration. It used to be the case that some of the smallest banks always ran up to the limit of their circulation in the month of October; but there were always most ample supplies of available notes in the hands of the other banks. This was a part of that feature of elasticity which Canadian banks were so proud of. If we go back for a period of ten years we shall see what the position formerly was: Thus;

Oct. 31st.	Circulation.	Capital.
1893	$36,900,000	$62,082,000
1895	34,600,000	61,900,000
1897	41,500,000	62,200,000
1898	42,500,000	63,000,000
1899	49,500,000	64,300,000
1900	53,100,000	66,200,000

But now look at the change which has taken place during the last three years:

1901	$57,900,000	$67,500,000
1902	65,900,000	71,100,000
1903	70,400,000	78,286,000

It is perfectly evident, therefore, that whereas formerly there was always a margin that could not possibly be exhausted, we are now in such a position that the banks as a whole have practically no margin left. For the mere "till-money," as bankers call it, meaning the amount in the hands of their tellers for daily business—would be nearly as much as the whole circulating power amounts to. It seems evident that a considerable increase of capital must still be called for if the banks are to be prepared for an increase of business in coming years. For one remarkable feature of the increase of circulation over last year is that the crop of the Northwest can hardly be worth more money than that of last year; which means that no more money has been required for the crop of the Northwest than formerly. The increase, then, must have arisen in the other parts of the Dominion, and can be accounted for only by the increased value of the crops of Ontario, the high price of dairy products, the high price of lumber, and the activity of the trade, together with the general stimulus of business arising from all these causes. It can be well understood that banks may be somewhat reluctant to make a permanent increase in their capital merely for the sake of additional circulating facilities that are required only for a few weeks—(from five to eight at the most)—during the year; for on this capital they must pay a whole year's dividend. If, then, they have not the means of employing the capital during the rest of the year at the same rate which they pay out in dividends, the increase of capital would be a positive disadvantage

Of course, in the case of those banks whose rest is equal to the capital, this observation will scarcely apply; for by calling up a certain amount of capital, they will get double that amount of money in. There can be no doubt that it is desirable to restrict circulation within the limit of capital; and none are more interested in this than bankers themselves, as they are all practically guarantors for each other's circulation. Looking, however, to the future of the Northwest, and judging from the last few years of experience, there can be little doubt that circulation all the year round is likely to be maintained at a higher level than formerly. It may, consequently, suit the purposes of the banks very well to increase their capital permanently To appreciate the bearing of this remark, let us look at the figures of the lowest circulation for ten years back, as follows:

Lowest Level.

1892	circulation	$32,400,000
1893	"	31,900,000
1894	"	28,400,000
1895	"	28,400,000
1897	"	30,800,000
1898	"	36,500,000
1900	"	42,800,000
1901	"	46,000,000
1902	"	50,600,000
1903	"	55,800,000

It will be perceived that the volume of circulation for the whole year round during the last year or two is at least twenty millions more than it was ten years ago, a condition of things which is not likely to be receded from even in a period of such depression as may succeed the present expansion. For the increasing areas of land brought under cultivation in the Northwest are likely to far more than make up for any decrease that might be caused by such depression. But the probabilities are that the increased development of the Northwest will ensure a permanently higher level of circulation, and almost certainly lead to largely increased requirements even above the present high level during the fall of the year. Time only will show.

There have been very great changes in the banking position generally during the past year, and especially in the remarkable increase of discounts. The increase amounts to no less than $65,000,000—an unprecedented sum, and one which may well call for grave consideration as to the quality of the increase. If the quality of these discounts is good, there need be no apprehension; for the amount of reserves is still abundantly large: And $27,000,000 of the increase has been provided for by calling in money lent on bonds and stocks. The mere increase in amount is, therefore, not calculated to cause apprehension. But Government returns of loans can give us no insight whatever into their quality. And this after all is the vital matter.

We present below a condensation of the monthly statement of Canadian banks for October, 1903. It is compared with the bank statement for the previous month, and shows capital, reserve, assets and liabilities; average holding of specie and Dominion notes, etc.

Canadian Bank Statement.

LIABILITIES.

	Oct. 1903	Sept. 1903.
Capital authorized	$97,046,666	$97,046,666
Capital paid up	78,286,682	78,057,190
Reserve Funds	49,989,361	48,897,498
Notes in circulation	$70,480,611	$63,741,270
Dominion and Provincial Government deposits	6,996,436	6,886,296
Public deposits on demand in Canada	118,070,088	116,701,497
Public deposits at notice	275,939,608	275,081,027
Deposits outside of Canada	29,101,329	35,391,668
Bank loans or deposits from other banks secured	573,006	515,428
Due to other banks in Canada	5,061,977	4,553,233
Due to other banks in Great Britain	3,334,191	3,863,586
Due to other banks in foreign countries	2,080,296	1,423,813
Other liabilities	9,102,714	10,732,913
Total liabilities	$520,740,325	$518,890,806

ASSETS.

Specie	$14,219,299	$14,717,111
Dominion notes	29,980,289	30,330,480
Deposits to secure note circulation	3,130,844	3,130,844
Notes and cheques on other banks	19,162,359	18,069,250
Loans to other banks, secured	573,006	515,428
Deposits with other banks in Canada	6,548,608	5,727,632
Due from banks in Great Britain	11,354,474	5,936,832
Due from other banks in foreign countries	13,489,646	18,240,336
Dominion or provincial Govt. debentures or stock	11,135,706	11,142,682
Other securities	52,827,444	52,562,189
Call loans on bonds and stocks in Canada	40,728,320	41,650,065
Call loans elsewhere	30,585,526	36,538,040
	$225,735,524	$238,560,880
Current Loans in Canada	380,823,162	373,633,072
Current Loans elsewhere	23,939,637	24,118,210
Loans to Dominion and Provincial Governments	1,965,964	1,471,990
Overdue debts	2,140,013	2,042,238
Real estate	775,645	787,154
Mortgages on real estate sold	716,339	717,954
Bank premises	8,748,055	8,625,443
Other assets	7,666,665	6,747,406
Total assets	$660,520,201	$656,704,532
Average amount of specie held during the month	14,541,628	14,449,361
Average Dominion notes held during the month	29,803,311	29,264,103
Greatest amount notes in circulation during month	71,339,031	65,089,739
Loans to directors or their firms	11,347,489	11,578,494

ABSTRACT OF BANK RETURNS.

Description.	Oct. 31st, 1902.	Oct 31st, 1903.	In Month 1903.
Capital paid up	$71,137,000	$78,286,000	In. $229,000
Circulation	65,928,000	70,480,000	" 6,739,000
Deposits	408,182,000	435,738,000	Dec. 3,389,000
Loans, Discounts and Investments	415,821,000	473,402,000	Inc. 7,920,000
Cash, Foreign Balances, Net & Call Loans	176,025,000	163,790,000	Dec. 5,261,000

Small	$ 12,463,000
	$ 39,808,000

Gold held, $26,733,000.

The Molsons Bank will open a sub-branch at Wales, Ont., under the supervision of W. S. Conley, manager at Morrisburg, about the first of December.

THE MANUFACTURERS' PROPOSALS.

If there was any doubt about the attitude of the Canadian Manufacturers' Association on the subject of the tariff, that doubt has been set aside by the definite pronouncement made a week ago at the manufacturers' dinner in the King Edward Hotel. They not only want, if Mr. Drummond, the president, interprets them correctly, a revision of the tariff, but they want, as the third of the paragraphs we quote below indicates, a higher tariff. We quote from Mr. Drummond's address what he tells us the manufacturers desire:

"We favor an immediate revision of our present Canadian Customs tariff, and the adoption of a general tariff, framed especially to meet Canadian conditions, based in principle upon and approximate to that now in force in the United States, a tariff that shall protect Canadian industries and pursuits as efficiently as the tariff of the United States protects the industries of that country.

"We favor a policy of reciprocal preferential trade within the British Empire, whereby through readjustment of their respective fiscal systems, the United Kingdom and her colonies will each grant to the products of the other a substantial preference as against the products of foreign countries.

* * * * * * * * *

"We believe that to make our present Canadian preference of 33 1-3 per cent. in favor of Great Britain of real value to her against her foreign competitors, the base of Canada's general tariff must be raised sufficiently to make the percentage form of preference really effective. The 33 1-3 per cent. preference is naturally of no service whatever to British producers in enabling them to meet the slaughter prices of their foreign competitors, if the article they desire to sell us is, as in the case of steel rails, for instance, on the free list of our Canadian Tariff. In such case we have nothing to give."

The opinion has already been expressed in these columns that there is real need for tariff revision, our industries having, since the present tariff was adopted, made progress to such an extent that existing inequalities in duties levied should speedily be cured. To this, there could be no reasonable objection. But to insist that our tariff should be based upon and approximate to the United States tariff, as the very first sentence indicates, is a proposition that instantly rouses objection, for the average Canadian thinks the United States tariff too high; and besides, he resents some features of it that especially gall us. Mr. Drummond craves "a broad, efficient, Canadian policy for the upbuilding of the whole Dominion," and so do thousands more. But it is necessary to remember that the manufacturers are not the only judges of what is best for the country; and assuredly there are many, agriculturists and merchants, laborers and taxpayers, who will not agree that a tariff wall such as the United States has surrounded herself with is the broadest and most efficient mode of building up all classes in this country. Our commercial and financial outlook is better to-day than that of the United States with their trusts and combines. Granted, that protection has done much to build up manufactures in that country, there are some monopolistic features which accompany protection that we may well pray to be guaranteed against before we accept it on such a scale as theirs.

The Canadian people, as they grow in wealth and comfort, increasingly demand, as any merchant will tell you, "good goods." And our people wish to buy goods to suit them, wheresoever they are made. While we are heartily in sympathy with fiscal measures that would protect Canadian manufacturers who aim to produce goods of the highest quality possible, it is common sense and common prudence to protect in reason an industry which is in every way suited to Canada. And while we would like to see a tariff framed in the interests of Canada first, we are by no means sure that to erect a tariff wall that shall exclude practically all foreign manufactures is a wise proceeding. Our carrying trade must have attention; our foreign merchants must be considered; the fact that no country can do a successful export trade which does not also buy abroad, cannot be disregarded.

The view of any statesman who aims to frame a satisfactory tariff for Canada needs to regard, first and most favorably, industries which are adapted by their nature for this country. If such exist and are under any necessary disability, let that disability be removed as far as legislation can do it. No foreigner should be allowed to make a dumping-ground of Canada, on terms unfair to legitimate and well-conducted industries already in progress amongst us. Cheap goods can be bought abroad too cheaply for the good of this country. But it is not necessary, we conceive, to make the United States tariff our model. To do so will certainly result in antagonizing the Canadian manufacturers in the minds of a great mass of our people who are already disposed to think that our factories are doing well enough. Some of our industries, we know, are not doing well enough, but are seriously handicapped by foreign competition, and we should be glad if measures can be framed to assist them. Still, if in expectation of an impending election the manufacturers propose as a war-cry, "protection as the United States have it," we warn them that they are in danger of incurring the criticism that Sir John Macdonald pronounced upon them when he was introducing the National Policy. Said Sir John; "Those who care to be protected at all want all the protection they can get. They are like the squaw who said of whiskey, 'a little too much is just enough.'"

THE CATTLE TRADE.

Any slackness discernible in the demand for cattle in the Toronto market may perhaps be attributed to the fact that insufficient attention has been paid to the quality of the offerings. The high-grade stock sells readily at fair to good prices, while inferior animals drag and sometimes spoil the market to a certain extent for superior kinds. However, at the last market held, a firmer feeling prevailed, and prices for good export cattle went up a fraction. Quite an active trade was done in butchers' animals, and all the offerings sold quickly. A continued brisk demand

exists for high-grade milch cows. Calves as well as stockers and feeders continued steady, with no special feature worth noting. Sheep and lambs went with a good enquiry, and a shade higher prices were willingly paid. A considerable degree of easiness was traceable in hogs, though offerings were somewhat small, and prices fell 10 to 15c. per cwt. At the sale at the Union Stock Yards, Toronto Junction, which sales are becoming an increasingly important factor in the Ontario live stock trade, a brisk business has been transacted this week. The total arrivals for the Tuesday sales were 50 cars, containing about 880 cattle, 1,236 sheep, and some hogs. Most of these were sold beforehand, and the prices realized were on the whole very good.

The following summary will give an approximately accurate idea of the range of local prices:

Export cattle, ex-choice	$4 50	to	$ 4 75
do. choice	4 20	to	4 40
do. others	3 75	to	4 10
do. cows	3 50	to	4 00
Butchers' picked lots	4 20	to	4 50
do. good	3 75	to	4 00
do. fair to good	3 30	to	3 70
do. rough to common	2 00	to	3 00
Good cows	2 75	to	3 35
do. rough	1 75	to	2 25
Bulls, export, heavy	3 50	to	4 00
do. medium	3 00	to	3 40
do. light	2 75	to	3 00
Stockers	3 00	to	3 25
do. light	2 75	to	3 00
do. common	2 00	to	2 40
Light bulls	1 75	to	2 50
Feeders, short-keep	3 75	to	4 00
good feeders	3 50	to	3 70
do. medium	3 25	to	3 50
do. bulls	2 50	to	3 00
do. common and rough	2 00	to	2 50
Milch cows, each	30 00	to	60 00
Export ewes, per cwt.	3 25	to	3 40
do. bucks, per cwt.	2 50	to	2 75
Culls, each	2 00	to	3 00
Lambs, per cwt.	3 75	to	4 25
Calves, per lb.	0 03½	to	0 05½
do. each	2 00	to	10 00
Hogs, select, per cwt.	4 85	to	0 00
do. fat, per cwt.	4 65	to	0 00
do. light, per cwt.	4 65	to	0 00

In Montreal, owing to the more seasonable weather, and the fact that the close of navigation rendered competition for freight space more pressing, there was last week a distinct improvement in the demand for cattle. Supplies, too, were not large, so that everything offered sold with more than usual readiness. Choice beeves realized 4¼ to 4½c., good, 3½ to 4c., and common down to 2c. per pound. Sheep were held at 3 to 3¼c., and lambs up to 4c. per pound.

The Old Country markets for cattle, according to last reports have been poor. Indeed, while the prices realized in Liverpool early this month were not absolutely so low as have occasionally been recorded in the past, the dullness which prevailed is described as having been almost unprecedented. The prices realized in London, so far as quotations have come to hand, range from 10½ to 11¾c. for Canadian beeves, and 11 to 11½c. for sheep. In Liverpool, a cattle and meat trades section of the Chamber of Commerce is being organized, which may be expected to be of benefit to the live stock interests of this country, if they will put themselves in touch with it.

THE DRY GOODS BUSINESS.

The change to cooler weather has resulted in marked improvement in the demand for seasonably heavy goods, and both retailers and wholesalers report much greater activity. Now that this has started, it is likely to continue, for the open weather has induced many farmers to continue working in their fields later in the season than usual, the result being a smaller amount of money in circulation for grain and other farm products, with which to purchase clothing, etc. During the last week or so, these conditions have been changed, and travellers in the country districts especially report great interest in dry goods on the part of the merchants. On the whole, though for the reasons aforesaid, business has not shown until the last few days, any great briskness, retail stocks are by no means heavy. With the demand for heavy woolen goods which has already set in apparently in earnest, it will not be long before wholesalers will be called upon to fill sorting orders at a rapid pace.

The chief feature of interest continues to be raw cotton; the price of which continues to harden. "Middling uplands" is now (in New York) about $13.50 per bale higher than it was last November, and it cannot be denied that the indications point rather to future rises. Production seems to have been already overtaken by consumption; and unless the estimates of the new crop, which certainly seem accurate prove altogether misleading, it is difficult to see how the price can fail to advance in sufficient volume to make a material difference to manufacturers all over the world. Manipulation has no doubt been responsible for a good deal of the erratic action of the raw cotton market during the past six months, but behind all this, it is being realized more clearly every day that the enhanced value rests upon the basic fact that the supply is only barely equal to the demand. A week ago, Canadian cotton sheetings were advanced 2½ per cent., which makes a total increase this year of 7½ per cent. The position of these goods is very strong, a feeling which is not diminished by the scarcity of woolen blankets. Some of the knitted goods manufacturers, too, are indisposed to quote prices ahead. Difficulty has been experienced in getting deliveries to time, and what looks like an upward movement has set in.

As to the prospects for a good spring season's trading they are thoroughly good. Travellers are already showing complete lines of samples for dress goods, and they say their efforts have already met with good success. Prices both in domestic and imported materials reign very firm.

INCOME AND THE COST OF LIVING.

Some statistics recently compiled in the United States serve to show in pointed form that what are known as prosperous times do not necessarily imply an ideal condition of things for the average wage-earner, or the possessor of an independent income. From figures prepared for the United States Census Bureau, it appears that the average cost of living in that country has increased from $72.45 per capita in 1897, to $99.45 per capita in 1903, or an advance of

nearly 30 per cent.. These figures are taken from wholesale prices, and are on a basis of the articles of consumption usually considered as the ordinary necessaries of life. Breadstuffs have increased in the six years from $10.58 to $17.47, meats from $7.52 to $9.26, dairy and garden produce from $8.71 to $13.08, other foodstuffs from $7.88 to $9.18, clothing from $13.80 to $17.13 per head of population.

This would not be so hard to bear if the ability to pay more for the price of living had increased proportionately. But it will surprise most people, who hear so much about the happy lot of the working-man in the States, to know that the exact contrary has been the case. At least, so say the figures presented in the last annual report of Mr. Carroll D. Wright, United States Commissioner of Labor. According to this document wages have increased from 10 to 20 per cent., in some instances, but a comparative table is given of the average wages paid to some fifty classes of employees in the first quarters respectively of 1897 and 1903, from which it is seen that the total increase in wages for the various trades, etc., has been $236, while the total decrease for various other trades, included in the fifty, has been $610. It thus appears that, if figures for this fragmentary period represent the conditions fairly, the wage-earners of that great country were worse off in 1903 than in 1897. For Canada, we believe the first comparison, as regards the cost of living, holds approximately true, but as to the average remuneration for labor, this country has probably been much more fortunate, though it is not too much to say that there has been no general increase in wage-earning capacity commensurate with the rise in foodstuffs and clothing.

In connection with the above considerations, the Brooklyn Eagle recently pointed out that the advance in the cost of necessaries has kept pace with the organization of the big trusts in the United States. The total capitalization of the trusts has been estimated to amount to $7,536,000,000, while the increase in the cost of living during six years for 76,000,000 people in the States would amount to $2,052,000,000, which is equivalent to about 27 per cent. on the above-named capitalization. According to this calculation, the people of the United States pay the piper for the trust luxury with a vengeance.

BOILER INSPECTION.

Such a disaster as that which took place last week in the United Factories, at Newmarket, and which might easily have been attended with more far-reaching fatal results than was fortunately the case, draws renewed attention to a state of things which has often before called for a remedy. There is one clause in the Ontario Factories Act which says that no boiler shall be used which is not insured in some duly authorized boiler inspection company, or that has not been inspected within a year by a competent man who has had charge of a boiler and engine for not less than 5 years, or who holds a certificate as a stationary engineer. Leaving the present explosion out of consideration, the loop-hole for danger probably is opened by the second clause of the above excerpt, for in many cases, factory-owners get their own engineers to inspect their boilers in order to save expense. In Quebec Province and in England, the law is more strict, and, especially in the latter country, where its disregard is attended with heavy punitive consequences, much more stringently carried out. Frequent examination of both the interior and exterior of boilers, and careful attention to the unhampered working of steam safety gauges and valves are the price of safety. The boiler insurance companies are doing good work, and the men who have the closest knowledge of the subject agree that what is needed is thorough Government supervision. The Ontario Association of Stationary Engineers has for long been trying to obtain legislation to safeguard the interests of factory-workers and the public along these lines. The explosion last week gives one more hint as to a danger which is constantly increasing in this Province, with the growth of its manufacturing industries.

ONTARIO MINERALS.

The report for 1902 of the Ontario Bureau of Mines reached us last week. The preface, or introductory letter of the Director to the Minister is dated 30th April. Mr. Gibson says therein that many enquiries were made of the Bureau during the past year respecting minerals and mineral deposits, both by prospective purchasers and sellers. "The substances involved included almost the entire list of economic minerals found in the Province, but iron ores and iron ore lands were perhaps in greatest demand. Nickel, gold, copper, zinc, molybdenite, iron pyrites, feldspar, mica, gypsum, petroleum, natural gas, actinolite, corundum and graphite have all formed the subject of correspondence, as well as limestone, for the several varieties of which, suited for particular uses, there has been much enquiry. Marl for cement is abundant in Ontario, and numerous deposits are held for sale by the owners. The same may be said of peat bogs. There has also been some enquiry for sand to be used in glass-making, and kaolin or china clay for the manufacture of pottery." All which is promising. The Bureau also devoted attention, months ago, as we have before remarked, to the peat bogs of old and new Ontario, and the lignites north of the height of land. An illustrated report by Mr. W .E. H. Carter occupies pages 191 to 234 of the volume. It was compiled in the midst of last winter, when the Pennsylvania anthracite strike took place, and when Canadians were pondering much upon the subject of fuel. There is further a report upon the mines of northwestern Ontario, by Prof. W. G. Miller, which gives an account of the gravel deposits on Savant lake, in which the existence of placer gold was reported a year or so ago. "These investigations," says the Provincial Geologist, "did not go to show that a placer field of any great value is to be looked for in that region. Gold undoubtedly is to be found in the gravel, but in small quantities, probably too small to be profitably worked under present conditions."

There are various reasons suggested in the report for the comparatively slow progress of mining in Ontario. Principal among them is the frequent re-

moteness of her mineral deposits from lines of railway, or even from water communication. The transportation question is of great moment. Says the Director: "Witness the opening up of the nickel fields of the Sudbury district which followed immediately on the building of the C.P.R., and which are now the backbone of Ontario's mining industry. So it was also in the cases of the iron ranges of Michipicoten. The Helen iron mine was discovered, but although situated within a few miles of deep-water on Lake Superior the ore could not be mined or marketed until the rails of the Algoma Central connected the mine with the harbor.

Turning to the statistics of the report it is seen that the nickel, copper, iron and steel industries have made great strides in the last two or three years. Two tables show the production of metallic and non-metallic substances for the past five years. We condense them thus:

	Metallic.	Non-Metallic.	Total.
1898	$1,689,002	$5,546,875	$7,235,877
1899	2,055,592	6,361,081	8,416,673
1900	2,565,286	6,733,338	9,298,624
1901	5,016,734	6,814,352	11,831,086
1902	6,257,499	7,134,135	13,391,634

The production of gold and silver in the Province has declined since 1900. Among non-metallic substances the prominent items are brick, stone, lime, cement, petroleum, since natural gas is no longer so largely produced and salt shows no great figure.

Summary of Mineral Production, 1902.

Product.	Quantity.	Value.
Metallic.		
Gold, oz.	13,625	$229,828
Silver, oz.	96,666	58,000
Copper, lb.	9,720,000	680,283
Nickel, lb.	11,890,000	2,210,961
Iron Ore, tons	359,288	518,445
Pig Iron, tons	112,687	1,683,051
Steel, tons	68,802	1,610,031
Molybdenite, lb.	6,500	400
Zinc Ore, tons	950	11,500
		$7,002,499

	.....	$13,391,634

(a) Included in gold. (b) Value of refined products and crude used for gas, fuel, etc.

With respect to the number of men employed in different departments of mineral industry in the Province, the brick makers appear to be at the head, 3,183 hands being at work in brick-making at $235 a year, average. But the nickel, copper, iron, and steel works employ 3,263 hands and pay an average of $531 a year; 890 are lime-burners and 727 are cement-makers. A comparison made on page 12 of the report shows that where in 1898 the metallic output of the Province was 23 per cent. of the total yield, it had reached 42 per cent. in 1901 and 47 per cent. in 1902. A great gain is thus shown over the non-metallic industries.

TORONTO INDUSTRIAL EXHIBITION.

The promises of great earnings held out at the time of the Dominion Exhibition in Toronto this year have not proved disappointing, for, according to a report recently issued by the management, the receipts of the fair were $52,000 greater than those of the previous best year on record. This is leaving out of consideration the grants of the Dominion and Ontario Governments. The directors of the fair, however, are not satisfied with past achievements; they are looking for new worlds to conquer. With this end in view, they want more money with which to erect new buildings and make more improvements, and they have decided to ask the city council to submit a by-law to the ratepayers for the raising of $200,000. The chief part of this expenditure would be required for the building of an amphitheatre for the exhibition and judging of live stock. It is believed that with better facilities, the number of exhibits in this line may be doubled, and the interest in the fair correspondingly increased. If the Dominion Government's grant of $100,000 to aid the exhibition of pure-bred stock at St. Louis Fair could be diverted to home use, which under the circumstances arising from the vexatious action of the St. Louis authorities does not seem improbable, it might be possible to develop this feature on a very extensive scale. Another part of the money would be used for the building of a permanent home for "processes of manufacture," a feature which drew so much attention at the fair last summer. New

horticultural, administration, and press buildings are also proposed, besides a general re-arrangement of entrances, turnstiles, etc., which latter, judging from the unpleasantness last Labor Day, is a thing much to be desired. The management of this year's fair have deserved well of the city, and ought to be dealt liberally with. Several of the Association's accounts are still in course of adjustment, but the authorities state that before long a detailed report will be presented to the public.

AMERICAN ANXIETY FOR RECIPROCITY.

Editor Monetary Times:—

Sir,—I have seen your article in last week's paper on the subject of reciprocity, replying to a letter in the same paper which seems to be in favor of reciprocity. I do not know who in Windsor would write that letter, but I don't think that many in Walkerville would write it, for we are pretty tired of Uncle Sam's professions of friendship while his acts are so unfriendly. We along this frontier would benefit greatly by a reciprocity treaty with the Americans, but at the same time I do not believe in bowing down before them; and it makes me laugh to see that now when we are prosperous, and more independent of them than we ever were before they are all of a sudden anxious to trade with us on a reciprocity basis.

They are getting to know that Canada is a great country, and they all at once make a profession of extreme friendship; that is, some of the folks along the Northern states do so, but the politicians at Washington are as far as ever from friendliness to Canada. We like the Americans as we meet them coming and going, but we will never, I am sure, get anything like justice from their government, who will get the better of us whenever and wherever they can. I want to back you up in the stand you take in that last article. I think you are dead right; and I believe that we should not go out of our way to help them to get reciprocity.

Yours very truly, G. S. C.

Walkerville, Ont., 23rd November, 1903.

RECIPROCITY WITH THE UNITED STATES.

Editor Monetary Times:—

Sir,—I have read your article in the Monetary Times of the 20th, on Reciprocity with United States with great pleasure. I am quite sure you are correct in saying that the feelings of the people of Canada are against any further effort in the direction of asking the United States people to reciprocate. I wish it were possible for the writer of the article to deal also with the subject, now for the first time appearing in our papers, of the possibility of the United States acquiring the French Islands in the Gulf of St. Lawrence. The British Government and the Dominion Government should see that such a thing is impossible. The United States should be informed that we also have a Munroe Doctrine. Canada should notify all parties that we would consider it an unfriendly act of any Government to acquire these islands. They can only be used as bases from which smuggling and encroachment upon our fisheries will be carried on, and possibly be fortified and greatly impede any fleet, either British or Canadian, coming in from the Atlantic to assist Canada.

BUSINESS MAN.

Sarnia, Ont., 23rd November, 1903.

AN IMPORTANT INDUSTRY.

A letter of Monday last from Ottawa gives some interesting information about the progress of the extensive works at Hull, across the river, being erected by the International Portland Cement Company. They have over 400 men at work, the capacious buildings are well on their way to completion, and the first of ten huge rotary kilns has been placed in position. The installation of this immense kiln—which is 60 feet long and 7 feet in diameter—was witnessed by a great gathering. The Governor-General, the Mayor of Ottawa, the Mayor of Hull, Sir Sandford Fleming, and many other prominent people being present. And indeed they may well welcome such an important industry, for it means much to Eastern Ontario and Southern Quebec. We are told that there has already been expended on the works $700,000, and in a few months more that company will have one of the most perfect plants ever employed in making cement. The men who are building this mill are modern experts, and never before probably in the history of cement manufacture have all the agencies required for its production been found so conveniently placed by nature in juxtaposition to each other, and so admirably situated as regards transportation both by rail and water for the realization of the best economic results.

This Hull cement plant, when it comes into actual working, must make a difference in the Portland cement trade of that part of Canada, which has been accustomed to using German and English cement—especially now since the surtax upon German goods imported here has come into play. The product of the International Company is expected to be the very best, for that is the reputation they had already made in Durham, Ont., and at other points where the same people had erected plants. The area over which the buildings at Hull extend is seven acres. Besides this the company owns 110 acres of the finest clay and 220 acres of limestone rock of the proper quality for the manufacture of cement. The situation of the works is admirable; the Canadian Pacific line on the one side and the Pontiac Pacific Junction on the other, and Leamy Lake and the canal leading to the Gatineau river. Handsome compliments were paid by Lord Minto and other speakers to the energy and fidelity shown by the managing director of the company, Mr. J. S. Irvin, and the secretary-treasurer, Mr. P. W. Stanhope. The Mayor of Hull, it was evident from his speech, appreciates the great future which cement must play in future construction; and the Mayor of Ottawa, so far from showing any jealousy of the sister city across the river, which had secured these great works, "looked forward hopefully to the time in the very near future when they will be turning out from 1,800 to 2,000 barrels per day, for which there appears to be an unlimited market. The people of Ottawa heartily join the people of Hull in congratulating this company. We wish them every success in this magnificent enterprise."

ONTARIO FRUIT GROWERS.

The discussions of such men as horticulturists, whose business it is to work in harmony with the ever-varying moods of nature, as well as the constantly changing conditions of trade in one of the most perishable of commodities, are always interesting even to the laymen. The 28th annual meeting of the Ontario Fruit-Growers' Association, which was held in Leamington this week, was no exception to the rule. The keynote of the present-day fruit growers' chief problem was struck by George C. Creelman in his secretarial report, when he stated that while local associations had been organized with successful results in promoting the production of more and better fruit, that object was not broad enough. In many cases more fruit had been produced than could be profitably handled. The time was now ripe, therefore, taking those local organizations as a nucleus, to organize associations for the purpose of buying and selling, buying packages, spraying materials, etc., and the selling to the best advantage all of the products of the garden the saving in purchasing packages in large quantities; there and the orchard. Among the advantages of co-operation are: the saving in purchasing packages in large quantities; there is no middleman to pocket the larger share of the profits; better facilities and lower rates are obtained; a better selection of apples is made in the orchards, and those not taken are not injured and wasted, while the interest of the producer is greatly increased. The plan has already had its practical

beginnings in the Georgian Bay and Lake Huron districts, and promises highly satisfactory results.

Mr. A. McNeil, senior inspector of the Dominion fruit division, spoke of the educational value of the demonstrations which had been given in apple grading and packing at several of the recent fall fairs. He stated his belief that a complete revolution should be made in the methods of awarding prizes. The judging should have the following objects in view: (1) To promote domestic trade. (2) To promote the export trade. (3) To encourage amateurs. (4) To add a decorative feature to the fairs. There seems little reason for offering prizes for collections in commercial varieties, unless it can be done so as to discourage the growing of a large number of varieties.

Another subject which brought out very keen discussion was the ever-present question of better transportation facilities and lower express charges. Probably no class of the community suffers more from discriminating charges and high freight rates than the fruit-growers, and the seeking of a remedy is an uphill fight, not only in Canada, but in most other countries as well. The following officers of the association were re-elected, with W. H. Bunting, St. Catharines, as president; A. McNeil, Walkerville, vice-president; Mr. W. W. Cox, of Collingwood, was replaced on the board of directors by A. E. Sherrington, of Walkerton.

IS THIS ENTERPRISE, OR CHEEK?

The Editor of this journal received yesterday, at his residence, on St. Joseph St., Toronto, a letter addressed to his house number, containing a printed circular, post stamped from a fish-packing concern in Gloucester, Mass., which offers to deliver goods to the consumer, duty and express charges paid, shipping everything direct and having "no agents or salesmen." Prices are quoted for salted mackerel, codfish, smoked halibut, Labrador smoked salmon, bloater herring, kippered herring, canned clams, shrimps, sardines, and lobsters, salt cod tongues, red Alaska salmon, and Irish moss. These people "guarantee safe arrival, and if any package is lost, we immediately replace it;" they likewise "send with each order full directions for cooking and keeping." They enclose a private mailing card addressed to the company. Finally, their terms are two per cent. off for cash with order, one per cent. off for cash in ten days, or thirty days nett cash. This looks as if they desired to do some business, and that with people 400 to 500 miles away, and after paying our duty of one per cent. per pound on smoked fish. It is enterprise, if not cheek, for they seem to want millionaire's prices from us for our own goods. We considered this letter and circular such a curiosity that we have shown it to several persons in the trade, who think that these Gloucester people cannot possibly do much trade here. One Toronto firm, the F. T. James Co., tell us that they are offering (wholesale of course), codfish at $1.30 per 20-lb. box, and these Americans ask $3.75 for the same quantity. He sells a box of 100 bloaters at $1.20, while the Gloucester man asks $1.75 for only 25. Again, why should any Ontario man pay a Massachusetts Yankee 18c. per pound for "Alaska" salt salmon, when he can buy New Brunswick or Quebec salmon for 10c.? Besides, we are given to understand that many of the fishery products advertised in this circular are taken from Nova Scotian waters, possibly bought from Nova Scotia, fixed up to suit American tastes or pockets, and now offered to us. Happily their prices are such that we need be under no alarm about their getting much business hereabout. It is well, however, for our Maritime Province readers to know what is going on in this direction.

THE LATE E. W. RATHBUN.

A man who stood high among the captains of industry of Canada, E. W. Rathbun, of Deseronto, has just passed away at the age of 62. It is to be feared that excessive devotion to business, devotion to it, we mean, to the neglect of necessary rest and recreation, is to blame for the too early demise of this admirable man. Coming, we believe, from the United States, Mr. Rathbun lived for more than forty years in Canada, and Canada is his debtor for a noble life. Long before Ontario had become the scene of such great industrial works as are her pride to-day, he was developing, on the Bay of Quinte and elsewhere, industries, which, though many of them in those days deemed premature, have proved successful, and made Deseronto a place famous throughout the Dominion and beyond it for model industrial works and conditions. A man of great prescience and of firm resolve, he introduced many novel manufacturing features into Canada. He was the first, we are told, to instal a roller flour mill; among the first to turn out ready-made wooden houses for export; a pioneer in making alcohol from wood; and he long since saw the advantages in Canada for cement-making, and built cement factories. Railroading, lumbering, and the economic production of a vast variety of articles from what had been the refuse of saw-mills, chemical works, the utilization of sawdust—such have been among the output of this widely known Deseronto concern. Besides possessing knowledge and genius as a merchant and manufacturer, Mr. Rathbun was a public spirited man, and paid attention to matters making for the good of the country. Broadly sympathetic, as well with his workmen as with any cause that tended to the public weal, he spent himself and his means in labors that will cause his memory to be long kept green.

DEATH OF WALLACE W. WATSON.

A man who is spoken of with universal respect and liking by the wholesale trade who knew him best, Wallace W. Watson, is mourned by the commercial community of Montreal. And not only of Montreal; we have heard at least two Toronto merchants speak of his death as if they had lost a warm personal friend. Mr. Watson died as the result of an operation undertaken after a long illness. His services to the Canada Sugar Refining Company were long-continued and faithful, and they were appreciated by his employers. The resolution passed by the Montreal branch of the Canadian Manufacturers' Association, in expressing the loss that body had sustained in his death, uses the following language:

"We learned to place a high value upon his ever-faithful membership in our association, upon his advice in council, upon his ardent and patriotic desire to forward Canada's true industrial interests. He gave of his energy without stint to his confreres in commerce and their common projects. Our sorrow at the loss of his genial manner and staunch comradeship is keen beyond words." Deputations from the Board of Trade, Canada Sugar Refining Company, Corn Exchange, Royal Montreal Golf and Montreal Curling Clubs attended his funeral.

BACHRACK, BLACKLEY AND MARGOLIUS.

It has been represented to us that the article in our issue of 13th November on the Bachrack-Margolius case is unjust to the defendants Bachrack and Blackley. And we are now told that Margolius was the arch-plotter, by whom the other two were induced to do some things which they afterwards repudiated or atoned for by payment of a sum of money to creditors. We are further informed that the judgment of Mr. Justice Desnoyers, which we then printed, does not present the pleas of Bachrack and Blackley adequately; and in fact that these two men were so much less blameworthy than Margolius that their plea of guilty of obtaining goods under false pretenses was made under peculiar surroundings, and with the understanding that they should endure only a nominal punishment, which it was impossible to evade under the code.

We do not purpose attempting to exonerate Messrs. Bachrack and Blackley from having done things in this matter which are not considered by the trade as in accordance with commercial ethics; but are willing to give them the benefit of the judgment of Mr. Justice Hall, which antedated that of Judge Desnoyers. And we further make public, so far as we can, the claim of these two men that they had no criminal

intent in what purchases they made. They declare that, being jobbers, "their business consists in buying stocks of goods from insolvent estates and assignees, curators—buying whatever they can in lots as cheaply as possible and selling them at low prices, so as to make a profit." This is what they consider "a legitimate method of doing business." Mr. Justice Hall has expressed his "disposition to render a sentence imposing merely a fine, but the criminal code in reference to the particular offense charged in this case makes it absolutely necessary that there should be a term of imprisonment." Hence they were "condemned to pay a fine of $100 [each] and to be imprisoned in the common jail for the space of two hours." The judgment of Mr. Justice Hall is as follows:

Charge:—Conspiracy to defraud. Upon the application of the Crown prosecutor that sentence be pronounced against the prisoners.

Seeing the adjournment of this case from a previous term to enable the Crown to procure additional evidence against the accused and the present declaration that such testimony cannot be obtained owing to the expense of a foreign commission which will not be assumed either by the interested creditors nor by the Attorney-General.

Considering the payment by the prisoners of a sum of over six thousand dollars for the benefit of the creditors of George Margolius mentioned in the indictment in this case, as representing the approximate value of the goods obtained by them from said Margolius, and the written request in consequence by said creditors or a great majority of them that the present charge should not be further proceeded with:

Considering the declaration by prisoners' counsel supported by medical certificate, that in view of the critical state of health of one of the prisoners, and the risk of serious injury in that respect by further delay, they are willing, while not admitting any criminal intent in their dealings with said Margolius to enter a formal plea of guilty to the technical charge brought against them in the present proceedings.

Considering the application of prisoners' counsel that a lenient sentence be imposed upon said prisoners for the reasons hereinbefore stated, and the declaration of the Crown prosecutor that no objection is made thereto on behalf of the Crown:

The said prisoners are condemned as follows:—

1st.—To the payment by each of them of a fine of one hundred dollars; and 2nd.—To imprisonment for two hours in the common gaol of this district.

It may be worth while to notice the number of creditors of this insolvent estate of George Margolius, and the dividend to be derived from it. Messrs. Wilks & Michaud, accountants and auditors, have prepared a statement of a first dividend, and the same is payable on or before December 2nd.

It shows receipts, by cash, from Bachrack and others, to the amount of $6,500. The privileged claims total up to $3,745.37. and the ordinary liabilities to $23,308, the latter, on a dividend of 11½ per cent., representing $2,680.43, leaving a balance of $74.20.

The privileged claims are: To contribution fund, re criminal prosecution, $1,809.30; Jacobs & Garneau, bill of costs, $600; Lafleur, MacDougall & Macfarlane, $55.55; Judge Desnoyers, commissioners' fee $50; Cooke & Mullin, extradition fee, $150; J. Lomax, official stenographer, $25; Government of United States extradition fee, $20.52; inspectors' fees, five at $50, $250; costs of declaring dividend sheet, $35; curator's fee, $750.

There are 76 ordinary creditors for a total of $23,308. Of these 59 are Montreal firms, the remaining 17 being mostly Toronto and New York houses. They receive 11½ cents in the dollar, which amounts in all to $2,680.

INSURANCE ITEMS.

The office of the Toronto branch of the Canadian Railway Accident Insurance Co. has been removed from 44 Victoria Street to 78-80 King St., east, where the accommodation secured is greater and better adopted to the requirements of the business.

The second annual dinner of the Insurance Institute of Montreal, was held in the Windsor Hotel, the president, Mr. E. P. Heaton, in the chair. The speakers were Mr. Foster, Donald Macmaster, K.C., Mr. A. J. Hodgson. The toast of "Our Own and Kindred Institutes" was spoken to by Mr. B. Hal Brown and Mr. S. P. Stearns. The addresses of these speakers referred to the work of insurance companies, and to the need of increased patriotism among Canadians for the institutions of their own country.

It is a remarkable statement, if true, indeed a startling statement if only half of it is true, that, namely, made by the New York Spectator to the effect that there are over 1,000,000 persons in the United States who are victims of the drug habit, including opium, morphine, cocaine, etc. Some life assurance companies protect themselves against premature deaths from this cause by a clause in their policies, but as a rule the medical officer has to see into the symptoms of such addiction. The habit of morphine addiction is certainly growing in the United States, and we believe it to be growing in Canada.

The following story is taken from the New York Times: "Last week," said Job Hedges, "I had the queerest 'touch' to which I have ever been subjected. A man, evidently in the last stages of consumption, came into my office and said:

"'You know ——,' mentioning a client of mine who is in the undertaking business.

"I told him I did.'

"'Well,' he said, 'he is holding an insurance policy on my life for $50. It's a cinch that that policy will be payable in a week or ten days at the most. Meantime I need $10. If you will advance me $10 I will give you a due bill against the policy. If you can't collect in ten days you can charge interest.'"

A contributor, in acknowledging receipt of a paper on an insurance subject, which we had returned to him as being, in addition to its great length, needlessly controversial and harsh, has this to say in defence of his attitude and language: "The late Mr. C. C. Hine, a long-time friend of mine, when I deprecated the very controversial nature of my writings for the 'Monitor,' replied: 'A controversy which is earnest without degenerating into bitterness, is the life blood of a journal, and promotes not only its circulation but the interest of its readers, however much they may disagree with the writers.' Apart from this is the personal benefit to me in having thoroughly considered a subject. So I am very greatly obliged for your editorial which caused me to look at the matter in question in the light of experiences."

LIFE ASSURANCE OFFICERS' ASSOCIATION.

In the rooms of the Insurance Institute of Toronto was held last week the annual meeting of the Life Insurance Officers' Association, which embraces the managers, actuaries and secretaries of the Canadian and British life assurance companies in Canada. Insurance officials from Montreal, Hamilton, London and Waterloo were in attendance, as well as officials of the Toronto companies. Several important matters affecting the interests of life assurance were considered.

The members in attendance were: David Dexter, Federal Life; J. K. Macdonald, Confederation Life; R. H. Matson, National Life; J. F. Junkin, Manufacturers' Life; F. G. Cox, Imperial Life; George Wegenast, Mutual Life of Canada; T. H. Hilliard, Dominion Life; F. Sanderson, Canada Life; John Milne, Northern Life; D. McGoun, manager for Canada Standard Life; T. Bradshaw, Imperial Life; D. Burke, Royal-Victoria Life; B. Hal Brown, manager for Canada, London and Lancashire Life; J. G. Richter, London Life; E. Marshall, Excelsior Life; Robert Junkin, Manufacturers' Life. Letters were received from Mr. L. Goldman, managing director, North American Life, Toronto; Mr. J. H. Brock, managing director, Great West Life, Winnipeg; and from Mr. A. McDougald manager for Canada of the Pelican & British Empire Life, Montreal, regretting their inability to be present on account of either personal or pressing business engagements.

The chair was occupied by the president, Mr David

Dexter, who, in his presidential address, referred to the important matters in legislation and life assurance practice which had been dealt with by the association during the past year. The association has been in existence for about ten years, and has had a good influence upon the conduct of life assurance throughout Canada. It has promoted uniformity of practice in matters of general administration; in guiding legislation in the interests of policyholders and life insurance in general, and in encouraging consultation and co-operation in matters affecting the common interests of life assurance companies. The beneficial effect of frequent conference and frank explanation of matters which were of a controversial character was acknowledged by all.

Mr. David Dexter was re-elected president for the ensuing year; Messrs. T. Hilliard and D. Burke, first and second vice-presidents; T. Bradshaw, secretary-treasurer; Messrs. E. W. Cox and J. F. Junkin, auditors, and Messrs. F. Sanderson and George Wegenast, in conjunction with the officers just named, constitute the executive committee.

THE PROGRESS OF WINNIPEG.

In a statement made in a recent special issue of the Winnipeg Free Press, we find an illustration of the wonderful progress which is being made by the Prairie City. This year has been the greatest, from a building point of view, in its history, the total expenditure denoted by the permits being over $6,000,000, as compared with $2,500,000 last year. In the first nine months of the present year, the number of dwelling housese erected was 1,126, their value being $2,611,455. Sixty-five retail stores were erected during the season. The sum of $175,000 was spent on buildings for religious and educational purposes, in 1903. Sixty-two thousand dollars' worth of cut stone from local quarries was used in Winnipeg buildings this year. No less than fifty warehouses, factories, banks and office blocks, and sixty-five new retail stores have been erected, at a cost approximating $1,500,000. The present population of the city is estimated at 70,000; thirty years ago it was 1,500. A significant fact is that during last season there were 13,893,047 bushels more wheat inspected at Winnipeg than in Chicago.

ISN'T THIS A BEAUTY?

We have been remonstrated with for making fun of insolvents, their statements and their proposals to creditors. But really it is hard, sometimes, to employ any other means than ridicule when so-called business people do absurd things and do them in an unbusiness-like way. A man who has by failure demonstrated three times over his unfitness to handle a stock of goods will present a statement to creditors and ask for a compromise settlement, and for more goods on credit to make a fourth trial as a shopkeeper. Which is better, to laugh at such a man or to attempt to convince him by labored argument that he is an impracticable ass?

Some one has sent us a sheet, foolscap size, containing the curator's account in the matter of George Dalglish, of the city of Hull, Que., trader, an insolvent. Not knowing what business George was in, for his name does not appear in Dun's book, we take the facts and figures as we find them in the statement. He had 47 creditors, the amount or aggregate of whose claims does not appear. The receipts from assets amounted to $721.97, J. C. Dalglish having made a deposit on adjudication—apparently required by law—of $50; A. T. Dalglish have paid $157.75 for the debts of the estate; and the Baldwin Foundry Co., $514.22 for the stock, etc. The disbursements on estate account were $641.07, which left $80.88 for distribution. But out of this had to come law costs, $21.75; advertising, sending notices, etc., $10; and the Montreal curator's remuneration for attending four times at Ottawa, writing ninety letters, selling and reselling goods, adjusting claims, etc., "which services are fairly worth $100"—say $49.13, which absorbs all the assets.

The creditor who sends us this statement asks, "Isn't this a beauty?" and we reply that it is a commercial daisy, so to speak. We can quite excuse Mr. John Hyde, the curator, for feeling that he has been done out of a lot of time and worry over such a petty estate as this. And as for the creditors—they may just as well look pleasant, since they get no dividend. We append a statement of the disbursements. They would have been no larger, probably, if the estate had been several times the size: Disbursements—Legal expenses, cost of abandonment, orders of court, etc., etc., $152.38; rent claim and damages per order of court, $230; municipal and school taxes, $100.87; travelling expenses to Hull and Ottawa, four trips, $32.05; auctioneers' fee selling assets, $15; checking and delivering stocks, etc., $44; postage, telephones, telegrams, car fares to Hull, etc., $9.39; advertising two sales of assets, $57.40; total, $641.07; balance for distribution, $80.88.

TRADE OPPORTUNITIES.

The following were among the enquiries relating to Canadian trade received at the Canadian Government Office in London during the week ending 13th November, 1903: A firm of export merchants, with good connections, are desirous of opening up business relations with Canada, and are anxious to get into touch with Canadian houses requiring representation in England. Will undertake buying agencies or give attention to sale of goods. A London firm interested in the flax trade enquire for names of exporters from Canada of this article or of parties who would be exporters if opportunity offered. Some makers of patent fireproof goods are seeking supplies of plaster (gypsum) or any other cohesive material produced in Canada and obtainable at a moderate figure in fair quantities. Another enquiry has been received from Ontario for the names of reliable manufacturers in Great Britain of firebrick for open hearth and blast furnaces; also for coke ovens and general mining purposes. A New Brunswick firm are looking out for parties desiring to utilize capital for the extension of a factory for making furniture for the British market. They also wish to extend the manufacture of turned hard and soft wood goods, such as handles, rollers, etc., and would prefer to interest some one with a knowledge of English requirements.

FINANCIAL AND BANKING.

Bank and express clerks have a prospect of relief from labor in the rapid packing up of silver. A most unique device, in the shape of a coin-counting and wrapping machine, is being exhibited in the Windsor Hotel, of Montreal. It not only counts the coins, but assembles them into perfect rolls and wraps them into cartridges, so it is stated.

The custom of holding bank meetings in June has been departed from in a number of cases of late years. The Canadian Bank of Commerce has changed to January. The annual meeting of the Bank of Montreal will be held on 7th December next; that of the Bank of Ottawa, 9th December; the Bank of Toronto, 13th January; and now we observe it notified that in accordance with a resolution of shareholders last February, the date of the annual meeting of the Eastern Townships Bank, head office, Sherbrooke, has been changed from the first Wednesday in the month of June to the first Wednesday in the month of December, which will be the 2nd, at 2 p.m.

The Federation of Societies of Public Accountants in the United States elected officers at their second annual meeting held in Washington, October 21st. The following officers were chosen: President, F. J. MacRae, of New York; secretary, George Wilkinson, of Illinois; treasurer, Robert H. Montgomery, of Pennsylvania; auditor, E. L. Suffern, of New York. The Executive Board for the coming year consists of the newly elected officers, all members ex-officio, besides John R. Sparrow and J. A. McKenna, of New York; A. L. Dickinson and J. A. Cooper, of Illinois; Harvey S. Chase, of Massachusetts, and J. E. Sterrett, of Pennsylvania. The presidents of the respective state societies are also members of the Executive Board, and are as

follows: William M. Lybrand, of Pennsylvania; Farquhar J. MacRae, New York; Max Teichmann, Maryland; J. S. M. Goodloe, Ohio; Ernest Reckitt, Illinois; Herbert F. French, Massachusetts, and John H. Clegg, of Michigan. The Federation will meet again in St. Louis, in October, 1904.—Chicago Bankers' Monthly.

"Father," said the little boy, "what is reciprocity?" "Reciprocity, my son, is an arrangement by which you undertake to give up something that you don't value very highly in exchange for something that you do."—Washington Star.

A despatch from Ogdensburg, N.Y., which is on the St. Lawrence river, opposite Prescott, Ont., says that towns along the border are being flooded with American and Canadian $1 bills, which have been deftly raised to $10, by adding a cipher. Secret service men believe the bills come from either Montreal or Toronto.

The young people of Montreal in certain circles, religious, commercial, literary, are to be fairly well supplied with lectures on popular subjects this winter. Alderman H. B. Ames has been giving a series upon Canada, at the Y.M.C.A. rooms. That gentleman founded his lectures and the lantern illustrations used in them on the trip across Canada taken last summer by the delegates to the Chambers of Commerce Congress, when Ald. Ames was one of the party. On one evening this week, Mr. D. M. Stewart, of the Sovereign Bank, gave the first of a series of four lectures upon banking.

The official statement of the affairs of the Mowat's Bank, in Stratford, Ont., which closed its doors about four years ago, has been issued. It shows liabilities amounting to $54,755.46, which includes some individual items as high as $3,427.59. There are upwards of one hundred claimants, whose credit balances with the bank were $100, and about a dozen who have lost one thousand dollars each. The assignee's statement shows receipts: Cash in till, $5.05; cash in bank, $671.40; rents, $2,778.16; real estate, $7,744.78; agreements, notes, mortgages, and accounts, $5,277.20; Merchants Bank savings account, $308.09; total receipts, $16,764.68. Disbursements, $10,627.44, leaving a balance of $6,157.24. The claims will be payable on the 5th ult.

DRY GOODS ITEMS.

Among fur novelties in London fashions, the Daily Graphic mentions a Russian mink just introduced by a leading fur house, which, unlike the ordinary mink, has no tinge of red, but is shaded very similarly to the sable. It is said to be meeting with high favor.

The Peterboro Review somewhat savagely says: "Apparently the Globe thinks it quite satisfactory that the Auburn woolen mill [at Peterboro], should be running two-thirds time, the Canada mills, at Hespeler, six hours a day, and the Waterloo mills about half-time, but those employed in those factories will not agree in admiring this result of the tariff muddling of the incompetents at Ottawa. It must be remembered, too, that these short hours indicate that fresh orders are not in sight, and that a further closing down is not improbable."

European flax markets are excited owing to the rapid advance in the price of the raw material. The Russian crop was badly damaged by wet weather, and it is estimated that not more than 25 to 50 per cent. of the normal yield will be realized. This, coming simultaneously with the exorbitant price of cotton, makes a serious situation for textile manufacturers. Stocks of yarn are unusually light, owing to the past disposition of manufacturers and dealers to wait for lower prices, which are now proved to be out of the question. Riga K, a standard brand of Russian tow, was last week quoted at £28 per ton, an increase in a few days of £12 per ton.

Despatches from Boston state that the first of the numerous reductions in wages announced in the cotton mills of Southern New England, and at half a dozen points outside of that territory, went into effect in all but one Fall River corporation and at a number of outside mills on the 23rd inst. Although about 32,000 operatives have had their pay cut down, no general strike occurred in any mill, the textile workers recognizing that the great cost of cotton and an unsatisfactory goods market would operate against the success of any radical step. The cut averages 10 per cent. and places the pay schedules on a basis with those paid previous to the advance in March last year. The reduction affects seventy-eight mills in Fall River, and about a score of corporations elsewhere in New England.

GROCERS AND PROVISION DEALERS.

Last advices from Greece state that currants remain steady. A little while ago it was thought likely that an advance would be made, as the Retention Bank has acquired no less than 37,000 tons.

A cable from France says that two houses in that country have practically established a corner in Grenoble walnuts. They were recently raised in price, and their strength is well maintained.

Another sharp advance has taken place in kerosene. Canadian water-white coal oil is now quoted at 27c. per imperial gallon, instead of 22c.; while the American article is 27c. and 32c. The rapid rise in the value of coal oil during the last year or two is attributed to the falling off in the productiveness of the oil fields.

A Dominion commission left Ottawa last week for the Bay of Fundy and Magdalen Islands to enquire into the state of the sardine and lobster fisheries. Complaints have been received that the American fishermen are taking young herring and packing them for sardines. They also take Canadian lobsters and pound them until the close season, when they are resold in Canada for very large prices.

The large quantity of cheese shipped from Montreal across the Atlantic this season is deserving of remark. The shipments in one November week were 96,668 boxes, or 17,707 boxes more than for the corresponding week of last year. The total export for the season was 2,390,702 boxes, as against 2,100,048 for the season of 1902. The total butter exports are figured at 338,277 packages, as compared with 534,951 packages for last season.

A Swedish professor has discovered a process by which the seeds of oats, barley, and other grains may be rendered practically immune to the action of frost. It consists really in a series of selections of plants grown from seeds which have proved their ability to withstand increasing degrees of cold. It is anticipated that the discovery will particularly benefit agriculture in semi-arctic regions, as it will enable crops to withstand the early frosts which so often cause a more or less complete failure in some localities.

The cheese factories in Shefford County, Que., closed out the last of the season's make, at 10¼ cents. The season proved the most profitable in the annals of the cheese trade. The prices were high from the beginning to the end, and in spite of dry weather in the spring and fall, the make was satisfactory. The twenty-four factories in the Richmond and Drummond County Cheese and Butter Syndicate, during the season just ended, turned out 839,261 lbs. of cheese, which sold for $35,110.41. The average amount received by each patron was $167.67.

The cane sugar industry is increasing in importance, according to facts collected by the Washington Department of Agriculture. The total sugar production of the world in the year 1903-04 is estimated at 10,425,800 tons of 2,240 pounds each, including 4,342,800 tons of cane sugar, and 6,083,000 tons of beet sugar. During the past five years the world's output of cane sugar has increased from 3,000,000 to upwards of 4,000,000 tons, the greatest increase ever made in any five-year period in the history of the industry. The high record crop in the history of the world's beet sugar production was that of 1901—02. Since that date there has been a decline in production in Europe amounting in all to about 1,000,000 tons, but the present year's estimated output will probably show an increase.

STATEMENT OF BANKS acting under Dominion Gov't charter, for the month ending October 31, 1903.

J. M. COURTNEY,
Deputy Minister of Finance

TORONTO STOCK TRANSACTIONS.

Dullness has been the prevailing feature on the local 'Change this week. To such an extent has this been the case that the local board was closed yesterday for lack of business. Wednesday's quotations for the leading stocks were as follows: Bank of Toronto, 220½; Imperial, 214; Commerce, 150½; Dominion, 223½; Consumers' Gas, 203; Dom. Tel., 116; C.P.R., 118; N. W. Land, (pfd.), 99; Can. Gen. Elect., (pfd.), 105½; Niagara, 115; Can. Per. & W. Co., 121; Lon. & Can., 90; N. S. Steel, 721; Preferred, 110; Com. Cable, 150; Sao Paulo, 86½; Tor. Rail., 96; Twin City, 90-90½; Dom. Steel, 9.

ONTARIO CROPS.

The Ontario Bureau of Industries has issued a report as to the yields and other particulars of crops grown in that province during the season of 1903. Speaking of fall wheat, it says that when both yield and quality are taken into consideration, this year's crop may be described as among the best in the history of the province. Spring wheat appears to be steadily increasing in favor in this province, as during the past four years there has been a material shrinkage in the area sown. Barley and oats yielded well. Corn was rather uneven, owing to poor seed, and to the necessity for replanting owing to drought. Tobacco was rather late in seeding, and cool weather kept back growth; its quality at harvesting, however, is described as from fair to good, though there was a falling off in quality of over half a million pounds, compared with last year. As to potatoes it is difficult to forecast the final verdict. The yield was large, but in a good many sections, especially in the heavy lands of the western and central counties, rot has developed, and is said to be spreading in the pits; it remains to be seen how far this will affect the available supply during the winter. Roots, including sugar-beets, gave fair to good returns. Fruit was abundant, in some cases to such an extent, as for example with plums, that a satisfactory market was not always obtainable. The principal feature affecting the marketing of apples, which were a fair crop, has been the scarcity of barrels, which rendered buyers more particular than usual in their selections. Summer and fall pastures were generally speaking, all that could be desired, and beef and dairy cattle are reported as being in tip-top condition. Sheep, however, while showing good quality, are decreasing in number every year. For poultry the summer was not favorable, but the good prices obtained for birds and eggs have encouraged raisers. A good yield of honey is reported in the western and central counties, but not so good in some of the other districts. Referring to general improvements on the farms, the correspondents of the Bureau for the most part speak encouragingly. Not much underdraining was done, chiefly owing to lack of labor, but altogether the year was a good one for nearly every line of agricultural advancement. The chief difficulty of farmers at the present time, namely, that relating to the labor and wage question, continues unabated; to such an extent, indeed, that the importation into the rural districts of Chinese and Japs is seriously advocated. The following summary gives the final estimates of the 1903 production of crops: Fall wheat, 665,028 acres; 17,242,763 bushels; or 25.9 per acre. The yield of 1902 was 20,233,669 bushels. Spring wheat, 248,518 acres; 4,949,233 bushels; or 19.9 bushels per acre. The yield for 1902 was 6,048 024 bushels. Barley, 709,839 acres; 24,378,817 bushels; or 34.3 per acre. Oats, 2,645,965 acres; 110,228,103 bushels; or 41.7 bushels per acre. Rye, 179,277 acres; 2,970,768 bushels; or 16.6 bushels per acre. The yield of 1902 was 3,509,332 bushels. Peas, 407,133 acres; 8,924,650 bushels; or 21.9 bushels per acre. The yield of 1902 was 7,664,679 bushels, and the average yield per acre, 14.4 bushels.

—A meeting of the representatives of the Accident Insurance Companies of Canada, was held at the Windsor Hotel, Montreal, on the 10th inst., at which there were present all the representatives of the different accident and fidelity companies doing business in Canada. The meeting was called with a view to perfecting the organization of an association of said representatives. Another meeting will be held at Ottawa, December 3rd, when, it is hoped, the details of organization will be perfected.

—An important commercial event was that in New York on the 17th inst., when the 135th annual dinner of the Chamber of Commerce took place under the presidency of Mr. Morris K. Jesup. Among the more prominent guests present were Mr. Shaw, secretary of the United States Treasury, Governor Odell, Mr. Payne, Postmaster-General, Senator Chauncey M. Depew, etc. A toast to His Majesty King Edward VII. followed, second to one to the President of the United States.

—It is announced that tenders will be received for army contracts for South Africa, up till January 5th, for the supply of bread, flour and groceries; and up till January 7th, for the supply of meat and forage. They should be sent, for Cape supplies, to the general officer commanding Cape Colony at Cape Town, for Natal supplies to the general officer at Pietermaritzburg, and for the Transvaal and Orange River Colony to the Director of Supplies, Artillery Barracks, Pretoria. Forms of tender and conditions of contract may be obtained from Mr. W. W. Moore, Chief Markets Division, Department of Agriculture, Ottawa.

—The Nova Scotia Institute of Science recently held its annual meeting. Officers were elected as under: President, Henry S. Poole; first vice-president, F. W. W. Doane; second vice-president, Professor E. Mackay; treasurer, William McKerron; corresponding secretary, A. H. Mackay; recording secretary, Harry Piers; librarian, H. Piers. In his presidential address, Mr. Poole dwelt upon the relations of scientific investigation to the mining progress of the Province, and showed how mining interests have profited by the systematic work of careful investigation. As a result of this, much interest is taken in gold fields, and also in locations where coal is supposed to exist, although its occurrence there was before unsuspected.

—A move of no small moment has been made by the Canadian Manufacturers' Association in securing the services, as a paid official, of a practical railway man as an expert in freight and tariff matters. A railway bureau has been established in connection with the association. The charge of this bureau has been offered to Mr. W. H. D. Miller, assistant to Mr. W. B. Bulling, Assistant Freight Traffic Manager of the Canadian Pacific Railway at Toronto, and Mr. Miller has accepted the new position. He expects to take charge about the first week of December. Having served both the Intercolonial and Canadian Pacific railways for some fifteen years Mr. Miller's experience has been valuable. The object of the new bureau is that a practical railway man one familiar with rates and the methods of tariff-making should act for the association in its dealings with the railroads. This ought to do away with a certain amount of friction that may now exist.

CLEARING HOUSE FIGURES.

The following are the figures for Canadian Clearing House for the week ended with Thursday, November, 26th 1903, compared with those of the previous week:

Cities	Nov. 26th, 1903.	Nov. 19th, 1903.
Montreal	20,938 987	24,014.302
Toronto	14,221,238	15,975,057
Winnipeg		6,776,844
Halifax	1,761,694	1,876 875
Hamilton	1,111,038	1,247,458
St. John	958,499	1,019,817
Vancouver	1,345.709	1,702,593
Victoria	562,597	833,013
Quebec	1,547,352	1,788.855
Ottawa	2,259,212	2.354,180
London	740,571	816,479
	$.....	$58,405,473

The Enormous sale of

OLD CHUM

Cut Plug

Smoking Tobacco

Proves its Superior Quality.

Sold by all leading wholesale houses.

THE CANADIAN CASUALTY AND BOILER INSURANCE COMPANY

Full Government Deposit Paid.

President:
ALEXANDER SUTHERLAND, D.D., Toronto.

Vice-Presidents:

Chief Engineer, - - - A. M. WICKENS.
Superintendent of Agencies, - J. G. BEAM.

HEAD OFFICES:
N. E. Cor. Adelaide and Victoria Sts., TORONTO. - Ont.

BRANCH OFFICES:
Temple Building, - - MONTREAL, Que
43½ King Street W., - - HAMILTON, Ont.

THE chairman of the Montreal Road Committee, Ald. Vallieres, has made the statement in his recent report that 60,000 square yards of permanent sidewalk has been laid, mostly in the central part of the city. The sidewalks laid are almost equal in area, it appears, to the streets improved by paving, and the total length is some eleven miles. Hardly any recent improvements will conduce more than this to the comfort and safety of the citizens.

MONTREAL MARKETS.

Toronto, Nov. 25th, 1903.

Ashes.—The direct shipping season of 1903 has now closed, and has been a dull one. There is usually some little stir in shipments of potash by last outgoing boats, but even this has been lacking this year. Stocks, however, are so extremely small, that values are well sustained, desirable tares of first pots still realizing about $5.90, and it is thought that the high price may induce some of the old makers, who have not been heard of in the market for some time, to re-enter the field.

Dairy Products.—Last week was an active one for cheese shipments, exports reaching 96,668 boxes, or 17,707 boxes more than for the corresponding week of last year. By the "Ontarian" this week, being the last boat, there were shipped 2,526 boxes, making the total for the season 2,390,702 boxes, as against 2,100,048 for the season of 1902. Last week's shipments of butter were small, being only 5,223 packages, or say 15,687 packages less than the same week of last year. The total butter exports for the season just closed are figured at 338,277 packages, as compared with 534,951 packages for last season. The market for cheese is a very quiet one at the moment, with late makes of fine Ontarios held locally at about 10⅝c.; Townships, 10½c., and fine Quebecs at 10⅛ to 10⅜c. For butter there is some moderate jobbing enquiry for local requirements, with from 21¼ to 21½c. quoted for fine fall makes.

Dry Goods.—Quite a good lot of orders are coming to hand, most of which are being sold on spring dating, but wholesale dealers generally are making preparations for stocktaking, which will be in full swing next week. City retailers report excellent business and are paying their bills remarkably well, while country remittances show improvement since last writing. Failures are singularly few, and there do not seem to be any anticipations held of many insolvencies after the Christmas holidays, when weaknesses of this kind generally develop.

Furs.—Local prices of prime raw furs for the season just opening are quoted, as follows: Beaver, $5 to $6.50 for large; medium ditto, $4 to $4.75; No. 1 choice bear, $15 for large, $10 for medium, and $6 for small; badger, 30 to 50c.; fisher, No. 1, dark, $5 to $6; ditto, brown, $4 to $5; pale ditto, $3 to $4; red fox, $2.25 to $4; cross fox, $5 to $10 for No. 1, as to color; wolverine, $2.50 to $5; lynx, $4 to $8 for No. 1; marten, $2 to $3 for Ontario and Quebec skins; fine B.C. and Northwest pelts bring higher prices; mink, $2 to $4 for No. 1; fall rats, 8 to

—It is reported that the Ontario Government's drilling gang has struck a rich deposit of silver ore near Mansfield, Ont.

—E. P. Charlton & Co.'s departmental store at St. John, N.B., was on Wednesday last badly damaged by a fire which started from the furnace. In the same building were situated Thorne Bros., furs; Dowling Bros., dry goods, and other merchants, and their premises also suffered severely. The total loss is estimated at between $40,000 and $50,000; covered by insurance.

17c.; winter ditto, 15 to 20c.; otter, $8 to $12; fine Labradors and Northeastern would bring $12 to $20; coon, $1.50 to $2.50 for No. 1 black, and from $1 to $1.75 for No. 1 dark; prime skunk, $1.50 for No. 1 all black; short stripe, $1.10; long stripe, 60c.; and broad stripe, 20c. Only a few small lots are being received as yet, mostly unprime pelts.

Groceries.—The volume of business is still well maintained, more particularly in dried fruits and other Christmas lines. New York advices report a decline of 10c. a cental in refined sugars, but local quotations are unchanged at the moment of writing though some shading of prices is deemed not improbable shortly. Molasses is very firm. Stocks of Valencia raisins are quite low, importers having placed much smaller orders than last year, when considerable stocks were carried over, and there will not likely be the usual tumble in prices after the New Year. A broker, who had an order from Winnipeg for a car lot, reports being unable to get the quantity desired. Malaga loose muscatels are held very firmly, some sales being reported of fair lots at nearly 50 per cent. advance on cost. California seeded raisins in cartons are coming at a laid-down cost of about 10½c. According to Patras advices, currants remain steady, but without any advance, which is considered rather remarkable, in view of the large quantities sold by the Greek Government under the Retention Act, and the fact that the Currant Bank has acquired some 37,000 tons. Grenoble walnuts retain the advance, and two French houses are reported to have practically established a corner in these goods. Tarragona almonds are advanced 2s. a bale.

Hides.—The demand from tanners for beef hides continues slack, and there is a tendency to weakness in the market, dealers discussing lower prices, but as yet there has been no definite announcement in this direction, and 9c. per lb. is still being paid to butchers for No. 1. Calfskins are easy at late reduction; lambskins will likely be advanced next week.

Metals and Hardware.—Trade in these lines is beginning to show signs of slackening, now that navigation is practically closed, and will doutbless become quieter as the holiday season approaches. Few changes are noted since last writing. Ingot copper has shown further sagging in prices, and is now quoted at 13½c. in an ordinary jobbing way. Lead is firm at $3.20, and spelter at $5.75; tin steady at 30c. for Straits. Comparatively little business is reported in pig iron. Bars are easy at $1.85; bar steel, $2.10; cast steel, 7½ to 7¾c.; toe calk, $2.60; machinery steel, $2.75. Iron pipe still firm at $4.81. Boiler plate and sheets of all kinds have undergone no change.

Oils, Paints and Glass.—With the close of navigation, and the taking effect of winter freight rates by rail, business is assuming a quieter phase. There continues to be much cutting and slashing in the prices of leads, and it has been

CUARANTEED RESULTS.

One of the best propositions in life insurance to-day is the Guaranteed Investment Policy of The Manufacturers Life Insurance Company. The Policy-holder can borrow all the premiums after the fifth, and should he die between the tenth and final year of the investment period, all premiums paid after the tenth will be returned with the face of the policy.

Write for rates, giving your age next birthday, to . . . .

J. J. W. Deuchar, F.F.A., F.I.A., General Manager and Actuary of the Norwich Union Life Assurance Company, speaking of investments says:

"It may serve to indicate the great importance of obtaining a good return on the investments, if it is realized that one per cent. of increased interest on the funds of a company will, on the average, have as great an effect as a saving in expenditure equal to 10 per cent. on the premium income, while, if an office could count on realizing 5 per cent. interest in place of 3, it might reduce its premiums some 30 per cent., or double its bonuses."

Mr. Deuchar does not name THE GREAT-WEST LIFE; but the above statement exactly describes the happy position of its policy-holders.

Managers and Underwriters

claimed by some buyers that they have been able to obtain fair lots of pure at even lower figures than $4.50, though it is claimed there cannot possibly be any margin for the grinder at these figures Turpentine is firmer by 2c. in the South, it is said, but local quotations are as yet unrevised. Linseed oil is also cabled ten to fifteen shillings firmer in Britain, but old prices are said to still hold here. We quote: Single barrels, raw linseed oil, 47 to 48c.; boiled, 50 to 51c., net 30 days, or 3 per cent. for 4 months' terms. Turpentine, 83½ to 84c., single barrels. Olive oil, machinery, 90c. to $1; cod oil, 35 to 37½c. per gal.; steam refined seal, 50 to 55c. per gal.; straw ditto., 45 to 47c.; castor oil, 8 cents, for machinery; pharmaceutical ditto, 8½ to 9c.; lead (chemically pure and first-class brands), $4.50 to $4.60; No. 1, $4.25 to $4.35; No. 2, $4 to $4.50; No. 3, $3.80 to $3.90; No. 4, $3.60 to $3.75; dry white lead, 4¼ to 4½c.

It Leads Them All.

As applied to the gain in net amount of life insurance in force in Canada for the FIVE YEARS ending December 31st, 1902.

Head Office—WATERLOO, ONT.

The Mutual Life OF CANADA

has once more established its right to the above claim. It stands to-day

At the Head Of All

life companies doing business in Canada in the NET AMOUNT IN FORCE GAINED OVER all its competitors during the past five years, as shown by the Government Reports.

for pure; No. 1 ditto, 4 to 4¼c.; genuine red ditto, 4 to 4¼c.; No. 1 red lead, 4c.; putty in bulk, bbls., $1.80; bladder putty in barrels, $1.90; ditto, in kegs or tins, $2.05; London washed whiting, 45c.; Paris white, 75 cents; Venetian boxes, $2.40; 23-lb. tins, $2.55; 12½-lb. red, $1.50 to $1.75; yellow ochre, $1.25 to $1.50; spruce ochre, $1.75 to $2; Paris green, 14c. in bulk, and 15c. in 1-lb. packages; window glass, per 100 ft., $3.25 for first break; $3.45 for second break, and $4.20 for third break; per 50 feet, $1.70 for first break, and $1.80 for second break.

TORONTO MARKETS.

Toronto, Nov. 26th, 1903.

Drugs, Chemicals, Etc.—A somewhat quiet trade is being transacted locally in drugs, though prices are fairly firm still for most lines of goods. The most active of the opium drugs is morphine. Quinine, though quite firm, holds to old quotations, not having been advanced, as expected. Cardamons have dropped considerably; in fact, it would seem, more than the circumstances seem to warrant.

Flour and Grain.—A fair demand exists for flour, the current quotation for ninety per cent. patents being $3.05. Choice brands are held a few cents higher. Manitoba flour is steady. A good trade is being done in bran and shorts. Oatmeal keeps steady. Wheat is coming into this market in larger quantities, now that the farmers are through with their fall work. At the same time, a good many are holding back their deliveries in readiness for higher prices, though this action, so far as we can see, is against the best advice. Prices are unchanged. Barley is the same. Oats are 1c. lower. Peas have dropped a cent. Rye and corn remain as before. Buckwheat is 1 to 2 cents higher.

Fruits and Vegetables.—Not much business is being done at the present moment in the fruit trade, the domestic article, with few exceptions, such as apples, being altogether absent. Trade probably will be on the dull side until invigorated by the Christmas demand. Tropical fruits are beginning to become more plentiful. Oranges sell fairly well and lemons are scarce.

Hardware.—Since our last report under this heading, little has occurred of a new character. Trade is fully up to the average for the fall season, and the movement of all seasonable goods is very good. Prices keep firm. The demand for metals continues about as before; even pig iron seems to retain its position. Glasgow reports speak of a moderate business as having been transacted in Cleveland warrants, and say that consumers are only buying from hand to mouth, owing to continued rumors that American iron and steel are being got in readiness for shipment to European markets.

Hides and Skins.—Offerings of hides are fair, and the demand about equivalent. There is a good demand for sheepskins, and the market is steady at 75c. Calfskins are easy. Tallow remains as before.

Paints and Oils.—The further advance of 5 cents per gallon in coal oils has taken people by surprise, coming so soon after the one of 2 cents a few weeks ago. Linseed oil has dropped 1 cent per gallon, the crop of seed having been large this year. No change has taken place in white or red lead. Spirits of turpentine continue to be high-priced.

Provisions.—Both creamery and dairy butter are in good supply, though the quality of the latter is sometimes second-rate. There is a good and remunerative demand for a good article. Prices of cheese are steady, under a fair demand. Poultry is wanted, there not being much in the market. Really fine new laid eggs are unobtainable under 30 cents per dozen, and sometimes a higher price still is asked. For smoked meats, the demand is brisk, and prices are high, though we note that live hogs declined a few cents this week. The Cincinnati Price Current says that the marketing of hogs shows considerable enlargement in numbers. Total Western packing, 465,000, compared with 375,000 the preceding week, and 385,000 two weeks ago. For corresponding time last year, the number was 505,000, and two years ago 675,000. From November 1st, the total is 1,005,000, against 1,235,000 a year ago —a decrease of 230,000, of which 40,000 only is shown by the past week. The quality is mainly good. Prices have further receded, prominent markets at the close showing an average of about $4.55 per 100 lbs., compared with $4.75 a week ago, $4.90 two weeks ago, $6.20 a year ago, $5.60 two years ago, $4.75 three years ago, and $3.90 four years ago.

Wool.—No change has taken place in the situation, and practically no demand for export exists. The demand from the mills for pulled wools is fair. At the London wool sales this week there was a large attendance. The offerings numbered 9,881 bales. Competition was fair at large prices. Fine and medium crossbreds were 5 to 10 per cent. lower, and coarse crossbreds showed a loss of 12½ per cent. Cape of Good Hope and Natal grades were unchanged to 5 per cent. lower. The home trade and the continent took equal shares of the offerings, and Americans bought a few lots of medium. Slips were in large supply. The quantity of West Australian new clip sold readily. Scoureds were in fair demand and several lots were bought in as bids were ½d. below sellers' limits. Cape of Good Hope and Natals sold to Germany and France.

Workman's Rights

In Canada a workman may proceed against his employer under the Workman's Compensation for Injuries Act, and at common law. That means untold annoyance and inconvenience to an employer An employer is even liable for damages to an employee for injury resulting from the negligence of a fellow employee. Oft-times a workman will get back at an employer in this way. The employee may or may not win. Whether he does or not it means a great deal of anxiety to you as an employer. Let us relieve you of all this. Our liability policies are designed to do this very thing.

Will be glad to explain our plan.

EMPLOYERS' LIABILITY ASSURANCE CORPORATION
MONTREAL —— TORONTO
GRIFFIN & WOODLAND,
MANAGERS.

A prominent Montreal business man recently gave an agent of another company a proposal for a large policy, with the condition that it would be given to the Sun Life of Canada. This is unusual. It shows that business men have a knowledge of the merits of life companies.

Continued Progress

During the last few years the North American has made marvellous strides in all Departments tending to its upbuilding, which can readily be seen by the following figures, showing a comparison of

Three SEPTENNIAL Periods

Year	Cash income	Assets	Policies in force
1881	$ 39,613	$ 88,763	$ 1,221,712
1888	203,691	666,919	7,927,694
1895	581,478	2,300,718	15,779,385
1902	1,270,846	5,010,813	30,927,961

A strong progressive Canadian Company giving excellent returns to its policy-holders, therefore making it a desirable Company for agents to represent. Three active agents wanted.

The electric railway between Winnipeg and Selkirk is making very satisfactory progress towards completion. Rails are laid already as far as Middlechurch, and a month or so is expected to see cars running.

Mercantile Summary.

The Crown Grain Company, Limited, of Winnipeg, has started work on the construction of a large cleaning and storage elevator at St. Boniface, at the intersection of the Canadian Northern and Canadian Pacific lines there. In dimensions it will be 56 by 72 feet, and 150 feet high. Its storage capacity will be 250,000 bushels. Afterwards they intend to build a tank elevator, with space for 2,000,000 bushels.

Mercantile Summary

THE general traffic manager of the Intercolonial Railway, Mr. E. Tiffin, is proud of a diploma received from the directors of the Dominion Industrial Exposition, Toronto, a diploma on which appear the following words: "Awarded to the Intercolonial Railway by the Jury of Awards for exhibit of pictures, etc." The series of pictures exhibited by the I.C.R. was a really worthy and striking one. The sight of them could not fail to impress upon the memories of thousands of Canadians the beauties and delights of our Maritime Provinces.

IN the matter of the James Cooper Manufacturing Co., Limited, of Montreal, Mr. Geo. A. Savage has been appointed liquidator, and an order has been obtained from the court authorizing the continuance of the business for the present, there being a good deal of work in hand, the material for which would be comparatively valueless if work were suspended. As near as can be ascertained at present the trade liabilities of the house, loans, etc., amount to $378,600, but it is expected there will be some further claims filed. The stock liability is $198,000. According to the books the assets are approximated at $562,882, made up mainly of premises and plant, etc., $342,000; accounts and bills receivable, $57,250; material, finished and in process, $145,000. The property, plant, etc., is now being valued by experts. An Advisory Committee has been named to act with the liquidator, composed of Messrs. F. H. Mathewson, of the Bank of Commerce; A. C. Pratt, of the Molsons Bank; F. H. Hopkins, J. T. McCall, Geo. Boulter, H. J. Fuller and R. B. Common.

THE failure list among country traders in the Province of Quebec has of late been of limited proportions, and the volume of liabilities very light. For the past week only the few following small insolvencies are reported: Geo. Bourgue, a carriage maker by trade, selling groceries at retail since July, 1901, at Sainte Rosaire, and previously for a short time at St. Gregoire, has assigned, owing $1,900.—F. A. Bedard, a shoemaker by trade at St. Ambroise de Lavette, has been attempting a small retail general business, which has not proved successful, and he is reported compromised at fifty cents on the dollar.—A voluntary assignment has been made by L. O. Couture & Co., general dealers, at St. Gedeon de Chicoutimi, Que. Couture had previously been unsuccessful in 1899, and subsequently associated his father-in-law, W. Ratte, a farmer, in partnership with him under the above style. Couture had also been a farmer previous to engaging in trade. Liabilities are shown at $2,269, with nominal assets of $1,360.—A demand in insolvency has been served upon Geo. Dechesne, a small storekeeper at Hunterstown, by a Three Rivers firm, and he has consented to assign.—M. E. Dunn, an agricultural implement dealer at Windsor Mills, already reported in trouble, has arranged to pay fifty cents on the dollar.

Mercantile Summary.

It is said that the Hull Lumber Company have sold the whole of their next year's cut, estimated at 20,000,000 feet, to a Liverpool, Eng., firm at a price which shows a considerable advance on last year's values.

The Danaher & Melendy Company, of Detroit, has just closed a deal for the purchase of 200 square miles of spruce and cedar lands in Quebec province, the price being understood to be about $300,000. Sawmills, logging roads, etc., are included.

During the eight months ending with November 14th last the earnings of the Canada Atlantic Railway Company were $1,124,702, compared with $1,109,487 last year, an increase of $15,213. Both freight and passenger service showed increases.

The Nettie L. mine at Phoenix, B.C., has closed down for the first time in six years. This is understood to be due merely to the desire of the management (in England) to put in some new machinery, which will probably take three months.

The Nova Scotia Steel Company's works at Ferrona and Trenton are now employed to their full capacity. The new works at North Sydney are said to be progressing very favorably, and are expected to add largely to the company's output at a reduced cost.

—The comic Englishman is always represented as being fond of the adjective "bloody." Perhaps he is the same sort of Englishman as the one who drops his "h's." This story is told of a London school in which a little French is taught after hours by an enthusiastic pupil-teacher:

The Witbeck Lumber Company, of Menominee, Mich., or rather some of the capitalists in control of that corporation, have purchased a timber area on Spanish River, Ont., from Ferguson Bros. and McFadden. It is estimated to contain some 200,000,000 feet of lumber, and the purchase price is understood to have been about half a million dollars. The Witbeck company's sawmill is to be moved to Massey, Ont., where it is calculated there is work for twenty years ahead.

Several towns in the eastern part of Ontario, as mentioned in these columns before, are agitating for better railway facilities. On Tuesday last a deputation, representing the municipalities lying between Campbellford and Whitby, had a conference with Sir Thomas Shaughnessy, president of the Canadian Pacific, and preferred a request that this railroad should build a spur line from the main road between Montreal and Toronto, starting at Springbrook and joining again at Agincourt. A party of Boston financiers in the meantime has made an offer to build an electric railway through the territory in question, but it is understood that, owing to the favorable treament of the above suggestion by the C.P.R. nothing will be done in the latter matter.

A Quebec saloonkeeper, named Joseph Campeau, has assigned. He owes about $1,200, mostly to local dealers.

A company has been organized at Port Arthur, Ont., under the name of the Northern Light Mining and Development Co., with a capital of $1,000,000, whose object is to consolidate the gold mining properties of Sturgeon Lake. J. H. Hill, of Duluth, is the leading spirit in the enterprise. There are nine properties involved, with an area of 567 acres. The intention is to put in machinery at an early date.

The Mexican Light, Heat and Power Company, in which Canadian capital is largely interested, has acquired the franchises and electric light and power plants of the Siemens-Halske Company, of Berlin (Germany). In order to furnish the city of Mexico and surrounding country with light and power, the first-named company is preparing to erect at Necaxa, a distance of 100 miles away, a large plant, including six generators of a capacity of 5,000 kilowatts each, or about 45,000 horse power in all.

It is understood that a contract has been entered into between the Pere Marquette Railroad and several Vanderbilt lines by which the former secures trackage rights over certain parts of the Vanderbilt system between Buffalo and Chicago. The contract gives the Pere Marquette a line into Chicago over the Lake Shore and Michigan Southern tracks between Porter and Clark Junction, Indiana, a distance of eighteen miles. Entrance into Buffalo is provided by an agreement with the C.S.R. and M.C.R., under which the Pere Marquette will use as far as St. Thomas the St. Clair branch, besides which it gets trackage rights over the main line of the Michigan Central east of St. Clair Junction. St. Thomas ratepayers will next month vote upon a by-law to give a bonus of $25,000 to the Pere Marquette Railway to aid in establishing workshops.

The recent discussion over the name of the New York, New Haven & Hartford Railroad Company has called attention to the names of various other roads. It is the exception rather than the rule when a railroad is known by its corporate title. Here are a few illustrations: What is called the "Atchison" is really the Atchison, Topeka & Santa Fe; the "Burlington" is the Chicago, Burlington & Quincy; the "Lake Shore" is the Lake Shore & Michigan Southern; the "Louisville" is the Louisville & Nashville; the "New York Central" is the New York Central & Hudson River; the "Northwestern" is the Chicago & Northwestern; the "St. Paul" is the Chicago, Milwaukee & St. Paul, and so on. It is the custom to shorten up and to use a part of the title, if any whatever is used. There are many cases where the real name altogether disappears, like the "Monon" route for the Chicago, Indianapolis & Louisville, the "Katie," for the M., K. & T., and the "Big Four" for the C., C., C. & St. L. and three others. —Hartford Courant.

Mercantile Summary.

THE town of Peterboro' and the village of Ashburnham voted one day last week on the question of the union of the two municipalities. It was carried in two places with the following vote: Peterboro'—273 for, 105 against; majority for, 168. Ashburnham—99 for, 79 against; majority for, 20. Peterboro' is now about to apply to the Legislature for incorporation as a city with a population of 13,588.

HERE is another instance of the effect of exorbitant demands by labor unions and their restricting the amount of work done. A New York paper declares that they are the cause of the closing down of the Townsend-Downey Shipbuilding Company at that city. This is the second shipbuilding company near New York which has got into financial straits through its labor troubles, a former one passing into bankruptcy.

EMIGRANTS of nearly every nationality thronged the Windsor station of the C.P.R. last night. Germans, Russians, Hebrews, British and Scandinavians and Chinamen made a motley crowd, and when they were all talking together it sounded like Bedlam. Fully one hundred left for the "Soo," while an equal number boarded the Chicago train. The Chinamen, however, remained behind, as they are going back to their native land in bond, having been refused entrance to the United States.—Montreal Gazette, 25th Nov.

Mrs. L. St. Denis, a milliner in Montreal, has been asked to assign. Her liabilities are quite small.—The widow of the late J. B. Beauchamp, who did a grocery and hardware business in the north-eastern suburbs of Montreal, and recently died as the result of a lamp explosion, has compromised the estate liabilities of $3,700 at twenty cents on the dollar.—In the matter of J. A. Riendeau, dry goods retailer in Montreal, to whose brief business career we alluded in a recent number, the assignee has abandoned the estate, there not being sufficient assets to pay the costs of liquidation.

IT is said that down in Madoc, a charming village in Hastings County, they have decided to paint the sidewalks white in order to avoid the use of electricity. The news comes from the editor of a sparkling weekly, printed in a neighboring town, and it may be that Madoc is falsely maligned; but if true, it seems to be a strange notion, particularly as Madoc is not in poor circumstances. "All around," it is declared by an ardent admirer, "are corundum enough to rasp the asperities of every politician, marble enough to build a city, gold enough to pay the national debt, and graphite enough to lubricate every wheel in Canada." The only thing we doubt about it is the lubricating quality of the graphite. If the imaginative scribe had only said graphite enough to provide pencils sufficient to write all the slanders that were ever conceived, we should have believed him absolutely.—Ottawa Free Press.

GREAT DEMAND FOR

MACHINE TOOLS.

An evidence of the unusual activity in manufacturing circles is the present large demand for machine tools of all kinds. H. W. Petrie of Machinery Hall, 131 Front St. W., is kept busy filling the orders for this particular class of machinery just now. Certainly the stock carried is a thoroughly representative one of American and Canadian tools, and for anyone who contemplates the purchase of anything in the machinery line at all in fact, it would pay them to call at the above address.

Mercantile Summary.

A Nova Scotian, Mr. Richard Starr, of Starr's Point, has raised thirty-two hundred barrels of apples this year.

It is understood that the requisite number of signatures having been obtained, Bridgeport, N.S., will become a part of Glace Bay. The step will add about 1,500 to the present population of Glace Bay.

The Gazette learns that it is expected that the Sissiboo mills, near Weymouth, Nova Scotia, will be opened again shortly, but only for the manufacture of lumber, as the large number of pulp concerns established in Eastern Canada within the last three years has had a tendency to reduce prices and profits.

At Hammondville, near Fredericton, N.B., a farmer, Mr. C. H. Giles, has made what seems to be a record in agricultural work. From eight bushels of English seed oats he has reaped 248 bushels. The straw was from five to six feet high, and the oats ran as much as 52 pounds to the bushel, taking first prize at the exhibition in September.

The customs collections on imports at the port of Montreal for the month of November, 1903, $1,040,113; same month in 1902, was $1,050,451; a decrease of $10,338. The total duty collected at the port of Toronto for the month of November, 1903, was $531,529, as against $458,239 in November, 1902, being an increase of $73,289.

A special cable from Calcutta to the Montreal Gazette, dated 30th November, says that a very rich copper mine has been discovered in the Garwhal district of the Himalayas. A company, with a capital of 1,500,000 rupees, is being formed in Calcutta to develop the mine. Seventeen American mining engineers are prospecting the Himalayas.

The Allan Steamship Line has awarded a contract for the construction of a second large turbine-engine steamship to a Linthouse, Scotland, shipbuilding firm, the other having been given to a Belfast company. Both vessels will have a length of 540 feet, a breadth of 80 feet, and a depth of 46½ feet. Each is to have a capacity for 300 saloon, 30 second, and 1,000 steerage passengers. They will probably be called "Victorian," and "Colonian," respectively.

The Valley City Seating Company, of Dundas, Ontario, Limited, has been incorporated under Ontario charter, with a capital of $75,000. Its objects are stated to be: to acquire, and manufacture, and deal in all kinds of chairs, settees, seats, and seating, furniture, interior art or other ornamental woodwork, architectural wood-carving, veneer and other doors, roller partitions, hardwood ceilings, wood carpet and parquet floors and fittings, furnishings and finishings and all other wood-work for churches and banks. Among the provisional directors are J. D. Pennington, D. E. Turner, etc.

J. E. ROBERTS, - - GEN.-MGR.

THE Welland Canal is to be kept open until 15th December. Ice is forming at the west end of Lake Erie and it is three inches thick on Lake St. Clair where the steam barge "Tempest" stuck for a while on Sunday. The lightships and gas buoys in the Detroit river and Lake St. Clair have been removed, and are now in winter quarters. Everything stopped in the river at Detroit last night, says a despatch of 30th November, and from this time until the close of navigation will run the river only during the day.

THE extensive improvements that have been made on the Grand Trunk Railway System on the line between Toronto and Montreal, west of Port Hope, were finished a week ago, and trains are running over the new portion. This work completed the double track of the Grand Trunk between Montreal and Niagara Falls. The portion between Whitby and Port Hope has taken a long time to complete, but now that it is done it is well done. Over 46 miles, a practically new roadbed has been under construction, involving an outlay for betterments of $1,500,000.

A CURIOUS state of things exists at Gagetown, Queen's County, New Brunswick, if the following paragraph is true. The Gagetown Gazette, has had to suspend publication. The editor remarks: "We have always found it impossible to secure local help as is found in most country newspapers, as in small towns there are always boys and girls who are anxious to get a chance to learn a trade. It is not so here, as you cannot get either a boy or a girl to work in an office, or in fact, anywhere else."

QUICK DELIVERY OF BOILERS.

We have in stock material for the following sizes and styles of Boilers:—

Mumford Standard -	35 to 175 h.p.
Mumford Portable -	6 to 110 "
Return Tubular - -	12 to 150 "
Vertical - - - -	4 to 60 "

As we have a large shop, thoroughly equipped with the latest appliances, we can deliver any of the above boilers on short notice.

Competent persons tell us that the quality of our boiler work cannot be surpassed.

THE INDUSTRIAL SITUATION.

Following the news of closing down of factories and reduction of wages in various parts of the United States last week, comes further information along the same lines. The International Harvester Co., Chicago, is trying to save $5,000,000 per year by the laying off to save $5,000 per year by the laying off of 7,500 of its 19,000 employees; 3,000 of these being in the Deering division, and 1,500 in the McCormick division, the others being stationed in the mills at Milwaukee, Springfield, and elsewhere. A dispatch from Boston, Mass., of November 30th, stated that the wages of some 32,000 cotton textile operatives were reduced on that day, this making the total number of New England workmen to have their pay cut down this fall, 64,000, and since then about 11,000 more have been reduced in New Bedford. The cut averages 10 per cent. In Rhode Island, practically every cotton mill has adopted the new schedule, about 20,000 hands being affected, and the new rates equalling a loss of income of something like $20,000 weekly. Apparently no very serious protest is being made against the

COCOA
IS ACKNOWLEDGED BY THE WONDERFUL SALE IT IS HAVING

reductions. Several of the paper mills in New York State and New England have closed down, though, it is believed for only a short time. Unusually low water in the streams is given as the cause, though it is divined that owners of factories are glad to seize hold of an excuse to reduce their stocks, owing to trade conditions. At Paterson, N.J., a 10 per cent. reduction in wages went into effect at the Passaic Steel Company's plant. The Boston Iron & Steel Works, at McKeesport, Pa., have announced an indefinite shut-down. Against the above may be set the return to work of a number of employees at the Ohio works of the Carnegie Company, at Youngstown, which had been closed down for some weeks to reduce the output of pig-iron; also, there are reported indications that very shortly practically all the iron and steel factories in Braddock, Homestead, and other parts of Pennsylvania, will be working double time with a full complement of hands, after several more or less protracted periods of idleness.

It is very gratifying to be able to note that the employees of the Dominion Iron & Steel Company, at Sydney, C.B., who, it was reported, were planning to strike, in consequence of the recently enforced wage reduction, have thought better of it. A mass-meeting was held on the 30th ult., at which this common-sense decision was arrived at. The citizens of the town generally, to whom a strike would have proved a disaster of the worst kind, did a good deal towards bringing about an adjustment. The company on their part offered to reduce the rent of their houses to the men by 50 per cent., and to supply them with coal at cost, two propositions which were gratefully accepted.

THE HONEY INTERESTS.

This week there has been held at Trenton a convention of the Ontario Beekeepers' Association. The price for the year's crop of honey had been fixed as follows: Sixty-pound cans, 7½c. per pound; comb honey, first-class, $1.75 to $2 per dozen. A commission house had been selected to handle the goods, but had finally declined on the ground that 5 per cent. commission was considered too little, especially on comb honey, and because members were already selling to others in Toronto. Rules for grading honey had been adopted, which, it was thought, would be of great value to beekeepers. Several papers of interest to apiarists were read and discussed, but the chief discussion of the meeting was around the question of the primary purpose of the Association. This was finally resolved to consist in the endeavor to obtain better, more evenly graded goods, and thus develop the home and foreign markets. A good many members strongly opposed Government aid altogether, but it was finally decided to ask for a Dominion act governing the grading of honey and proper inspection for foreign markets.

Economy in Lumber Cutting.

A prominent lumberman stated recently that, in his opinion: **Every gauge saved** on your saw meant **twenty cents per thousand** added to the value of your entire cut.

The ordinary **circular** cutting forty thousand per day is **6 gauge**. The **Band** never over **14 gauge**.

Its use therefore adds $1.60 per thousand to value of lumber produced.

Double Cutting-steam Feed Steam Niggers, Loaders, Kickers and Steam Setters — add larger percentage to daily cut reducing cost per thousand.

This Pony Band—Single or Double Cutting—using **15** or **16 gauge short saws** is within the reach of all. You should get into line—get posted —make the change—it's simple. Many hundred Bands running in Canada.

THE PORT OF MONTREAL.

On Monday last, December 1st, the navigable season on the St. Lawrence from Montreal closed for 1903. It had been a season of very considerable length. The total number of boats arriving in Montreal this season was 797, as against 758 last year. The total net registered tonnage last year was 1,541,272 tons, which has been exceeded this year by about 450,000 tons. These figures include all vessels entered in and out of Montreal, whether steamers, yachts or schooners, which go to deep water. The number of regular lines of ocean steamers plying to the port has been added to, while new water connections between the city and the Great Lakes have been this year effected.

The greater number of large Atlantic liners is responsible for much of the marked increase in tonnage shown. There are now half a dozen steamers trading regularly to Montreal, each of which exceeds 6,000 tons burthen. Unfortunately the record of the port, or more properly, of the St. Lawrence route, since Montreal port suffers in repute as the route does, has been injured by the grounding of the Manchester Trader and the Norwegian and the total wreck of the Monterey, which happened far down the gulf. These accidents have been shown, however, to be more the fault of incompetent navigators than of the natural dangers of the route. The Government is slowly but steadily improving the buoying and lighting of the river, and shippers are steadily hoping for a reduction in the marine insurance rates, which have proved such a handicap to the St. Lawrence route.

A feature of the season's work was the purchase by the Canadian-Pacific Railway of the Elder-Dempster and Beaver Line steamers. This great company can now ship goods or send passengers by its own steamers and rails from England to China. Minor features are the establishment of the Finska-Lloyds line between Canadian ports and La Pallice-Rochelle, and the Canadian Ocean and Inland line between Canadian and English ports. In the case of all the different lines, whether to Liverpool, Glasgow, London, Bristol, Antwerp, Hamburg or Belfast, there is as a rule an increase in tonnage as compared with last year. The South African service, too, makes a good showing.

It is worth while to notice the growth of the passenger traffic to and from Montreal. The Allan Line carried 38,905 passengers, as against 29,033 last year and 22,458 in 1901, including both Liverpool and Glasgow passengers. The Dominion Line carried 13,529 and C.P.R. Atlantic Line 26,074. These three lines thus show the not inconsiderable total of 78,508 passengers. Of this number 66,536 were carried from Europe to Canada and 11,972 from Canada to Europe.

Notwithstanding the encouraging figures given above, shipowners declare that the season has been but little profitable. The competition of American ports has kept freight rates low, while the rates of insurance on both cargoes and hulls have been maintained at a high point. An exception obtains in the case of cattle carriage, the embargo placed by the British Government on cattle from New England ports resulting in greatly increased shipments from Montreal at higher freights than for years past. A new feature in the annals of the season is the export of cattle to South Africa. The last three steamers from Montreal have taken both cattle and horses as an experiment, with the intention of opening up this trade between South Africa and Canada. Four different lines—the Allan, the C.P.R., the Leyland and the Furness-Withy—have sent eleven steamers of 40,191 tons to that continent. Rates on grain to Europe were generally low, and so they were on flour and lumber. Cheese exports were increased, but butter exports decreased. Shipments of apples from Montreal were the heaviest ever known.

As to inland traffic between Montreal and the Great Lakes, the Richelieu and Ontario Navigation Company had a very active season in both passengers and freight, while the Canadian Ocean and Inland Line had an encouraging first season, bringing goods direct from England and shipping them to Fort William and Port Arthur. Arrangements are progressing—but slowly, however—towards the enlarged facilities for inward and outward transhipment at our great ocean port which have been long in process. Whether the

Harbor Commission or the city council, or both, are to blame, the harbor arrangements at Montreal are by no means what they should be or what it was expected by this time they would be.

ADVANCE AND DECLINE IN BUSINESS.

The theory of cycles in business, that is, periods of prosperity alternating with depression, is not a new one. Enough has been observed of the alternation of such longer or shorter periods to justify the recognition of a general law, according to which a series of prosperous years is followed by a series of lean ones. Some fifteen to twenty years ago, Charles H. Dow, of New York, thinking the stock market the best barometer of trade conditions, formulated and compared price lists of American securities for a series of years. He found the prices of securities taking in periods of years "a series of swings": first, the main movement, usually running for a period of years; then the secondary movement occupying thirty to ninety days; and third, the small daily fluctuations caused by merely "traders'" operations.

An article in the Independent two or three weeks ago, dealing with business in the United States, the title of which is: "Has the Tide of Prosperity Turned?" deals with some features of the present situation among our American neighbors in the light of Mr. Dow's general law. Going back to the close of the Civil War in that country, he notes the following periods of large advance and decline:

Years 1868 to 1873, a period of advance.
Years 1873 to 1877, a period of decline.
Years 1877 to 1882, a period of advance.
Years 1882 to 1885, a period of decline.
Years 1886 to 1892, a period of advance.
Years 1892 to 1896, a period of decline.
Years 1896 to 1902, a period of advance.

It is noticeable that these periods are of a duration of from four to seven years each. The term of advance closing with 1902 was one of six years, and the reaction from excessive activity in speculation at great prices is dealt with by the writer of the article, the editor of the Wall Street Journal, Mr. Thos. F. Woodlock, thus:

The country has enjoyed a period of extraordinary growth in wealth, thanks to abundant harvests and enormous production and sale of all kinds of goods here and abroad. In the early nineties the Western farmers were staggering under a load of mortgage debt. By the close of the century they were lenders of money in Wall Street, and by 1901 they were investors and speculators. The country, as a whole, thanks to its enormous exports of commodities, had greatly reduced its indebtedness to foreign capital, and like the farmer had gotten out of debt in 1900, but it quickly speculated itself into debt again in 1901. What with enormous business in merchandise and commodities, and a fever of promotion and stock-gambling of totally unprecedented intensity, it is not surprising that the supplies of loanable or "floating" capital finally became absorbed and "fixed," with the result that a general liquidation became absolutely necessary in the stock market. A halt in general business was bound to follow. The direct causes of the latter were the rise in the necessaries of life—food, fuel and clothing—and the consequent demand of labor for increased compensation. These demands could only be met as long as the ball was kept rolling; the moment it stopped they could not be granted.

Happily, there are excellent reasons for believing that we need not apprehend a very serious or prolonged depression in trade. The main trouble is that we have overdone everything a little—most of all promotion and speculation. We have had a wonderful run of good luck, a wonderful period of growth in general wealth, and have, in the current slang phrase, "run it into the ground."

The most disquieting thing Mr. Woodlock finds in the outlook is the labor question, and he sees a clear disadvantage to labor in the inevitable contraction of manufactures. "Human history," he concludes, "has been summed up in a cycle of six words, thus:

War,
Poverty,
Peace,
Prosperity,
Pride,
War,

and, as the Greek proverb has it, 'War is father of all things.' Finance and commerce are, after all, a kind of war, and the historic cycle holds good for them, too."

BRITISH AND SOUTH AFRICAN TRADE.

A good business man, Mr. Henry Birchenough, was appointed by the British Government to report upon the position and prospects of British trade in South Africa. In speaking of the considerable trade done there by Americans and Germans, this gentleman describes the sinister policy adopted by British steamship lines, which by carrying foreign goods at lower rates than they have been charging for British goods, have given an impetus to foreign trade in a British colony, to the consequent injury of their own countrymen. American goods for a period of nine months were, owing to a freight war between the South African Conference and the Prince and Houston lines, carried from New York to South Africa at an all-round rate of 10s. per ton, compared with British rates varying from 25s. to 42s. 6d. "After careful enquiry," Mr. Birchenough observes, "I am convinced that no single circumstance has done so much to promote the growth of American trade during the past twelve months as these low freight charges between American and South African ports. It is not pleasant to reflect that they are the result of the action of British and not of foreign steamship companies."

The London Economist of 21st November, in the course of an article headed, Decrying the Mother Country, calls Mr. Seddon, of New Zealand, "that weird politician," over the coals for reckless and absurd assertions about the decadence of Great Britain that are calculated to injure the Motherland in the eyes of foreign nations. Again, in his report on South Africa, Mr. Birchenough, the Government Special Commissioner, observes: "Much of the depreciatory criticism which has been directed by recent writers against the conduct and methods of British trade is to be deprecated, for the reason that it is too often indiscrimi-

nating and exaggerated in its character. . . . As it is, while it has often failed to assist British traders, it has almost always succeeded in giving a valuable and quite unnecessary advertisement to foreign manufacturers, and particularly to Americans and Germans." It is high time, indeed, adds the Economist, that this policy of self-depreciation were dropped, and that, in the present fiscal controversy facts took the place of the vaporings of empiricism.

IRRIGATION PROSPECTS.

Mr. J. S. Dennis, late Deputy Commissioner for Public Works in the North-west, has issued a report, from which it appears that 64,621,169 acres of land in the Canadian Territories, at present classed as semi-arid, may be rendered suitable for the production of cereals. This vast tract of land, situated in the southern and south-western portions of the Territories, is at present ranching country. It produces a nutritious grass on which cattle thrive, but owing to lack of rain it is often impossible to raise crops on it with profit. It is, however, an ideal country for pastoral or dairy farming. The soil naturally is very fertile, and as its only drawback is lack of moisture, the possibilities of irrigation speedily became a matter for discussion.

In 1893, as we have recently noticed, the first irrigation work of that district was undertaken, a channel being run from the Elbow river to serve the district west and south-west of Calgary. Since then other like works have been undertaken, and up to a year ago 163 canals and ditches had been constructed with a length of 474½ miles serving 623,362 acres of land. The increased value of this land as a result of irrigation is stated in the report at $1,850,000, which represents a large profit on the cost of the work. The increased value given by irrigation of the entire semi-arid region, taking the same figures as in the case of the land already irrigated, would be nearly $200,000,000. It is worthy of note that the Canadian Pacific Railway has taken several million acres in the semi-arid region as part of its land grant, and will irrigate it. The irrigation of the whole region will, no doubt, prove a work of years, but in the meanwhile the idea is gaining ground, and several parcels of land are being taken in hand by private companies. The Americans have employed irrigation very successfully in some of their semi-arid regions in the Western States.

BOILER INSPECTION.

Since our comments on the question of boiler inspection in our issue of last week, we have had an opportunity of comparing the laws of such of the Provinces of this Dominion as provide for the inspection of steam boilers with the law in England, which indirectly makes a proper inspection of boilers compulsory. The comparison, as will be seen, is very much in favor of English law.

In both countries the law has been enacted principally for the protection of life. The difference, however, between the laws in this country and the law in England is very striking. In Quebec, Manitoba and British Columbia, and, perhaps, in Ontario, where such an inspection as the Acts and regulations of these Provinces call for has been made, and a certificate granted, a boiler owner can, in the event of an explosion, shelter himself from its consequences behind the Government, which is responsible for the quality of the work done by its inspectors. In England the onus of responsibility is thrown upon the boiler owner.

The law in the latter country is embodied in the "Boiler Explosion Acts of 1882 and 1890." The law itself is contained in the Act of 1882, while the Act of 1890 extends the operations of the earlier Act to all classes of boilers. These Acts provide for strict investigations being made into the causes and circumstances of boiler explosions by the Board of Trade, which is really a branch of the Government, and has far wider powers and authority than is comprehended by the term in this country.

Notice of any explosion, stating the locality of the explosion, the day and hour it occurred, the number of persons injured or killed, the purposes for which the boiler was used, the part of the boiler which failed, and the extent of the failure, must be sent to the Board of Trade by the boiler owner or user, or some one acting on their behalf, within twenty-four hours of the occurrence of the explosion. Non-compliance with this provision makes the person in default liable to a fine not exceeding £20.

Provision is then made for the Board of Trade making a preliminary enquiry into the causes of the explosion, and, if it sees fit, a formal investigation may follow. The scope of this enquiry, or investigation, is very far reaching. It is made by commissioners, one or more of whom must be a competent independent engineer or engineers appointed by the Board of Trade for the purpose of the enquiry only. These commissioners have the power of a court of summary jurisdiction, and in addition special powers as to the summoning and examination of all persons whose evidence in their opinion may have any bearing whatever on the matter before them, and as to the production of any books, papers or documents which they may think necessary.

The scope of their enquiry can go back from the time of the explosion to the time the boiler was built. It covers the boiler owner, the user, the engineer, or others in the employment of the user, the person whom the owner or user has employed to inspect his boiler, a boiler repairer, a second-hand dealer from whom the boiler may have been bought, or the boiler-maker. Any one of these persons may be found responsible for the explosion.

The owner or user is relieved of responsibility by showing that the boiler has been efficiently examined, at proper intervals, by a competent person, and, if any repairs have been recommended, that they have been properly carried out. He is, however, liable for the acts of his servants, and if the engineer were found to blame, the owner or user would be held responsible.

A Boiler Insurance Company may be found responsible where its inspector has been negligent in making an inspection, or the commissioners find him to be incompetent. A second-hand dealer may be found to blame for selling a boiler which he knew to be defective, or misleading a purchaser as to its condition. And a boiler maker can be found to blame for improperly making repairs, or where a boiler has been improperly constructed.

The commissioners may order the costs and expenses of the investigation, or any part thereof, to be paid by the person found to blame for the explosion. These costs are not in the nature of a fine, and are unlimited. These findings are made public, and the reports show that sums of from five pounds to two hundred and fifty pounds have been paid by those found blameable, while they are still liable for damages under common law.

It will be seen that the tendency of the Act and its workings is to compel boiler owners or users to have their boilers properly examined by competent persons, and to employ trustworthy engineers. It very naturally raises the standard of the men employed, for the consequences to an engineer who is found to be negligent or incompetent in his duties are serious.

Boiler Insurance Companies which hold out to the public that practical immunity from explosion can be relied upon by their system of inspections would be presumed to employ as inspectors only men well known to be competent, and would probably be heavily mulcted in costs where an explosion was caused by a defect which was overlooked by an inspector whom the commissioners found to be incompetent. Second-hand dealers would be careful in the statements they made to purchasers regarding the condition of the boilers they had sold, and boiler makers would exercise great care in the work put upon the construction of, or repairs to, boilers.

It would seem, therefore, that no greater protection against loss of life or damage to property arising from the explosion of boilers could be given than by the Legislatures of our different provinces passing an Act similar in its scope to that in use in the United Kingdom. The Act in question has been in operation for twenty-one years, and its results have given very great satisfaction.

ACCIDENTS FROM ACETYLENE.

There have been a number of explosions arising from acetylene gas machines at various points in Canada during the last few weeks. In the case of one at Ridgetown, Ont., a coroner's jury reached the following conclusion:

"We strongly recommend the Government to pass an Act to enforce the installation of acetylene gas machines in isolated buildings, and place them under Government control."

This eminently sensible recommendation has been objected to because it is said to be put forward in the interest of the Standard Oil Company, who, presumably, are afraid that the growing use of acetylene gas for illuminating purposes may interfere with the use of coal oil lamps. As to the truth of this guess we know nothing, but we are convinced of the need of regulation and supervision of a method of lighting so little understood theoretically, and so liable when in the hands, as it often is, of people who know nothing of either mechanics or chemistry, to result in explosion and disaster. A word as to the production of acetylene gas. It is produced by the contact of calcium carbide with water, which contact results not only in the production of volumes of brilliantly illuminating acetylene gas, but also in the generation of much heat.

Several years ago, December, 1899, to be exact, it was shown by Robert Howe, C.E., in a paper before the Insurance Institute of Toronto, that the Explosives Department of the British Home Office, having made experiments to determine the character and peculiarities of acetylene gas, found that under a pressure equal to two atmospheres it is violently explosive. Therefore, the pressure at which it can be legally used is placed at one and one-twentieth atmospheres, while in France and Germany one and one-half and one and one-tenth respectively have been fixed by the authorities. Mr. Howe's paper further shows the risks incident to the use of these substances:

> The risk attending the storage of carbide includes not only an immediate evolution of large quantities of highly inflammable gas on contact with water, but also the possible ignition of the gas, or mixtures of it with air, by the intense heat generated by water acting upon the carbide.
>
> * * * * * * * * * *
>
> Danger from improper construction or location of generators, which should always be placed in a dry, well-ventilated and absolutely frost-proof room, and no generator should be used *until that particular style has been examined and approved* by a competent person.

We venture to say that the suggested regulation we have underlined above is persistently ignored in Canada. Numbers of persons, both male and female, are allowed to manage, or mismanage, these perilous materials who know nothing of the risks to which they are nightly exposing households and whole communities. More than this, we have been told that many acetylene gas machines are made of flimsy material, put together carelessly, and that they are exposed to weather and the action of rust and water in a manner that causes one to wonder that wounds or fatal accidents are not more common.

Here, then, is an element of danger to the public which should no longer be permitted. A man of intelligence, who understands the composition of carbide and the conditions of the production of acetylene gas, may be trusted to have a gas machine properly installed in an outhouse, and will naturally take pains to look after it, or have it looked after. But it is worse than the prevailing carelessness as to steam boilers in factories to have servant maids or stable boys given charge of the watering of carbide in dwellings or rows, where an explosion may mean death to one or a dozen persons.

It was, in our opinion, with perfect propriety that the Ridgetown jury made their recommendation of governmental control. There should be an Act to regulate the construction of machines for the making of acetylene gas, and this Act should also regulate the placing of such machines, and subject them to periodical inspection. It would further be well that every person whose duty or practice it is to attend to these machines should be required to possess a Government certificate, and that the householder who desires to instal such a machine should obtain a permit from the municipality in which he resides. In the Old Country and in Germany governmental regulations have been imposed upon the use of acetylene gas; and it is not in the public interest that the negligent go-as-you-please mode now in vogue in Canada of dealing with this illuminant should be permitted to continue.

THE SITUATION IN WHEAT.

As we forecasted some weeks ago, dollar wheat for this year seems to be proving itself somewhat of an ignis fatuus. Three months ago, the Manitoba farmer had certain grounds for believing that he was warranted in holding out for higher prices. United States Government statistics began to acknowledge that the earlier figures had been too optimistic, and that the yield in several of the western grain States would be considerably higher than had been expected. Then there was the early sleet storm in the Canadian Northwest, which did considerable damage to crops which already were betokening a lighter yield than had been looked for. Besides this, reports began to come to hand to the effect that the European crops would be for the most part very short. As a result of these conditions, and of the fact that stocks for local demand were already scanty, the domestic mills began to show great eagerness to obtain supplies of high-grade wheat, the earlier grain always being specially wanted for their purposes. In Minneapolis and some other places we believe a dollar per bushel was actually paid for wheat wanted in haste for special purposes. Apart from these isolated instances, however, it was by no means exceptional for millers to offer three or four cents more per bushel than Old Country importers could afford to pay, and buyers for the latter, being left in the lurch, became very keen in their enquiries, which still further strengthened the growers' feeling. One result of these factors and of the fact that towards the last of the season so much injury was done to the crop, as well as of the extra stringency with which the inspectors attended to grading, has been that this year the discrepancy or margin between the grades has been the greatest known for a long time.

Now, another side of the picture is presented. Although there has not been so much complaint regarding railway car blockades as was the case last year, yet owing to bad weather and slow deliveries by the farmers, the plans of the C.P.R. were thrown out of gear to no small extent, with the consequence that many western elevators are full now of grain which will not be moved out for months to come. Dealers having such large stocks on hand, the growers are apt to fare but poorly, and it is not too much to say that in most cases they would have made more net profit if they had sold a month or more ago.

A good many people in the West are questioning as to the discrepancy between the grading of Manitoba wheat and that of the Dakotas and other western States. According to Duluth standards, No. 1 hard must be composed mainly of hard Scotch Fife, and weigh not less than fifty-eight pounds to the bushel, whereas Manitoba No. 1 hard must be composed of at least 75 per cent., and must weigh sixty pounds to the bushel. Really, a hundred United States bushels are equal to not more than barely ninety-seven bushels, Imperial measure, or the American standard is one-sixth of a pound lighter than the Canadian. It should be remembered, however, as the North-West Farmer remarks, that "the market demand for our wheat depends, we think, much more upon our establishing a reputation for its reliability and then taking advantage of every means of keeping the quality of our grain as sold in the Old Country than upon the mere names under which we happen to send forward the different grades. In other words, if our inspections are made on a permanent basis, and are always to be relied upon, we can depend upon it that all the British buyers who know anything about the matter will soon learn the relative value of our wheat grades as compared with those of the consignments from other countries.

THE PROVISION TRADE.

The prices for live and dressed hogs have declined lately, and, as a consequence, the values of products have dropped likewise. Since the close of navigation, trade has been very quiet and this is likely to prove the case until after the New Year. Most of the supplies for the lumber camps, which always consume such large quantities of these goods, have already been sent up, and besides this the camps of late years have taken increasing quantities of fresh meat and poultry. In the States, according to the Cincinnati Price Current, there was a fair run of hogs during the week ending November 29th, with a considerable gain over previous receipts, but not quite equal to a year ago. The total Western packing was 545,000, compared with 465,000 the preceding week, and 375,000 two weeks ago. For the corresponding time last year the number was 565,000, and two years ago, 740,000. From November 1st the total is 1,550,000, against 1,800,000 a year ago—a decrease of 250,000. The quality is good. Prices show considerable reduction, with the prominent markets indicating an average of $4.25 per 100 lbs., compared with $4.55 a week ago, $4.75 two weeks ago, $6.05 a year ago, $5.70 two years ago, $4.80 three years ago, $3.75 four years ago.

The receipts of butter are increasing somewhat, and prices are distinctly easier. This increase in supplies is no doubt due to the closing down of the factories and hurrying forward of shipments. A number of winter creameries have now started and this fact will no doubt add to the supplies. Local prices, however, are better than those quoted for export requirements, but if the large receipts continue, a further reduction in prices may be looked for. The cheese market is easier. Factory men, however, do not appear disposed to accept the lower prices offered, so that there is still a fair quantity remaining in their hands. The majority of dealers apparently do not look for any great improvement in trade for some time to come.

The egg market is very firm, and there is an upward tendency in prices. Stocks are light and some dealers predict record prices for the coming winter. Better figures will even now have to be paid to bring forward sufficient supplies to meet the actual demand. So far as can be learned, stocks are in comparatively small compass. Some think that poultry is going to be high priced, partly because the season has been a comparatively poor one for young birds, owing to the cool, damp season. Against that theory, however, should be placed the fact that farmers generally throughout the country have become imbued with the idea that Christmas prices would be extra good, and so have kept their stock at home. As a result, perhaps, the supplies of poultry will be larger than anticipated. At the same time, the demand in the Old Country for good fowls is likely to be good, as all the year it has been on the scarce side there. It must be remembered, that only thoroughly good, well-finished birds should be sent over there. Canadian country dealers have it in their power to do much benefit to the poultry trade if they would take more pains and use more firmness to discriminate between fine stock and poor. As attention to high-class breeding pays in relation to cattle—witness Canada's success at the present Chicago stock fair—so is it the case with poultry. Farmers and chicken raisers have still a good deal to learn in this connection, though the carefully written bulletins issued from time to time by the Government are doing an excellent work in this direction.

DAIRY SHIPMENTS.

The extent and importance of our export of dairy produce to Europe is illustrated by the statistics given of the outcome of Montreal export trade in butter and cheese for the navigable season of 1903. The value of dairy produce exported from that city this year was $26,369,000. The quantity so exported in 1898 was $19,000,000 worth, so that the increase has been at the rate of nearly two millions a year. We are happily able to state that the quality of our cheese is admirably maintained. Of butter not so much can be said. The improvement in quality of cheese is probably due as much to better methods of making, improved buildings, and so on, as to the cool weather prevailing and the iced cars and compartments provided for its transportation. We obtain from the Montreal Gazette the following figures showing the season's results with comparisons for a series of years:

	Boxes, Quantity.	Per Box, Price.	Value.
1903	2,395,932	$9.00	$21,563,388
1902	2,109,171	8.50	17,927,000
1901	1,791,613	7.00	12,541,291
1900	2,077,000	8.00	16,560,000
1899	1,896,496	7.75	14,698,000
1898	1,900,000	6.35	12,065,000
1897	2,102,985	6.75	14,195,000
1896	1,726,237	6.75	11,605,000

Some thirty or forty firms were shippers of cheese during the season, besides the two great railways. Messrs. A. A. Ayer & Co., and Messrs. Hodgson Bros. continue to be, as they have been for years, at the top of the list of private shippers. We give a few of the names of these exporters, including shippers of more than 100,000 boxes:,

Shippers	1903, boxes.	1902, boxes.	1901, boxes.
A. A. Ayer & Co.	308,496	297,774	290,971
Hodgson Bros.	306,609	289,524	264,600
A. W. Grant	245,034	194,801	217,674
James Alexander	201,275	180,214	140,359
Lovell & Christmas	175,589	215,057	103,871
Co-Operative W. S. Co.	145,078	121,807	80,724
P. W. McLagan	99,255	71,641	86,543
Sundry Shippers	469,850	362,752	320,041
Grand Trunk	324,892	280,686	286,830
Canadian Pacific Railway	119,854	88,915	
Total	2,395,932	2,109,171	1,791,613

London, Liverpool, Bristol and Glasgow took the great bulk of these shipments, London getting over a million boxes and Liverpool over half a million, with Bristol and Glasgow getting 388,000 and 154,000, respectively. Manchester, Leith, Cardiff, and Aberdeen came next in order.

Our shipments of butter this year instead of being $8,000,000 in value, as they were last year, were a little less than 5,000,000 in value this season. We compete in the British market with Denmark, New Zealand, Australia, Russia, and the Argentine. The New Zealand article is very carefully graded, and the Russian is being steadily improved in quality. Canadians still need to improve their methods of cooling and transmitting butter; we have by no means perfected our system of shipping at regular intervals, and with cold storage and chilled chamber transmission. The following table shows what a set-back our butter shipments received this year. The results of the season, with comparisons for a series of years back, are as follows:

Year.	Quantity, Boxes.	Price, Per box.	Value.
1903	338,277	$14.20	$4,803,533
1902	539,845	14.70	7,936,121
1901	410,000	14.70	6,027,000
1900	256,000	14.00	3,640,000
1899	451,050	13.30	5,998,000
1898	270,000	12.25	3,307,500
1897	200,000	12.00	2,697,000
1896	157,321	12.25	1,890,000

The bulk of our butter goes to Bristol, London, Liverpool and Glasgow. This year Bristol received 134,000 boxes and London only 84,000, which was but half the average of some former years. Messrs. Ayer & Co. and Hodgson Bros. are still the largest individual exporters, and the two great railways shipped some 44,000 boxes each.

MINING MATTERS IN KOOTENAY.

A communication dated 21st November, respecting the doings and the outlook in the Kootenay mining regions of British Columbia, reached us too late for our issue of last week. It deals mainly with the mines around Rossland, Nelson, and the Boundary country:

The coming of snow has made the mineral output of Rossland Camp lighter than usual this week. For example, it stops shipping for the present from the Le Roi dump, and lessens the output from the Kootenay and Jumbo mines. The White Bear is likely to be a shipper soon. When the railway spur to the ore bins is done, and the new hoist and compressor are installed, the mine will be able to begin shipping. At War Eagle, mining and development continues. The I. X. L. will run steadily. Up to the middle of November, total shipments of ore for the year were 349,190 tons. More than half this quantity was from the Le Roi, namely, 186,485 tons; Centre Star's contribution was 69,736 tons; that of War Eagle, 28,158, and of Le Roi, No. 2, 23,-355 tons; Kootenay, Velvet and Jumbo help to make up the total.

In the Boundary, matters are fairly active. The Granby mines, as is natural, show the largest tonnage, as four furnaces were running almost steadily during October, and that company's properties alone shipped some 14,000 tons more than for the previous month. The next largest shipping mines, the Mother Lode and Snowshoe, show a somewhat less tonnage than for September. The total for the latter month was 70,284 tons, of which Granby mines put out 39,-398 tons; Mother Lode, 12,665 tons; Snowshoe, 9,480; Oro Denoro,, 3,215 tons; Emma, 2,320 tons; Sunset, Winnipeg, Morrison and Athelstan-Jackpot making up the remainder.

Oil concentration in the Rossland Camp is a live issue, and every effort is being made there, as elsewhere, to reduce cost. The best results cannot be obtained unless and until the lowest cost has been reached. The duty on oil to be used in oil concentration must, to this end, be reduced. An article in the Rossland Miner says: The matter of placing concentrating machinery on the free list is on all fours with the oil duty. The erection of mills would certainly be stimulated substantially if mining companies were relieved of the heavy burden of customs duties imposed by the tariff regulations, although it is well known in the mining industry that the required machinery is not available from Canadian manufactories.

In the Slocan, the Payne concentrator has now been in active operation for nineteen months, which is said to be the longest run of any mill in the history of the Slocan. There is an expectation that a silver-lead concentrator will soon be erected at Kaslo. News comes from the Lardeau of a strike of rich silver-lead ore, made while excavating for a blacksmith-shop at the Mammoth group on Goat Mountain. Eleven assays have been made, and the samples run from $306 to $722 to the ton. At Ymir the October output of the Wilcox mine was the best ever made, and the mine shows a good profit on the season. The report for October is 325 oz. of gold, forth $4,000, or thereabout, in addition to which two and a half carloads of rich galena ore have been shipped to the Hall Mines smelter, yielding about $2,400. Concentrates shipped amount further to over $500, net value, making the total output of the mine over $7,000 for the month.

The existence of iron ore in Rossland camp continues to create interest. Great expectations in this regard have been formed of the Kootenay and Monte Christo, but the Iron Horse has also shipped, I am told, 100 tons, which netted the company $21 per ton after paying $13 for freight and treatment. It is low-grade, heavy iron ore. The Evening Star, Iron Colt, and Mascot properties promise well

in this particular, some development work being already done.

Mr. A. C. Flumerfelt, assistant to S. H. C. Miner, of the Granby smelter and mines, returning on 18th November from visits to New York, Boston and Montreal, says, according to a special to the Nelson News, that "the outlook for copper is very encouraging. John Stanton, a director of the Granby Company, and who is regarded as the world's authority on copper, has been discussing the situation. He stated in the press that consumers of copper have been buying from hand-to-mouth, and that a continuance of the amalgamated curtailment for three months means 15 cent copper. A six months shutdown, Mr. Stanton added, would cause a copper famine. The demand for copper is firmer."

A meeting of the Greenwood Board of Trade was held the other day, at which Mr. Ehrlich, the president, was in the chair. Delegates were appointed to attend the annual meeting of the Associated Boards of Trade, which is to be held in Rossland on Wednesday, 2nd December. These delegates were Messrs. Duncan Ross, George R. Naden, and J. P. Myers-Gray.

CANADIAN ACTUARIES HONORED.

That our Canadian actuaries are appreciated outside as well as inside the institutions they serve is evidenced by recent events. The actuary of the Canada Life, Mr. Frank Sanderson, has been appointed chairman of the Board of Examiners for the Actuarial Society of America for the current year, having already served as one of the examiners for two years. We also observe the appointment recently of Mr. Sanderson to the Board of Governors of McMaster University. Mr. Thomas Bradshaw, actuary of the Imperial Life Assurance Co., was last week appointed consulting actuary of the Commercial Travellers' Association, in which capacity a good opportunity will be afforded him of rendering practical actuarial advice.

FREE-AND-EASY BUSINESS.

A bank manager in Ontario writes on Wednesday last, as follows: "You are always on the lookout for literary and business gems. Is not the enclosed (from a farmer lately turned business man), a worthy companion to the pretty picture" in your last week's issue." The enclosure is as under, written in a cramped, school-boy hand on a half sheet of cheap note paper, with no name or place mentioned, and with no signature attached:

november 27 1903

Dear sir

i resve your latter on nov 17 an j Wated hay few Days to see Wether e Wood pay up or not if e dont pay between now and next Wednesday notify him once More very strictly

and if he dont pay up Make him pay

your sturley

We have seen letters from French-Canadian storekeepers struggling with the English language, and they did not contain any funnier spelling than is exhibited by this man who lives in or near an English town of southwestern Ontario, and is, by the way he drops his h's, an Englishman. The ignorant coolness with which, without putting any place on his letter, he addresses the manager of a bank, assuming that the banker knows where he lives; and the stupidity which allows him to neglect signing his name to his communication are surely rare. But one may expect all sorts of things from the farmer-storekeeper with limited brains and no knowledge of business procedure.

Sugar in the local markets remains at unchanged quotations, though a shade easier. In New York, however, refined sugars have dropped 10 per cent.

THE OTTAWA COLLEGE FIRE.

A serious fire took place in Ottawa on Wednesday last, by which the great range of buildings on the south side of Wilbrod street belonging to the Ottawa University were absolutely destroyed. Happily the Science Hall, which is across the street, remains intact. The fire was discovered between seven and eight in the morning, while the students were at breakfast, but from the speed with which it spread the opinion is formed that the fire, which first developed in the Music Hall, had started the previous night, and had been smouldering for hours. At any rate, the flames swept through the corridors, which acted as a series of funnels for their sweep, so quickly that many persons were penned up in the different stories, some having to jump from the windows to save their lives. The building, which is a series of wings, connected by corridors, is mainly an old one, that is, it has been added to from time to time for thirty years or more. It had no fire doors nor any of the modern protective measures.

Frightful is it to contemplate what might have happened if the fire had broken out at night, when the students, priests and professors were in bed. The interior woodwork of the place is heavy and old-fashioned, and made a tremendously hot fire. It is probably true that this University building was no exception to the rule in unwise construction, for most of our universities and colleges were designed and erected before the newer principles and practices of fireproof building had become operative. This disaster, which has resulted in broken limbs and other serious injuries to several persons, might have been a calamity involving scores or hundreds of human lives. It should be a warning to our educationists to have in mind in the designing and occupancy of school and college buildings, the exposure to fire which they offer.

The loss is a serious one to the authorities of the college. In money it probably represents four hundred thousand dollars, but in interruption of their studies, in the loss of valuable books in the library, and the destruction of scientific apparatus, it is especially momentous. We see it stated, by the way, in the "Ottawa Evening Journal," that the walls of the chapel have been twice before visited by fire, and on this the third occasion they utterly collapsed. There is said to be $200,000 insurance on the building and contents. We have only been able to learn definitely about $150,000 of this which is in the following offices: Northern Assurance Co., $20,000; Insurance Co. North America, $20,000; Alliance, $20,000; Economical, $5,000; Equity, $10,000; Anglo-American, $10,000; Queen City, $10,000; Scottish Union, $30,000; Ottawa, $10,000; London Mutual, $10,000; Western, $5,000.

THE CANADIAN MANUFACTURERS' EXCURSION.

SIXTH PAPER.

It has occurred to the writer of these papers that it would be a good thing, now that the trip of these 120 manufacturers across the continent is some weeks old, and time enough has elapsed to allow impressions to crystallize, to let our reader know how the visitors, or at least the official representatives of the visitors, were affected by what they saw. This paper will therefore consist, not of expanded notes of our own, but largely of the story written about "The Continental Tour" in the special western edition of Industrial Canada, and of extracts from the formal report made to the Manufacturers' Association by its officers who made the tour. Says the writer who describes the tour:

"With such an immense expanse of country, and a comparatively meagre population, we must cultivate acquaintance, and foster intercommunication between all the provinces in order to establish those bonds of brotherhood and that unity of interest which are so necessary in the building up of a great nation. It was the distinct aim of the Association to see the great Western country, to meet its people, to endeavor to grasp sympathetically their problems, and following this, to open up through practical business

channels a closer intimacy between East and West. This purpose was admirably fulfilled.

"The Centre of All Things" is the descriptive phrase optimistically applied to Winnipeg by one of its progressive newspapers. Its growth and progress form one of the most interesting chapters in Canadian history. Thirty years ago it had a population of less than 500. To-day, it is a flourishing city with a population of more than 65,000, and an activity not excelled by such great Eastern centres of Montreal and Toronto. From a prairie village it has grown to be the great receiving and distributing centre of Central Canada.

The marvellous growth of Winnipeg is indicated by the fact that during the first eight months of 1903, permits were issued for buildings valued at $5,000,000. All these evidences of progress were emphasized by the visit to the city and personal contact with citizens.

No more hearty welcome could have been granted to any visitors than that extended by the people of Winnipeg during the brief sojourn of the excursionists. The officers of the Manitoba branch, together with other prominent citizens, welcomed the passengers as they alighted from the train, and from that moment until the time for departure the reception and demonstration did not cease.

The visitors were at once struck with the broad clean streets, and the bustling business atmosphere—new buildings on every hand, new storeys on almost every warehouse, and new streets being opened up, told plainly of prosperity. And above all else, the contagious optimism of the people which pervaded the business and social life of the city, not only disclosed the secret of their progress, but furnished the strongest evidence of the greatness of our western country.

There was a point in Mr. Drummond's address here, a local point, in which he thought they would be able to help them. He believed they had an Exhibition in Winnipeg in July. Might the Manufacturers' Association help them to get a machinery hall, where the manufacturers could bring their exhibits from the East and show the West what they could do for them in machinery. (Hear, hear.) Their Association had a membership of 1,200, but before the year was out it might be 2,000, and it represented capital to the amount of three to four million dollars. One of their objects was to try and raise the standard of Canadian workmanship. They wanted more technical schools, so that the young lads and daughters of Canadian artisans might be as well trained as any German or American pupils, so that the very best work might be produced.

Fronting on Burrard Inlet, and extending across a strip of land to English Bay, the shore of which is rapidly being claimed, is situated the merchant and commercial centre of Western Canada, the good city of Vancouver. As a distributing centre, the large warehouses in almost every line of goods indicate a heavy trade. These are likely to be largely increased both in size and number in the near future. British Columbia is yet, commercially speaking, an unknown province. Development has only begun. Its lumbering, mining and fisheries are but infant industries capable of immense growth. With their advance, additional manufacturing plant will spring up and Vancouver will be the great centre around which the province will develop and from which it will secure a large proportion of its supplies.

The mining industry has received serious setbacks. Ill-planned and sometimes fraudulent schemes with mines "only on paper," have made capitalists doubly suspicious about British Columbia mining investments. Mr. C. Sweeney, of the Bank of Montreal, spoke for the province when he expressed his faith in the future of its mineral wealth. When the coal mines on the island and in different parts of the province, and the mines where the precious metals are found at Nelson, Rossland and elsewhere, were visited, and the modern methods that are being used were explained to the excursionists, every one would be impressed and convinced that the minerals of the province would yet prove to be of great value, and become a magnet to attract both capital and population."

FINANCIAL MATTERS.

The Dominion Bank has opened a branch at St. Thomas, Ont. It has also taken over the old established banking business of E. D. O'Flynn & Sons, in Madoc, Ont., Mr. F. W. O'Flynn being retained as manager.

The chairman of the Bank of Scotland, John Hamilton Dalrymple, Earl of Stair, died yesterday morning, having reached the great age of 84 years. The deceased Earl came of Covenanting stock, and had a long line of distinguisned ancestors. Besides being chairman of the Bank of Scotland, he was Chancellor of the University of Glasgow and Lord Lieutenant of Wigtonshire.

Owing to ill-health, Mr. W. R. Travers, manager of the Merchants' Bank, in Hamilton, Ont., has resigned. He is succeeded by Mr. A. B. Patterson, manager of the St. Thomas branch. We understand that Mr. Frederick Hague, who has been connected with the Bank in Montreal for some years, has resigned from the bank in order to enter business as an insurance and financial agent. He has been appointed city agent for the Liverpool and London and Globe Insurance Company.

Hon. Arthur Drysdale, Commissioner of Works and Mines for Nova Scotia, has succeeded, in England, in floating a loan on most favorable terms to enable the province to pay subsidies and advances on account of the Halifax, Southwestern Railway, being built from Halifax to Barrington, by Mackenzie & Mann. Under the contract the province advances Mackenzie & Mann, to build the road $13,000 a mile, secured by first mortgage bonds on the road. The total length of the road is 200 miles.

In high finance, Rockefeller is the rising, and Morgan the setting, sun, says the Chicago Record. The "deadly" parallel tells why:

	Rockefeller companies.	Morgan companies.
Capital stock	$ 556,542,300	$2,153,061,600
Market value	1,041,521,582	1,020,119,812
Water	None	1,132,841,788

In an article descriptive of Trusts and their methods in the States, a Boston writer says that if Thomas B. Reed had succeeded in beating the anti-trust programme of the administration and had lived, there is little doubt that the trusts would have sought to beat Roosevelt in the national convention of 1904, and run Reed for President. The death of Mr. Reed was the death of the cause of trusts in the Fifty-seventh Congress of the United States. It would not be fair to regard Mr. Reed as a mere tool of the trust. He was an ultra high protectionist. He was a believer in the modern trust development. His remarkable fling at Roosevelt's plan to regulate trusts by further legislation as an effort "to compress the oak tree back into the original acorn" will live for many years.

INSURANCE MATTERS.

The policy holders of the Victoria Mutual Fire Insurance Company held a meeting in the Board of Trade rooms in Hamilton a week ago to consider a proposition to subscribe a capital of $100,000 for that company and introduce the cash premium method. Those present favored the scheme, and it was understood that each director would subscribe $2,500 towards it.

The Railway Passengers' Assurance Company, of London, England, has this week removed from 28 Wellington Street East, Toronto, to the rejuvenated Bank of British North America Building at the corner of Wellington and Yonge Streets. The new offices afford nearly three times the room of the old, and are in other respects much better adapted to the company's growing needs.

The danger from electricity, particularly for the fireman in directing a stream of water upon an object carrying electric current, was the subject of an article in a recent issue of "Energie," of Berlin, recording the results of a number of tests. A man wearing wet shoes and standing on a wet plank flooring, threw a jet of water on an electrified plate. At 500

volts and an aperture of 0.74 inch in the nozzle, he felt the current at a distance of 3¾ feet, and with an aperture of about 2 inches could not get nearer than about 3¼ feet. Under the same conditions, but with alternating current, he could not stay within 8.2 feet, and at 3,600 volts he had to remain at a distance of 26¼ feet.

INDUSTRIAL ENTERPRISE.

The municipality of Berlin, Ont., will next spring construct new filtration beds and other extensive improvements for sewerage farm purposes. The cost is estimated at $60,000.

A factory has been established on the north shore of the St. Lawrence, below Saguenay, to manufacture oil, glue and fertilizers out of Greenland sharks, of which there are large numbers in that vicinity, running some of them from 200 to 600 pounds in weight.

A despatch from Boston announces that the Fall River iron works, operating four print cloth mills, will cut down wages next Monday, and on that day also nearly all Rhode Island and Connecticut manufacturers will adopt the lower schedule. A cut in New Bedford is to occur in two weeks.

On Tuesday last there was a conference in Montreal of leading men in the rubber trade. Views were exchanged as to current and future operations. Mr. Miner, of the Granby works, who was in the chair, declared that there is no proposal by the manufacturers to increase the prices of their products.

The dumping process has begun in earnest. A despatch from London of a recent date stated that the Monmonths Wire, Steel and Tin Plate Works, employing a thousand hands, announces that owing to the dumping of American and German steel in Great Britain, the profitable continuation of its business is improbable. It has notified its employees that after November they will be engaged under weekly, instead of monthly contracts. The company has spent £40,000 during the last five years in modernizing its plant.

The industrial situation, in Sherbrooke, Que., has been very unsatisfactory of late owing to the low condition of the Magog river and the abundance of ice and snow prevailing. Some of the establishments using electric power have already had to close down, and many storekeepers and householders have had to use candles and lamps owing to the poor quality of the electric light. The light and power company claims it is not to blame, but that the difficulty is caused by interference with the natural flow of the river by the Paton mills. One remedy suggested is the lowering of the channel at the foot of Lake Memphremagog.

During last week there were three companies with a capitalization of a million or over, which received Dominion Government charters. One, the Pacific Coal and Oil Company, of Toronto, has an authorized capital of no less than $17,500,000. As its name implies, its aim is to produce and refine oil, also carry on mining, milling, reduction and development enterprises. Among the charter members is J. S. Lovell, Toronto. "Canadian Contractors," Toronto is another company just chartered, its capital being $3,000,000. Mr. E. L. Sawyer, Toronto, being one of the incorporators. The American Asbestos Company, headquarters at Montreal, capital, $1,000,000, is a corporation in which Mr. H. M. Whitney, of Boston, and Mr. B. F. Pearson, of Halifax, are interested.

Many of the best surgeons in New York, says the New York Times, send their instruments for repairs to a man in Brooklyn. A specialist says: "Surgical steel can be wrought and wrought only in England. The famous surgeons of Berlin and Vienna must send to England for their instruments. In modern surgery, where life or death depends absolutely upon the reliability of the instrument to do exactly the work that the operator expects of it, no surgeon will take chances with a knife, scissors or forceps that he cannot depend upon as absolutely as he can depend upon his own nerve."

The proportion of Canadian workers in the various industries in the State of Massachusetts is no less than 13.01 per cent., or nearly one-seventh. This seventh is shown by the State Board of Labor Statistics to be composed of 7.54 per cent. French-Canadians, 2.65 per cent. Nova Scotians and 2.82 per cent. other English Canadians. The figures of the Bureau show that 44.41 per cent. of Massachusetts' industrial population was born under the British flag. Out of a total population of 2,805,346, shown by the census of 1900, there were 1,079,006 classed as workers. Among these 28.70 per cent. were Irish, 2.32 per cent. Scotch, and 13.01 per cent. Canadian It is curious that none are specifically classed as coming from England and Wales. It is curious to observe that only some 37½ per cent. of all the workers in the State were born in the United States, and only 19¾ per cent. of them born in Massachusetts itself. Analyzing the nationalities of the people in the State, Massachusetts, at the time of the last census, had, in its population of 2,805,346, no less than 843,324 persons of foreign birth. The report of the Bureau shows that the foreigners are chiefly of the working class.

HOUSE ROOM IN TORONTO.

With a view to finding some data in the difficult question of house room in the city of Toronto, and its relation to increasing population, the Globe recently examined the assessment statistics of some 150 houses in representative districts. These figures show that while in 1898, the number of occupants in these houses was 778, it is now 935, or an increase of about 20 per cent. Growing density of population in a city is a feature for which those who have the people's best interests at heart cannot feel thankful. One reason, no doubt, is the non-existence of houses of the sort required, while another, growing out of this, is the increased rents which Toronto families are now called upon to pay for the accommodation offered. In 1898 the average rental of the aforesaid residences was $14.20; now, it is $18.80, or an advance of 32 per cent. This would be all very well if the people generally were in a position to pay the higher rate, but their wages or incomes have increased in no such proportion. Property owners, however, say that returns from real estate are still materially lower than those from other classes of investment.

DRY GOODS ITEMS.

Joseph Benn & Sons, of Clayton and Bradford, England, have decided to establish a branch of their extensive business at North Providence, Rhode Island, U.S., for the manufacture of mohair, alpaca and other materials. That municipality has agreed to exempt the firm from taxation for a term of ten years.

There seems good reason to believe that the policy of being in a position to retaliate for harmful tariffs has more supporters in the country than the protective policy which is the chief plank in Mr. Chamberlain's platform. Mr. H. B. Bruce, J.P., of the firm of Bruce & Sons, Wigston, Leicester, recently gave his views on this subject to an interviewer. He represents the elastic web industry. "We used to do tens of thousands of pounds' worth of trade with America twenty years ago," he said, "but now we do not do anything at all." In Mr. Bruce's opinion, if a duty is put on any goods going into a country, the manufacturer has always to pay at least one-half. In the '70's and '80's there were employed in the elastic web trade more than 10,000 people, principally at Leicester, Derby, Nottingham and Coventry. To-day there are not 1,000 hands engaged in the industry. This destruction has been entirely due to foreign tariffs. "The principal thing we want," concluded Mr. Bruce, "is a reduction of the tariffs abroad, but we shall not get this until we have a weapon which we can use against foreign countries. We ought to be able to say to other nations, 'If you put prohibitive duties on our goods, we will do the same to yours, and get our colonies to follow our example.'" Of course, the belief is that this would bring about a reduction of foreign tariffs.—Drapers' Record, Nov. 21st.

—In the speech from the throne at the opening of the British Columbia Legislature, the recommendation was made to push forward the scheme for an all-Canadian railway from some point on the British Columbia coast to the Yukon, the decision on the Alaska boundary question having created a warm feeling in that direction.

—At present there are six furnaces in blast at the Granby smelter, at Grand Forks, B.C., giving an output of 2,100 tons. Several improvements have been made at the smelter itself, and it is now capable of turning out 1,500,000 tons of blister copper daily. In the electrical department also considerable enlargements have been made, including an addition to transformer capacity of 11.00 horse-power. Other improvements by this company comprise the purchase of locomotives in order to do away with horse and mule haulage. They are up-to-date people.

—The Canadian Forestry Association are about to make strenuous endeavors to bring home the importance of the question of preserving our woodlands to the public mind. They are preparing several small tracts on the subject, both in French and, English, for circulation among teachers clergymen and others. Speakers on forestry subjects will be provided for the meetings of the Farmers' Institutes, and special meetings will be held at different places throughout the Dominion. The association has received a $300 grant from the province of Ontario, besides promises of assistance from Quebec and British Columbia. The association has decided to start a journal. The annual meeting will take place in Toronto on March 10th and 11th, when papers will be read by leading lumbermen and scientific experts.

—A general meeting of the Commercial Travelers' Association of Canada was held in Toronto last Saturday evening, there being a large and representative attendance. The chair was taken by Mr. M. C. Ellis, the president. It was stated that the current year had been one of the most prosperous in the history of the association. The following officers were elected by acclamation for 1904: President, Mr. Thomas McQuillan; first vice-president, Mr. H. Goodman; treasurer, Mr. J. C. Black. The result of balloting for other officers will be made known at the annual meeting on the 23rd inst.

CLEARING HOUSE FIGURES.

The following are the figures for Canadian Clearing House for the week ended with Thursday, December 3rd, 1903, compared with those of the previous week:

Cities	Dec. 3rd, 1903.	Nov. 26th, 1903.
Montreal	21,261,737	20,938 987
Toronto	15,958,676	14,221,238
Winnipeg	7,255,855	6,990,244
Halifax	1,840,537	1,761,694
Hamilton	1,081,235	1,111,038
St, John	994,291	958,499
Vancouver	136.172	1,345,709
Victoria	774,692	562,597
Quebec	1,663,808	1,547,352
Ottawa	2,220,300	2,259,242
London	951,866	740,571
	$55,364,718	$52.437,171

SIDNEY H. PIPE, ACTUARY.

THE Accumulation Policies issued by the Sovereign Life Assurance Company of Canada are absolutely free from conditions, and guarantee the most liberal Extended Insurance, Paid-up and Loan Values annually, after being two years in force. First-class contracts can be secured by reliable energetic men as Managers, District and Local Agents throughout the Dominion. Address with full particulars and references.

A. H. HOOVER, President and Managing Director.

The Enormous sale of

OLD CHUM

Cut Plug

Smoking Tobacco

Proves its Superior Quality.

Sold by all leading wholesale houses.

INDUSTRIAL ARBITRATION.

"Industrial arbitration." That means "split the difference." Difference is split. New agreement lasts until agitator thinks time ripe to break agreement. Arbitration again. Orators demand arbitration, preachers demand it, newspapers demand it. Concession made; arbitrators again take easiest way, and "split the difference." Splitting the difference settles the fact that both sides are right and both sides are wrong. Go on splitting by arbitration and employers have nothing left. Now, let us suppose employer wishes, agreement having expired, to meet the market by reducing cost of production, and declares a lock-out. He is a horse-thief, a robber baron, etc. The time seems to be coming for this. Why do not employers demand employee shall work for nothing? Then, lock-out, arbitrate, split the difference, and there you are. While the fever for arbitration lasts, no arbitrators will decide flatly in favor of one side or the other. They know the employees will not accept such decision and abide by it. Conciliation, negotiation, reason, patience, consideration—these have settled many differences and established good feeling—but arbitration has never settled anything. As we have said many times, the state of mind which will lead both sides to submit to fair arbitration and accept its results, will enable them to get together without arbitration. There are certainly two questions which are never proper subjects for arbitration. One is, whether either party may break his contract; the other is, whether any man shall or shall not be permitted to work for a living.—Railway Review.

THE CANADIAN CASUALTY AND BOILER INSURANCE COMPANY

Full Government Deposit Paid.

President.
ALEXANDER SUTHERLAND, D.D., Toronto.
Vice-Presidents.
H. N. BATE, Ottawa, Director Bank of Ottawa.
W. S. DINNICK, Toronto, Vice-Pres. and Mng.-Dir. Standard Loan Co.
A. G. C. DINNICK, - Managing-Director.

MONTREAL MARKETS.

Montreal, Dec. 2nd, 1903.

Ashes.—Of business there is practically none doing at present. Owing, however, to the absence of receipts and the extremely limited stock first pots would bring round $5.90, and seconds about $5.50.

Cements and Firebricks.—Business is now of a very sluggish character. Deliveries are still being made from the docks at old prices, but stocks will be all removed to winter storage next week, when the usual advance will be made.

Dairy Products.—Since the close of the shipping season the market has been a dull one, with the business doing in cheese mainly confined to seconds and tail-ends at from 9¾ to 10⅛c. Best late made Ontarios are held at 10⅝ to 10¾c., with proportionate prices for Township and Quebec makes. There is some moderate local consumptive enquiry for butter at 21½ to 21¾c. for finest creamery; fine ditto, 20½ to 21c.; good dairy makes are quoted at 16½ to 17c.

Dry Goods.—Stock-taking is general among the wholesale houses, and net results for the year are generally expected to be something beyond the average. Travellers are said to be doing well with spring samples, and money is coming in well from central and eastern sections on thirty days' bills, dated November 1st, though remittances from the Northwest are not over liberal. Values continue to rule very firm in all lines. Under date of November 27th the Canadian Colored

—Among the companies which have received Ontario charters lately are the following: Toronto Iron & Steel Company, capital $40,000, provisional directors, W. E. Friedman, R. E. Mills, and D. Muhlfelder; Toronto Coal & Mycenian Marble Company, capital $100,000, provisional directors, W. Maguire, E. H. Hilborn, etc; Credit Forks Vitrified Stoneware Pipe Company, Toronto, capital $200,000, provisional directors, R. Carroll, J. H. McKnight, S. G. Stone, A. H. Chitty, and M. and W. J. Thompson; Damascus Gold Mining Company, Bridgeburg, capital $250,000; provisional directors, J. S. Lovell, R. Richardson, etc.

Cotton Co. advises an advance of about 5 to 7½ per cent. on cottonades, tickings, denims, ginghams, flannelettes, sheetings, etc. The makers of battings have advanced prices from 7½ to 10 per cent

Furs.—Receipts are still light; they comprise mostly thin-furred in prime small lots of mink, skunk, etc. We quote prices for prime skins as follows: Beaver, $5 to $6.50 for large; medium ditto, $4 to $4.75; No. 1 choice bear, $15 for large, $10 for medium, and $6 for small; badger, 30 to 50c.; fisher, No. 1, dark, $5 to $6; ditto, brown, $4 to $5; pale ditto, $3 to $4; red fox, $2.25 to $4; cross fox, $5 to $10 for No. 1, as to color; wolverine, $2.50 to $5; lynx, $4 to $8 for No. 1; marten, $2 to $3 for Ontario and Quebec skins; fine B.C. and Northwest pelts bring higher prices; mink, $2 to $4 for No. 1; fall rats, 8 to 17c.; winter ditto, 15 to 20c.; otter, $8 to $12; fine Labradors and Northeastern would bring $12 to $20; coon, $1.50 to $2.50 for No. 1 black, and from $1 to $1.75 for No. 1 dark; prime skunk, $1.50 for No. 1 all black; short stripe, $1.10; long stripe, 60c.; and broad stripe, 20c.

Groceries.—Quite a fair movement is still maintained, and collections afford no special ground for complaint. As anticipated at last writing, there has been a slight decline in sugars, local refiners announcing a cut of 5c. a cental on Thursday last. Present factory prices are $4.05 for standard granulated in barrels, with yellows ranging from $3.25 to $3.80; bags, 5c. less. There have been some moderate recent importations of Barbadoes from molasses, which have been offered in lots at about 36c., it is said, but they are stated to be of dark, poor quality and desirable goods are held at 40 to 42c. in a jobbing way. Some business is being done in New Orleans molasses at prices ranging from 25 to 35c., as to brightness. Nothing specially new is reported in teas. Dried fruit prices are steadily held, with good demand reported. Canned corn is still firmer; a sale of 300 cases is reported at 95c., and in a jobbing way from $1 to $1.05 is asked; tomatoes are generally quoted at $1.05 for good brands.

Hides.—Receipts of beef hides are large, and as tanners are indifferent buyers stocks are showing accumulation, lower prices are being discussed, and may take effect next week. Lambskins are advanced to 75c. each. Calfskins as before.

Metals and Hardware.—Business is gradually becoming quieter, but a very fair movement for the season is still reported. Pig iron stocks being now removed from the wharves into store, prices are rather firmer, with $21 about the figure for Summerlee. Bars are easy at $1.85. Makers of iron pipe are beginning to overtake the long-continued shortage in certain sizes, but the quotation is steady at $4.81 for inch. Plates and sheets of all kinds show no change. Ingot tin shows considerable fluctuation, and is easier than a week ago at 29 to 30c.; lead a little firmer, but still quoted locally at $3.20; copper, easy at 13½c., and expected to go lower.

GUARANTEED RESULTS.

One of the best propositions in life insurance to-day is the Guaranteed Investment Policy of The Manufacturers Life Insurance Company. The Policy-holder can borrow all the premiums after the fifth, and should he die between the tenth and final year of the investment period, all premiums paid after the tenth will be returned with the face of the policy.

J. J. W. Deuchar, F.F.A., F.I.A., General Manager and Actuary of the Norwich Union Life Assurance Company, speaking of investments says:

"It may serve to indicate the great importance of obtaining a good return on the investments, if it is realized that one per cent. of increased interest on the funds of a company will, on the average, have as great an effect as a saving in expenditure equal to 10 per cent. on the premium income, while, if an office could count on realizing 5 per cent. interest in place of 3, it might reduce its premiums some 30 per cent., or double its bonuses."

Mr. Deuchar does not name THE GREAT-WEST LIFE; but the above statement exactly describes the happy position of its policy-holders.

Authorized Capitals, $1,250,000

Special attention given to placing large lines on mercantile and manufacturing risks that come up to our standard.

Head Offices—Queen City Chambers, Toronto
SCOTT & WALMSLEY,
ESTABLISHED 1858
Managers and Underwriters

Oils, Paints and Glass.—Business in these lines is assuming a holiday character, and is of comparatively moderate extent. Prices have not undergone any change since a week ago, but there is general dissatisfaction at the pronounced cutting of prices in leads. We quote: Single barrels, raw linseed oil, 47 to 48c.; boiled, 50 to 51c., net 30 days, or 3 per cent. for four months' terms. Turpentine, 83½ to 84c., single barrels. Olive oil, machinery, 90c. to $1; cod oil, 35 to 37½c. per gal.; steam refined seal, 50 to 55c. per gallon; straw ditto, 45 to 47c.; castor oil, 8 cents, for machinery; pharmaceutical ditto, 8½ to 9c.; lead (chemically pure and first-class brands), $4.50 to $4.60; No. 1, $4.25 to $4.35; No. 2, $4 to $4.50; No. 3, $3.80 to $3.90; No. 4, $3.60 to $3.75; dry white lead, 4¼ to 4½c. for pure; No. 1 ditto, 4 to 4¼c.; genuine red ditto, 4 to 4¼c.; No. 1 red lead, 4c.; putty in bulk, bbls., $1.80; bladder putty

It Leads Them All.

As applied to the gain in net amount of life insurance in force in Canada for the FIVE YEARS ending December 31st, 1902.

Head Office, WATERLOO, ONT.

The Mutual Life OF CANADA

has once more established its right to the above claim. It stands to-day

At the Head Of All

life companies doing business in Canada in the NET AMOUNT IN FORCE GAINED OVER all its competitors during the past five years, as shown by the Government Reports.

in barrels, $1.90; ditto, in kegs or tins, $2.05; London washed whiting, 45c.; Paris white, 75 cents; Venetian boxes, $2.40; 23-lb. tins, $2.55; 12½-lb. red, $1.50 to $1.75; yellow ochre, $1.25 to $1.50; spruce ochre, $1.75 to $2; Paris green, 14c. in bulk, and 15c. in 1-lb. packages; window glass, per 100 ft., $3.25 for first break; $3.45 for second break, and $4.20 for third break; per 50 feet, $1.70 for first break, and $1.80 for second break.

TORONTO MARKETS.

Toronto, Dec. 3, 1903.

Chemicals, Drugs, etc.—Not a very large business has been done this week, though probably for the season it is up to the average. Prices remain about steady. Opium is firm, and morphine somewhat especially active. Quinine is without change. New York advices speak of an absence of noteworthy features. Manchester trade is fairly good, that for export showing some improvement.

Dry Goods.—The more seasonable weather has brought about a much more active demand. Christmas needs, too, are becoming more noticeable, and a special feature is the enquiry for goods of high quality. Such things as handkerchiefs, gloves and many small articles suitable for presentation are selling briskly.

Flour and Grain.—A moderate enquiry exists for flour, and ninety per cent. patents sell at $3.05, middle freights, in buyers' bags. Millfeed and oatmeal are steady, and a good trade is going on. Wheat and other grain quotations remain the same as last week. The only change in the situation is in the demand for rye and buckwheat, for which a better enquiry has sprung up for local use. Receipts are improving with the better roads in the country, owing to the snowfall.

Fruits and Vegetables.—A demand is beginning for Christmas fruits, but trade as a whole continues on the light side. It is expected to improve rapidly, however. Prices may be quoted as follows: Apples, $1 to $2.25 per barrel, according to grade; cocoanuts, $4 per sack; oranges, Floridas, $3.75 to $4 per case, $2.75 to $3.25 per box; Jamaicas, $5 per barrel; lemons, Messina, $3.50 to $4 per case for 300's, $3 to $3.50 for 360's California, $5 to $5.50; Floridas, $4 to $5; bananas, 8's, $1.25 to $1.50 per bunch; 1st, $2 to $2.50; sweet potatoes, $3 to $3.50 per barrel; celery, 20 to 30c. per dozen; cranberries, $10 per barrel, $1.25 per basket; Spanish onions, $2.75 to $3 per large case, and $1 for small; Malaga grapes, $5 to $6 per barrel. The total shipments of apples from Canadian ports for the week ending November 21st were 212,773 barrels, against 161,848 barrels for same week last year, and 64,712 in 1901. Total shipments for the season to-date have been 2,101,798 barrels, against 1,262,163 for same time last year, and 391,951 for 1901.

Groceries.—The end of last week there was a decline in all grades of sugars amounting to 5c. per cwt. This was due to a similar movement in New York. In the latter place there was another drop of one-sixteenth on Wednesday, but so far this has not been followed locally. An average trade is being done. The trading in other lines of general groceries continues very much as before. Dried fruits are beginning to attract a good deal of attention, as is usual a few weeks before Christmas. There is a fair movement in canned vegetables and fruits. Teas are firm, but without much activity.

Hardware.—A thoroughly good business may be said to be the feature of the hardware trade just now, though, perhaps, the volume is no greater than was the case last year. Orders for practically all lines of seasonable goods are coming in satisfactorily. Travellers believe they have good prospects. Metals seem to be on a fairly steady basis now, and the movement is quite fair.

Hides and Skins.—Quietness prevails in the hide market, and no further changes have taken place in prices. For sheepskins the demand is good. Tallow remains as before. Leather for the moment is quiet, but is expected to show an improved enquiry after Christmas.

Live Stock.—Of really choice animals there is a scarcity, and they are in good demand, with a rising tendency in prices, especially for export. Butchers" cattle, too, are wanted. Sheep and lambs are quiet. There was another fall in prices for live hogs.

Wool.—Trade is quiet, a feeling which is accentuated by the reported decline in London prices. For pulled wools there is a fair demand from domestic mills, and prices continue firm. The offerings at the wool auction sales were 11,924 bales. There was a brisk demand for fine kinds at steady prices. Low and inferior grades were slow. Most of the grades offered were taken by the home trade. American buyers secured a few lots of superior. France and Germany competed for scoureds. A good supply of fine conditioned new clip caused spirited competition. Withdrawals were frequent. Following are the sales in detail: New South Wales, 3,000 bales; scoured, 11d. to 1s. 8d.; greasy, 4¼d. to 1s. ½d. Queensland, 900 bales; scoured, 9½d. to 1s. 10d.; greasy, 6¾ to 10d. Victoria, 1,100 bales; scoured, 7¼d. to 1s. 8d.; greasy, 6½d. to 1s. 1½d. South Australia, 1,100 bales; greasy, 5d. to 1s. ½d. West Australia, 2,000 bales; greasy, 5½ to 9½d. Tasmania, 200 bales; greasy, 11d. to 1s. ½d. New Zealand, 2,800 bales; scoured, 6 to 7½d.; greasy, 4½ to 11d. Cape of Good Hope and Natal, 800 bales; scoured, 1s. 1½d. to 1s. 9d.; greasy, 5½ to 9d. The arrivals for the first series of the 1904 sales amounted to 8,384 bales, including 2,500 forwarded direct to spinners. The imports during the week were: New South Wales, 1,543; Queensland, 1,789; Victoria, 430; South Australia, 200; Cape of Good Hope and Natal, 2,099; elsewhere, 1,272 bales.

The Canada Life's New Business

For the first half of 1903 exceeded that of any similar period in the Company's record of 56 years. Compared with over 100 similar periods in its history, the Company on this occasion

Surpassed All Previous Records

A prominent Montreal business man recently gave an agent of another company a proposal for a large policy, with the condition that it would be given to the Sun Life of Canada. This is unusual. It shows that business men have a knowledge of the merits of life companies.

Continued Progress

During the last few years the North American has made marvellous strides in all Departments tending to its upbuilding, which can readily be seen by the following figures, showing a comparison of

Three SEPTENNIAL Periods ET

Year	Cash income	Assets	Policies in force
1881	$ 39,613	$ 88,763	$ 1,221,712
1888	263,691	666,919	7,927,564
1895	581,478	2,300,518	15,779,385
1902	1,270,845	5,010,813	30,927,961

A strong progressive Canadian Company giving excellent returns to its policy-holders, therefore making it a desirable Company for agents to represent. Three active agents wanted.

'Phone Main 2893. TORONTO

—"The trouble with the average American," remarked the placid philosopher, "is that he doesn't stop work long enough to digest his food. He doesn't appreciate the importance of the alimentary canal." "My friend," replied Senator Sorghum, as he hastily signed another letter, "there's no use in trying to ring in any new canals. It'll be either Panama or Nicaragua, or none at all."

—In the matter of ingenuity a gang of French burglars would be hard to beat. They appropriated recently a dummy horse from a saddler's stable. Wheeling this on a barrow to the entrance to a block of flats, they induced the concierge to store it for the night. Next morning the dummy was duly removed, and it was subsequently discovered that the flats had been ransacked, a man, of course, having been concealed inside the horse.

HALIFAX. 3

EASTERN TOWNSHIPS BANK.

The forty-fifth annual meeting of the shareholders of the Eastern Townships Bank was held in the board room of the bank at Sherbrooke, Que., at two o'clock, on Wednesday, the 2nd December. There were present a good number of shareholders. The president took the chair, and the general manager acted as secretary, Mr. C. W. Cate and Mr. Wm. Morris were appointed scrutineers of votes.

The minutes of the last annual meeting having been read, the president, on behalf of the directors, read the following report:—

REPORT.

In consequence of the change of date of holding the annual meeting from the month of June, as heretofore, to December, the statements submitted herewith cover the operations of the bank for six months only.

As foreshadowed in last annual report, your directors have decided to apply $65,000 of the amount brought forward in May last in reduction of values.

The result of the business for the half year has been most satisfactory, showing a balance of profit after providing for current expenses, interest on deposits and all current losses of $144,359.75. Out of this amount a dividend at the rate of eight per cent. per annum has been declared, payable on the 2nd January next, and sufficient with the balance of premium on new stock has been transferred to reserve fund to bring that account up to $1,450,000, leaving a balance to carry forward of $27,647.57. All the offices have given satisfactory returns.

The crops, contrary to indications in the early part of the season, turned out very satisfactorily, and prices for produce, both of dairy and field, are fully equal to those of previous years. The lumber business, however, owing to the severe drought which prevailed and prevented bringing logs to the mills, has been very bad. What small stocks were on hand have realized better prices, but it really means in most cases the loss of one year's business, if not more, by loss of logs as well.

The large addition to head office building is nearly completed, and we have now a fine and commodious premises. New buildings are under construction at Richmond and Huntingdon, and will be ready for occupation, it is hoped, early in the year. Plans for Coaticook and Rock Island are prepared, and work on them will be commenced early in the spring. Plans are also being prepared for the Montreal building.

It is with deep regret that we have to refer to the loss the bank and the Eastern Townships have sustained by the death of your vice-president, the late Senator Cochrane, which occurred on the 12th of August last. He was a member of the Board for twenty-seven years, for eleven of which he held the office of vice-president. He always took a great interest in the success of the bank, bringing his wide and varied business experience and good judgment to bear on all questions affecting its interest. His place on the board and in the country cannot readily be filled.

In conclusion, your directors have much pleasure in recording their satisfaction with the zeal and attention shown by the general manager, the inspector, the managers, and all other officers of the bank in their close attention to the interests committed to their charge.

Respectfully submitted,

William Farwell,
President.

J. MACKINNON,
General Manager.

The president addressed the meeting, and after reviewing the report in detail, spoke of the business of the bank in general and of the prosperity of the country, closing by moving the adoption of the report, seconded by Director Wood.

The general manager and some of the shareholders also addressed the meeting. A motion was made and passed increasing the appropriation for the remuneration of the directors.

A by-law was also passed increasing the number of directors from nine to ten.

Votes of thanks were passed to the president and directors for their attention to the affairs of the bank; also to the general manager and staff for the efficient manner in which they have performed their duties during the past year.

THE DIRECTORS.

The ballot resulted in the election of the following directors:

Wm. Farwell, Israel Wood, N. W. Thomas, Gardner Stevens, C. H. Kathan, H. B. Brown, K.C., Jas. S. Mitchell, S. H. C. Miner, A. C. Flumerfelt, Frank Grundy.

At a meeting of the new board Mr. Wm. Farwell was re-elected president and Mr. Wood was elected vice-president.

FROM Ottawa we hear of the assignment of W. Chapman & Co., stationers in a moderate way. Chapman is employed as a translator in the Canadian Senate, the stationery business being mainly managed by a female relative.

THE Canadian Transit Company is issuing in London, Eng., stock to the amount of £300,000, of which £165,000 is of £1 ordinary shares, and £135,000 of 5 per cent., first mortgage debenture gold bonds of £20 each, secured upon the company's fleet. The company, it is stated, has made a contract with the new Canadian Company, Limited, for the supply of a fleet of twelve new especially designed vessels for the grain-carrying trade between the Great Lakes and Montreal, at a price of £275,000, also for working capital up to £25,000. The new Canadian Company is receiving £165,000 in ordinary shares and £135,000 of the Canadian Transit Company's bonds, to be delivered within seven months.

INVESTMENT and LOAN COMPANY.

HALF-YEARLY DIVIDEND.

Notice is hereby given that a dividend of three per cent. (3 p. c.) on the permanent preference stock of this company has been declared for the half-year ending December 31st, 1903, and that a dividend of three per cent. (3 p. c.) upon the ordinary permanent stock of the Company has been declared for the half-year ending December 31st, 1903, and that the same will be payable on and after Saturday, the second day of January next.

The Transfer Books of the Company will be closed from the 15th to the 31st December, inclusive.

By order of the Board.

(Signed). A. J. JACKSON.
General Manager.

Dated Toronto, 1st December, 1903.

GREAT DEMAND FOR

MACHINE TOOLS.

An evidence of the unusual activity in manufacturing circles is the present large demand for machine tools of all kinds. H. W. Petrie of Machinery Hall, 131 Front St. W., is kept busy filling the orders for this particular class of machinery just now. Certainly the stock carried is a thoroughly representative one of American and Canadian tools, and for anyone who contemplates the purchase of anything in the machinery line at all in fact, it would pay them to call at the above address.

Mercantile Summary.

The town of Glace Bay, Cape Breton, has decided to borrow $60,000 for opening up new streets and extending the sewerage system.

In Montreal a real estate association has been formed, with branches in several centres in the province of Quebec. The officers are as follows: President, B. A. Mainwaring; vice-presidents, U. H. Dandurand and Joseph Lavoie, St. John's, Quebec; treasurer, John J. Johnston; secretary, W. C. Palmer.

The Northern Consolidated Holding Company, Toronto, has been incorporated under an order-in-council of the Ontario Government. Its purpose is to secure, purchase, hold, sell and dispose of bonds, debentures or other securities made by any corporation or the capital stock of any corporation, etc., etc.

Mr. H. P. Cockburn, and Mr. J. H. Tilden, of Hamilton, with others, have formed themselves into a company to be known as Corundum Refiners, Limited, and have obtained control of some 600 acres of corundum lands in Raglan township, Ont., with the aim of erecting one of the largest corundum and aluminum reduction plants in the world. There is a great corundum belt thereabout.

The Temiscouata Railway Company are applying to the Dominion Government for power to make a new issue of prior linen bonds, out of which certain liabilities will be met; to issue general mortgage bonds to be exchanged for existing main line and St. Francis branch bonds; to provide for the payment of overdue coupons; also to fix the head office of the company at London, England.

G. G. Power, who has for some years done a very active general trade at Kingston, N.S., has made an assignment, and the failure is exciting much comment in Halifax commercial circles. In March last, Power stated his liabilities at only $5,000, with an apparent surplus of $18,000, but since then he appears to have been buying lavishly in all directions, establishing branches at Middleton and Somerset, and the assignee reports liabilities now, at something like $70,000. An estimate of assets has not yet been arrived at.

The city of St. Catharines has made an agreement with the Cataract Power Company, we understand, whereby 1,000 horse-power is delivered at a reduction of 10 per cent., compared with the cost in Hamilton. The company is given permission to build a dam in Beaverdams Creek, from which St. Catharines receives its supply of water for domestic purposes, to a level of about 30 feet, forming a lake of considerable extent. The city now has a lease of water in the creek, running 16 years more, which it exchanges for a title to the company's canal, which has 63 years yet to run. The company agrees to expend $35,000 in the improvement of the water supply.

John Mackay & Co.

Chartered Accountants

Canadian Bank of Commerce Building. **Toronto.**

A GENERAL dealer at Nictaux Falls, N.S., W. A. Pickels, has assigned to E. L. Fisher, in trust for the benefit of creditors. He has been in business at this point for the past eight years, but he appears to have had uphill work all along, suits and judgments having been recorded against him from time to time.

J. H. CLAY, after having been employed with Clay Bros. at Galt, moved to Hespeler, and opened a grocery store. About a year ago a statement of his showed a surplus of $1,500 over liabilities of $1,100. But in July last, he gave a chattel mortgage to his principal creditor for $2,900. The following month he met with a fire loss, and now he assigns.

A VOLUNTARY assignment has been made by P. P. Masse, a young man, who began business on his own account about four years ago, in Montreal, as a dry goods retailer. During the past year or so he has been found very slow pay, and since September last quite frequent suits have been entered against him by Toronto and Montreal houses. Liabilities will reach about $10,000, it is figured.

A SMALL neckwear manufacturing business at Montreal, started only last summer, under the pretentious style of the Royal Neckwear Co., has already come to grief. The registered owner of the business is Dame Ida Lazer, wife of Wm. Lazer, who is said to have had a checkered business record in New York, and who has figured before the courts several times, in a not wholly favorable light, during his brief residence in Canada.

FOR a number of years F. C. King has been in the tailoring business at Parry Sound. His first failure occurred in 1892, at that time he owed $4,000, and his assets were $3,500. He obtained a discharge from creditors and continued business. In September last, he presented a statement showing a stock of $1,800, and outstanding $200; liabilities $800, giving a surplus of $1,200. Our last report is to the effect that he has assigned.

THE Canadian Pacific Railway Company is making an issue in London of £2,808,000 worth of four per cent. consolidated debenture stock. Of this amount, about one-half is needed for paying for the Atlantic Steamship line, consisting of fifteen ocean steamships, for which the purchase price was temporarily advanced from current funds. The balance represents the cost of 471 miles of additional railway constructed and acquired during the past two years. The issue price is understood to be 106, and the entire amount of the issue has been underwritten in England and on the continent.

Mercantile Summary.

THE Niagara Navigation Co. has declared a dividend of 4 per cent. for the first half year, payable on the 2nd, prox.

A BY-LAW will be submitted to Hamilton ratepayers to authorize the raising of $25,000 to build a drive along the brow of the mountain.

A CARRIAGE-MAKER at Truro, N.S. named A. A. Archibald, has made assignment of his estate to H. T. Lawrence. The liabilities are small.

THE result of some analyses recently made by the Ontario Bureau of Mines on nickel ores from Haileybury, in the Temiscaming region, shows some of them contain 18.34 per cent. of cobalt, 6.04 per cent. of nickel, 65.40 per cent of arsenic, besides iron and rock matter The New Caledonia ore contains generally from 3 to 5 per cent. of cobalt.

THE White Bear Mining Company is about to inaugurate concentration in connection with the treatment of its product, and intends to equip its property near Rossland with the Elmore process. A fifty-ton plant will be put in for a beginning. It is now recognized that much of the White Bear's ore deposit is of milling grade, but that concentration is necessary to its utilization.

MR. H. L. DUNN, and some Toronto capitalists have a scheme to build an electric railway from St. Catharines to Niagara-on-the-Lake, thence along the river road to Queenston, thence along the stone road to St. Catharines. The town of Niagara, it is said, will assist with a bonus of $15,000; Grantham Township is asked for a loan of $20,000, and St. Catharines for one of $25,000. The company is capitalized at $250,000.

THE Backus Syndicate, of Minneapolis, propose to expend $480,000 in erecting a reservoir and dam at Kettle Falls, near Fort Frances, Ont., for the purpose of developing 10,000 horse-power. They also propose to pay one-half of the cost of erecting a 1,000-barrel flour mill on the Canadian side, on the condition that the town or Government will contribute the balance. Representatives of the corporation held a conference with the Ontario Government upon the question of exporting power to the United States side, in the event of idleness in Canada, but this proposition was rejected by the latter in toto.

THE assignment is noted of Bureau & Co., hardware and furniture dealers, at Lake Megantic, Quebec. Joseph Bureau, the virtual proprietor, who has of late been using his wife's name as a cover, made a failure in 1900, which was criticized, his business methods being considered lax, and the general credit of the concern has since been very indifferent. He recently came to Montreal and proposed a compromise, but did it in such a cool "stand and deliver" style that his principal creditors felt that they had no other recourse but to take insolvency proceedings. The liabilities are estimated at $9,000, and it is hardly expected the estate will pay more than 15 cents on the dollar.

Reduced Cost of Production

is the goal all are striving for.

One of our Band Mill customers in comparing the **Band** with the **Gang** said:

"It's quality, not quantity, I'm after. I have stood over my men this year and insisted on quality. In selling my cut I arranged for an advance of 25c. per M for every 1% advance in quantity of the cutup and better grades By the use of the Band I have secured 8% advance, which means $15,000 extra profit this season."

Several gangs have been discarded for the Pony Band double cutting, adding much to quality while only slightly reducing quantity. Many hundred single and double cutting bands running in Canada. Simple—easily managed—it's worthy of investigation.

THE COTTON CRISIS.

Seldom have the cotton mills and their employees in all parts of the world had to face such a perplexing, almost alarming, condition of things, as that which confronts them at the present time. For months past the high price and the scarcity of raw cotton have been causing difficulties in the cotton manufacturing trade, as a result of which mills have closed down and thousands of operatives either been thrown out of employment or had their wages reduced. In Lancashire, still par excellence the cotton manufacturing region of the world, it is estimated that over 3,000,000 people have been affected by the depression, besides whom, thousands of storekeepers, ship-owners and other interests have been indirectly injured.

Last week, matters came to a sort of crisis. The Washington Government report was issued, and, far from portraying anything likely to alleviate the cotton world's nervousness, rendered it distinctly worse. The estimate made by the department for the present crop was only 9,962,039 bales, besides which there was already a shortage. The scene which followed this announcement on the New York Exchange, we are told, was one of intense excitement. A regular panic among the shorts was created, and the price of March cotton was jumped in a few moments up to 11.97c.; and in a short while up to 12.35c. per pound before there was the slightest reaction, these fluctuations representing a maximum advance of 70 points or $3.50 per bale. Brokers unite in saying that, since the time of the American Civil War never has the state of the cotton industry been more alarming. At the same time, it should be said there is just a chance that the Government figures have underestimated the crop, a thing which has been done before. For instance, in 1897, the Government estimate was 9,000,000 bales, whereas it proved afterwards to be 11,181,000. There are some people, indeed, who assert not only that the figures leak out, very opportunely for certain bull interests, before the time authorized for their publication, but that they are manipulated to suit certain interests. It is to be hoped that they are under the mark this year, but, even if they be so, it seems more than probable that, making all allowance for such a contingency, there is in the South an actual scarcity of raw cotton, together with a very large consumptive requirement.

Comparatively speaking, the Canadian mills have done well up to the present, though they have had their share of worries. The products of the Montreal and Merchants' Cotton Companies are still, at last reports, out of the market, their prices having been withdrawn with no notification as to when they would be made public again. The Canadian Colored Cotton Company, however, on Monday last, issued a circular showing advances in many of the lines of goods manufactured by them. Among those affected are tickings, which are advanced ½c. per yard, or about 2½ per cent.; striped flannelettes, ¼c. per yard, or 5 per cent.; all lines of cottonades, about 2½ per cent.; apron ginghams, ½ to 1c. per yard; flannelette sheetings, 1c. per yard or more than 5 per cent. in addition to the 5 per cent. increase a few weeks ago. Denims, shirtings, galateas, oxfords, saxonies, shakers, domets, and cashmerettes are among the other goods which suffer increases in prices, varying from 5 to 7½ per cent. Cotton blankets, carpet warps, and cotton yarns still remain off the list, but when they are put on it is expected that it will be at a considerable advance. In fact, several of the goods which were marked up in this week's circular are by no means unlikely to make still further upward movements in the near future. The Dominion Cotton Mills issued a circular on Wednesday last, which, it is hardly too much to say, staggered the trade. Advances are mentioned in white cottons, long cloths, drills, ducks, cantons, bags, grey cottons, grey and bleached sheetings, pillow cottons, cotton yarns and carpet warps of from 5 to 10 per cent. Some of these lines, such as carpet warps, bags, etc., have already been advanced more than once during the last two or three months, so that there is in some cases an increase of 25 and even 30 per cent. in price compared with the early part of the season. Not only this, but there seems to be extant a by no means

indefinite idea that the end has not yet been reached. The Colonial Bleaching and Printing Company, we notice, has also advanced the price of prints, ducks, drills, moleskins, etc., by about 10 per cent.

The state of the raw cotton market, as pointed out above, was never more perplexing both to the factories and to the jobbers. Mills very seldom buy sufficient raw cotton to last through the whole season; neither do the wholesale houses buy stocks of textiles likely to be large enough under the present wonderfully extensive demand. It is difficult, therefore, to know how to act. In the meantime, retailers feel that prices are bound to go higher, with the result that the volume of trade being carried on at present is very large.

THE BANK OF MONTREAL MEETING.

Eighty-six years is a great age, for a man, or in this country for a bank. But at such a period of his life a man must show the decrepitude of age, while to a bank, well-managed, fourscore years and six may mean only increased resources, business, and influence. The lusty age of the Bank of Montreal, which was founded when the last century was only sixteen years old, is a source of pride to all Canadians. That institution is pointed to with confidence as an evidence of the growth of Canada in power, and of Canadians in influence. On two continents it has long stood for strength and stability, and now that its capital is practically fourteen millions, and its reserve fund ten millions, it is more than ever recognized as one of the great banks of the world.

Naturally, an official utterance on financial and commercial subjects of the authorities of such an institution carries weight, for they have the advantage of a wide and intimate knowledge of the business of this and other countries. Hence it will be of interest to read the summary of the results of 1903 to producers, manufacturers and merchants offered by the chairman of the bank to his auditors at the annual meeting on Monday last. They are briefly these: In dry goods—"An unusually good year." In wool—"A good demand at good prices." For iron and hardware—"An excellent year's business at fairly remunrative returns." "Leather exports—"An increase of late at prices netting shippers good results." Boots and shoes—"A very good year's trade." Grocery—"A satisfactory year's business, materially greater than last year." Lumber—"A very satisfactory year, at prices 10 to 15 per cent. higher than last year." Cheese—"The most profitable for years." And in the summary given of exports, the total of which is $124,000,000, lumber is credited with being 26½ per cent. of the whole; grain with 22½ per cent. (not all our own grain, however), dairy produce with 22 per cent.; bacon, ham, poultry and eggs with 13 per cent.; live animals, 10 per cent.; flour and meal, 6 per cent. It is further to be noted that a large proportion of the year's crops has yet to come forward.

Dwelling upon the increase of our trade, illustrated by the growth of shipping at Montreal, the rapid development of the Northwest, resulting in great growth of grain export and the brisk sale of farm lands, the increase of population, the extension of foreign trade, Mr. Drummond, while he hesitates to make any forecast of the future, indicates what these factors of activity may naturally be expected to lead to. "The prosperity of our farmers," he says, "the wealth pouring into Territories only recently a barren waste, the full employment of labor of all kinds at high wages, and the great industrial activity caused by the establishment of many branches of manufactures;" must be given their proper weight. But he is also "compelled to enforce the counsels of prudence and economy."

He pronounces the most striking event of the year to have been the serious decline in the market for securities, and goes on to say: "Primarily, this has been the result of over-production of stock certificates, bonds, debentures, and all marketable securities, in some cases the necessary consequences of great industrial activity, but in others due to excessive capitalization, the disclosures of which excited public distrust. It is to be noted that such cases have been rare in Canada, but we have by no means been exempt from the consequences."

The resolution of thanks to the officers of the bank, proposed, as it has been for a number of years, by Mr. R. B. Angus, brought responses from Mr. A. Macnider, acting general manager, and from the assistant general manager, Mr. H. V. Meredith. The last-named gentleman expressed the regret felt by all connected with the bank at the absence of Mr. Clouston, the general manager. He has been ill, but not seriously so, and is expected back almost at once. Mr. Meredith expressed in warm terms the gratefulness of the staff for the words of appreciation and confidence spoken by Mr. Angus, which, he said, "coming as they do from one of our oldest and most successful general managers, must prove an incentive, were incentive wanting, to greater exertions in obtaining the best possible results for your investment and at the same time safeguarding the large responsibilities you have confided to our care." The report records the deep regret of the board at the demise of Mr. A. F. Gault. The directors were re-elected, Hon. Robert Mackay having been, as we already noted, chosen to fill the seat at the board vacant through the death of Mr. A. F. Gault.

EASTERN TOWNSHIPS BANK.

The report submitted at the meeting of shareholders of the Eastern Townships Bank last week was for six months instead of a whole year, the date of the annual meeting having been changed from June to December. A very good rate of earning is shown by the statement, profits of $144,000 being announced for the half year. Besides this, the premium paid on new stock brought in $112,857. This sum, along with $18,700 of the profits earned, making together $131,577, was added to Rest, which fund now stands at $1,450,000 on a paid capital of $2,426,780. Dividend at the rate of eight per cent. per annum was declared, and $26,647 carried forward. The totals of assets and liabilities of this progressive bank now reach $14,636,000; its circulation has bounded up in the six months from $1,427,000 to $2,021,000, and its deposits, which in

June were seven and a half are now more than eight and a half millions.

Appropriately, the report refers to the loss sustained by the institution in the death of Senator Cochrane, who had been a director for twenty-seven years, and vice-president for eleven. Mr. Israel Wood was chosen to succeed him in the vice-presidency. The number of directors is now ten. Of course the increased business of the bank has made necessary more room at head office, and this has been secured. New branch buildings are under construction at Richmond and Huntingdon while the spring will probably see work begun upon the Rock Island and Coaticook branch premises. Plans are also being drawn for a new branch building in Montreal, which we are told, will be handsome. It is remarked in the report that while the crops turned out well and prices for both field and dairy produce were good, the lumber business was very disappointing. The president and the general manager of the bank both addressed the shareholders, but their addresses do not appear to have been reported.

BANK OF OTTAWA.

The effect of the issue of fresh capital since last year by the Bank of Ottawa is seen in the bound upward in circulation shown by the present statement. And there has been during the current year a marked increase in the business of the bank generally. Deposits have advanced from $11,853,000 to $13,926,000; and the increase in loans corresponds very closely with this advance. Call loans are no larger, but rather smaller than a year ago, and the total of readily available assets is about a million greater. We do not observe anything further among the assets calling for special remark.

It is seen by the report that the net earnings for the last twelve months amounted to $335,640. After dividing nine per cent. among shareholders, there was prudently applied in reduction of bank premises and furniture, $19,826 (in the previous year it was $14,187), and $100,000 was placed to Rest account, which is further swelled by $424,179, the proceeds of new stock issued at 90 per cent. premium in February. Five new branches of the bank have been opened during the year, and mention is made of the progress of the new building which is being erected on St. James street for a larger Montreal office. The former board of directors was re-elected. Mr. George Hay is president and Mr. David Maclaren, vice-president.

A MUNICIPAL DUTY.

Is it any concern of ours, as citizens, as business men, manufacturers, bankers, insurance agents, whether steps be taken to lessen the ravages of consumption in our midst? Assuredly it is.

If any man of public spirit, any man of even ordinary sympathy, will take the trouble to enquire into the subject he will probably conclude, as we have done, that any movement to attack and conquer this ravenous monster deserves support.

"My Dear Sir, I have seen in hospital wards in this country and other countries of late, what would wring the heart of any man, in the hopeless fading away of consumptive patients. And when I learned what had been accomplished at Gravenhurst and elsewhere, in the way of curing them, I wondered that public-spirited people, or municipalities, had not built ten—twenty—fifty—such places in Canada where consumptive patients can be cured."

Such was the greeting to the writer, on Monday of this week, of a Toronto merchant walking down Yonge St. And the earnestness of the man led to a consultation on the subject that same evening with two physicians. Both these professional men conceded the urgent need of measures to prevent the spread of tuberculosis, which, it has been stated, numbers among its victims nearly one in seven of the inhabitants of Canada. Said one of these medical men:

"It is a perfectly preventible disease, but it needs careful and exacting measures. You do not inherit tuberculosis, but you inherit a peculiar quality of fleshy tissue in your body which is a suitable soil for tuberculosis to thrive in. Listen to me, Mr. Editor, one consumptive patient, coughing and spitting about the streets, is a menace to the health and safety of every citizen. What a tuberculous man or woman spits out may be ground into powder and blow about our streets, but the sputum *does not die*. It lives in thousands of germs, to be breathed into the throat and lungs of passers-by. These germs if they find a suitable soil in any one's body will do their deadly work. Therefore, consumptives should not be allowed to spit in public."

Another physician, a man of mature years and experience, told the writer of this paper last night that he would be fearless in the presence of a patient with diphtheria, scarlet fever, or even small pox. "But put me in the presence of a consumptive, and I am instantly disquieted; I cannot breathe freely, for I know the communicable character of the germs which infest that case. Tuberculosis is a dreadful scourge. No terms can describe it too strongly as a danger to public health."

Now surely, in the presence of testimony such as this, the necessity for isolating and regulating patients suffering from this disease is plain. We take pains, and rightly, to detach cases of scarlet fever and diphtheria; to surround them with restrictions in the public interest; to make penal the concealment of them. And thousands of lives have been saved by these measures. But here is a disease, consumption, more fatal than either. Why is it not similarly dealt with? Any person, any association, who will erect sanitaria and deal honestly and effectively with this "Great White Plague," deserves sympathy and assistance. We cannot, therefore, but approve the proposal to be made to the ratepayers of Toronto that $50,000 shall be set aside by this municipality for the erection of a sanitarium for consumptives. If certain conditions are complied with, the Government will make a money grant, and will allow a sum per head for maintenance. Private contributions can be relied on to do the rest. In the words of the Montreal Medical Journal: "The great problem of the eradication of tuberculosis is of equal importance with the education of

the people, the administration of justice, and is one with the question of the preservation of the public health."

THE ABSOLUTE NEED FOR FORESTRY.

One of the most interesting subjects taken up at the meeting this week of the Ontario Agricultural and Experimental Union, at Guelph, was introduced by means of a paper by Mr. R. D. Craig, of Pasadena, director of Co-operative Experiments in Forestry for the State of California. This gentleman expressed his disappointment at the refusal of the Ontario Government to allow the establishment of aforest nursery at the Agricultural College grounds, and pointed out that the object of the Union was not primarily to advance the interests of the lumberman, but to help farmers to prevent the devastation of their wood-lots by burning and wilful waste, which, indeed, are often brought about by the carelessness of the latter. It may be mentioned that in the United States farmers are now able, upon application to the Bureau of Forestry, to have their wood-lots inspected and plans prepared for their improvement and conservation. In that country, too, some $375,000 every year is expended in the reforesting of agricultural regions besides smaller sums which are utilized for the same purpose by the legislatures of several of the States. The occasion presented by the discussion was seized to urge the Ontario Government to make more strenuous efforts to conserve our forest wealth and encourage farmers to plant trees, which are necessary to the well-being of the rural districts in so many ways. And a strong plea was made for the immediate establishment of a School of Forestry, where instruction can be given in practical methods of dealing with forestry problems, and for forming a system of taxation which shall encourage the preservation of farm woodlands rather than discourage it.

That the question of forestry is not one merely for academic discussion is shown by a remark recently made by M. Meland, inspector of forests in France, to the effect that at the present time there are only seven countries in the world able to supply large quantities of timber. These are Norway, Sweden, Finland, Canada, Austria-Hungary, Russia, and the United States, but of these the last three are seriously threatened by increase of population and industrial development, while Norway is not so careful in its regulations against the indiscriminate use of the axe as it should be. If, however, the three countries left, which promise to be sources of supply for some time to come, attempt to accede to the increasing demands made upon them by all the world, and if they do not take very strict care of their privileges, they will be found hopelessly insufficient—and not at such an extremely distant future.

Canada has now, roughly speaking, some 800,000,000 acres of woodland, of which, perhaps, one-half may be considered fit for timber cutting, the rest being suitable for pulp manufacture, domestic demands, etc. This area, already so largely injured by fire, must be placed under much stricter supervision than is for the most part the case at present, if it is to keep pace with the ever-increasing consumption, and the probable exhaustion of other sources of supply. Canada's wealth in timber has already been and may continue to be an asset of such enormous value that it would be a thousand pities if any Government procrastination or regard for false economy should prove sufficient to put back the taking of every possible measure for its preservation.

RISKS OF EXPLOSION.

In connection with the article in our issue of Dec. 4th, on the subject of boiler explosions and means taken to avert them, a friend has sent us a series of reports to the secretary of the Board of Trade of the United Kingdom, and some of the appendices thereto. The former contain statistical and other information as to boiler explosions for several recent years; the latter give the reports of Government commissioners appointed to investigate the explosions, and include the evidence taken and the findings upon it. The whole series of documents show with what minute care and fairness these enquiries are conducted, and the pains taken by the authorities to ascertain the causes of disaster and to apportion blame.

By the first of these yearly reports, that for the fiscal year 1892-3, we are informed that 72 explosions took place in Great Britain and Ireland in the twelve months, by which 20 persons were killed and 37 injured. Six were locomotive boilers, 18 vertical, 12 each marine and heating, 13 land boilers, etc. The choking of the pipes by ice accounted for 11 explosions of heating boilers by reason of the exceptional cold of December, 1892. In some of the cases preliminary enquiries were instituted, as the act provides, and in 26 cases formal courts of investigation were held. In six cases out of these twenty-six no blame was found to attach to any one; in six more the owner was blamed for neglect; in some instances the maker, in others the seller of the boiler was blamed and in still others the attendants were found to blame, and the owners were fined from £5 to £50 for their negligence or that of their employees. Nor were the advisers of owners allowed to escape punishment for their ignorance or negligence, from £5 to £20 being the cost to such persons. Minute particulars as to age, the make, the character, the repairs, of these burst boilers are given in appendices; also as to whether and when inspected, the name of the company insuring or inspecting them forming part of the information.

During the eleven years 1882-3 (when the Act was passed) to 1892-3, no fewer than 660 boiler explosions took place, by which 310 persons lost their lives, and 667 persons were injured. Within the next succeeding nine years there were 728 explosions by which 278 persons lost their lives and 1,144 persons were injured. The record for 1902 was 30 persons killed and 55 injured. In the report dated December 1902, it is stated that "deterioration, defective design, and undue working pressure still account for the majority of explosions;" and "in nearly one-third of the cases dealt with the failures occurred in steam pipes and boiler mountings."

The careful apportionment of blame and punish-

ment by the commissioners who looked into these explosions in the Old Country is deserving of notice. We in Canada would do well to heed the thoroughness of their enquiries, too. In one recent case, at Manchester, the owner of the boiler was condemned to pay £25 costs for having unsafe conditions, and the boiler-maker who incompetently advised him was ordered to pay £15 costs. In another, at Bathgate, Scotland, the owners were "blamed slightly" for insufficient precautions, ordered to pay £42 towards the costs of the investigation, while the Board of Trade (i.e., the Government), were ordered to pay £7 7s. to two of the owners' employees, who appeared as witnesses in the case. Another Scotch case is cited, that of Mr. J. Spencer, of Coatbridge, near Glasgow, where the owner was blamed for want of proper supervision. The penalty in his case was £20 costs; the attendant was found guilty of neglect and ordered to pay £5 costs. In one instance, where the owner failed to have a boiler inspected, it cost him £42; in other cases from £10 to £20 only. Another case may cause the reader to smile, it reads so like a Scotch verdict, not, we mean, one of "not proven," but the deference it pays to the reading man or boy. Thus: "The owners were blamed for employing the attendant for 24 hours without relief, but as he neglected his duty to read a book no order was made as to costs." The book-loving attendant was killed! Too late, poor fellow, to teach him that, as Kipling puts it in McAndrew's Hymn to the Steam Engine:— "Ye'll understaun' a man must think o' things."

What Canadians may learn from these careful records of experience is that the very best skill and the very greatest care are needed to avert disaster in such matters as steam boiler service. The proprietor in Great Britain, who is careless or parsimonious, who either doesn't care enough about his premises or is too mean to pay a properly qualified man, may not only lose his property by an explosion, but he may be fined besides. Or, on the other hand, the builder of a boiler, or the seller of a second-hand boiler, may misrepresent the quality of what he sells; and if he does the searching enquiries of the Government will find him out and fine him. Again, if an inspector of an insurance company or some one employed to inspect a boiler, proves to be a quack or a child in mechanics, the company imposing him upon its customers can be made to suffer. These are some of the directions in which we in Canada may profit by the longer experience of the older country in lessening the likelihood of fatalities or disaster from boiler explosions. Our Ontario Factory Act does not cover all the cases, outside of factories, where Government supervision is desirable. There are hotel boilers, boilers in public buildings, whose caretakers need supervision more, probably, than most factory engineers or stokers. Even our Factory Act might with propriety be made more stringent.

NOVEMBER FIRE WASTE.

The following comparative table of fire losses for the United States and Canada, compiled at the office of the New York Journal of Commerce, shows the losses for the first eleven months of 1901, 1902, and 1903:

	1901.	1902.	1903.
January	$16,574,950	$15,032,800	$13,166,350
February	13,992,000	21,010,500	16,090 800
March	15,036,250	12,056,600	9,907,650
April	11,352,800	13,894,600	13,549,000
May	22,380,150	14,866,000	16,366,800
June	9,590,000	10,245,350	14,684.350
July	15,740,000	10,028,000	12,838,600
August	8,334,000	7,425,550	8,428,350
September	7,645,200	9,945,000	9,939,450
October	14,749,900	9,593,300	10,409 800
November	15,469,800	10,546,650	13,589,550
Totals	$150,865,050	134,644,350	$138,971,000

This shows, as will be seen, an increase of more than $3,000,000 for November this year, as compared with same month of last year, and will serve to bring the general total for the whole up to a disagreeably large amount. This is a disappointment, especially as the first quarter of the year showed so favorable a contrast with the same period of 1902. In only five months of this year have the losses been less than those of the former year: in six they have been greater. The fire insurance companies, however, have, we believe, had a more favorable year than last on this continent. The people of this country are still too reckless as to fire conditions. Municipalities are not strict enough as to fire measures; and the average man does not realize that he, individually, has a duty to keep his own premises free of fire-inviting faults. Every man in a town should be a helper to the fire underwriters and the fire brigade. Then we should see our fires lessen and our annual fire-waste shrink.

FROM A FAR-AWAY I.O.F.

An echo of a recent editorial of ours has been heard all the way from Sydney, New South Wales, relative to the death-rate of the Independent Order of Foresters being much heavier in Canada than among the newer members of the Order from abroad.

The Sydney Morning Herald copied a portion of the Monetary Times article, whereupon the New South Wales manager of the I.O.F. writes that paper disputing, but only very slightly, the correctness of our figures. In doing so, he takes occasion to call this paper a "rabid opponent" of the I.O.F. We are sorry for this. Some people have a better reputation abroad than in their own country. It seems to be the reverse in this case. Dr. Oronhyatekha has repeatedly commended very highly the course of this paper in calling attention, now and again, to the progress of the great institution over which he presides with so much advantage to himself, as well as to some of his former assessment friends.

We wish to say again, as we have so often said before, that we have no animosity towards any of those misguided men, in Canada or elsewhere, who have championed the assessment system even clear through until the death of the concerns they sought to foist upon the public. The Iron Hall, the Canadian Mutual Aid, the Dominion Safety Fund, the Mutual Benefit Associates, the Provident Association of America, the Select Knights, the Provincial Provident Institution, the Covenant Mutual, the Com-

mercial Travellers, the London Masonic Association, the Massachusetts Mutual Benefit, the N. Y. Mutual Reserve Fund, and several others. Where have their promoters all gone to? They were all with us, here in Toronto, and for a time they did a rushing business inwards, and then came a time of much bigger rushing outwards, just as we had repeatedly said would be the case. The old line companies, which Dr. Oronhyatekha likes to criticize so unsparingly as being no models for him, are all here. Every one of them is doing well. But where are the Doctor's friends, who conducted the Canadian branches of the above-mentioned institutions of a few years ago? A few of them, we are well aware, have been taken into his employ. They are no longer, however, singing the praises of the assessment system. That system is discredited and now practically defunct in Canada. Even the Supreme Chief Ranger makes claim that the Foresters have left the assessment fold in which they were nourished and milk-fed for so many years. His new slogan is "No assessment on death."

One of the strong points urged by the clever Doctor in by-gone days, was the superior safety of the late lamented assessment system, in that the "pocket reserves" of the members could be called upon at any time, to meet the death claims, even if these should increase. But he stoutly maintained that they would not and need not increase. He pointed to the death-rate of the Independent Order of Foresters. in 1888, 1889, and 1890 in proof of this. The figures were $6.43 and $5.85 and $5.18. But those were in years in which new members, fresh from the medical examiners' hands, were coming in at such a ratio of increase as is now no longer possible. Compare the figures of those three years, as to increase over the year 1887, with those of the past three years in their relation to 1899:

	THEN.			NOW.	
Years.	Members.	Growth.	Years.	Members.	Growth.
1887	7,811		1899	163,610	
1888	11,800	51%	1900	180,717	10%
1889	17,349	47%	1901	192,086	6%
1890	24,604	40%	1902	205,369	7%

The relation of the growth of the death losses of the foregoing four-year periods to the increase of the assurances in force, is also a most interesting study. We take all our figures from a neat 12-page advertising pamphlet distributed at the late Toronto Industrial Exhibition. It is headed, "Assessment System," underneath which is a moose and a lion, and also the Supreme Chief's picture. This pamphlet gives the following figures in a table filling the second page:

	THEN.			NOW.	
Yrs.	Mortuary.	Increase of Ins.	Yrs.	Mortuary.	Increase of Ins.
1887 ..	$ 51,300	$2.356,000	1899 ..	$1,256,975	$16,481,000
1888 ..	75,000	4.594,000	1900 ..	1,381,860	11,772,000
1889 ..	89,000	6,364,000	1901 ..	1,540,109	10,463,000
1890 ..	125,000	8,420,000	1902 ..	1,568.635	9,822,000

It is easily seen that during the former period the new blood was coming in much faster than the death claims were growing. The increase in 1890 was nearly four times that of 1887. But look at the terrible falling off in the "increase" column the past three years, ending December 31st, 1902, while the "mortuary" column continues to grow apace. The increase in 1902 was little more than half that of 1899. But the deaths showed no disposition to halt. They grew, in the three years from $1,256,975 to $1,568,635. That, of course, was to have been expected. But it must be a keen disappointment to those who hold certificates to compare the small increase of membership now being made with that wonderful growth of a few years ago. See how the "increase" column looks as to the last seven years. Here are the figures for fourteen consecutive years:

Years.	Increases.	Years.	Increases.
1889	$ 6,364,000	1896	$20,763,000
1890	8,420,000	1897	25,719,000
1891	10,897,000	1898	23,801,500
1892	13,848,000	1899	16,481,000
1893	14,538,000	1900	11,772,000
1894	18,625,000	1901	10,463,000
1895	21,521,000	1902	9,822,000
Growth upwards	$15,157,000	Drop since 1897,	$15,897,000

No wonder the conviction is growing in the public mind, that the game is nearly up, notwithstanding the immense sums of money spent this year in advertising the growth of what is called "the surplus," but which is not surplus. In regular life insurance companies there is a certain large fund called the "legal reserve," which will pay the claims as they come due, and then a small addition thereto, called a "surplus" for added strength. But if the I.O.F. funds were dealt with in that way, by an actuary, or a superintendent of insurance, it is very doubtful if there would be any surplus whatever, above the legal liability at the present time.

What troubles the New South Wales agent of the I.O.F. is that the Monetary Times stated the death rate of the Canadian membership, in 1902, (taken separately), at $9.92, and that if even half as great an increase should occur in the next ten years, as had taken place the past ten, "it would not only sweep away the whole of the Canadian gross income, but render a large call on the surplus necessary." Our critic disputes the $9.92, and says that $9.37 is the proper average sum, per $1,000, in Canada. Well, we are not particular which rate is taken, for in either case the increase is alarmingly great, compared with 1893 and 1894, when it averaged only $5.47. Difference in eight short years, $3.90, or nearly double. If the next eight years sees the deaths among Canadian members grow to even $14 or $15 per $1,000, what will happen? This is more than the present gross mortuary rates paid, per member, in Canada, at ages 30 to 33 at joining. Hence the Canadian members, as we stated, would begin to consume the surplus. In what way, then, could the outside members be protected from having the whole "surplus" swept in out of sight? "First come, first served" is the rule at present, and we do not hear of any separation of the funds, such as might give the outsiders some show of security for their money.

We are calling the attention of the members, and the officers of the society, to this recent rapid growth of the death losses among the older Canadian members for the purpose of putting them and the public on their guard against possible disaster. A thorough

examination of the society should be made by some authority, in some state or country, to see if it has funds on hand sufficient for solvency, and to determine whether it has any surplus or not. We do not know that the Ottawa authorities have any power to order such an examination, so long as their law is complied with in the matter of printing the words, "assessment system" over every advertisement. This, they think, gives the public fair warning that the concern is doubtful and should be taken in small doses, well shaken.

And the "increase" column, as printed in the society's own pamphlet, shows that no such rushing business is now being done as formerly. It is a tremendous difference to increase, last year, by only 13,283 members and $9,822,000 of certificates, as compared with 21,849 members and $25,719,000 of certificates five short years ago. Five years more of that crab-like experience, and the society's growth will have come to a standstill. Some of our readers belong to it, and they are entitled to light on the subject.

OUR AUSTRALIAN LETTER.

Australia, at least the habitable part thereof, is having a wet time of it, and the chief concern is to know when will a dry time come. The farmer is alarmed lest rust shall damage his crops, and it has attacked low lands; and the pastoralist is concerned because it interferes with his shearing. The shearers won't work on wet sheep, and insist that three dry days are necessary to dry the sheep after a heavy rain. The shearer is paid by the head shorn and has to feed himself, but the pastoralist has to pay and feed a small army of wool classers and laborers with no return. The harvest has already begun in Queensland and South Australia, and will steadily sweep southwards quickly, and then danger from rust will soon be over. The statisticians figure out a yield of over sixty-five millions of bushels, which is about seventeen millions above any previous year and more than five times the crop of last year. It is likely to be much better grain, too.

Grain and flour importers have overdone the business, and Sydney and Melbourne have pretty full warehouses. They formed a ring to maintain prices, used the newspapers and maintained reports of arrangements to re-export, but the scheme has failed and prices have broken. Some importers of Manitoba flour are in the ruck, but they are not likely to suffer as badly as the soft flour men.

Trade generally is quiet. There has been more movement in Melbourne towards improvement than in Sydney. The unusual wet and cool weather has affected the dry goods trade. Payments are poor and failures may be beyond the normal. Cash from wool and wheat will shortly be available and help things. Trade is quiet in New Zealand also, though that colony has been revelling in specially good times for five years. But like the rest of Australia, it has been boomed on borrowed money and now that London has buttoned its pockets, New Zealand is feeling the natural consequences.

New South Wales and Victoria have to go on the market; the one to meet the necessities of its gigantic scheme of purchasing the wharves and adjoining ports of the city of Sydney and its other public works; the other to meet obligations falling due. Both have obtained short date loans at a cost, expenses included, of slightly over four per cent. for New South Wales, and slightly under for Victoria. Prior to the Canadian Confederation, the securities of old Canada ranked so much below those of New South Wales that they had to bear nearly one per cent. per annum more interest and even the Official Statistician of this Government recorded it with a cackle. Now that conditions are reversed this table is omitted in his returns.

The newspapers do too much in this line of flattering the Australian by publishing all in which he excels and hiding the failures. Perhaps this is one of the failings of John Bull and family. It is to be regretted, nevertheless, as it gives the people a woefully wrong conception of themselves and is largely responsible for the public extravagance.

The lowering of the public credit has necessitated some restraint on the part of the States, but already the reaction has begun. Victoria, which made a marvellous retrenchment last year and changed a deficit of £715,000 into a surplus of £200,000, has already backslidden and next year threatens to return to the old system of deficits. The people do not like an economical Government very long.

The country is in the thick of a Federal election. The Right Hon. G. H. Reid, leader of the Opposition, is on a tour and his committees have introduced an innovation. In order to cover expenses they set apart certain reserved seats in the halls in which he delivers his addresses and charge two shillings and one shilling each for them. They sell them, too. This might be worth imitating elsewhere, but then there are not many in any country who can attract a crowd as can the Right Hon. G. H. Reid.

There are no new features in Canadian trade. Mr. D. H. Ross has returned to Melbourne from Western Australia. He anticipates good results from the trip for Canada. A Canadian paper states that he is recommending Canadian manufacturers to arrange for the right to make a harvester which is an Australian invention, and a number of which have been sold for the Argentine. This is the "Stripper." It is only useful for dry countries, where no value is put on the straw. An improved article is already made in Canada by the Massey-Harris Co., who sell them by the hundred in Australia, and there is no patent on them of any value.

Up-country farmers have arranged for a big picnic and ball to celebrate the cessation of the drought and the return of good times. As the harvest is not yet reaped and won't be for some time, and it will require more than one good season to put the people on their feet, this happy optimism may be taken as a fair illustration of Australian rural life. "Rejoice to-day, and don't take thought for the to-morrow."

Sydney, New South Wales, F. W.
2nd November, 1903.

OUR SAINT JOHN LETTER.

Announcement was made this afternoon, and the business community heard it with regret, that Messrs. Blair & Co., private bankers, of this city, had suspended payment. This firm, only a year or two ago, had a large and growing business, and enjoyed the confidence of the entire mercantile community. Then it became known that the principals were investing heavily in gold mining operations. This tied up a good deal of the capital that was needed for their dealings, and of necessity their business declined. The suspension of to-day follows as a natural consequence of this imprudence, and it is not thought that the failure will entail any heavy losses. The managers of the business bear an excellent reputation, and generally there is sympathy for them, and a feeling that the gold mining fever led them to sacrifice a much better mine in the good business they could have done in the city in a legitimate way.

The Board of Trade annual meeting was held on Monday afternoon, and Mr. D. J. McLaughlin, a retired lumber merchant, is the new president, succeeding Mr. W. M. Jarvis. The board is an active organization, as your pages devoted to its deliberations have often testified.

The King Edward Oil Company, of Toronto, intends establishing in this city a Maritime Province branch. An agent of the company is now here, and has leased until the first of May next, quarters on the South Market wharf. The company is negotiating for the purchase of a site on Prince William and Water Streets, adjoining the I.C.R. tracks at the harbor front, and it is understood will build thereon a large warehouse. This will likely be ready for occupancy by May.

At Monday's meeting of the city council announcement was made that one thousand subscribers had been secured for a new telephone system, and at the next meeting the new

company will seek permission to instal its plant in St. John in opposition to the present Bell system. The present company only last year completed extensive expenditures on their system, and followed these with an increase of rates. It cannot be said that the expenditures resulted in any improvements in the service, which is such a wretched one that many of the present subscribers to it have put their names down for the new system.

The Scott Lumber Company, of Fredericton, is preparing for a big business next year. Present indications are that they will have as large a cut, if not a larger cut, than any other firm in the province. They are now preparing to build a big shingle mill alongside their Victoria mill at Fredericton, and will also erect a number of cottages for the use of their workmen. Most of the lumber operators now have their men in the woods, and the outlook is that the cut this winter will be an average one. Great efforts will be made to cut as much as possible of the lumber that was burned last year in the destructive forest fires that swept over this Province.

Recently incorporation was granted a syndicate of local capitalists as the Mah Pu Mineral Springs Company. The spring is in Kings County, and the company was capitalized at $10,000. Now it has been decided to increase the capital to $75,000, and a large hotel will be built and other provisions made to engage in business on a more extensive scale than was at first purposed. A bottling plant is at present in course of erection at the springs, and the hotel is to be started early in the new year.

Local stockholders of the Macadamite Metal Company, of which I have told you, returned a few days ago from a visit to New York, where is the head office of the company. Since their return they have maintained the silence prevailing since the recent annual meeting of the local company. The factory is still idle, and street rumor is busy with many stories. Generally the impression is that the metal falls short of being the success that was anticipated, and that the enterprise is a failure.

The city of St. John took advantage of the recent visits of Hon. Messrs. Fielding and Prefontaine, of the Dominion Cabinet, to show them the existing harbor facilities, and to urge upon them the need of Government assistance before anything more can be done. Both interviews were entirely satisfactory, and the belief exists that the Government will meet the wishes of St. John, and at once put dredges to work clearing a channel for a new wharf the city will build that can be got ready in time for next winter, and will give accommodation for three, perhaps four, more steamers.

St. John, N.B., 8th December. * * *

MONTREAL TECHNICAL INSTITUTE.

It is a good while since a movement was begun looking to the founding of a technical school in Montreal, but not much progress was made until quite recently, when a few public-spirited people, Mr. A. McFee prominent among them, took hold of the project with vigor. That gentleman, having seen what technical instruction is doing for handicrafts in other countries believes firmly in the need for such institutions in Canada as will give instruction to artisans. It is of much importance to the rest of the country to have this movement in Montreal taken hold of by men who are practical as well as active, and we look for good results from this move.

The provincial directors of the proposed technical school held a meeting on Saturday and elected officers. Appropriately, Mr. McFee was made president. The vice-presidents are: Dr. Bovey, Lieut.-Col. J. H. Burland, Hon. F. L. Beique; treasurer, Mr. J. C. Holden; hon. secretary, Mr. Robert Munro; secretary, Mr. E. H. Cooper; committee, Messrs. C. Stephens, John Harper, R. R. Stevenson, J. H. Birks, W. R. Baker, Wm. McMaster, Geo. E. Drummond, F. W. Morse, C. J. Fleet, Senator Dandurand. The amount of money required to perfect the plans will be about $250,000, of which no less than $150.000 will have to be raised among the citizens. Several $5,000 subscriptions, it is stated, have already been promised. We understand that by the amalgamation of the Mechanics' Institute with the Technical School $100,000 will be provided. In any other Canadian centre than Montreal $150,000 would seem to be an enormous sum to raise. But if the rich and generous residents can be interested, as we believe they can, the money will be forthcoming, and that before long.

INSURANCE INSTITUTE OF TORONTO.

On Tuesday evening last was held, in the rooms of that body, a general meeting of the Insurance Institute of Toronto. The president, Mr. P. H. Sims, secretary of the British America Assurance Co., occupied the chair. The secretary, Mr. J. K. Pickett, referred to the large increase in membership, the total membership now being 395. He also reported that seventy members had signified their intention of trying the examinations of the institute in April next. A paper was read by Mr. Charles D. Cory, fire insurance adjuster, on "Fire Insurance as an Exact Science," illustrated by a specially prepared chart. This was followed by a discussion of a paper by Mr. Arthur J. Hughes, secretary of the Crown Life Insurance Co., on "A Method of Ascertaining the Cost of an Agency." The discussion was opened by Mr. P. C. H. Papps, A.I.A., actuary of the Manufacturers' Life, and Mr. S. J. Mackie, manager, agency department, Imperial Life Assurance Company. A very interesting feature of the evening was the explanation given by Mr. Robt. Howe, C.E., fire appliance inspector of the Canadian Fire Underwriters' Association, of the Toronto waterworks system, illustrated by a map of the city and a chart of the system.

A REMINISCENCE OF PRINCE EDWARD ISLAND.

In writing about telegraph cables, and after noting that the first successful cable of the kind in the world was laid across the English channel, a distance of two miles, in 1849, although attempts were made with partial success as early as 1839, the Charlottetown Guardian gives a story wihch possesses interest in this connection: "On the 21st November, 1852, one of the first telegraph cables ever laid was stretched between Cape Tormentine and Cape Traverse. The event was one of great interest and importance. The work was conducted under the supervision of F. N. Gisborne. [Since dead.—Ed. M. T.] The line was not intended to serve merely as a means of telegraph communication between the island and the American continent; it was originally designed, more than fifty years ago, to serve as a connecting link in a projected line to connect New York by telegraph with Newfoundland. Hence the company which laid it was designated by the name of the New York and Newfoundland Telegraph Company. In August, 1868, the telegraph cable at the capes became unworkable, and its repairs were delayed until the following spring, and telegraph communication was interrupted for a whole winter.

THE CROWN BANK OF CANADA.

We have been at the pains to inform ourselves of the present position of this projected new bank. It is significant of belief in the institution that notwithstanding the collapse of the stock market, which unfortunately took place immediately after the launching of its prospectus, the subscription of shares has quietly gone on until it has reached a large sum, which speaks well for the proposition itself, as presented to the public. So little more is now required to be done, we are told, to enable the bank to open its doors for business, that the directors feel themselves justified in opening an office for the Crown Bank in Toronto next month, under the general manager, Mr. Gerald DeC. O'Grady, for the purpose of organization.

The Electrical Development Company, which was formed for the purpose of developing energy from Niagara Falls, has decided to erect on the banks of that famous river, a solid granite power-house, 425 ft. in length and 200 ft. wide, at a cost of $400,000. It is to be one of the largest and finest power-houses on the continent.

BANKING AND FINANCIAL ITEMS.

A bill is being introduced in the Nova Scotia Legislature to authorize the Dominion Coal Company to increase its capital for the purpose of improving and developing its plant and properties, and to permit of a general readjustment of its finances.

Mr. W. Pearson and a syndicate of capitalists, it is understood from the United States, have purchased from the Saskatchewan Valley Land Co. a large tract of land in the East Mountain lake district for $300,000. A vigorous colonization policy is to be pursued by the purchasers.

It is announced in the Ontario Gazette that assent was granted on November 25th to the amalgamation of the Southern Loan and Savings Co., Southwestern Farmers' and Mechanics' Savings and Loan Society, and the Star Loan Co., all three mortgage lending companies of St. Thomas, to continue under the name of the Southern Loan and Savings Co.

The Bank of New Brunswick has recently issued a new ten dollar note which is being put in circulation. This note resembles the old one in most respects, but in the lower right-hand corner the vignette of James Manchester, president of the bank, appears, replacing that of the Hon. J. D. Lewin, the late president. This issue is the first of a new series. Other denominations are to be put in circulation as required.

In addition to those mentioned last week, the following changes have been made in the staffs of the various branches of the Merchants' Bank of Canada: In Hamilton, Mr. A. B. Patterson becomes manager, in place of Mr. W. R. Travers, resigned; the former's place in St. Thomas is filled by Mr. M. S. Hodder, whose former position in Owen Sound is filled by Mr. J. R. Little, and the latter's position at Chesley will be taken by Mr. H. A. Tofield, late accountant at Sherbrooke, Que.

A deliberate suicide appears to have been that of F. B. McNaughton, manager of the Tilbury branch of the Merchants' Bank, who shot himself through the heart on Sunday afternoon. He had left a note giving the safe combination and the address of his parents in Quebec city, also asking to have Chatham branch notified so that help would be sent out on Monday. At a coroner's inquest, the jury, after hearing the evidence, decided that deceased came to his death by a pistol shot fired by himself while laboring under temporary insanity, caused by his worrying over his business management. His accounts are all correct.

INSURANCE MATTERS.

At the regular meeting of the Toronto Board of Fire Underwriters, held on Monday last, Mr. George R. Hargraft, general agent of the Commercial Union Assurance Co., was unanimously elected vice-president of the Board to fill the vacancy caused by the retirement of Mr. R. W. Lovt.

First, carelessness with matches; second, gasoline; third, sparks. These are the causes of fires in 3,261 cases reported by the Chicago Fire Insurance Patrol from January 1st to November 15th of the present year. The careless use of matches leads with 377 fires, gasoline standing next, with 233, sparks from chimneys caused 199 fires, spontaneous combustion, 156, defective flues, 153, and overheated stoves and furnaces, 260. The causes of 35 per cent. of these fires are reported as unknown.

It seemed, up to a fortnight ago, as if the marine companies were going to come well out of business on the Great Lakes this season, but last week came the news that the steel steamer "Hutchinson" met with disaster, involving a loss of over $400,000, which is the heaviest individual loss in the past ten years. The cargo was insured in the Peck syndicate, made up of the Marine Insurance Co., the British and Foreign and the London Assurance. The hull was insured in Buffalo.

A speaker before the Insurance Institute of Montreal on Monday, Dr. Macphail, dealt with the after history of rejected lives. His paper was the outcome of an enquiry he had conducted into the subsequent history of persons who had been declined for life insurance. The doctor had had access to the records of one of the largest insurance companies in the United States and Canada, and tabulated 5,115 applications, out of which 409 had been declined, covering fifteen years. He took these 409 cases as the refuse of the whole series, and by tracing the individuals, found out how many had died, the causes of death and the number who still survived. Of 235 cases, which he was able to trace, all were living except 31, after a period varying from five to fifteen years. According to the mortality statistics, the normal number of deaths would have been twenty-five. As a matter of fact, the deaths were only six more than the normal. While not disposed to lay too great stress upon statistics, he felt that the fact of rejection by insurance companies was not always a matter of very great moment, as they had certain inviolable rules, based upon experience, by which they had to be guided.

Commenting upon recent articles and statistics in the Monetary Times on the subject of Counterfeit Insurance, the issue of the London Review, dated 18th November, has this to say upon the prospects of assessment life assurance: "For an independent people, the citizens of the United States and Canada certainly are paradoxical. The Monetary Times, of Toronto, prints a list of about thirty-five assessment or fraternal institutions which have come to utter grief, or are on the high road thereto. For instance, how does the Ancient Order of the United Workmen of America propose to pay its claim from start to finish? When an Order owns that 'no amount of increased membership would overcome the deficiency already accrued, because with each new member there would be added more deficiency,' it is clear that the crisis has been reached, and the result would be, probably, that the rates of contribution would have to be trebled. All the principal lodges of the A.O.U.W. seem to show an increase in the cost per cent. ranging from 25 to over 50 per cent. In the St. Louis Grand Lodge the rate has been increased by something like 150 per cent., and so on. The American Legion of Honor shows an increase of cost, per thousand dollars, of from 14.80 to 57.00, whilst the members have fallen from 58,000 to 6,000. The Catholic Benevolent Legion has increased its cost by something like 100 per cent., and, for the last eight years, on a falling membership. The Knights of Pythias, of Chicago, seems to be holding on with an even cost and increased membership, but that must come to an end."

TRADE OPPORTUNITIES.

Canadian Offices, London, 20th Nov., 1903.

A north of England firm would correspond with one or two good Canadian houses importing old iron and steel in the shape of rails, ship-plates, etc. The representative of an English group is about to visit Canada, and will entertain proposals for the purchase or development of established industrial enterprises of a sound character suitable for the English market. A Quebec firm of lumber shippers wish to communicate with importers of box and crate shooks. Mineral exporters in Canada want a market in Europe for chrome ore, chrome concentrates and chrome powder. A Toronto house wishes an English and continental connection for the sale of their pig lead, pig tin and other metals.

Imperial Institute, 20th Nov.

A company making insulated wires and cables would correspond with Canadian buyers of these. The makers of an agricultural motor wish to establish trade in Canada, and would like to hear from Canadian firms. A company manufacturing tools desires information as to the nature and extent of the market existing in Canada for edge tools.

FOR GROCERS AND PROVISION DEALERS.

A factory has been established near Vancouver, B.C., for the canning of oolachan, a small fish somewhat similar to a smelt.

The Standard Oil Company has raised the price of paraffin candles by one cent per pound, a step which is expected to increase its income by about $1,000,000 per year.

Canadian turkeys and other poultry are expected to be in extra good demand in the Old Country during the coming winter, the season there and on the Continent having proved very unfavorable.

A large English firm of fruit importers suggest that more attention should be paid in Canada to the cultivation of black currants and raspberries for pulp-making. This year pulp sold at £35 to £40 per ton.

The Ontario Fruit Growers' Association have decided to hold their next annual meeting in Toronto. At their recent convention they discussed also a plan for holding a winter fruit fair in Toronto at the same time, the idea being to make this an annual event, similar to the Guelph Fat Stock Exhibition.

Mr. Henry Doyle has resigned from the office of general manager of the British Columbia Packers' Association, Limited, and is succeeded therein by Mr. G. J. Wilson, who has heretofore held the position of secretary-treasurer. The latter office will be filled by Mr. R. J Ker, of Victoria, one of the vice-presidents.

The Inland Revenue Department of the Dominion Government has been making some analyses of whiskies and brandies sold throughout this country. The examination failed to show the presence of any poisonous adulteration. The analysts looked especially for alkaloids, such as morphine and quinine, but found that they are neither used in liquors of domestic manufacture, nor in those imported from abroad and consumed in this country.

FOR DRY GOODS DEALERS.

Mr. Cecil D. Danford, a manufacturers' agent, of Montreal, is trying to organize a company in Ottawa for the purpose of making women's blouses and men's shirts at the latter city.

Messrs. R. J. Chowen and W. Hartley, of Peterborough, have invented an improvement for warping reels, which, it is believed by some, will revolutionize the weaving of woolen goods. Patents have been already granted in the United States.

On the 27th ult., the Canadian Colored Cotton Company made an advance of from 5 to 7½ per cent. in cottonades, tickings, denims, ginghams, flannelettes, etc. The manufacturers of battings, too, have raised prices from 7½ to 10 per cent.

A rumor is extant that the Hoffman-Corr Mfg. Company, of Fitchburg, Mass., will erect a large cotton batting factory in Toronto. According to the report, the machinery used will cost $250,000, and a hundred hands employed. These are large figures, its seems to us.

The London Drapers' Record speaks of a firm purporting to have a warehouse in Cannon St., in that city, and to sell goods direct to consumers by pack-men and otherwise. The above-named journal says the address mentioned has been visited, and that no firm of the name given is known there. It says this is of particular interest to Canadians.

Probably the uses to which rubber can be put are without number; certainly they seem to be increasing all the time. The India Rubber Journal sums up the advantages which may be claimed for it as a floor-covering. The first point is that, as the rubber floor gives back no echo, it is very effective in subduing noise. Next, it has the rare quality of durability. So far as rubber is concerned, it may be said to be everlasting; and the more wear it gets, the better does it show its remarkable qualities. Again, floor coverings of rubber have such a spring, that one's feeling, on walking across them, is aptly described by the phrase "walking on velvet." On board ship, particularly, the non-slipping quality of rubber tiling has been very much appreciated. No matter how wet it gets it always gives sure foothold. Rubber tiling, moreover, is absolutely waterproof, a quality which gives it an immense hygienic advantage over all the other floor coverings. Being without porosity, no dust or germ of disease can find concealment in it. Rubber is also one of the worst conductors of heat or cold, and it naturally follows that rubber tiling is cool in summer and not cold in winter. Lastly, with regard to its artistic possibilities, rubber tiling is capable of splendid effects. The designer of a floor can choose his colors and how he would have them arranged, and in this way bring the floor into harmony with the room.

LAKE FREIGHT CARRIERS.

For years there has been keen rivalry among the newer and bigger steamers of the Great Lakes as to which could carry the biggest load of coal or ore or grain, or could make the fastest trips between certain points perhaps a thousand miles apart. Up to 20th November, the best carrying records made are as under, according to the Marine Review:

Iron Ore—Steamer "Wm. Edenborn," owned by Pittsburg Steamship Co. A. B. Wolvin, of Duluth, manager, carried 8,807 gross or 9,864 net tons, Escanaba, Michigan, to South Chicago.

Grain—Steamer "J. H. Reed," of the Providence Steamship Co., A. B. Wolvin, of Duluth, manager, 271,000 bushels of wheat, equal to 8,130 tons (2,000 lbs.), from Duluth to Buffalo; steamer "Rensselaer," of the Pittsburg Steamship Co., 151,000 bushels of wheat, 94,000 bushels of barley, and 55,155 bushels of oats (300,155 bushels in all), equal to 7,668 tons, from Chicago to Buffalo; steamer "Mataafa," Pittsburg Steamship Co., 185.399 bushels of corn, 40,000 bushels of rye, and 43,600 bushels of wheat (268,000 bushels in all), equal to 7,619 tons, from Chicago on Lake Michigan to Buffalo on Lake Erie.

Coal—Steamer "I. L. Ellwood," owned by Pittsburg Steamship Co., 7,688 net tons anthracite coal from Buffalo to Duluth; steamer "John W. Gates," Pittsburg Steamship Co., 7,659 net tons of bituminous coal from Lorain on Lake Erie to Duluth on Lake Superior.

CANADIAN TRADE INDEX.

A new edition has been issued of the Canadian Trade Index. This substantial volume of over 400 pages is a classified directory in three languages—English, French and Spanish—of the members of the Canadian Manufacturers' Association and of the goods they make. The present issue contains something, however, more than a catalogue of names and a list of products, important as these are towards stimulating Canadian trade in foreign parts. It has a good map of Canada and a table of distances between some thirty leading places in the Dominion. Some of these distances are calculated to make foreigners stare—an Englishman would flatly refuse to believe them unless he were a Chambers of Commerce delegate, and had really been in Canada. Another sensible thing done by the publishers is the addition of some statistics calculated to enlighten the commercial foreigner as to the extent of our products of every kind. It shows the growth of our trade per capita from $47.00 per head in 1881 to $72.03 per head in 1891 and $84.09 per head of the population in 1903. The exports of Canadian manufactured goods, which were $3,075,000 in value in 1881, count up to $6.296.000 in 1891, to $16,012,000 in 1901 and to $20,624,000 this fiscal year.

ELECTRICAL DEFINITIONS.

Referring to "Answers to Enquirers," given elsewhere in to-day's issue, we believe there are many readers who would like to have, in these days of electricity, some handy definitions of terms of electrical measurement. We therefore

present a short list of the most commonly used terms and explanations thereof, which we take from The Engineers' Hand Book, published by Biggar-Samuel, Limited, Montreal and Toronto.

Ohm.—The unit of electrical resistance, equal the resistance of one thousand feet of No. 10 (B. and S. gauge), pure copper wire at a temperature of 75 deg. F.

Ampere.—The unit of volume (or strength), of electric current, equal to the current generated by a battery consuming zinc at the steady rate of one ounce per twenty-four hours; or, the amount that one volt will force through one ohm of resistance.

Volt.—The unit of pressure (voltage of electro-motive force), equal to one-half the pressure of a single freshly charged lead storage battery cell; or, pressure required to force one ampere through one ohm of resistance.

Watt.—The unit of power equal to 1-746 of a horse-power.

Kilowatt.—A thousand watts, or roughly, 1 and 1-3 horse-power.

Candle-power.—The unit of light, equal to that produced by a candle burning two grains of spermaceti per hour.

BOOKS RECEIVED.

"The First Business of the World,"—i.e., Life Assurance. A beautiful book of 200 pages, half calf, library size, gilt, comes to us from New York with the compliments of Mr. Darwin P. Kingsley, vice-president of the New York Life Insurance Company. It is entitled, "The First Business of the World," and at least one of the striking papers it contains is devoted to proving that life assurance is this first of mundane businesses. Mr. Kingsley modestly calls his book a series of messages to life assurance men, especially to the agents of the New York Life during ten years. But these papers, essays, speeches, are a series of stimulating pæans in honor of life assurance—its dignity—its advantage—its blessings. He quotes from Longfellow, Darwin, Bellamy, Spencer, Lincoln and from Arthur Balfour's "Foundations of Belief." He argues, he compares, he exhorts, he warns, until a man who reads the eloquent periods feels ashamed of himself that he is not insured, and the young agent who listens thinks himself a new John the Baptist, ready to cry out in the uninsured's wilderness a twentieth century evangel. A great pleasure, as well as a great stimulus, must have been received by those who were privileged to hear Mr. Kingsley's addresses. And as to his papers, we have already quoted from some of them and hope to do so again. We are very much obliged for so handsome a Christmas box.

ANSWERS TO ENQUIRERS.

A. B., Brantford.—There is much more than that to be learned; you had better take a course of instruction in some college or go to work in an electrical shop. We cannot in this place give you all the information you ask: it would need a course of lectures. Your last question may be answered, however, broadly thus: The unit of electro-motive force or what is called potential, is the volt; the unit of electrical current is the ampere; the unit of resistance is the Ohm. There are other terms employed to designate electric forces, such as the Coulombe, the Farad, the Joule, the Watt, and so on.

Banker, Ottawa.—The imports of cement into Canada for the past three years were as follows:

	Year 1900. Bbls.	Year 1901. Bbls.	Year 1902. Bbls.
Belgian	80,747	85,600	107,796
German	53,450	25,320	31,450
English	53,385	22,065	9,525
American	.....	.....	1,950
Totals	196,582	132,985	150,721

G. K., Detroit, Mich. The proper way is to get a Year Book of Canada. Apply to Mr. George Johnson, statistician, Department of Agriculture, Ottawa.

—During the first eleven months of the present year, according to a report of the building inspectors of Montreal, the sum of $4,500,000 was spent on new buildings in that city, an increase of more than 50 per cent., compared with last year.

—From London comes a despatch that one of the largest cotton spinning concerns in Bradford is preparing to establish mills in the United States owing to the fact that, under the present high rate of duty, reigning in that country they cannot carry on their present American department at a profit.

—A British Columbia paper, à propos the departure from Victoria for the Orient and Europe of the steamship "Calchas," with a cargo of cased salmon, etc., remarks that none of the dog-fish salmon which formed so important a part of the exports to the East last year, were included, this species of fish, like other salmon, having been remarkably scarce this year.

—According to latest calculations, the British Columbia salmon pack for 1903, including Fraser river and northern points, amounted to 473,547 cases, comprising 368,709 cases of sockeye, 25,533 of red and white springs, 25,735 of humpbacks, and 53,570 of cohoes. This year there have been in operation thirty-five canneries on Fraser river and twenty-five in northern waters, a total of sixty canneries, or more than double the number ten years ago.

—M. Prefontaine, the Dominion Minister of Marine and Fisheries, has arrived at the conclusion that if a better system of curing and packing Canadian herring were followed, it would command much more favor and a higher price. Scotch herring being from 50 to 100 per cent. better prices, and this is attributed to the superior way in which the latter is treated. The Minister is thinking of a plan to bring some of the Scotch fishermen over to this country to instruct our people in the matter.

The result of the hydraulic operations at the Cariboo (B.C.), Consolidated Hydraulic Gold Mining Company's operations this year has been disappointing, owing to the unusually dry season. Hydraulicing could only be carried on for fifty-three days, the clean-up for that period being about $60,000. It is anticipated, however, that there will be plenty of water for next season, as a large supply, which fell after the men disbanded, has been stored up in readiness.

It is noted in the Bank of Montreal report that since the last meeting of the shareholders branches of that bank have been opened at Edmonton, Alta.; Indian Head, Assa., and Brandon, and Gretna, Man.; and a branch at Sherman Ave., Hamilton, has been arranged for. The bank also established a branch at Yarmouth, N.S., through the purchase of the business and premises of the Exchange Bank of Yarmouth. The Bank of Montreal is at present erecting premises for the branches at Edmonton, Alta., and Birchy Cove, Newfoundland, and has acquired properties on the corner of St. Catherine street and Papineau road, Montreal, and the corner of Greene and Western avenues, Westmount, where premises are being erected for branches.

—A very important sale of Ontario timber limits was held in the Parliament Buildings, Toronto, on Wednesday last, the auctioneer being Mr. Peter Ryan. The area sold comprised 826 square miles, and the amount realized was $3,677,337.50, the average price per mile thus being $4,450. The largest amount previously realized was in October last year, when 633 miles realized $2,315,000, or an average price of $3,657.18 per mile. The record price per mile, so far realized, was reached at the latest sale when a small berth in Hammell township, Nipissing District, was sold at the rate of $31,500 per mile. Besides, the large return to the province from the actual receipts of the sale, there will be the increased receipts from dues and ground rents. One feature was the competition from the United States, especially in the Rainy River District.

Meetings.

BANK OF MONTREAL.

The eighty-sixth annual meeting of the shareholders of the Bank of Montreal was held in that institution at noon on Monday, 7th December.

There were present: Hon. George A. Drummond, vice-president; Sir William C. Macdonald, Hon. Robert Mackay, Messrs. R. B. Angus, A. T. Paterson, E. B. Greenshields, R. G. Reid, Charles Alexander, E. K. Greene, G. F. C. Smith, A. T. Taylor, Hon. J. K. Ward, Donald Macmaster, K.C., C. J. Fleet, K.C., F. S. Lyman, K.C., Henry Dobell, Angus Hooper, Richard White, Thomas Gilmour, James Tasker, James Moore, George Hague, B. A. Boas, James Croil, D. Forbes Angus, George Filer, R. H. Clerk, John Molson, John Taylor, H. Macdougall, Robert Archer, Hugh Cameron, W. D. Gillean, Robert Hampson, M. S. Foley, W. Howard, W. H. Evans, Farquhar McLennan, H. J. O'Heir, Alfred Piddington, J. J. Robson and John Morrison.

On the motion of Mr. John Morrison, Hon. George A. Drummond, vice-president, was unanimously voted to the chair, in the absence of the president, Right Hon. Lord Strathcona and Mount Royal.

Mr. B. A. Boas moved, seconded by Mr. Henry Dobell: "That the following gentlemen be appointed to act as scrutineers: Messrs. F. S. Lyman, K.C., and G. F. C. Smith; and that Mr. James Aird be secretary of the meeting."

The report of the directors to the shareholders at their eighty-sixth annual general meeting was then read by Mr. A. Macnider, acting general manager, as follows:—

REPORT.

The directors have pleasure in presenting the report, showing the result of the bank's business for the period from 30th April to 31st October, 1903, in accordance with a resolution at the special general meeting, held 7th January, 1903:

Balance of profit and loss account, 30th April, 1903	$ 724,807 75
Profits for the half-year ended 31st October, 1903, after deducting charges of management and making full provision for all bad and doubtful debts	917,156 31
Premiums received on new stock	416,024 00
	$2,057,988 06
Dividend 5 p.c., payable 1st December, 1903	684,000 00
Amount transferred to rest account	1,000,000 00
Balance of profit and loss carried forward	$ 373,988 06

Since the last annual meeting of the shareholders branches of the bank have been opened at Edmonton, Alta.; Indian Head, Assa., and Brandon and Gretna, Man.; and a branch at Sherman Avenue, Hamilton, has been arranged for, to be opened on the 1st December, 1903.

The bank also established a branch at Yarmouth, N.S., through the purchase of the business and premises of the Exchange Bank of Yarmouth.

The bank is at present erecting premises for the branches at Edmonton, Alta., and Birchy Cove, Newfoundland, and has acquired properties on the corner of St. Catherine Street and Papineau Road, Montreal, and the corner of Greene and Western Avenues, Westmount, where premises are being erected for the occupation of branches to be established at those points.

The bank has also, since last annual meeting, gone into occupation of the new premises on Craig Street, Montreal, and the reconstruction of the St. James Street building is proceeding satisfactorily.

With deep regret the directors have to record the death of their esteemed colleague, Mr. A. F. Gault, who had been a member of the board for upwards of ten years.

The vacancy on the board has been filled by the election of the Hon. Robert Mackay.

It has been thought desirable to provide an assistant to the general manager, and Mr. H. V. Meredith has been appointed to the position of assistant general manager, retaining also the position of manager at Montreal.

The issue of $2,000,000 new capital stock authorized at the special general meeting of 7th January last, has been all subscribed for, and all taken up with the exception of $12,660, which will be paid up on the 23rd December, making the capital stock, all paid, $14,000,000.

The head office and a number of the branches have been inspected since the meeting last June. All the branches will be inspected, and reported on at next meeting.

STRATHCONA AND MOUNT ROYAL,
President.

Bank of Montreal, Head Office, 31st October, 1903.

THE CHAIRMAN'S ADDRESS.

Hon. George A. Drummond then said:

The statements now presented show clearly the position of the bank, and will, I feel assured, be accepted as satisfactory.

In Montreal the new banking room to the rear has been occupied, and, giving as it does ample and convenient accommodation to the public and the staff, has proved most satisfactory.

The old building had long been outgrown by the business of the bank, which was being carried on in it under crowded and most unsanitary conditions.

The reconstruction of the old building in modern fireproof manner is now proceeding, the original facade alone remaining, and when finished the premises of the bank in this city will no doubt be accepted as creditable alike to the architects, the bank and the city.

It may be mentioned that the original building fronting the square was first occupied in 1847, at which period the liabilities of the bank to the public were $3,660,000, as compared with $93,534,000 at present, figures giving some indication of the expansion of the bank's business and the accommodation required.

Turning to general questions, the most striking event of the year has been the serious decline in the market for securities.

Primarily, this has been the result of over production of stock certificates, bonds, debentures and all marketable securities, in some cases the necessary consequence of great industrial activity, but in others due to excessive capitalization, the disclosures of which excited public distrust.

It is to be noted that such cases have been rare in Canada, but we have by no means been exempt from the consequences.

Notwithstanding these drawbacks, which have made the receipts of wholesale houses occasionally slower than usual, the general trade of the country has been prosperous, as the following summary will indicate:

Dry goods—"An unusually good year."

Wool—"A good demand at good prices."

Iron and hardware—"An excellent year's business at fairly remunerative returns, equalling those of any former year."

Leather exports—"An increase of late at prices netting shippers good returns."

Boots and shoes—"A very good year's trade."

Grocery—"A satisfactory year's business, materially greater than last year."

Lumber—"A very satisfactory year, at prices 10 to 15 per cent. higher than last year."

Cheese—"The most profitable for years."

Summarizing the figures approximately they stand thus:—

Exports of lumber	$ 33,000,000
Exports of butter and cheese	27,000,000
Exports of bacon, ham, eggs, poultry	16,000,000
Exports of grain of all kinds	28,000,000
Exports of flour and meal	7,500 000
Exports of live stock	12,500,000
	$124,000,000

And it will be noted a large proportion of the year's crop has yet to come forward.

The opening of the trade with South Africa promises well. Already an extensive trade in flour, meal, lard, meats, canned goods and lumber has been established.

As regards the business of the port of Montreal, very full information is already in the hands of the public, and it need only be stated that the tonnage visiting the port shows a steady increase over the past three years, the excess being 41 vessels and 350,662 tons for 1903 over 1902.

The abolition of tolls on our canals has been effective in increasing the business of the port, the exports of wheat for the season from Montreal being larger than from New York; nevertheless, our grain exports are below the figures for 1896 and 1899.

The cattle exports for the past season show a very great increase over any previous year.

The rapid development of the North-West Territory, and the consequent increase in exportable produce, is amongst the most important of recent events. During the past sixteen months the Canadian Pacific Railway has sold for settlement over three million acres of wild lands; add to this the sales by the Government and private holders, and the aggregate must reach into large figures. It is known that at least 115,000 immigrants have entered these territories since the 1st of January last.

If disposed to attempt a forecast, which I have no intention of doing, it would undoubtedly be necessary to give weight to the great factors already alluded to. The prosperity of our farmers, the wealth pouring into territories only recently a barren waste, the full employment of labor of all kinds at high wages, and the great industrial activity caused by the establishment of many branches of manufactures; but I should also be compelled to enforce the counsels of prudence and economy.

I have much pleasure in moving:—

"That the report of the directors now read be adopted and printed for distribution among the shareholders."

This was seconded by Mr. A. T. Paterson, and was carried unanimously.

THANKS ARE TENDERED.

Mr. Donald Macmaster moved:—

"That the thanks of the meeting be presented to the president, vice-president and directors for their attention to the interests of the bank.

Mr. Angus Hooper seconded the motion which was unanimously agreed to.

The Chairman—In the absence of Lord Strathcona, and in the name of my brother directors, I beg to express sincere thanks for the honor done us.

Mr. R. B. Angus—I beg to move:—

"That the thanks of the meeting be given to the general manager, assistant general manager, the inspector, managers and other officers of the bank, for their services during the past year."

The ability, integrity and zeal with which the officers of the bank have displayed deserve this recognition at our hands. It is a matter of regret to us all that the general manager is at present absent, having been detained in England by business matters, and also by a slight indisposition. But he is now well, and will be here in a few days.

The motion was seconded by Mr. R. G. Reid, and was carried unanimously.

Mr. H. V. Meredith, assistant general manager, said:—I regret that the general manager, whose duty and pleasure it is to reply to this resolution, is not in his place to-day. He is, as Mr. Angus has said, detained in London undergoing treatment for an ailment, which we are all glad to know is not a serious one, and we expect to have him back with us in the course of a few days. I am aware the vote of thanks to the staff, which you have been good enough to pass, is to a large extent one of form and usage. At the same time, I feel that the words of appreciation and confidence which the mover of this resolution has used, coming as they do from one of our oldest and most successful general managers, must prove an incentive, were incentive wanting, to greater exertions in obtaining the best possible results for your investment and at the same time safeguarding the large responsibilities you have confided to our care.

Mr. A. Macnider, acting general manager, returned thanks, on behalf of the other members of the staff, for the kind words of appreciation that had been spoken.

Mr. George Hague moved, seconded by Mr. A. T. Taylor:

"That the ballot now open for the election of directors be kept open until 2 o'clock, unless fifteen minutes elapse without a vote being cast, when it shall be closed, and until that time and for that purpose only this meeting be continued."

This was unanimously concurred in, and a hearty vote of thanks was then accorded the chairman, who acknowledged the same.

THE DIRECTORS.

The ballot resulted in the election of the following:—

R. B. Angus, Esq., Hon. George A. Drummond, E. B. Greenshields, Esq., Sir William C. Macdonald, Hon. Robert Mackay, A. T. Paterson, Esq., R. G. Reid, Esq., James Ross, Esq., Rt. Hon. Lord Strathcona and Mount Royal, G.C.M.G.

E. S. CLOUSTON,
General Manager.

Bank of Montreal, Montreal, 31st October, 1903.

BANK OF OTTAWA.

The twenty-ninth annual meeting of the shareholders of the Bank of Ottawa was held on Wednesday, the 9th day of December, 1903, in the bank. Among those present were: Messrs. J. Roberts Allan, James Ballantyne, H. N. Bate, Newell Bate, Geo. J. Bryson, Hon. George Bryson, W. G. Black, J. F. Cunningham, John Christie, A. H. Edwards, J. D. Fraser, Rev. T. Garrett, George Hay, John Mather, Denis Murphy, M.L.A., J. L. Murphy, David Maclaren, Albert Maclaren, J. B. Maclaren, W. S. Odell, George H. Perley, C. E. Russell, Sheriff Sweetland, F. J. Wilson, J. G. Whyte.

It was moved by Mr. George H. Perley, seconded by Mr. Henry N. Bate, "That the president take the chair, and the general manager be requested to act as secretary."

The chairman then asked the secretary to read the report of the directors:

REPORT.

The directors have pleasure in submitting to the shareholders the twenty-ninth annual report, showing the result of business for the year ended 30th November, 1903, together with the balance sheet as on that date.

The balance at credit of Profit and Loss account on the 30th November, 1902, was		$ 69,273 01
Vote at last annual meeting to Charles Magee, Esq., retiring president		10,000 00
		$59,273 01
Net profits for the year ending 30th November, 1903, after deducting expenses of management, and making necessary provision for interest due to depositors, unearned interest on current discounts, and for all bad and doubtful debts		335,640 53
		$394,913 54
Appropriated as follows:—		
Dividend No. 54, 4½%, paid 1st June, 1903	$ 98,795 56	
Dividend No. 55, 4½%, payable 1st December, 1903	109,947 60	
Applied in reduction of bank premises and furniture	19,826 60	
Carried to Rest account	100,000 00	
		328,569 76
Balance carried forward at credit of Profit and Loss account		$ 66,343 78
The Rest account on 30th November, 1902, was		$1,865,000 00
To which has been added premiums on new stock issued		424,179 00
Transferred from Profit and Loss account		100,000 00
Making the present balance		$2,389,179 00

Under the authority given your directors at the last annual meeting to increase the capital stock of the bank by the sum of $1,000,000, they allotted to the shareholders on 2nd February last $500,000 of new stock at a premium of 90 per cent.

Branches of the bank have been opened during the year at Buckingham, Fort Coulonge and Maniwaki, in the Province of Quebec; Carp, Ont.; and Regina, Assiniboia; and an office is opened twice a week at Jasper, Ontario, as a sub-agency to the Smith's Falls Branch.

To meet the need of more suitable premises for the Montreal branch, a desirable site has been secured on St. James Street in that city, and a building is now being erected thereon.

The offices of the bank have all been inspected during the year. .....

The directors have pleasure in testifying to the zeal and efficiency with which the officers of the bank have performed their respective duties.

All of which is respectfully submitted.

GEORGE HAY, President.

GENERAL STATEMENT OF LIABILITIES AND ASSETS AS ON 30TH NOVEMBER.

FINANCIAL CONDITIONS.

Aemilius Jarvis & Co., Toronto, in their letter of December 4th, say: That the steady, if somewhat slow, progress upwards of the stock markets in the past three weeks should be accentuated by a smart advance with purchasers very much keener than sellers, instead of the inevitable reaction, is a great relief to the brokerage fraternity and their clients. The feeling, both in New York and locally, has been more bullish than for months past. The purchasing appears to be of a wholesome kind, and not the manipulative sort indulged in by professionals. The market has grown distinctly wider, and the general tone is losing its feverish and unhealthy characteristics. That we are in at present for an active and continuous bull market we do not wish our clients for a moment to believe, but we must express the opinion that conditions have made a marked improvement in the past three weeks, and we feel that there is every reasonable hope that purchases made of the standard stocks at the present time will show reasonable profits. In our own markets, with a few exceptions, there has been a steady advance lately, without much trading, the stocks coming in for most attention being Twin City, C.P.R., Toronto Rails, Dominion Bank, Sao Paulo, and, as one of the exceptions, Northern Navigation. There appeared to be some demand for this latter stock lately, and, under the influence of comparatively few transactions, it rose in price, and there was better demand. C.P.R. has not shown the proportionate strength one would expect. There are various reasons assigned for this, one of them being a large issue of debenture stock recently, said to have been made to provide for terminal improvements and for the purchase of the new steamers, and another being a small falling off in gross earnings during one or two weeks. There has been considerable liquidation recently, and, considering the amount of stock offering, the market has taken it well.

THE CANADIAN CASUALTY AND BOILER INSURANCE COMPANY

Full Government Deposit Paid.

President.
ALEXANDER SUTHERLAND, D.D., Toronto,
Vice-Presidents.
H. N. BATE, Ottawa, Director Bank of Ottawa.

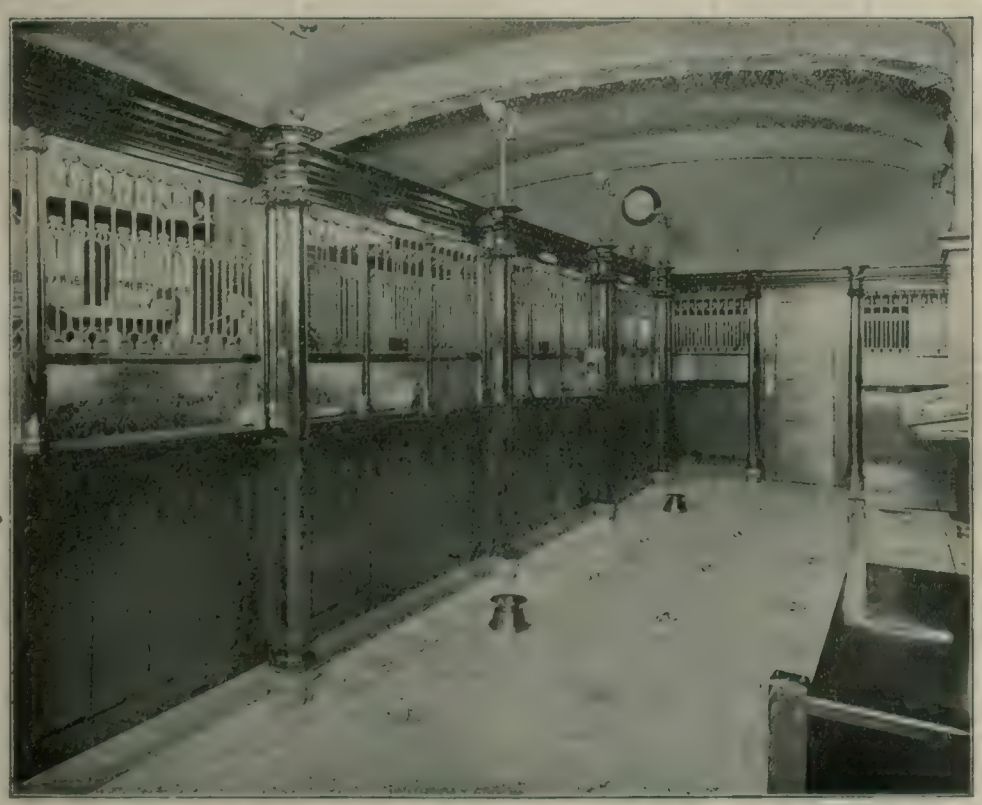
HEAD OFFICES:
N. E. Cor. Adelaide and Victoria Sts.,
TORONTO, - Ont.
BRANCH OFFICES:
Temple Building, - - MONTREAL, Que.
43½ King Street W., - - HAMILTON, Ont.

MONTREAL MARKETS.

Montreal, December 9th, 1903.

Ashes.—There is little doing in the way of business in ashes. Makers are offering little or nothing, and stocks in store are extremely light. Owing to this scarcity, dealers are still disposed to bid $5.90 to $5.95 for first pots.

Cements and Firebricks.—Stocks are now all removed from wharf to warehouse, and prices of cements have been advanced about 10c. a barrel all around.



THIS CUT SHOWS THE INTERIOR FITTINGS OF A BANK RECENTLY MADE BY

The Geo. B. Meadows Wire, Iron and Brass Works Co., Limited, of Toronto, Ont.

Toronto Prices Current.

We quote: Belgian cement, $1.80 to $2.05; English, $2.15 to $2.25; German, $2.15 to $2.35. Firebricks, $18 to $24 per m.

Dairy Products.—The markets in these lines are quiet. Some moderate trading is reported in factory fall ends of cheese at about 9⅝c. Fine September and October makes are held at 10½ to 10¾c. In butter there is no export demand, but values are pretty steadily held at 21 to 21½c. for fine fall creameries, with current receipts selling at 20½ to 21c. per pound.

Dry Goods.—There has been a further all around advance in cotton goods. On Saturday last, the wholesale dry goods trade received notification from the Merchants' Cotton Co., that all quotations were withdrawn. Supplementing their circular of November 27th, referred to in last issue, the Canadian Colored Cotton Co., on Saturday, gave notice of a further advance of 5 to 7½ per cent. in denims, tickings, shirtings, ginghams, and practically all the lines advanced the week before. The Colonial Bleaching and Printing Co., has put prices up about 10 per cent., on their output, consisting mainly of prints, ducks, drills, moleskins, etc. The Dominion Cotton Co. also has issued a circular to the trade, stating that owing to the enhanced cost of raw material, all their lines of gray and white cottons, carpet warps, yarns, etc., are advanced 5 to 7½ per cent., and are subject to further advance without notice. The print product of their Magog mills is likewise advanced about 10 per cent. The general state of trade is about as indicated in last report. Retail trade is reported good in both city and country, and money is coming in well from retailers.

Furs.—Receipts of raw furs are not liberal as yet, but they are showing some little increase, and the pelts are of rather better quality, the proportion of prime skins being larger. The London January sales are fixed for the 25th prox. We quote prices here for prime skins as follows: Beaver $5 to $6.50 for large; medium ditto, $4 to $4.75; No. 1 choice bear, $15 for large, $10 for medium, and $6 for small; badger, 30 to 50c.; fisher, No. 1, dark, $5 to $6; ditto, brown, $4 to $5; pale ditto, $3 to $4; red fox, $2.25 to $4; cross fox, $5 to $10 for No. 1, as to color; wolverine, $2.50 to $5; lynx, $4 to $8 for No. 1; marten, $2 to $3 for Ontario and Quebec skins; fine B.C. and Northwest pelts bring higher prices; mink, $2 to $4 for No. 1; fall rats, 8 to 17c.; winter ditto, 15 to 20c.; otter, $8 to $12; fine Labradors and Northeastern would bring $12 to $20; coon, $1.50 to $2.50 for No. 1 black, and from $1 to $1.75 for No. 1 dark; prime skunk, $1.50 for No. 1 all black; short stripe, $1.10; long stripe, 60c.; and broad stripe, 20c.

Groceries.—There is no slackening of the movement as yet, wholesalers generally reporting quite a good demand for the month of December, and collections are fair to good. In values there have been few changes. Local refiners still quote $4.05 for standard granulated sugars, while yellows range from $3.25 to $3.80. Molasses is if anything stiffer, good Barbadoes being quoted at 40c. per gallon in puncheons, and 42c. in barrels. Stocks of dried fruits are getting low, more particularly Valencia raisins, and prices are well held. Canned corn keeps moving upwards, and is exceedingly scarce.

Hides.—As anticipated last week prices of beef hides have declined. Owing to the lockout of shoe operatives at Quebec, tanners in that city have been very light buyers of late, with the result that stocks show material accumulation, and dealers have reduced quotations by half a cent, making the present price of No. 1 hides 8½c. per lb., and other grades in proportion. The figures for lambskins and calfskins are unaltered.

Leather.—The market remains a quiet one, boot and shoe manufacturers not being free buyers, as a good many of them are stocktaking. Prices are still firm, notwithstanding the easiness in the local hide market, noted elsewhere.

Metals and Hardware.—Some quieting down is noticeable in general hardware, but a few of the dealers in heavy metals still report a good demand, more especially from local sources, there being a large amount of construction going on. Agents for British manufacturers are said to be booking quite a good proportion of import orders for spring shipments, though hardly as large as a year ago. It is reported that some fair-sized orders have been placed for American tin-plates, with the likelihood that further business may be done in this direction. Very little change is to be noted in prices since a week ago. Copper is again off somewhat, with sales of fair lots reported at 13c.; ingot tin has recovered a little, and is quoted at 29½ to 30½c. per pound.

Oils and Paints.—There is an absence of any noteworthy news in these lines. Little business is doing just now, and a slack time is expected till January. We quote: Single barrels, raw linseed oil, 47 to 48c.; boiled, 50 to 51c., net 30 days, or 3 per cent. for four months' terms. Turpentine, 83½ to 84c., single barrels. Olive oil, machinery, 90c. to

J. J. W. Deuchar, F.F.A., F.I.A., General Manager and Actuary of the Norwich Union Life Assurance Company, speaking of investments says:

"It may serve to indicate the great importance of obtaining a good return on the investments, if it is realized that one per cent. of increased interest on the funds of a company will, on the average, have as great an effect as a saving in expenditure equal to 10 per cent. on the premium income, while, if an office could count on realizing 5 per cent. interest in place of 3, it might reduce its premiums some 30 per cent., or double its bonuses."

Mr. Deuchar does not name THE GREAT-WEST LIFE; but the above statement exactly describes the happy position of its policy-holders.

It Leads Them All.

As applied to the gain in net amount of life insurance in force in Canada for the FIVE YEARS ending December 31st, 1902.

Head Office—WATERLOO, ONT.

The Mutual Life OF CANADA

has once more established its right to the above claim. It stands to-day

At the Head Of All

life companies doing business in Canada in the NET AMOUNT IN FORCE GAINED OVER all its competitors during the past five years, as shown by the Government Reports.

TORONTO MARKETS.

Toronto, December 10th, 1903.

Chemicals, Drugs, etc.—Trade conditions here continue much as they have been during the whole fall, that is, fairly active, without any very special feature worth noting. Prices for the most part remain firm. A Baltimore report says that the market there for ammoniates is without change. The demand is good for fertilizer materials, but the extreme prices asked by producers have been a serious handicap to business.

Dry Goods.—The seasonably cold weather and the approach of Christmas have together given a great impetus to trade, which was not particularly inactive before. Prices remain very firm, and, as mentioned before, those for staple cotton goods have made further substantial advances. Retailers looking for job lots have been disappointed; such are very few and far between, owing to the rush with which the domestic mills have only been barely able to keep with their orders. Domestic prints are now coming forward, and create a very good impression. For dress goods the demand lately has been particularly active. Prices are very firm, and for imported goods those wishing repeats are frequently called upon for higher prices. General prospects for good trade for the balance of the season are very bright. Payments have been good.

Flour and Grain.—Wheat is dull, and from 1 to 2c. lower. Barley has dropped 2c. Oats is 1c. lower, and is dull at the decline. Peas are unchanged, and corn nominally the same. Buckwheat is steady and in good demand. Rye is firm at an advance of 1c. Receipts are good, but are being interfered with to some extent by the scarcity of cars. For flour, the market continues steady at $3.05 for ninety per cent. patents, Manitoba is steady. Bran and shorts are fairly firm. Oatmeal is nominally the same.

Groceries.—The movement in sugars at the recent decline, continues about normal for this season of the year. General trade is in a similar condition. Coffee is creating some little interest, owing to rumored increase of speculation in futures. Prices of Rios have already gone up a fraction. A good trade is going on in Spanish dried fruits, but the Californian articles will not be much in evidence on the market for a month or more. Canned vegetables are fairly active.

Hardware.—Considerable activity is still to be noted in the demand for all lines of seasonable goods. Prices remain practically the same in all lines. The demand for metals continues normal, without special feature.

Live Stock.—For high-grade stock, of which there was a somewhat larger percentage than usual, the demand was keen, both as regards export and butchers' cattle. Prices were well-maintained at the market this week. The run of sheep and lambs was light, and everything sold rapidly.

Provisions.—For hay products the demand at the present moment is a little slow. Butter is practically unchanged, though really good quality finds willing purchasers. Cheese is in moderately good request. Poultry are warranted. Eggs continue scarce.

Fruits and Vegetables.—The Christmas trade may be said to have begun. It promises well. Prices may be quoted as follows: Apples, $1 to $2.50 per barrel, according to grade and quality; cocoanuts, $4 per sack; oranges, Floridas, $3.50 to $4 per case, $2.75 to $3.25 per box; Jamaica, $5 per case for 200's, $3 to $3.50 for 360's; California, $5 to $6; Floridas, $4 to $5; bananas, 8's, $1.25 to $1.50 per bunch; 1st, $2 to $2.50; sweet potatoes, $3 to $3.50 per barrel; celery, 20c. to 40c. per dozen; cranberries, $9.50 to $10 per barrel, $1.25 per basket; Spanish onions, $2.75 to $3 per large case, and $1 for small; Malaga grapes, $5 to $6 per barrel.

Wool.—Little is doing in this market, though the stronger feeling in the London wool sales is having some effect for pulled wools, the demand is fair, but for fleece very quiet.

The Altar Of Friendship

Do not hazard your all on the altar of friendship. Thousands of men have been ruined by going surety for friends. Better far for you to pay a strong surety company the premium on the bond. It will pay you to enquire about our policies.

EMPLOYERS' LIABILITY ASSURANCE CORPORATION
MONTREAL — TORONTO

GRIFFIN & WOODLAND
MANAGERS

The Montreal and South Shore Auto Car Company purposes to operate automobiles and motor cars between Montreal and the south shore of the St. Lawrence, if permission can be obtained from the Grand Trunk Railway to cross upon the Victoria Bridge driveway.

A prominent Montreal business man recently gave an agent of another company a proposal for a large policy, with the condition that it would be given to the Sun Life of Canada. This is unusual. It shows that business men have a knowledge of the merits of life companies

Continued Progress

During the last few years the North American has made marvellous strides in all Departments tending to its upbuilding, which can readily be seen by the following figures, showing a comparison of

Three SEPTENNIAL Periods

Year	Cash income	Assets	Policies in force
1881.....	$ 39,613....	$ 88,763....	$ 1,221,712
1888.....	263,691....	666,919....	7,927,564
1895.....	581,478....	2,300,218....	15,779,385
1902....	1,270,840 ...	5,010,813....	30,927,961

A strong progressive Canadian Company giving excellent returns to its policy-holders, therefore making it a desirable Company for agents to represent. Three active agents wanted.

Perley Putnam, of Onslow, a leader in the search for Capt. Kidd's treasure at Oak Island, on the south shore of Nova Scotia, is seriously ill. Putnam has spent a fortune at Oak Island during the last six or eight years, but for the last few years, for lack of funds, operations have been suspended on that famous, or rather fabulous, treasure. When taken ill a few weeks ago he had a company organized to proceed with him in the search for the treasure. The capital was to be $15,000. A large part of the stock was taken at Amherst, N.S., and some in the United States.

Sail from Halifax for Bermuda, the West Indies, Demerara every Fortnight. Passage accommodation first Class only.

R. M. MELVILLE, - TORONTO.

Mercantile Summary

THE Maritime Commercial Travellers' Association will hold a dinner at the Halifax Hotel on Tuesday evening, 22nd inst.

"DE man dat makes a business of findin' fault," said Uncle Eben, "gits mo' occupation an' less results dan anybody else in de community." Washington Star.

FARMERS in the vicinity of Magog, Que., have been doing a thriving business in Christmas trees, which are shipped to Philadelphia and New York.

QUITE a big charter is that recently closed, says the Halifax Chronicle of 12th inst., for five British steamers (Battle line boats) from St. John, N.B., and other bay ports to the United Kingdom with deals at 34s., season of 1904.

IN the action taken by the Bank of Hamilton against E. K. Scott, of Palmerston, and C. W. Anderson, of Oakville, to recover $12,350 on promissory notes, a matter which became of public interest at the time of the Anderson bank failure in the latter place, judgment was given for the plaintiff.

NEW YORK and Montreal capitalists are said to have a project on hand for the building of a big hotel in the city of Quebec on the most approved modern American and European plans. The head of the plan is believed to be Mr. J. W. Drake, of Chicago.

THE Ontario Government has made an extensive addition to the forestry reserve of the Province by setting aside 3,700 square miles north and west of the present reservation at Temagami. The new tract has never been lumbered before, so that the pine upon it is believed to be particularly valuable.

THE Imperial Coal and Coke Company has received a Dominion charter authorizing it to operate some eighty-eight square miles of coal lands lying between the C.P.R. coal areas on the Fording River, B.C., and the Crow's Nest Pass mines. The intention is to engage in coal mining on a large scale, and to erect a number of coke ovens so as to enable them to compete for the British Columbia smelter and Montana copper trade. The head offices of the company are to be in Montreal. The capital is placed at $4,500,000.

THE Nicola, Kamloops and Similka Coal and Railway Company held a meeting in Toronto last week, and organized under the following officers: E. A. Jukes, Toronto, president; George A. Begy, St. Catharines, vice-president; W. S. McNamara, St. Catharines, secretary and treasurer. The company proposes to build a line from Spence's Bridge, on the C.P.R. main line in British Columbia to Nicola, and then southeast a distance of about 100 miles to the United States border. Large coal areas are believed to exist along the proposed route, which will also connect with the C.P.R. at Midway with the Coast and Kootenay Railways and the Midway and Vernon Railroad.

GEO. A. STIMSON & CO.,

24-26 King Street West. TORONTO, Ont.

F. E. CAME & Co.'s warehouse of railway supplies in Montreal was badly damaged by fire a few days ago. Loss, $25,000, insured.

WINNIPEG factories have been granted a reduction in their water rates of from 16 2-3 to 30 per cent., according to the quantity consumed.

Mercantile Summary.

THE Montreal Clothing House, owned by Vineberg & Co. in Owen Sound, Ont., was destroyed by fire last Sunday morning at an estimated loss of $12,000, mostly insured.

THE Grand Trunk station and freight sheds at Beachville, Ont., were last week destroyed by fire, caused by a lamp explosion. The loss, including damage to several carloads of oatmeal and merchandise, is placed at $20,000.

THE great smelt fishing on the Miramichi river New Brunswick, has put everybody in good humor. So far the catch has been all that could be desired, and goes far to recoup the fishermen for the poor successes of the past two years. Prices have ranged high, four cents a pound being paid upon the ice; and while price is good the quality of the fish is also good.

A STRIKING piece of printing, in four colors, the centrepiece representing the Holy Family, is the cover of the Christmas number of the Canadian Churchman. Even more delicate, perhaps, are the two-color picture on page 767 and the beautiful "Madonna and Child," full page picture fronting page 758. There are other illustrations on nearly every page, indeed, several unusual ones in advertisements, such as the picture of St. James' Cathedral in the J. F. Pease Company's card; and the letterpress contains, in addition to current religious information, some literature appropriate to the Christmas season. The fact that the paper, color-printing and all, was produced by the type and presses of the Monetary Times Company ought not to prevent our saying that this number of the Canadian Churchman is an exceedingly well-printed and attractive paper.

THE following list gives a record of the patents recently granted to Canadian inventors in Canada and the United States: Canadian patents—R. R. Wiley, transformer; J. W. Arnott, saw dressing and filing appliances; A. Campbell, steam boilers; N. E. Nash, valves; W. Hull, cultivators; A. La Lande, car replacers; L. Migner, outsoles; E. Dore and F. Toupin, ploughs; L. Cohen, valves; O. Zepf, stoppers; S. Haigh, gas burner cut offs; J. G. Elderskin, rafts; W. B. Bulmer, tea kettles; D. C. Hodd, sand papering machines; W. D. Mitchell, combination credit files; L. C. Smith, rail switches for overhead travelling carriers; W. E. Kyle, photo flash lamp; J. A. Proulx, linotype leaders; C. H. Hutchings, machines for moulding building blocks and artificial stone. United States patents—J. A. Bell and L. T. Teit, steam indurated stones; J. V. Brooke, display rack; S. Brown, clothes clamp; H. S. Burrill, W. Cross, combined feed water heater and scummer; J. E. Currie, jun., brush; J. Kynoch, combined trolley and air brake controller; A. Norman, last; E. Vegiard, paint brush; E. Vegiard, painting and cleaning apparatus; P. H. Zeigler and D. Betzner, extension ladder.

Mercantile Summary.

FROM Ottawa it is learned that the Canadian Broom Co., Limited, of that city, is to be wound up, and affairs are in the hands of W. A. Cole, assignee. The company was incorporated only in March, 1903, with an authorized capital of $40,000, but very little actual capital was ever apparently paid in.

THE Market Committee of the Montreal city council have quite recently met and drawn up appropriations for next year. They total $66,426, of which $19,636 is for salaries. Most of these are for repairs to the following markets: Bonsecours, $6,500; St. Antoine, $3,500; the Eastern cattle market, $26,250. This sum is to be used, if obtained, for rather extensive improvements.

SEVERAL changes have been made in the managing directorate of the Montreal Street Railway Company as a consequence of the resignation of Mr. F. L. Wanklyn, its first vice-president and general manager, who, we understand, will occupy an important position under Mr. James Ross in the Dominion Coal Company and the Mexican Light and Power Company. Mr. K. W. Blackwell becomes vice-president also of Montreal Park and Island Railway. Mr. W. G. Ross, heretofore secretary-treasurer of the Street Railway, becomes managing director, while Mr. Duncan McDonald, who has been assistant manager, becomes general manager. Mr. Patrick Dubee is appointed secretary.

THE following is a record of patents recently granted to Canadian inventors in Canada and the United States: Canadian—R. Oliver, shocking machines; R. D. Gardiner, apparatus for pickling or treating grain; P. H. Cowper, hydraulic valves; J. W. Provan, litter and feed carriers; J. W. Provan, hoisting apparatus; R. O. Dobbin, smoke consumers; H. Hamel, cattle guard; H. and S. Fox, tongue supports; G. A. Roedde, loose leaf binders; W. B. Stevens, parturition forceps; J. Lavigne, aux ressorts a voitures; I. R. Lemm, boat checks; E. B. Jarvis, moulds for artificial stone; H. W. Smith and M. F. Smith, pneumatic straw stackers; H. B. Frost and H. L. Frost and A. Robertson, barbed wire for fences; M. Turnbull, wire-stretching machine; E. A. LeSuer, art of causing evaporation; L. A. Melanson, auxiliary thill coupling; J. Hauser, hose couplings; J. B. Perry, brake shoes; T. E. Ayotte and A. A. Charbonneau, brick machines; T. N. Stubbs, weather strips; T. J. Watkinson, balanced roller blind; A. Johnston, harrows. United States—G M. Absalom, threshing machine; E. Brougham, pneumatic seat post for bicycles; A. B. Collin, scale or weighing beam; E. F. Comber, boiler furnace; J W. Olaholm and G. T. Kent, parallel ruler; A. Guindon, rotary engine; E. G Overholt, fence-weaving machine; N. Prince, voting machine; T. M. Ramsay, adjustable drivers' seat; A. Sonsthagon, bracket or clamp; E. S. Stimpson and C Short, clamping device for heddle bars or supports.

By order of the Board.

(Signed). A. J. JACKSON,
General Manager.

Dated Toronto, 1st December, 1903.

Mercantile Summary.

Z. REGIMBAL, a general dealer at Azilda, Ont., who recently obtained an extension of time, is unable to complete the arrangements, and a Montreal firm of accountants is in charge of his affairs.

OWING to recent pressure from suit, J. F. Read & Co., plumbers, of Smith's Falls, Ont., are endeavoring to compromise liabilities of about $3,000. They offer 60 cents on the dollar, cash.

A WINDING-UP order has been issued by the court in the matter of the Union Home and Real Estate Co., of Montreal. The concern was chartered at Quebec in May, 1902, with an authorized capital of $10,000.

TWELVE hundred steerage passengers sailed from New York on the La Champagne and 850 on the Lahn, making the total number returning to Europe during the ante-Christmas rush up to December 12th nearly 50,000.

HERCULE GIRARD, of Baie St. Paul, Que., lately insolvent, is offering 40 per cent. cash on liabilities of about $2,000, and L. O. Couture & Co., of St. Gedeon, in the same district, proposes to pay 80 per cent. on liabilities of $2,300.

THE failure is noted of F. X. Brassard, storekeeper, at St. Leon le Grand, Que. He had been in trade a matter of two years or less, and was formerly a farmer at Laterriere, beginning entirely without any business experience. He has been reported slow pay for some time past, and is now in the hands of a Quebec assignee.

A WINDING-UP order has been issued in the matter of the Union Brewery, Limited, Montreal, and a meeting of creditors and shareholders is called for the 21st inst. to appoint a liquidator. The business was a prosperous one during the lifetime of Mr. John Atkin, the original proprietor. He died in 1896, and his executors put the concern into joint stock shape in 1898, with an authorized capital of $200,000. Without the master hand at the helm, however, the business gradually fell off. Fresh capital needed to keep the plant up to date was not forthcoming and during the last year or two it has been a continual struggle against the inevitable.

A DEMAND of assignment has been made upon McBean & MacPherson, dealers and exporters of baled hay in Montreal. During the South African war they are said to have had some very profitable contracts with the British Government, and a warehouse and baling plant were established at Mile End. After the suspension of hostilities they endeavored to find a market in Britain and the United States, with unfortunate results, and latterly they have shown signs of serious financial strain. It is said an interesting point of law may develop out of the failure, as, it is reported, MacPherson, who is a large cheese operator in the Lancaster district, was never regularly registered as a partner, though he is reported to have furnished most of the active capital, and legal process may be necessary to establish his real status.

AGENTS { William McKay, 320 Ossington Avenue, Toronto.
Watson Jack & Company, 7 St. Helen St., Montreal.
J. F. Porter, 355 Carlton St., Winnipeg.

J. A. D. ANNETT, a young man, who began storekeeping at Gaspe Basin, Que., three years ago with little experience, but with some financial backing from his father, has become involved, and his affairs are in the hands of Kent & Turcotte, assignees, Montreal.

LA Compagnie de Cegares Havana, Limited, started less than a year ago in Quebec, with a considerable "flourish of trumpets," has come to an untimely end, having gone into voluntary liquidation. The company was incorporated in February, 1903, with an authorized capital of $50,000, of which a very limited proportion was ever subscribed or paid up.

A GROCER named A. P. Gould, at Shediac, N.B., has assigned. He started at his present address in 1901, coming from Buctouche, where he had been burned out. His lawyer recently approached his creditors with a compromise offer of 45 cents on the dollar, but not being able to furnish security, the proposed settlement fell through.

A DEMAND of assignment has been made upon J. C. Kennedy, of Granby, Que. His son, who had been brought up on his father's farm, went into business several years ago under the style of the Banner Tea Co., but soon got into bad shape, and was obliged to compromise a year ago. The father, with no more experience than the son, then undertook to manage affairs, and has himself become speedily involved. The liabilities are placed at $7,000.

AN assignment has been made by J. O. Lemire & Co., general merchants at St. Guillaume, Que., not far from St. Hyacinthe, upon the demand of the Sherwin & Williams Co., of Montreal. Lemire, who has of late been doing business under cover of his wife's name, has not a very favorable business record. In 1893 he was of the firm Lemire & Frere, who made a much criticized failure in that year. He resumed business alone, but again proved unsuccessful in the course of a year or so. He is now said to show liabilities of about $15,000, with assets estimated at $6,000.

E. Baskin conducted a clothing and boot and shoe business at Sault Ste. Marie. After operating there for some time he opened branch stores at North Bay and Sudbury. In each of the three places business has been unsatisfactory, and as he saw no means of meeting his engagements he has made an assignment. It may be supposed that, having branch stores, his obligations would be large. We are told they are some $26,000, while his assets do not exceed $16,000 in value.

The following item is from the St. John Sun: Frank S. Murdoch, representing the Canada Paint Company, returned to St. John from the graphite mine at Thorne's Brook, King's County, N.B., where one hundred tons of graphite will be got out soon for this Canadian company. The same company secured not long ago 2,000 tons of iron oxide at St. Malo, Quebec. Some of this was shipped to the United States and United Kingdom. The remainder will be used in the company's paint works at Montreal, where it is ground for painting girders, bridges and roofs.

George G. Power, general storekeeper, of Kingston, N.S., to whose assignment reference is made in another column, was for a time in partnership with one A. E. Roach, but this was dissolved in 1897, his partner receiving $1,200 for his share, Power giving his confession of judgment for that amount, with the proviso that Power was to be allowed a reasonable time to collect accounts to settle same. In the spring of 1902 he opened a branch at Middleton, where he bought out E. C. Gates. Under date of November 26, 1902, he stated that total liability did not exceed $7,000. Again, under date of March 20, 1903, he submitted an approximate statement, which showed the liabilities as $5,000. This statement, made about nine months ago, when put alongside that of the official assignee, J. W. Blanchard, to the effect that the liabilities to-day will in all probability reach $73,339, would show that something is very much out of gear. During the past few months he has been buying in all directions. Among the creditors are seven Toronto firms, whose claims aggregate about $6,100. He assigned on the 25th ult. His stock is said to be mostly new, is his principal asset, and said to be in fair condition. It seems to be the local opinion that the estate may pan out about 50 per cent. to creditors if properly handled.

STOCK TRANSACTIONS.

A firmer feeling with regard to prices and a better undertone to the market have been noted on the local as well as the New York Exchange, though the volume of trade continues small. The following brief summary of prices quoted for some of the more important stocks yesterday will serve to indicate the range of values: Bank of Commerce, 152; Nova Scotia, 269½; Imperial, 215; Hamilton, 210; Twin City, 92⅛; Toronto Rail, 100; Soo (preferred), 115; Sao Paulo, 80⅜; Toronto Electric, 134½; Northern Nav., 77; Dom. Steel (common), 8; Dom. Coal (common), 74⅞ to 75; Nova Scotia Steel, 77½.

Economy in Lumber Cutting.

A prominent lumberman stated recently that, in his opinion: **Every gauge saved** on your saw meant **twenty cents per thousand** added to the value of your entire cut.

The ordinary **circular** cutting forty thousand per day is **6 gauge**. The **Band** never over **14 gauge**.

Its use therefore adds $1.60 per thousand to value of lumber produced.

Double Cutting-steam Feed Steam Niggers, Loaders, Kickers and Steam Setters — add larger percentage to daily cut reducing cost per thousand.

This Pony Band—Single or Double Cutting—using **15** or **16 gauge short saws** is within the reach of all. You should get into line—get posted—make the change—it's simple. Many hundred Bands running in Canada.

THE HARDWARE AND OIL TRADES.

The comparatively long-continued period of low temperatures has resulted in a rush of business for seasonable metal goods. The demand for such articles as skates and sleigh-bells was hardly ever more active than it is now, and this date is usually but the beginning of the season. Wholesale dealers are beginning to arrive at an opinion upon the whole volume of trade during the past year, and they appear to think that while perhaps it is scarcely larger than that of last year, yet it is certainly fully equal to it, and it should be remembered that last year was a wonderfully good one. Prices remain firm, with hardly any appreciable changes. This is the season of the year when the various hardware associations meet to compare notes and to fix prices; but so far as known, they have no particularly important subject for discussion on hand. They may, of course, decide to alter prices in some instances, but it is the general belief that these alterations, if there be any, will be of an unimportant character. There is a very firm feeling in cordage, and any change is likely to be in an upward direction. As remarked above, the most noticeable feature of the shelf hardware trade for the moment is the unusually large demand for seasonable goods. Very large quantities of skates are going out. Some rumors of a shortage of these are heard, but it is believed in the best-informed quarters that this has been exaggerated. Orders for sleigh bells are reported as coming in in highly satisfactory numbers both from Ontario points, many of which are now enjoying good sleighing, and from the Northwest. Montreal reports speak similarly as to Quebec province. Other articles of a winter kind, which seem to be in extra good request, are snow-shovels, hockey-sticks, and such domestic and sporting implements; as well as goods of a holiday nature, such as cutlery, silverware, etc. It may be added that horse nails, rivets, burrs, staples, screws, nuts, etc., continue in fair demand, but the call for wire nails has declined considerably during the last month, though before the close of navigation, trade in them was exceptionally good.

The building trades must be pretty busy, judging from the keen demand for goods required in plumbing; and a point worth mentioning is that people now-a-days seem to call for those of a somewhat higher grade than was the usual case until latterly. Prices in these lines keep steady, though for large orders a little shading is occasionally indulged in. In cement not very much business is being done just at present, though prices keep firm, and some slight advances are not improbable during the winter. Canadian cement now fetches $2 or a little more at the mills. An active trade is going on in firebricks.

At the oil warehouses, much discussion has been created by the almost unprecedented strength in coal oil. A brisk trade has been carried on in Toronto at the recent advance of 1c. per gallon. It is said that the highest prices in over twenty years for crude oil were paid last week on the Pennsylvania Exchange. The output is being restricted both in this country and the United States owing to the cold weather, as a consequence of which the price went up two weeks ago by 5c. per gallon. Apart from this comparative scarcity, it appears that the consumption has increased during the last year or two owing to the greater number of oil stoves and oil engines in use. Lubricating oils are also very firm, while fish oils are very high-priced—cod liver oil, we believe, was never quoted higher, owing to the very light catch. Seal oil, too, which is used to a certain extent as a substitute for cod, is going up. Linseed oil has declined a couple of cents. Turpentine continues steady. The paint trade has naturally been a little dull since navigation closed.

As to metals, the demand has fallen off, especially for pig iron, but probably not more so than is usual when the water channels are frost-bound. It may be said, especially when the dullness of the market in the United States is taken into consideration, that the trade in pig and bar iron in Canada has kept up wonderfully well. The latter has dropped 5c. in price, however. Iron pipes have been active. Some American tin plates have recently been sold in Canada in competition with the Welsh, at some little

concession in price. In the Montreal market up to 16th there was an unusually good demand, for mid-December, for sheets and plates, as also for plumbers' supplies. A report has reached Montreal that the American sheet steel trust is preparing to make Canada plates for our market, which will be a new departure. The same concern has taken some round orders in Canada for tin plates within the fortnight. Such facts as these give point to Mr. Chamberlain's address at Cardiff, where he dealt luminously with the tin plate trade. A ½c. reduction was recently made in copper ingots, and trade has moved fairly well under the decline. For lead there has been a slightly improved demand. Other lines of metals have remained very much as before stated.

TRADE CONDITIONS IN NOVA SCOTIA.

The business situation in Nova Scotia is less satisfactory ever since the beginning of December. Some of the conditions are unusual. The shortage in the catch of fish has affected trade in important sections and led to more conservative buying on the part of many merchants. The difficulties which have overtaken the iron industry and the consequent discharge of large numbers of workmen employed by the Dominion Iron and Steel Company, at Sydney, has made trading at the latter point dull and uncertain. The strike at Springhill, affecting over one thousand colliers, caused commercial travellers to give that town a wide berth for a time. Fortunately in this instance the striking workmen, after a fortnight's idleness, reconsidered their hasty decision and resumed work, so that the business of the town is assuming normal conditions. It is much to be hoped as our local informants assume, that the worst is also over at Sydney, and the New Year may bring back something of the old time activity to that remarkable place. In addition to these factors of local depression, the effect of the weather has been distinctly unfavorable. In and about Halifax it has rained for two weeks with but slight intermissions, and little, save the necessities of life, have been bought during this month so far. The unseasonable weather has been especially detrimental to the dry goods business, and unless cold weather sets in very quickly this will be a lean December for many who look for heavy sales at this particular season of the year. The financial situation also is not without its discouragements. A very heavy failure of a trader in the Annapolis Valley has been a disquieting feature. The liabilities amounted to some $73,000, in which Halifax creditors figure to the extent of over $14,000. The total creditors exceed one hundred, including firms both in the Maritime Provinces and in Quebec and Ontario. We have been told of a number of retailers in that province who, finding themselves with heavy stocks on hand, have lately been applying to their creditors for extensions of time in meeting current payments. In most of these cases there is no suspicion of the financial soundness of these firms, but the present conditions are pressing on them.

It has been a subject of complaint by not a few retail merchants in country places in Nova Scotia, that they cannot get accommodation, such as they have a right to expect, from branches of the chartered banks. The situation is described to us as follows: Mr. Blank, of ———, and Mr. Dash, of———, applied each during the same week for a discount. The reply they received was: "The paper is good; none better; but, we have no money." Now, says the man who tells us of these circumstances, and of the reply received: These branches are of no use to retail men. What are they for? To oblige manufacturers alone? Banks might remember that there are other interests in the country. As a matter of fact, some of our institutions have withdrawn funds usually available for local uses, and loaned them in the West and the United States, where much larger interest has been secured. No one questions the right of the banks to use their funds where the most profit is to be made, but all the same this course has pressed heavily on many firms which, having received liberal accommodations for years, have this year had these privileges suddenly curtailed.

The bright side of the situation is presented when we turn to the manufacturing industries of the province. Here the utmost activity prevails and every effort is being put forth to increase the output. Our Halifax correspondent tells us of one of the underwear manufacturers of Nova Scotia, which has turned down $50,000 worth of orders this season because he could not produce sufficient goods. In some degree, we are informed, every important factory in the province has had the same experience. All are full of orders well on into 1904. Farmers and apple growers in that favored province are also prosperous. Altogether the outlook for the New Year is encouraging. The influences that have had a disturbing effect are believed to be passing away.

"COST, FREIGHT, AND INSURANCE."

A decision of great interest to importers was rendered in the Superior Court, Montreal, last week. in the case of The Canada Hardware Co., Limited, v. Suren, Hartmann & Co., for loss and damage sustained on a consignment of hay-binding wire shipped by defendants to plaintiffs, which was found on arrival to be damaged by rust resulting from salt water. The purchase had been made by plaintiffs at a C.I.F. price, and letter-of-credit on London acompanied the order, so that the goods were paid for long before the steamer reached Montreal. It was then learned that the wire had been insured by the sellers—"F. P. A." (Free of particular average), and as no accident had happened to the ship so as to cause a "general average," there was no claim against the underwriters for the damage, which, as shown by the Port Warden's report of survey, amounted to as much as forty per cent. on some portions of the lot. The shippers refused to indemnify, claiming that they had done their duty when they insured the goods, and that it was the established custom to insure only "F. P. A." unless specially stipulated otherwise at time of sale.

The buyers maintained that this kind of insurance was insufficient for the class of goods purchased, which being particularly sensitive to damage by perils of the sea, other than sinking, stranding, burning or being-in-collision (which alone are covered under

F.P.A.), should have been insured against all loss ("with particular average"), and that, in fact, the insurance effected did not insure, and was therefore not in fulfilment of the terms of the contract of sale. This view was sustained by Judge Trenholme, before whom the case was heard, after many experienced witnesses had been examined during three days, the actual amount of damage sustained to be computed and declared later. His Lordship gave his decision without leaving the bench, adding that he would not even require the evidence to be transcribed. The result of this decision is that sellers of merchandise at C.I.F. (Cost, Insurance and Freight) prices must insure according to the liability to damage of the articles thus sold. It appears that a very similar case was before the courts in France in 1884, and was similarly decided.

SIR RICHARD CARTWRIGHT'S SPEECH.

Sir Richard Cartwright, in his speech in Toronto a week ago yesterday, struck two notes which, though they have been but little played upon in the past, have set answering chords vibrating in the minds of many thinking people. His recapitulation of the story of Canada's marvellous commercial progress during the last few years, made pleasant hearing, but it is not to this part of his speech that we refer; and probably a statesman of an opposite complexion of politics could easily tell the same tale in such a manner that its heroes would be quite distinct from those eulogized by Sir Richard.

What we would rather dwell upon at this time is his treatment of the Great American Bogey. Far be it from us to apologize for some of the acts or for the general conduct of our neighbors to the south towards ourselves; for it is quite true, as Sir Richard remarked, that "they have sometimes descended to sharp practices unworthy of a great nation." But this does not excuse the attitude towards the United States of a large section of our own population, for whom no sneer at the former is sufficiently withering, no misrepresentation too wide of the mark. Self-reliance in a young nation is a good quality, but when it degenerates into perkiness and a blindness to the real proportions of things, it becomes not only undignified, but a menace to our own interests. Useless depreciation is worse than useless; it incites antagonism where friendship, or at any rate a friendly understanding should reign; and, however pleasing it may sound in some ears to hear constant predictions of the irrevocable ruin of the American people, we are face to face with a condition, not a theory—and the United States is at the present time among the most powerful and in some respects one of the greatest nations known in history. Foolish talk against the United States should be guarded against, as Sir Richard said in his speech, not because we as Canadians need grovel to them, but because they are neighbors and, being closely related to ourselves in blood, in methods, and in purpose, it is much more mutually beneficial in the long run so to act; and because, as some one else observed, there can be no greater act of enmity to the British Empire than the attempt to sow enmity between it and the United States.

Approval of this sentiment, however, does not imply approval of the methods which have apparently been adopted by British statesmen to gain the friendship of the Americans. Sir Richard gave as his chief reason for supporting Mr. Chamberlain's policy the supposition that it would cause the United States to enter into reciprocal trade arrangements. His policy would be, not to beg for favors, but to force the Americans to be friendly to prevent the practical ruin of their own trade; a very different proposition, and one, on the face of it, much more liable to meet with success than the habit of giving way to each fresh demand.

And this brings us to the other above-mentioned note struck by Sir Richard. In discussing Mr. Chamberlain's plan for making a preferential tariff league for the Empire, we wonder how many have asked themselves the question, how long would Canada be able to keep that privilege to itself? The instant that the United States and probably other countries, as well, see what an advantage such a British preference will give the colonies, they would sue for something similar; and the instant such privilege is obtained, Canada's advantage, in itself, ceases. This will be a new point of view, we imagine, to some enthusiasts. We are, nevertheless, fully aware that it creates no new argument against the adoption of Mr. Chamberlain's scheme; for if its principle of reciprocity be adopted, Canada could, least of any country, afford to be left out of the arrangement.

THE FISCAL FIGHT IN BRITAIN.

Recent cable news from Great Britain is interesting, as showing that Canada and the other colonies are taking a greater place then perhaps ever before in the regard of Old Country folk. Monday's cables show a great variety in the views of speakers before the London Chamber of Commerce; but even Lord Brassey, who avows himself a follower of Rosebery, thinks "an interchange of opinions as to the best way to help each other" is an eminently practical thing. Here is evidence of the good it has done the delegates to see Canada and to hear Canadians, as they have done this year. On the other hand the Daily News calls a commission, such as is proposed to be formed to discuss trade and tariff problems, "eccentric and anarchical," mainly, we are at liberty to infer, because such a commission would "betray distrust of the British Board of Trade." Exactly. Anything which differs from the free trade ideas of 1850, and the machinery adjusted to them, must be wrong, no matter how much conditions may have changed since. It might be premature to lay too much stress upon "the victory of Mr. Chamberlain's policy," as it is called, in Lewisham and Dulwich on Tuesday. But it is undeniable that Chamberlain's anti-free import views are taking a strong hold in various parts of the United Kingdom. Among the Canadians who have been speaking over there, Mr. Andrew Patullo, of Woodstock, Ontario, expressed to an audience at Leyton his amazement at the views of the Duke of Devonshire and other Liberal leaders re Canada. "Be-

fore the fiscal question is settled, Canada is going to be heard in these islands. When I hear British statesmen's caution against irritating Americans, I wonder how Englishmen can sing 'Rule Britannia.' The United States has humbugged England for years. The only way to fight her is to fight her as Canada has done."

ACETYLENE GAS MACHINES.

Apropos of certain recent explosions in Canada, connected with acetylene gas machines or gasoline plants, concerning which we had urged the need of municipal supervision or legal enactment, we have received a somewhat explosive letter from Mr. Frederick L. H. Sims, who represents a certain illuminating system. It is to little purpose that Mr. Sims points out, as he had already done in a letter to the World, that fires and accidents also take place where occupants use ordinary gas distilled from coal, or use gasoline, or kerosene lamps, or other forms of lighting, and that these are more numerous than fires or explosions arising through the use of acetylene. Of course they are more numerous, because ten times more of them are in use. The point is that gasoline and acetylene plants, being methods of lighting with which most people are not yet familiar, and which are shown by experience to possess features that necessitate prudence in their use, are properly subjects for regulation by law. Nothing that Mr. Sims has said in his rather hysterical letter has altered this conviction in our mind. To exclaim at the stupidity of newspapers or to call fire insurance inspectors fools and to laugh at "their dupes" is not argument. Mr. Sims may be a prodigiously clever fellow, and his machine may be a triumph of constructive art—neither of which propositions we have even attempted to deny. Our plain contention is that in the interest of the public, acetylene gas machines, or any other lighting machines, have some elements of danger attaching to them when carelessly made or carelessly looked after, or when time has worked its will upon them. Such machines, we know, *are* sometimes carelessly made and carelessly looked after. They will rust and they will wear. Therefore, we say, let them be examined and regulated by the Government, and if approved admitted for use. Perhaps Mr. Sims will pardon us for suggesting that when competent authorities in England, in Germany, and in France, have made rules regulating acetylene gas lighting machines, there may be some excuse for even Canadian fire underwriters (to whom he appears to object), desiring to have rules made which shall lessen the fire risk of such machines. But no! His letter declares that British, German or French ideas are four years behind the times in respect to acetylene lighting. Presumably, Canada has the only up-to-date machine.

To say, as he does, that "a modern carbide gas plant does away with all danger of fire or explosion except what the insurance men term the moral hazard," is a most extraordinary statement. Our readers may judge how true it is when we say that there are thirty or forty acetylene machines recognized by the underwriters, and that in addition to what explosions have occurred in Ontario there have quite lately been three in Manitoba, one at Deloraine, one at Pilot Mound, of the third we have forgotten the locality. In the Pilot Mound case a fire occurred as a consequence of the explosion, and the premises were a total loss. It may be true enough, as Mr. Sims so triumphantly alleges, that a child can work his machine. That does not cover the situation. A machine grows old and exhibits faults. Can "a child" repair it? Corrosion does the mischief, as a rule, in such cases, as a chemist tells us: therefore supervision of a competent inspector is needed. We do not print Mr. Sims' letter, with its picturesque language and its abuse of all and sundry who do not agree with him, because we do not choose to repeat in print the abusive epithets he bestows on officials who are more entitled to confidence than he.

THE SCIENCE OF FARMING.

Such an exhibition as that which took place in Guelph last week brings into strong relief the fact that successful farming is based upon principles as stringently scientific as those underlying many other industries which in popular nomenclature are allowed to keep that term to themselves. The secrets of nature upon which hangs the improvement or the deterioration of a herd of cattle, or the development of a certain shape or quality, or power of resistance for a certain purpose, are no matter for mere dabbling; they must be delved into deeply or the problem remains unsolved. It was this aspect probably that Col. Ferguson had in mind when he referred to the grey matter which had been expended by the breeders of the Dominion in forcing their live stock to the front, a position of which Canadians can rightfully boast. For the reaching of that goal, in competition against the energetic strivings of our southern neighbors, means many things; it means judgment, and unwearying attention to details, close observation of the varying effects of different diets,—the chemistry of food; an understanding of anatomy and physiology; and a practical insight into the hundred and one subtle tendencies which enter into the art of producing and reproducing points. In addition to all this is the business ability required to manage a breeding establishment on a commercial scale, to probe the best markets, in short, to make the occupation profitable.

And this phase of the subject leads us to ask the question: Is there, rightly considered, any other profession or human calling, which calls into play such a wide assortment of talents and sciences and keen intuitions as modern farming? We have already spoken of the live-stock breeder; but take the up-to-date mixed farmer, or still more the fruit-grower, and what a multiplicity of mental assets are ranged before one's view! He must be a judge of what constitutes good soil, not only intrinsically, but for the special objects he is aiming at; and to know this he must take into account its chemical constituents, its physical texture, its past uses and present vegetation; besides which its exposure and location must be care-

fully considered. He must know something as to the varieties best adapted to that particular soil in that special location, and to the market he has in view; and he must be acquainted with a dozen different ways of preparing the land for those varieties and planting them, and be able to choose correctly the best one. Then, when he has at length set his "factory" firmly upon its natural foundations, he has to do his utmost to improve upon nature and yet must conform to her teachings, all the while remembering that these teachings vary from month to month, from year to year, and must be dealt with and allowed for accordingly. And finally, after a long-continued course of applied science, in which chemistry, botany, entomology, meteorology, and toxicology all have their part, he should be a business man with a good all-round knowledge of his fellow-men, should be a judge of the best markets and should be possessed of a systematic method of keeping accounts and have besides an artistic eye for the right sort of packing and selection.

All this varied equipment of skill and experience on the part of the agriculturist is not always in evidence at the present time; but it is becoming more so every day and the time will surely come when it alone will ensure success. And the day will come, too, when many a promising young man from the country, looking now to the city for an opening for his ambition, will feel chagrined that he did not recognize the wonderful potentialities of the rural life until too late.

CANADA AND JAPAN.

The Monetary Times had the advantage last week of another interview with Mr. T. Nosse, Consul-General in Canada for the Empire of Japan. The subject apparently uppermost in this very intelligent gentleman's mind is the increase of traffic between his country and ours. Being asked how best a mutual interest can be stimulated, Mr. Nosse replied: "First by maintaining a continuous representation of Canada in Japan. It is not enough to send a commissioner every few years, for the impression made by one dies out before the advent of another. You should keep up the interest. It is like this—Suppose some of your people as Christian missionaries abroad, hold revival services among those you call heathen, and you make some converts in a certain district. Then suppose your missionaries go away 500 miles and do not come back for years—the impression they made is effaced and their converts have lapsed. But if some foreign or native teacher remain constantly, you have a chance to maintain a church.

"It is thus in commerce. You sent Mr. George Anderson, a good man, a man of good manner, with some enthusiasm: I wish he had stayed longer. You need a man who can talk and write and make himself agreeable. Then you sent Mr. Hodgson, of Ottawa, who made a good impression. Much benefit was produced by the visit of your Minister of Agriculture, Mr. Sydney Fisher, who, as a member of the Government, of course carries much weight abroad, but his pleasing personality also counted for much. In any case, your representatives do not want to imitate some English business visitors I have seen, who seem to avoid speaking to Japanese people, and who keep away even from the press.

"Your exhibit at our great Osaka Fair was of much advantage to Canada. Your building was regarded as one of "The Sights" of the Exhibition, what you showed was good and the Government is to be congratulated upon it. These fairs are to be held every five years, and Canada ought not to neglect them. If your manufacturers will keep up their efforts to get at our market, and the Government continues to send us deputies yearly, it will do much good."

At this point the Consul-General was asked whether it was essential that either our merchants or our governments should be represented by people who speak the Japanese language. "Not at all," he replied, "for every prominent native house there keeps intelligent clerks who know several languages, English of course. Your agents should study our market and get into close touch with our people. The foreign consuls do not all do this, but the agents for United States houses do it, and that is the way they are getting the trade. Uncle Sam is very attentive to us: he sends us *everything* beginning with expensive pianos and going down the list to pulpwood. He sends to Japan woolen and cotton fabrics, iron and steel wares, all sorts of machinery, furniture and desks—for Japan possesses no oak—and he would send us shoes only that our people make their own shoes. From Puget Sound there also come shiploads of American lumber.

"Now, we get lumber from you, shall we not also begin, by and by, to rely on you for pulpwood? At present we are importing pulpwood from Germany and even from Australia. I must explain to you that Japan is not treeless, although Corea, Manchuria and much of China are treeless countries. We Japanese have been practising forestry ever since Buddhism was introduced into the land. For every tree cut down we plant three new ones; our forestry laws are very strict. Of course we know your flour, the trade in which is growing: we also buy your butter, and your salmon. A trade in pickled salmon, not sockeye or cohoe, but a larger sort, has been begun at my instigation, and is doing well. I spoke of Australia just now; do you know that Australia is sending more merchandise into Japan than Canada is? You take from us half a million worth of silk and more than half a million worth of tea per annum, and some paper napkins and curios, and so on, perhaps, a million and a quarter all told, but our trade outward and inward might be much larger. What I recommend is a continuous representation of some sort by Canadians, no matter whether trade or Government officials, so long as they are intelligent."

THE UNION STOCK YARDS.

Any Toronto man who desires a pleasant walk with a pleasant surprise at the end of it, should take a Bloor and McCaul car as far north as it goes, and then walk over to the Stock Yards at the Junction. Or, if he does not want so much of a walk, let him take a Queen and Dundas car, which will land him at the C.P.R. subway, close by these stock yards, of which, and their importance, so little is known by the residents of this city.

At the time of the boom in Toronto Junction, some years ago, the site of these yards was residential property. Much of it consisted of graded and sewered streets, with brick houses and rough-cast houses built thereon. One of the enterprising and novel things that the Union Stock Yards Company did when they bought the property was to remove thirty or forty of these dwelling houses, on rollers, to distances of 100 to 300 yards, where they now receive a rent-roll of more than $14,000 per annum. They then erected cattle sheds and sheep pens to accommodate thousands of head, storehouses and office buildings—in fact, 30 acres are covered with buildings. These are arranged along the drained streets, so that every cattle-byre, every sheep-pen drains into the sewers. Every alley-way is paved with brick. The buildings are furnished with troughs along which water can be supplied to each animal. Straw and wood-shavings are plentifully used for bedding. Electric light is everywhere, and there are alley-ways between the rows of pens of animals. The soil is sand and gravel, so that the sticky, black muck, so generally characteristic of stock yards, is nowhere seen. In fact, the place is a sort of temporary paradise for stock, where 1,500 can be housed at one time.

Along the southern boundary of these great ranges of sheds, some of which are 900 feet in length, is the track of

the Canadian Pacific Railway, with loading and unloading pens and inclines. Along the northern boundary a spur of the Grand Trunk is being laid, so that the company will connect with all quarters of the province. In the large brick building near the entrance are offices of the large cattle shippers; four or five bank agencies; dining-rooms and smoking-rooms in the basement; bed rooms for such customers as may desire that accommodation; and finally, at the top of the house a hall in which to give lectures on subjects connected with cattle-raising and agriculture. The whole place is admirably arranged, with plenty of room for expansion.

When one thinks of the great future that lies before the cattle export trade of Canada, it seems that these stock yards, so well placed and designed, must grow to great dimensions. On Friday last, the first prize-offering of the directors took place. Such a splendid array of fat cattle and woolly sheep surprised every one who was there. Three prizes of $60 in all, namely, $30, $20, and $10, were given for the best group of export cattle, and another prize of $40 for the best group of butcher cattle, steers or heifers. Thirty prizes, aggregating some $300, in all were given for steers, cows, sheep and lambs. The judges were Messrs. Simpson Rennie and J. Gardhouse. An unexpected number of farmers and drovers were present from great distances. The prize winners show this, for they were from the following counties: Huron, Kent, Waterloo, Middlesex, York, Ontario, Peel, The president of the company, Mr. James D. Allan, presided at a luncheon given when the judging was over, and addressed the gathering of between 100 and 200, upon the great importance of the dead meat export trade, and the plans of the company for the future. He then called upon several gentlemen, beginning with the Mayor of Toronto Junction, Mr. Chisholm, who congratulated Mr. Hodgson, the manager, and Mr. Dods, the secretary, for their untiring work. Mr. W. F. Maclean, M.P., made a good address, emphasizing the great moment of the cattle trade. "Let us stop this foolishness of wasting by-products," he said. "We ought to slaughter our own cattle, tan the hides, turn them into leather, and the bones into fertilizers in our own land, by our own workmen." The president of the Board of Trade, Mr. John F. Ellis, confessed to surprise at the perfect arrangement of the place, as did Prof. Grisdale, of the Government Farm, Ottawa. Mr. Hubbard, of New Brunswick; Mr. Hedley and Mr. McMahon, of Toronto, Messrs. Rice and Bond, of the Junction, made brief addresses, and the very pleasing function came to a close.

A HALIFAX LETTER.

As already noted in these columns the Nova Scotia Legislature has been in session since December 3rd, having been called together thus early for the express purpose of passing legislation necessary for the separation and improvement of the conditions of the Dominion Iron & Steel, and the Dominion Coal companies. The Coal Company was given power to increase its capital and readjust its securities, and it purposes to open up additional collieries and otherwise extend the scope of its operations. The offices of the local officials of the company have been removed from Sydney to Glace Bay in the near vicinity—where the operating collieries are located. The Steel Company will now have available the capital it had formerly locked up in coal, and it is hoped the speedy completion of the finishing mills will result. Another measure of public interest passed by the Legislature permits an extension of time for the completion of the Halifax and South Western Railway. Upwards of one million dollars has already been spent upon the road, and some important sections are completed. The House decided to appoint a committee to investigate the business methods and workings in the Province of certain Upper Province loan societies. On Friday the Lt.-Governor gave his assent to twelve bills, and the House adjourned until January 17th.

These are great times for Intercolonial Railway employees. Conductors, drivers, trackmen, and some other classes have lately been granted an increase of pay, to date several months back. The cheques for the arrears have lately been received, amounting in some cases to over $200. Last week a delegation of the P.W.A. waited upon the Acting Minister of Railways, with a demand that a new schedule of wages be adopted for all railway men employed between Halifax and Sydney. The advance upon the present scale ranges from ten to twenty per cent. The delegates appear satisfied from the reception given them by Hon. W. S. Fielding, that their demand will be granted.

Mr. Alfred Dickie, of Stewiacke, may now be fairly styled the Lumber King of Nova Scotia. Eighty thousand acres of land were last week added to his holdings, by purchase of the United Lumber Company. Mr. Dickie now owns all the mills operating on the eastern shore of the Province, save one at Sheet Harbor, owned by Rhodes, Curry Co., Limited, and is by far the largest operator in Nova Scotia. His holdings aggregate about half a million acres, on all of which lumbering is being carried on. In addition, he has extensive interests at Labrador. His recent purchase was put through in a few hours, the price being in the neighborhood of $150,000.

The Maritime Winter Fair and Fat Stock Show opens at Amherst on Tuesday. Among those who will be present and deliver lectures during the week of the fair, are the Hon. John Dryden, Minister of Agriculture for Ontario; Dr. Mills, President of the Guelph Agricultural College; Mr. W. S. Sparks, of Canterbury, Eng.; Dr. Fletcher, of the Experimental Farm, Ottawa; Hon. W. S. Fielding, and the Premiers of the three Maritime Provinces.

Perley Putnam, of Onslow, leader in the search for Captain Kidd's treasures at Oak Island, is lying at death's door. Putnam spent a fortune at Oak Island in the last ten years, and when taken ill had a company organized with a capital of $15,000, to make another search. A large part of the stock was taken at Amherst and in the United States, and strange as it may appear, the stockholders were all drawn from the business classes.

Halifax, 15th December, 1903.

A FARMER'S LETTER.

Editor Monetary Times:—

Sir,—I, see an article on page 716 of your paper of December 4th, as to Forestry Associations, and meetings of the farmers of the Dominion, and about the importance of the wood land. Would it not be as well to try and get the Governments in this country to stop the sale of their timber land by the hundreds of miles to American lumbermen, and to get them to use more care in selling to our people. They talk of unlimited supply! What folly, when we have to import the greater part of all the hardwood we use and much of our large pine from the South. Enquire into the matter and find out for yourself, and you will see our timber is almost all gone. See the prices we have to pay. Call up your dealers and ask the price of good material, of any kind of lumber. Yours, a farmer.

JOHN WEDGEGOOD.

Toronto, December 9th, 1903.

THE SOO INDUSTRIES.

Perhaps at no time during the last three months of uncertainty and disaster have the present position and the future prospects of the Consolidated Company at Sault Ste. Marie, Ont., been more enveloped in darkness and uncertainty than just now, when the properties have been sold and yet nobody seems clear about whom they belong to. The sale, which has been postponed so many times, actually took place on Tuesday last, in spite of the protests made by various of the creditors, and the entire property was declared sold to the Speyer Syndicate, the holders of the mortgage, for $4,500,000. This syndicate, as is generally known, was composed mainly of Speyer & Co., and Philadelphia and New York capitalists. The mortgage was for $5,050,000, so that not sufficient was realized at the sale to satisfy it ,and the defunct company, without assets, is confronted with a judgment of over a million dollars. The re-

sult of the sale is that the properties are now in the actual possession of Speyer & Co., but as to whether this condition will last there is much difference of opinion. Representatives of the old corporation assert that the sale was not valid, and will not affect the winding-up order of the Canadian Court; but this is doubtful. The Ontario Government is interested to the amount of $250,000, which was advanced to the employees as wages at the time of the crash, but it is not expected that it will do any more than watch the course of events. The reorganization syndicate, headed by Messrs T. J. Drummond and F. H. Clergue, are understood to have secured $6,500,000 towards the underwriting of the new company, the capital coming largely from New York. Meanwhile the chief interest of Canadians is that the industries shall be enabled to resume operations, by whom, they do not so much care.

DOMINION COMMERCIAL TRAVELLERS' ASSOCIATION.

We have already noted the meeting of this body weeks ago, and the election of certain officers. Since then the annual meeting has been held, namely, at Karn Hall, Montreal, on Saturday last. The most interesting feature of the gathering was perhaps the contest between Mr. J. S. N. Dougall, manufacturer, of Montreal, and Mr. George A. Mann, of Toronto, for the presidency. It was found that Mr. Mann was no match for his opponent, who received 1,273 votes to Mr. Mann's 811. Other elections were those of Messrs. W. Beauchamp, T. S. Currie, W. J. Egan, W. B. Mathews and J. F. Dubreuil as directors. The annual report was adopted, when Mr. David Watson, representing the Mutual Benefit Association, made a plea to the parent body for assistance. The Benefit Association, he said, wanted 500 new members, and he hoped the travellers would give their support. Mr. James Robinson, the retiring president, and Mr. Dougall, the president-elect, made addresses, and after some formal motions, conveying thanks, the meeting adjourned.

MARITIME COMMERCIAL TRAVELLERS' ASSOCIATION.

At the Queen Hotel, Halifax, the twenty-first annual meeting of the Maritime Commercial Travellers' Association was held on Thursday of last week, the president, Mr. W. B. Arthur, in the chair. The report for the year was submitted. It showed that the finances of the body had increased by $2,718 during the twelve months. The total assets on hand now amount to $27,384. The membership roll for 1903 contains 571 names, an increase of 55 during the year. Three members died since the last report—James P. Wallace, a past president of the Association; Alex. Troup and George H. Richards, the two latter former directors. Their beneficiaries received mortuary benefits for $500, $960, and $800, respectively, from the Association. It was decided to add a sum not less than $1 to the membership fee, the revenue thus obtained to be used in securing for the membership a special rate in the hospitals of the province. A committee was appointed to take measures to ascertain whether a dinner should be held. If their report is favorable, it will take place on December 22nd. Officers were elected as follows:

President—W. B. Arthur (re-elected.)

Vice-presidents for Nova Scotia—L. Clyde Davidson, R. H. Neal, George E. Davidson, J. L. Hetherington.

Vice-presidents for New Brunswick—G. F. A. Anderson, R. A. March, F. S. W. Parlee, Henry Thomas.

Directors—A. Mackinlay, C. Blackie, H. E. Pyke, A. Milne Fraser, James C. Jones, J. B. Douglas.

Treasurer—William Robertson.

We hear that Mr. Herbert Simpson, who for several years past has been connected with the Manufacturers' Life Insurance Company, has assumed the management for Montreal and district of the North American Life Insurance Company. Mr. Simpson is well known and popular. He was at one time superintendent of the Grenville canal.

FINANCIAL ITEMS.

The Royal Bank of Canada has moved its Havana (Cuba), agency into new offices in that city, which are described as being very handsome and commodious. The local papers speak very highly of the pluck and ability shown by Canadians in the development of this and other Cuban enterprises.

The London and Paris Exchange, Limited, whose head office is in London, England, and who, we understand, do a general banking business in the Old Country, have opened an office in Toronto, in the Land Security Chambers, 34 Victoria St. Mr. C. G. T. Bailly, who was formerly in the head office, London, has assumed charge of the Toronto branch.

The speech of the new president of the Bank of Ottawa to his shareholders, the other day, has the right ring about it for Canadians. Here is Mr. Hay's conclusion: "As regards the outlook, while disclaiming any special prescience, I may yet be permitted, as a business man of some years' experience, to say that although the financial world may at present be partially befogged by portents of great financial importance, Canada has no cause for much concern. As all the world is now aware, we have a goodly heritage. We are from ocean to ocean, an industrious, energetic, honest, law revering and increasingly intelligent population, and with the help of a good Providence we trust to continue so. What is there to fear? I call to mind an old aphorism, met with in my boyhood in reading some such wise ancient as Marcus Aurelius. It has often recurred to me, and I venture to close my remarks by repeating it: 'Look not mournfully back into the past. It returneth not to thee. Wisely improve the present; it is thine. Go forth to meet the shadowy future without fear and with a manly heart.'"

At the last session of the Dominion Parliament, a charter was obtained by Messrs. Charles Magee, J. Roberts-Allen, C. J. Booth, Bennett Rosamond, M.P., and M. P. Davis, for the establishment of the City and County Bank, to have its head office at Ottawa, and a certain amount of progress was made in the Ottawa district towards its organization. The supporters of the bank named, attracted probably by the progress of the Crown Bank of Canada, have decided to join forces with that institution and the announcement to that effect has been formally made. As a consequence, Mr. Charles Magee, of Ottawa, is nominated as a director of the Crown Bank. Nine directors have been nominated to date, viz., Edward Gurney, president; Charles Magee, vice-president; R. Y. Ellis, Charles Adams, John L. Coffee, John C. Copp, these four of Toronto; John White, Mayor of Woodstock; John M. Gill, of Brockville, and Colonel Jeffrey H. Burland, of Montreal. Mr. Frank Arnoldi, K.C., 103 Bay St., Toronto, is secretary of the provisional board of directors, to whom all communications should be addressed.

According to Bradstreets, bank clearances in New York for the past month showed a heavy shrinkage from those of October, and were also smaller than those of November one, two or three years ago. Part of the explanation for the decrease from October is, of course, found in the smaller number of business days—23 as against 27—but reasons for the decreases shown, as compared with the month of November of recent years are found largely in the repression in stock speculation in New York, the slow movement of cereal crops to market, the consequent backwardness of collections and in the slowing down of industrial and commercial operations noted during the past month. These influences more than offset the better business noted toward the close of the month in retail trade, the increase in grain speculation at the West and the increase in speculation and large movement at high prices of cotton, which caused the clearings at the Southern cities to show the heaviest gain of any group. Clearings outside of New York show a slight gain for the month. The total clearings at ninety-two cities for the month aggregated $8,103,951,503, a decrease of 19.2 per cent. from November, a year ago, of 17.2 per cent. from November, 1901, and of 7 per cent. from November, 1900.

The failure of Blair & Co., private bankers, is referred to at some length in our St John letter last week. It resulted from investments in gold mining, which the proprietors could not afford. Such instances as this discredit private banking.

There is talk in Montreal about forming an association of bank clerks. A meeting of some sixty persons was held recently in the Merchants Bank to confer to that end, and a committee was chosen to see what could be done. We are told that the Bank Managers' Association has offered its aid in forming the new bank clerks' association. The idea is to have the new society partly a social club and partly of an educational character. Papers would probably be read and discussed at intervals.

Something rather novel has cropped up in connection with the proposal of Edmonton, Alberta, that it shall be made a city. Application is already made for a charter as a city. In the matter of taxation, the Mayor has stated that it is proposed that the land be taxed according to location, and the buildings be not assessed, as at present, as unfair to the ratepayer who improves his property, thus enhancing the value of adjoining land. He asked Premier Haultain his views of this proposal, and the Premier heartily endorsed it. The principle is worked in the school districts thereabout, and the new municipal bill embodies it.

INSURANCE MATTERS.

The North American Life Insurance Company has appointed Mr. G. H. Simpson, who was formerly with the Manufacturers' Life, as manager for Montreal and district.

We have heard of a promotion in insurance circles, which seems to be considered well deserved. Mr. C. T. Gillespie, who has been lately manager for Ontario and the Maritime Provinces of the Provident Savings Life Assurance Society of New York, with headquarters in Toronto, has been made general manager of that company for Canada. Mr. Gillespie, before coming to Toronto, managed the "Provident Savings" business in the Maritime Provinces for twelve years. He is an active man, in the prime of life, and carries with him many good wishes.

The Maryland Casualty Co., of Baltimore, which entered the Canadian field some months ago, has recently secured, we understand, a license to do a boiler inspection and insurance business all over Canada. This company has found the sprinkler leakage business less profitable than it was thought it would be, hence the change referred to. In this connection, we may say that the company is moving into new and more commodious offices, in the rejuvenated and now handsome Sun Fire Building, on Wellington St. East. They will occupy the top floor, and the offices are to be fitted up in the most modern fashion.

The Dominion Commercial Travellers' Mutual Benefit Society held their annual meeting on Saturday afternoon, in Montreal. Mr. Alexander Murphy, recently elected president, succeeding the late regretted W. T. Le Sueur, occupied the chair. The treasurer's statement showed the total receipts to be $18,783.97, and disbursements $16,021.10, there having been $1,000 each paid to the heirs of sixteen deceased members. The following are extracts from the report: "Notwithstanding the heavy death list, the year has been marked by many encouraging features. There were 150 new admissions to membership—this being the largest number in any single year during the last decade. Present membership 1,045. The society has paid each of the death claims almost at once after the presentation of the necessary proofs. This prompt attention has elicited many warm letters of appreciation from grateful beneficiaries. . . Your board, in closing, would urge—both as a matter of self-interest and mutual loyalty, that each member take it to heart—to increase our membership. This is the solution of success. The board is ambitious to add to the roll during 1904 at least an additional 500, and take the responsibility of predicting that under such circumstances six regular assessments per annum would be ample to meet all requirements. In preparing new names, see that the applicants are in sound health, of good habits, and under 45 years of age."

The Maryland Casualty Company advertise that a license has been issued to them by the Dominion Government, permitting said company to transact accident, sickness, and steam boiler insurance in Canada. J. William Mackenzie, chief agent for Canada, Wellington street east.

An extensive addition to the already large building of the Canada Life Assurance Company in Toronto, is to be made on the corner lot of King and Bay, now occupied by the Molsons Bank (the old Cawthra residence) and a part of the Robinson House lot on Bay street. The real estate has been purchased, we are told, in both cases.

The members of the Montreal Fire Department are giving fresh proof of their mechanical ingenuity. A new double hose sleigh, capable of carrying 1,000 feet of hose, has been added to the equipment of No. 5 fire station. The vehicle was made, we are told, at the department's own shops, and is a credit to the makers, and satisfactory to Captain Johnson and his men.

Who owns the business, neck and crop, without whom everything would stop and premiums take a sudden drop? —the broker. Who always kicks about the rate, wants his accounts put on the slate, and has Old Nick for running mate?—the broker. Who thinks that cutting is not crime, for tariffs doesn't care a dime, and raises Sheol all the time? —the broker.—Insurance Age.

Max Kronfeld, the insurance adjuster, who made a sensational confession to the New York District Attorney of dishonest methods employed by public insurance adjusters, was sentenced on Friday last by Recorder Goff, to serve not less than three years nor more than three years and nine months in the States prison for the presentation of a false claim to an insurance company.

Addressing a gathering of medical men upon the subject of medical examinations for life assurance, Dr. John L. Davison used the following language: ". . . The importance of careful work [in examining applicants for assurance], is even greater in another direction; I mean the protection of the companies and, through them eventually, of the public. May I make this assertion? I believe that if every examination was conducted in the best and most scientific manner possible, with the status of medical science as it to-day is, and the full information placed in the hands of the head office, life assurance would be about one-third cheaper than it now is."

ANSWERS TO ENQUIRERS.

Enquirer, Hamilton,—If you will look at the last letter of our Australian correspondent, you will see what he thinks of it. Here is an extract, in case you have not a copy at hand: "New South Wales and Victoria have to go on the market; the one to meet the necessities of its gigantic scheme of purchasing the wharves and adjoining ports of the city of Sydney, and its other public works; the other to meet obligations falling due. Both have obtained short date loans at a cost, expense included, of slightly over four per cent. for New South Wales and slightly under for Victoria. Prior to the Canadian Confederation, the securities of Old Canada ranked so much below those of New South Wales that they had to bear nearly one per cent. per annum more interest and even the Official Statistician of this Government recorded it with a cackle. Now that conditions are reversed, this table is omitted in his returns. The newspapers do too much in this line of flattering the Australian by publishing all in which he excels and hiding the failures. Perhaps this is one of the failures of John Bull and family," etc.

TRADE OPPORTUNITIES.

Canadian Government Offices, London, 4th December. —A London firm might buy or receive consignments of picture frame mouldings, pastry boards, knife boards, broom handles, clothes pegs, enamelled ware. Is there any market

in Canada for West Indian salt? An English firm of iron and steel merchants want names of good firms in Canada, who import old rails, ship plates, angle iron, etc. A London soft goods dealer asks about business connections in Canada. A municipal engineer applies for samples of different Canadian woods, in blocks 9 by 5 by 3 inches. How would a small wool-combing plant succeed in Canada, and where could it be placed to advantage? A person proposing to establish himself in Canada next year is endeavoring to obtain some British agencies in addition to those already secured.

FOR GROCERS AND PROVISION DEALERS.

A London report dated December 4th, stated that the demand for Canadian cheese had been better. A large amount of business was being done in small sales.

It is roughly estimated that at least 150,000 turkeys have been, or are being shipped to Old Country markets, in readiness for the Christmas season. This, however, is not a noticeably heavier consignment than usual at this period of the year.

We hear that the output of sugar at the Berlin, Ont., sugar factory was so large this season, amounting to between six and seven million pounds, that the resources of that city for storage were exhausted, and the aid of other places, such as Hamilton and Toronto, was called in.

Our Montreal correspondent advises us of something new in the shape of a direct shipment of dates from Bussorah to that city, via London. These goods, a 2,0000 case lot, have just reached Montreal, where they are to be sold by auction on December 21st. Up to the present time it has been customary to buy dates through New York houses. The present arrival has had the effect of reducing the price.

INDUSTRIAL ENTERPRISE.

John Ryan, of St. Boniface, Man.; H. T. Goodland, of Winnipeg, and others, are organizing a company to establish a factory in the former place to manufacture all kinds of woolen and cotton yarns, cloths, blankets, underwear, etc.

The Canada Handle Company has received a Dominion charter to engage in the manufacture of handles and other articles made of wood. Among the provisional directors are: Chillion Jones, of Brockville, and Dr. R. E. Webster, of Ottawa.

The Electro-Manganese Company, of Shawinigan Falls, Que., has started operations, the ore being brought from the Maritime Provinces. The product, known as ferro-manganese, resembles bronze in appearance, and is used in the manufacture of steel rails. Hitherto, it has been manufactured in blast furnace from ore found in conjunction with rock, but with the development of electrical reduction, a process has been perfected whereby certain bog ores, found in some parts of Canada, can be successfully treated and a high grade of ferro-manganese obtained.

Mr. Brooks, of Minneapolis, is trying to complete arrangements for his proposed power dam scheme, at Koochiching Falls, Rainy River. The intention is to build a dam across the river from the United States to the Canadian side, put in the necessary wheels and flumes, and lease at a stated price the power required up to a certain amount for manufacturing purposes on the Canadian side, the balance being reserved for the company's own use. The dam will be constructed in such a manner as to make it available for an international traffic bridge. The promoters have in contemplation the establishment of a large pulp mill, a saw mill, and woodenware industries on the United States side, while on the Canadian side a mammoth flour mill is one of the enterprises projected.

The progress of manufacturing in the West is interesting to note. For instance, we read in the Winnipeg press that recently the Manitoba Iron Works, in that city, turned out two of the largest boilers ever built west of Toronto. They were made we learn, for a Milwaukee brewing and malting company.

FOR DRY GOODS DEALERS.

Some of the Quebec shoe factories are now in partial operation, the manufacturers having decided to refer the difficulty to a board of arbitration.

Recent reports to hand from Montreal do not speak optimistically of the prospects for a successful issue to the negotiations for a union of the chief cotton manufacturing interests there.

It is said that at the next session of the British Parliament, an Imperial grant in aid of cotton growing in British West Africa will be proposed. The vast importance of having a supply of raw cotton independent of the Southern States, is becoming increasingly realized.

Following the example of all the local cotton mills, as noted last week, the Montmorenci Cotton Co. has advised the trade of an advance on all their products, which are mainly gray cottons, and cotton blankets. Most of the large Montreal manufacturers of shirts, blouses, ladies' whitewear, etc., have notified wholesale buyers that they cannot entertain any orders at old prices.

On the 14th inst., a reduction in wages averaging 10 per cent., and involving six thousand operatives was made in the cotton mills at Adams and North Adams, Mass., and Norwich, Conn. The mills reducing to-day are the last of those in southern New England, western Massachusetts and scattering towns elsewhere to adopt a lower schedule, following the lead of the Fall River mills in November, and in all about 88,000 hands have had their pay reduced.

The great bugbear of storekeepers and others these chilly months of winter is the accumulation of frost upon their show windows. A preparation has been discovered which, it is said, will prevent this. It consists of a mixture of 55 drams of glycerine dissolved in a little over a quart of 62 per cent. alcohol, containing, to improve the odor, some oil of amber. As soon as the mixture clarifies, it is rubbed over the inner surface of the glass.

The death took place last week of John Christopher Wilmerding, formerly of Wilmerding, Houget & Co., for over fifty years a dry goods auctioneer in New York. Many Canadians, who have frequented the New York market, will remember him, how quick he was, and what a memory he had. It was said of him that on meeting merchants and buyers singly he would not be able to recall their names, but when he had a crowd of bidders around him in the auction room he never failed to recognize each one instantly. Without a moment's hesitation he would roll out name after name, knocking down five cases here and ten cases there with lightning speed.

A new method of shoplifting was brought to light this week, says the Dry Goods Economist, by the arrest of one of the fraternity who was accompanied by a child of tender years. The shoplifter's plan was to covertly push an article from the counter to the floor, where it was picked up by the little one and quickly stowed away in a pocket provided for the purpose. By the way, the number of shoplifters discovered in the average big department store in New York would surprise those not "in the know," 45,000 cases having been detected in one New York store during the last six years, an average of three a day.

The principal feature of the Belfast linen market during last week was the sharp advance in the prices of Continental flax. The quiet improvement in business noted for past weeks has been rather more than maintained, though demand cannot fairly be described as active. Prices are tending towards increases. The demand for yarns has greatly improved, tows being specially in request. Rates are going up, but the prices of raw material have advanced so much and so rapidly that spinners do not care to take fresh contracts, unless at substantial increases. Continental spinners have issued very advanced quotations. All the flax offered in the home markets was quickly bought up at good prices. Brown cloth has been in good, regular demand. Power-loom linens for bleaching are selling steadily at full rates. The demand for cloth for dyeing and hollands has considerably improved. Unions are in better request, and

dress goods are still selling well. Damasks and household linen keep somewhat dull. The handkerchief trade is improving. Bleached and finished linens are selling moderately on home account at hardening values.—Draper's Record.

The Dry Goods Economist, referring to what it observes in New York, remarks as follows: "Never in the history of the world has there been a time when it was so easy for the average woman to be well dressed, and never, it would seem, have the average women been able to spend so much money upon their clothes. They pile it on. At every public gathering, whether it be the theatre, the restaurant or only the public promenade at the shopping hour, there are to be seen women arrayed in furs and velvets which, a few short years ago, would have been only obtainable by the millionaires. The same tendency to call for really good goods is at work in Canada.

—It is estimated by the Manitoba Department of Agriculture that the total production of all grains in that province during the year 1903 was 82,576,519 bushels. As compared with the year previous, 1902, this season's crop shows a falling off in the total production of 17,475,824 bushels, by far the larger portion of which is made up by wheat and flax. The total yield of each cereal is stated as follows: Wheat, 40,116,878; oats, 33,035,774; barley, 8,707,252; flax, 564,440; rye, 49,900; peas, 34,154. Total, 82,576,519.

—The article in our issue of November 27th, upon "Boiler Inspection," seems to have been read under a misapprehension, so far as the United Factories are concerned. It was very far from our intention to suggest that this company had been negligent in the care taken of their boilers; or that they had not complied with the law in the fullest sense. The boiler which exploded had been regularly looked after and examined, and, as it happened, had been inspected only a few weeks before the disaster, and been pronounced safe by an expert. It is worthy of note, too, that the enquiry, held after the accident, brought out the fact that, so far as human knowledge could go, it was impossible to discover any reason for an explosion.

—An increase of between six and seven per cent. is shown in eleven months of this year, as compared with same period last year, in shipments of coal from the Cape Breton collieries. The total for this year was 3,253,448 tons, and for last year, 3,041,986 tons. The Dominion Coal Company's shipments were 2,603,391 tons, as compared with 7,704,360 tons for the corresponding period in 1902, a slight decrease. The Nova Scotia Steel and Coal Company, for these eleven months in 1903 shipped 429,989 tons, as compared with 237,929 tons for 1902, an increase of 192,060 tons. The Port Hood Coal Company shows an increase in its shipment for this period of 34,715 tons, the amount being 70,540 tons, compared with 35,825 tons for the previous year. The Inverness Railway and Coal Company shipped for eleven months 149,528 tons, an increase of 85,656 tons over 1902, when the shipments were 63,872 tons.

By an order-in-council of the Dominion Government, the following clause has been added to the enactment concerning the surtax on goods from Germany: "Such surtax shall also apply to any article imported into Canada when the chief value of the article was produced in Germany, although it may have been improved or advanced in value by the labor of another country; notwithstanding the provisions of the British preferential tariff and regulations thereunder. In determining whether or not any article imported into Canada, which has been produced, improved or advanced in value by the labor of any country other than Germany, is subject to the surtax by reason of a portion of the value thereof having been produced in Germany, the fair market value of the article or material grown or produced or manufactured in Germany, which has entered into the manufacture of the article imported into Canada, shall be held to be the value produced in Germany, within the meaning of the tariff act respecting the surtax."

—The power-plant of the St. Louis Exposition will, it is said, include a 3,000 horse-power gas engine from Belgium, the largest gas engine in service. The World's Fair power-plant will embrace more than 40,000 horse-power, "but by far the most interesting feature of this power-plant to Americans," says The Scientific American, "must be the gas engine display."

—Mr. P. B. Ball, this country's commercial agent in Birmingham, England, writes to the Canadian Manufacturers' Association pointing out that British colliery owners at the present time import each year something like 2,000,000 tons of pit props from various parts of the continent of Europe, and urges the possibilities of this trade for Canadian lumbermen. The same officer has made arrangements for sending to this country some 200-pound samples of Welsh coal. They will be brought across the ocean free by the Canadian Pacific steamers. Toronto manufacturers are manifesting considerable interest in the question, as to how this coal will be found to compare in steam qualities, etc., with the American and Cape Breton articles.

—Some days ago it was stated in a letter written by Phillips Thompson, a socialist, an employee of the Dominion Government, and an apparent sympathizer with the attempts of labor leaders to manage the labor market to suit themselves, by fair means or foul, that a thousand men, laborers and artisans, were, upon a certain day this month, walking the streets of Toronto, unable to get employment, and that many of them were destitute. We pronounce the statement untrue, and an injury to Canada, which cannot be too widely contradicted. National society managers tell us that there is far less destitution at this time in Toronto than at similar times of former years. And the kind of persons who profess to be unable to find work are those who will not take work offered them, but insist on getting the especial sort of "velvet" employment that suits them. This reckless statement of a flighty man has, we are told, been contradicted by cable.

—At the annual meeting of the tanners' section of the Toronto Board of Trade, held this week, the following officers were elected:—Chairman, J. C. Breithaupt, Berlin; vice-chairman, R. M. Beal, Lindsay; executive committee W. D. Beardmore, George C. H. Long, A. R. Clarke, F. T. Daville, G. P. Beal; Inspection and Arbitration Committee, C. J. Miller, L. J. Breithaupt, W. D. Beardmore, S. R. Wickett and George McQuay; Transportation Committee, L. J. Breithaupt, C. G. Marlatt, S. R. Wickett, W. D. Beardmore, Geo. C. H. Long and R. M. Beal. The retiring chairman, Mr. Daville, made a few remarks in which he stated that the commercial situation during the year had been good, though, in the matter of profits, the high prices paid for hides and skins, and the uncertainty of the labor supply had prevented the tanners from being especially benefited, in spite of the fact that their plants had been run to their full capacity, and the demand for leather had been active.

CLEARING HOUSE FIGURES.

The following are the figures for Canadian Clearing House for the week ended with Thursday, December 18th, 1903, compared with those of the previous week:

Cities	Dec. 17th, 1903.	Dec. 10th, 1903.
Montreal	21,318,868	21,822,222
Toronto	15,864,281	17,875,802
Winnipeg	6,024,337	6,919,676
Halifax	1,862,352	2,133,973
Hamilton	1,234,121	1,213,503
St. John	909,414	1,073,950

The Enormous sale of

OLD CHUM

Cut Plug

Smoking Tobacco

Proves its Superior Quality.

Sold by all leading wholesale houses.

TRINIDAD PRICES CURRENT.

From a circular giving an account of trade conditions in Port of Spain as they existed early this month we extract the following: Large assortments of breadstuffs recently came to hand. All grades of flour were moving more freely, though prices had not appreciably improved except in the case of one or two certain brands. Bakers' grades were quoted at $6.25 to $6.50. Recent landings of Canadian flours had been light, and for one shipment of 200 barrels a slight advance was being asked. Cornmeal was in over supply and neglected. Pork and lard continued to move downwards. Beef was plentiful, but in limited demand. Butter receipts were light, and values, which were at time of writing $12, should shortly improve. Cheese and ham are likely to be in improved demand later on this month. Split peas were in good demand at $5.20 to $5.30 per barrel. Oats were easier at $2.40, and for imported corn there was a restricted demand at $1.60. With regard to fishstuffs, several cases of Newfoundland cure were sold at $28 for export, at which high price consumption is naturally restricted. Split herrings were quoted at $4.25, and smoked in boxes at 10c. Not much pitch pine had arrived so far this month, but several ships are expected in port before long. A small lot of Nova Scotia white pine sold at $24.50, and handy-sized lots of this and spruce were well competed for. Potatoes were in over supply at $1.10 and $1.25. Onions were held at $3.50 in small lots, and stocks were being gradually reduced.

—Whatever financial heresy Mr. W. J. Bryan, of Kansas, may have talked while in England, his remarks in a speech at Thanksgiving time, perfervid as they are could not but have pleased his hearers Mr. Bryan, we are told, spoke eloquently of the natural resources and advantages of the United States, for which the people must return thanks to God, and of the ideals of liberty and progress, for which they must thank their English progenitors. He urged the necessity of the present generation bequeathing to posterity some gift commensurate with the blessings they had received from their ancestors, and suggested that they bequeath the ideal of international amity, of which The Hague arbitration tribunal was a lasting monument. "Hail to the nation," concluded Mr. Bryan, "whatever her name, who leads the world towards this higher ideal for the lasting good of all humanity."

—A United States journal learns that South Sharon, Pa., is to be made "the greatest tin plate producing centre in the world." When the plans of the American Tin Plate Company are carried out, the plant at that point will consist of seventy pot mills giving employment to nearly 6,000 hands. The present plant consists of twenty mills; fifty more are to be added. The Muskegon Tin Plate mill, at Muskegon, Mich., consisting of eight pot mills, is to be abandoned and moved to Sharon. Part of the machinery has already arrived. It is also stated that the Falcon mill of the tin plate combine, at Niles, Ohio, is to be brought there.

WINNIPEG customs returns show that the duties collected during November amounted to $183,861, as compared with $126,184 for the same month of last year.

MONTREAL MARKETS.

Montreal, 16th Dec., 1903.

Ashes.—The extreme paucity of receipts keeps the prices of potash up, though the demand is really limited, and dealers are still quoting around $5.90 for firsts; seconds, about $5.50. In pearls there has not been a transaction for some weeks.

Cements and Firebricks.—Business in imported cements is now practically at a standstill. Some little demand is reported for firebricks for seasonable repair work. We quote: Belgian cement, $1.80 to $2.05; English, $2.15 to $2.25; German, $2.15 to $2.35. Firebricks, $18 to $24 per M.

Metals and Hardware.—With the wholesale hardware houses stocktaking is now absorbing the main attention, but in heavy metals there is quite a good demand for this season of the year, more particularly for sheets, plates, plumbers' supplies, etc. Pig iron is dull, as foundrymen will be shortly shutting down for the annual repairs. Local stocks are reported light, there being only some moderate supply of Summerlee, which is quoted at $22 for No. 1 and $21 for No.

THE CANADIAN CASUALTY AND BOILER INSURANCE COMPANY

Full Government Deposit Paid.

President:
ALEXANDER SUTHERLAND, D.D., Toronto.
Vice-Presidents:
H. N. BATE, Ottawa, Director Bank of Ottawa.
W. S. DINNICK, Toronto, Vice-Pres. and Mng.-Dir. Standard Loan Co.
A. G. C. DINNICK, - Managing Director.

This Company having deposited $30,000 with the Treasury of the Ontario Government, has been duly licensed to transact the following classes of Insurance

Boiler Inspection — Personal Accident Insurance
Boiler Insurance — Sprinkler Insurance
Consulting Engineers — Elevator Insurance

The patronage of the public is respectfully requested. Correspondence with Insurance Agents and those wishing to engage in the business is invited, and will receive prompt and courteous consideration.

Chief Engineer, - - - A. M. WICKENS.
Superintendent of Agencies, - J. G. BEAM.

HEAD OFFICES:
N. E. Cor. Adelaide and Victoria Sts., TORONTO, - Ont.

BRANCH OFFICES:
Temple Building, - - MONTREAL, Que
43½ King Street W., - - HAMILTON, Ont.

2. It is expected that quotations will shortly be announced for the product of the Londonderry furnace, the blowing in of which has been delayed from time to time. Bars rule easy at $1.85. The American Sheet Steel Trust are reported to be pushing actively for Canadian business; already some fair-sized orders have been booked for tinplates at a special export price, and it is said that company are also preparing to manufacture Canada plates for this market.

Dairy Products.—A very fair local consumptive demand exists for butter, but offerings are pretty free, and there is an easy tone to quotations. Fresh-made creameries quote at about 19½ to 21½c.; good dairy rolls bring 17 to 18c. Cheese rules quiet, with only a limited business doing in medium-priced kinds. There were shipments last week, via Portland and St. John, of 27,141 boxes of cheese and 818 packages of butter.

Dry Goods.—Travellers are getting home to the city for the holidays, and

the wholesale warehouses are comparatively quiet, though some little shipping of spring prints and other staple lines is being done. City retailers continue to report good trade. Following the example of all the local cotton mills, as noted last week, the Montmorenci Cotton has advised the trade of an advance on all their product, mainly grey cottons and cotton blankets. Most of the large local manufacturers of shirts, blouses, ladies' whitewear, etc., have notified wholesale buyers that they cannot entertain any orders at old prices. European advices indicate great firmness in all lines except, perhaps, silks, which are if anything a little easier.

Furs.—Now that snow roads are general through the interior, receipts are showing some increase, but are said not to be up to the usual average, as the high wages lumbermen are paying have attracted a good many trappers to the lumbering shanties. The law now in force making a close season for muskrats both in Quebec and Ontario also affects receipts. We quote prices here for prime skins as follows: Beaver, $5 to $6.50 for large; medium ditto, $4 to $4.75; No. 1 choice bear, $15 for large, $10 for medium, and $6 for small; badger, 30 to 50c.; fisher, No. 1, dark, $5 to $6; ditto, brown, $4 to $5; pale ditto, $3 to $4; red fox, $2.25 to $4; cross fox, $5 to $10 for No. 1, as to color; wolverine, $2.50 to $5; lynx, $4 to $8 for No. 1; marten, $2 to $3 for Ontario and Quebec skins; fine B.C. and Northwest pelts bring higher prices; mink, $2 to $4 for No. 1; fall rats, 8 to 17c.; winter ditto, 15 to 20c.; otter, $8 to $12; fine Labradors and Northeastern would bring $12 to $20; coon, $1.50 to $2.50 for No. 1 black, and from $1 to $1.75 for No. 1 dark; prime skunk, $1.50 for No. 1, all black; short stripe, $1.10; long stripe, 60c.; and broad stripe, 20c.

Groceries.—There is very little in the way of news to report. As the holidays draw near the volume of trade shows some falling off, but payments are well sustained. The sugar market has undergone no recent change, nor is it expected that there will be any revision of prices during the next few weeks. Refiners' quotations are $4.05 for standard granulated, and from $3.25 to $3.80 for yellows, in barrels; bags, 5c. less. Importers of teas report comparatively little demand at present, but say that markets at all primary points are steady to firm. Canned corn keeps advancing, and as high as $1.10 is being asked in a jobbing way for standard brands. A direct shipment of 2,000 cases of dates from Bussorah, via London, has just reached here, and will be sold by auction next Monday. This is the first direct importation ever brought to Canada, all supplies having hitherto been bought through New York houses, and the effect of this shipment has been to already reduce the New York quotation ¼c. per lb. It is probable that this experiment will lead to further business of the kind.

Hides.—The hide market is fairly steady at the decline of half a cent. noted last week, though receipts are large and

The Manufacturers Life Succeeds.

The Manufacturers Life has succeeded in putting on the market one of the best insurance policies ever issued by any company.

It is remarkable for the guarantees it contains.

Drop a post-card, giving your age next birthday, to the Head Office, Toronto, and get a copy of the pamphlet regarding their "Guaranteed Investment Plan."

JAMES H. MILNES & COMPANY,

Head Office, 86 King St. E. | TORONTO. | Docks, Foot of Yonge St.

J. J. W. Deuchar, F.F.A., F.I.A., General Manager and Actuary of the Norwich Union Life Assurance Company, speaking of investments says:

"It may serve to indicate the great importance of obtaining a good return on the investments, if it is realized that one per cent. of increased interest on the funds of a company will, on the average, have as great an effect as a saving in expenditure equal to 10 per cent. on the premium income, while, if an office could count on realizing 5 per cent. interest in place of 3, it might reduce its premiums some 30 per cent., or double its bonuses."

Mr. Deuchar does not name THE GREAT-WEST LIFE; but the above statement exactly describes the happy position of its policy-holders.

Managers and Underwriters

stocks in store continue to show accumulation. We quote dealers as paying 8½c. per lb. for No. 1 beef hides, Nos. 2 and 3 each a cent less respectively; calfskins, 10c. per lb. for No. 1, and 8c. for No. 2; lambskins, 75c. each.

Oils, Paints and Glass.—Travellers have all come home, and there is little now doing in these lines. The linseed oil market continues low and unsettled. There is very little seal oil here, and practically no strictly pale steam refined. Cod oil is also very scarce. We quote: Single barrels, raw linseed oil, 47 to 48c.; boiled, 50 to 51c., net 30 days, or 3 per cent. for four months' terms. Turpentine, 83½c., single barrels. Olive oil, machinery, 90c. to $1; cod oil, 35 to 40c. per gal.; steam refined seal, 50 to 55c. per gal.; tinged and brown ditto, down to 35c.; castor oil, 8 cents, for machinery; pharmaceutical ditto, 8½ to 9c.; lead (chemi-

It Leads Them All.

As applied to the gain in net amount of life insurance in force in Canada for the FIVE YEARS ending December 31st, 1902.

Head Office - WATERLOO, ONT.

The Mutual Life OF CANADA

has once more established its right to the above claim. It stands to-day

At the Head Of All

life companies doing business in Canada in the NET AMOUNT IN FORCE GAINED OVER all its competitors during the past five years, as shown by the Government Reports.

cally pure and first-class brands), $4.50 to $4.60; No. 1, $4.25 to $4.35; No. 2, $4 to $4.50; No. 3, $3.80 to $3.90; No. 4, $3.60 to $3.75; dry white lead, 4¼ to 4½c. for pure; No. 1 ditto, 4 to 4¼c.; genuine red ditto, 4 to 4¼c.; No. 1 red lead, 4c., putty in bulk, bbls., $1.80; bladder putty in barrels, $1.90; ditto, in kegs or tins, $2.65; London washed whiting, 45c.; Paris white, 75 cents; Venetian boxes, $2.40; 23-lb. tins, $2.55; 12½-lb. red, $1.50 to $1.75; yellow ochre, $1.25 to $1.50; spruce ochre, $1.75 to $2; Paris green, 14c. in bulk, and 15c. in 1-lb. packages; window glass, per 100 ft., $3.25 for first break; $3.45 for second break, and $4.20 for third break; per 50 feet, $1.70 for first break, and $1.80 for second break.

TORONTO MARKETS.

Toronto, Dec. 17, 1903.

Chemicals, Drugs, etc.—No appreciable change has taken place in the condition of the market since last report. Prices are steady, and an average fair trade is going on. New York advices say that there is the usual seasonable dullness in business there. There is no demand for opium in anything except small jobbing lots, though firmer reports are to hand from Turkey. Quinine is moving very slowly, though the statistical position keeps bark firm. Menthol is unsettled. Oil of peppermint has better prospects.

Dry Goods.—No complaint is heard among the wholesale dry goods houses as to lack of business. The recent heavy advances in cotton staples seem to have stimulated purchasers, who are now imbued with the assurance that future changes will be still upward. Dress goods are in continued good demand. Articles which are of a handy nature for presentation purposes are in great request, such as handkerchiefs, umbrellas, small lace articles, and a dozen other lines suitable for Christmas. Heavy underwear, blankets and similar articles needed in cold weather are being sold in large volume, the winter spell having greatly stimulated the demand.

Flour and Grain.—Ontario wheat remains unchanged, while Manitoba is 2c. lower. Oats, peas, rye and corn are without change. Buckwheat is from 1 to 2c. higher. Receipts for the most part are light. The English wheat market is described as of a holiday character. Flour is steady, with no special feature presenting itself. The price asked for ninety per cent. patents is $3.05 in buyers' bags, middle freights. The position of bran and shorts is unchanged. Oatmeal is firm.

Fruits and Vegetables.—Greater activity prevails in the market now, owing to the close approach of the Christmas holidays. Prices for oranges seem a little lower than normal. Apples locally are from $1 to $2.25 per barrel, and they fetch, that is those of really good quality, very fair prices in Old Country markets, though the almost unprecedented shortage of barrels is hampering the trade considerably. Quotations follow: Cocoanuts, $4 per sack; oranges, Floridas, $3 to $4 per case, $2.75 to $3 per box; Jamaica, $5 per case for 200's, $3 to $3.50 for 360's; California, $4 to $6; Valencia, $3 to $4; bananas, 8's, $1.25 to $1.50 per bunch; 1st, $2 to $2.50; sweet potatoes, $3 to $3.50 per barrel; celery, 20c. to 40c. per dozen; cranberries, $9.50 to $10 per barrel, $1.25 per basket; Spanish onions, $2.75 to $3 per large case, and $1 for small; Malaga grapes, $5 to $6 per barrel.

Groceries.—Wholesalers say that orders are coming in satisfactorily from practically all parts of the country. The approach of the holidays is exercising a stimulating effect on the demand for dried fruits, nuts, etc., and travellers have sent in large sorting orders. Sugars are moving freely, though the aggregate trade is probably not large. Canned fruits and vegetables keep very steady under a moderately active demand. Teas continue firm, but no great business is being done.

Live Stock.—Brisker conditions prevailed at the cattle market this week, and there was an active Christmas demand. For good exporters the bidding was keen, and the same may be said of good butchers' cattle. Trade was quiet in feeders and stockers. Sheep and lambs sold for 10c. per cwt. higher under a very brisk demand. Hogs went up 25c. per cwt.

Provisions.—Poor grading as to quality is responsible for a good deal of depreciation in butter values. For choice dairy rolls prices are firm. Eggs keep their high value. Poultry are somewhat scarce, and fetch good prices. Chickens are quoted at 7½ to 8c. per lb.; geese, 8 to 9c.; turkeys, 13 to 15c.; ducks, at 8 to 9c. Hops (new crop) are very firm. A keener demand is being experienced for hog products, and stocks are light.

The Metropolitan Life INSURANCE CO. OF NEW YORK.

"The Leading Industrial Company of America."

Is represented in all the principal cities of the United States and Canada

THE METROPOLITAN is one of the oldest Life Insurance Companies in the United States. Has been doing business for over thirty-five years.

THE METROPOLITAN has Assets of over 89 Millions of Dollars Liabilities of 78 Millions, and a Surplus of over 10 Millions.

THE METROPOLITAN pays Death Claims, averaging one for every minute and a half of each business day of eight hours, and has nearly Seven Million Policy-holders.

THE METROPOLITAN offers remunerative employment to any honest, capable, industrious man, who is willing to begin at he bottom and acquire a knowledge of the details of the business. He can by diligent study and practical experience demonstrate his capacity and establish his claim to the highest position in the field in the gift of the Company. It is within his certain reach. The opportunities for merited advancement are unlimited. All needed explanations will be furnished upon application to the Company's Superintendents in any of the principal cities.

Continued Progress

During the last few years the North American has made marvellous strides in all Departments tending to its upbuilding, which can readily be seen by the following figures, showing a comparison of

Three SEPTENNIAL Periods

Year	Cash Income	Assets	Policies in force
1881	$ 89,615	$ 88,763	$ 1,221,712
1888	263,891	666,419	7,927,564
1895	581,478	2,300,118	15,779,885
1902	1,270,840	5,020,813	30,927,961

A strong progressive Canadian Company giving excellent returns to its policy-holders, therefore making it a desirable Company for agents to represent. Three active agents wanted.

R. G. DUN & CO.
Toronto, Montreal, Hamilton, London and Cities in Dominion, U.S. and Europe.

—A Yorkshire socialist, who was explaining to a friend the principles of socialism, remarked that all possessions should be shared equally. "If you had two horses," said the friend, "would you give me one?" "Of course," replied the socialist. "And if you had two cows would you do the same?" "Of course I should." "Well, supposing, now," said the friend, slowly, "you had two pigs, would you give me one of them?" "Eh! That's gettin' ower near home," said the other shyly; "tha' knows I've got twa pigs."

PICKFORD & BLACK,
HALIFAX.
R. M. Melville Toronto.

Mercantile Summary

"You should strive to appeal to the imagination and the human interest of your pupils," said the principal. "I do," answered the teacher, "but it is very hard to convince the boys that Hector and Achilles were as great men as Corbett and Jeffries."—Washington Star.

Another company, apparently closely connected with the above, judging from the list of its provisional directors as given in the Gazette, is the Freehold Realty Company, Toronto, which has a capital of $250,000. It will carry on a real estate and mortgage business.

Placentia Water Works.—Contractor Ellis arrived in town from Placentia last night, where he had been overseeing the job at the water works. The work is now being rushed to completion, and over 100 men are employed. It is hoped to have the town fully supplied in less than three weeks.

The Dominion Peat Products, Limited, held their annual meeting in Ottawa on the 15th inst., and elected officers as follows: Dr. D. Spencer, president; Edwin Tolton, M.P., vice-president; George C. Holland, secretary; Harold K. Pinhey, treasurer; C. F. Gray, superintendent of works, and Mr. J. Keith as auditor. The company which are building a factory at Newington, have already distributed samples of their product in various parts of Canada.

The D.I.S. Company have completely closed down for the season. The Nova Scotia Steel Company have seventy men working at present, but after New Year expect to have about 250 men employed. They are now building a new air compressor and crusher, which mean the employment of a number of men. All the work this winter will be done under ground. One of the tunnels is said to be the finest in the world of its kind. Another, some distance, will be connected with the principal one. Ten drifts are now being opened, and six horses will be utilized this year working under ground. —St. John Telegram, 3rd Dec.

As long ago as 1877, Mr. Dan. J. Lynch began business as a general merchant, at Hagersville. About January, 1898, he became financially embarrassed and settled with his creditors at 50 cents on the dollar. His liabilities amounted to $19,000. Shortly afterward he was appointed Indian agent and the store business was taken over by his wife. She now assigns, with liabilities of about $12,000. A meeting of creditors has been called for the 16th inst.

Z. Regimbal opened a general store at Azilda, near Sudbury, in 1901, having formerly been a farmer. He had no previous business experience. At the time of starting, he was worth about $4,000 or $5,000. He recently obtained an extension of time but was unable to meet the payments on same, and the Montreal creditors have placed a man in charge with a view to disposing of the assets.

GEO. A. STIMSON & CO.,

24-26 King Street West, TORONTO, Ont.

The Canadian Consolidated Oil Company, Limited, of Hamilton, capital $1,000,000, has been incorporated under Ontario laws, with power to carry on an oil business, and also operate mines, construct power works, etc., etc. Among the provisional directors are E. R. Clarkson, and T. Ramsay, of Hamilton.

Mercantile Summary.

The Cleland block, a three-story building in Winnipeg, was partially destroyed by fire last week, at a loss of over $13,000, fully covered by insurance.

It is believed that the Nova Scotia Steel Company contemplates the purchase of some valuable iron deposits in Cuba. The Cuban ore is already used to some extent by the company to mix with that from Newfoundland, as its addition does a great deal to improve the quality of the product.

Mr. R. J. Tretheway, representing the Vancouver Petroleum Syndicate, is carrying on extensive boring operations for oil in the neighborhood of Pincher Creek, Alta. Progress has been slow owing to the hardness of the rock, but indications are said to be good for the presence of oil in large quantities. One well is down nearly 1,300 feet.

The Northern Consolidated Holding Company, Limited, Toronto, has been incorporated under an Ontario charter, with an authorized capital of $8,000,000. The company will buy, sell, and hold bonds, debentures, and other securities, engage in the financing of, and act as agent or manager of other companies. The provisional directors are five employees of the law firm of Blake, Lash and Cassells.

The Christmas section of the Montreal Gazette contains a poem by John Reade, entitled A Legend of Saint John the Apostle. The last stanza runs:—

"And is the story true? Most true.
St. John has never ceased to say:
Love one another, all of you,
On Christmas Day and every day."

It has also a story by John Knight, entitled The Widow's Son, the scene of which is Spruce Cove, Nova Scotia.

The Dominion Government have issued a statement to the effect that the Grand Trunk Railway Company have deposited one million pounds of their guaranteed stock as security for the carrying out of the agreement entered into last session between the Government and the Grand Trunk Pacific, subject to ratification of their shareholders to a general meeting. These stocks are unquestionably good security, but we suppose that legislation will need to be passed to authorize their acceptance.

From the honorary local secretary of the Canadian section of the Society of Chemical Industry, Mr. Alf. Burton, we received notice of the second meeting of the session 1903-4 held in Montreal in the Lecture Theatre of the Macdonald Chemistry and Mining Building, on Tuesday, December 22nd, Dr. G. P. Girdwood delivered an address on "Chemical Education." All interested in chemistry and in the application of research towards furthering the development of the country's industries are invited to attend these meetings. The chairman of the Section is Prof. W. R. Lang, of Toronto University.

Mercantile Summary.

MR. J. F. RUTTAN, real estate dealer at Port Arthur, has the thoughtfulness to send us a pen wiper and calendar in red, blue and yellow cloth.

SYDNEY, N.S.W., December 18th.—The official estimate of the wheat yield of New South Wales is 28,570,000 bushels, an increase of 12,500,000 bushels compared with the record of the year 1901. About 18,500,000 bushels are available for export.

THE new year calendar for 1904 of the Imperial Bank of Canada takes the form of a condensed statement of the bank's position, its officers and agencies. Its first page bears the Imperial crown, the Canadian beaver, and the maple leaf, in vivid colors on an olive ground, with Christmas good wishes as a motto.

WE had occasion to notice, a few weeks ago, an ingenious machine for counting and wrapping in packets silver and copper coins, which merits the attention of banks, loan companies, street railways and other concerns. This machine can be seen in operation at room 451, King Edward Hotel, Toronto.

WORD comes from Halifax, under date, Saturday last, of the discovery of immense deposits of gold, silver and copper ores at Cheticamp, Cape Breton, which is confirmed by the Provincial Mines Department. One of the beds of ore is over three hundred feet wide, and continues for a mile. Dr. Gilpin, head of the department, expresses the opinion that from present indications the ledge of ore is among the largest in the world.

WILL advertisers never learn to come at the proper time in the week to have their ads changed? It will take all the influence of all the clergy in town, and there are quite a large number in proportion to the population, to counteract the line of profanity into which compositors turn on being pestered with ads-to-be-changed when about going to press. If this week's Spectator gets to our subscribers late, punish the advertisers by reading their advertisements and buying their goods.—Annapolis, N.S. Spectator.

IT is stated by the Stratford News that what is claimed to be the first solid cement bridge of its kind in Ontario was that erected in August last, about a mile east of Tavistock, over a small creek on the boundary of Perth and Oxford counties. It has a span of thirty feet, with absolutely no support underneath between the abutments at each end, and yet the thickness of the floor is only fourteen inches. Seven days after this bridge was built it allowed the passage over it of a twenty-ton load without a tremor. The abutments at each end are 3½ feet thick at the base and 2½ feet at the top. Like the rest of the bridge, they are of solid cement. A railing about three feet high is also of solid cement. The bridge cost $635.

INVESTMENT and LOAN COMPANY.

HALF-YEARLY DIVIDEND.

Notice is hereby given that a dividend of three per cent. (3 p. c.) on the permanent preference stock of this company has been declared for the half-year ending December 31st, 1903, and that a dividend of three per cent. (3 p. c.) upon the ordinary permanent stock of the Company has been declared for the half-year ending December 31st, 1903, and that the same will be payable on and after Saturday, the second day of January next.

The Transfer Books of the Company will be closed from the 15th to the 31st December, inclusive.

By order of the Board.

(Signed). A. J. JACKSON.
General Manager.

Dated Toronto, 1st December, 1903.

TENDERS FOR

Vancouver Debentures.

Sealed tenders will be received by the undersigned up to Saturday, Dec. 26th, 1903, at noon, for the purchase of Debentures, to the amount of $99,000.00, bearing interest at the rate of 3½% per annum, payable half-yearly; and $50,000.00, bearing interest at the rate of 4% per annum, payable half-yearly. The whole of these Debentures extend over a period of forty years. Interest and principal are payable at the City Treasurer's office. The Corporation reserves the right to reject any or all Tenders.

THOS. F. McGUIGAN,
City Clerk.

Vancouver, Dec. 3rd, 1903.

Mercantile Summary.

SEVERAL suits have recently appeared against Marchand & Co., dealers in lumber and grain, at Pont de Maskinonge, Que., and they have now filed consent to assign. Mr. Marchand was previously unsuccessful as a grist miller.

A DEMAND of assignment has been made upon J. A. Gayette, who keeps hotel at Iberville, Que. He only began in the spring of this year.——Mrs. Joseph Plante, in the millinery line at Sorel, Que., is seeking to make a settlement with her creditors at 50 cents.

J. BELLEISLE and his brother, of St. Stanislas de Champlain, Que., were both farmers. They began storekeeping in the spring of 1902, under the style of Belleisle & frere, without any business knowledge, and with the usual results in such cases, their assignment being now reported.

MR. N. M. CANTIN is at the head of a number of capitalists who propose to build an electric railway between Stratford and St. Joseph's, on Lake Huron. They are submitting to the Stratford council a proposition to build the road for a fifty-year franchise, reserving to the city the right to buy the road in twenty-five years. Exemption from taxation for a certain period is also asked. The route proposed will touch at Zurich. Hensall, Chiselhurst, Cromarty, Staffa, Fullerton Corners, Carlingford, and Avonton.

AN expert examination has been made of the anthracite coal bed recently discovered near the National Park at Banff. It is stated that the depth reached was 600 feet, where a solid seam of the best anthracite was found. The seam ran about ten miles northerly, and varied in thickness from 6 to 10 feet. Analysis shows the coal to contain from 75 to 80 per cent. of carbon. The Canadian Facific Railway people are making preparations for developing the deposits and have already let contracts for a spur to the pit mouth, also for extensive sidings, coal chutes and sheds.

ON the 14th inst., the town of Bathurst, N.B., was visited by a destructive fire, which, breaking out in Meahan's general store, destroyed eight or ten buildings before it could be extinguished. The opera house was saved after strenuous exertions, and this fact probably prevented the town from being altogether destroyed. The premises which suffered most severely were those of Miss Meahan, McKenna Bros'. livery stable, McLean's dry goods, Kent's general store, Doul Bros'. bakery, Pitre's and Gunning's harness shop, and the Great Northwest telegraph office. The loss is estimated at $20,000, with insurance of about half. On the same day a fire took place in a building in St. John, N.B., owned by Mrs. Alexander, and occupied by W. O. Dunham, A. J. Lordly & Son, J. A. Tufts & Sons, and W. Cameron. The total loss is placed at $15,000, mostly insured.

J. E. ROBERTS, - - GEN.-MGR.

Position Wanted

By an A1 Experienced Business Manager, age 31 years. Of exceptional executive ability and talent, having held high positions of trust, such as general manager large manufacturing firm, head accountant, financier and correspondent of large wholesale firm, etc., etc. Is a capable, expert accountant of strictly up-to-date methods, understanding thoroughly factory costing. Would prefer taking full charge of branch office or general managership of large manufacturing concern. Can furnish excellent references and will accept moderate salary to commence, but must have scope to prove executive power and ability. Address,

"W. M. C.,"

Monetary Times, Toronto, Ont.

B. NERON, engaged in storekeeping and lumbering at Metabetchouan, on the lower St. Lawrence, whose failure we lately noted, is offering his creditors 50 cents on liabilities of $29,000.

AN assignment has been made by A. W. Atkinson & Co., of Advocate Harbor, N.S., general dealers and lobster packers. They were recently reported as offering 50 cents on liabilities of about $12,000.

A GENERAL store concern in Martinville, Que., John Duffee & Co., have assigned. Duffee is a harness maker by trade, and carried on that line of business for some years at Moe's River, where he is reported to have compromised more than once. He moved to Martinville in 1894, where he subsequently went into general business under the cover of his wife's name, and getting credit, as too many such people do.

A. D. VIAU, of Montreal, who began in a dry goods store last fall, and who has just assigned, has had another unfavorable business record. He was formerly in the men's furnishing business, and was burned out in the spring of '98. The fire was investigated by the commissioners, and it is said creditors then received little. He was subsequently interested in a similar business carried on as A. & D. Viau, which came to an unfavorable termination in the spring of 1901.

J. E. BIGELOW, the proprietor of the business carried on at Truro, N.S., under the style of Bigelow & Hood, as manufacturers of aerated waters, met his creditors in Montreal some days ago, and made an offer of 50 cents on the dollar. Liabilities are estimated at $28,000. He is also the principal owner of the soda water business carried on at Halifax, under the style of Bigelow & Co., Limited, which concern is also said to be involved.

THE Canada Atlantic Railway during the past season brought into the port of Montreal 10,500,000 bushels of grain, which is an increase of 2,000,000 bushels. This line now has good facilities for handling grain. It has a thousand 70-ton cars capable of handling 1,165 bushels each. In addition there are 500 cars of 1,000 bushel capacity. The low grades that exist over the entire line enable an engine to haul 27 of the big cars on the western section, and from 30 to 35 cars from the middle section right through to Coteau.

WORLD'S COAL PRODUCTION.

According to an estimate made by Mr. D. T. Phillips, United States consul in Cardiff, the following is a comparison of the coal outputs of the five main producing countries of the world in the years 1902-3. United Kingdom, 227,095,000 tons, an increase of 8,048,000; United States, 268,688,000 tons, an increase of 6,814,000 tons; Germany, 107,436,000 tons, a decrease of 1,103,000; France, 29,574,000 tons, a decrease of 2,060,000; Belgium, 22,769,000 tons, an increase of 556,000. The total known production of the world, it is stated, is now about 700,000,000 tons. Figures showing the number of employees in the coal industries in the five principal coal-producing countries are given as follows: United Kingdom, 787,700; United States, 458,554; Germany, 448,000; France, 159,957; Belgium, 134,092. The following figures are given to show the consumption of coal in 1902 in the countries named: United States, 265,105,000 tons; United Kingdom, 166,698,000 tons; Germany, 99,325,000 tons; France, 42,195,000.

—According to a correspondent of the New York Tribune, His Majesty King Edward, is taking an active part in securing the revival of the tobacco industry in Ireland. During the reign of Charles II., the growing of tobacco in England and Ireland was forbidden by law. In England the prohibition has always been maintained, although eighty years ago tobacco growing was permitted in Ireland, and for two decades its cultivation was successfully carried on. In 1830, when distress was great in Ireland, the only county that did not suffer was Wexford, where the cultivation of tobacco was an established industry. Finally, in Queen Victoria's reign, the English Government forbade the further growth of the plant, giving fiscal reasons and the difficulty of collecting the revenue. Through the influence and the initiative of King Edward, all restrictions are now about to be removed, and tobacco growing may once more become a flourishing industry in the Emerald Isle.

GRAIN STANDARDS.

A few days ago there was a meeting of the grain section of the Toronto Board of Trade, at which a strong resolution was carried, respecting the making of grain standards for the Province of Ontario. The making of grain standards for the guidance of Government inspectors in the grading of grain grown in Ontario has been performed annually for over thirty years. By the amendment to the Inspection Act made last session, no more standards will be set in future for the grading of grain in Ontario. The farmers of Ontario grew this year over 199,902,000 bushels, having a value of $76,000,000, all of which is subject to Government inspection. Without any standard of samples set the grading of this vast quantity of grain will be left to the individual opinion of a few Government inspectors scattered over Ontario without any standard to

guide them, unless by themselves, and subject only to appeal to the chief inspector located in the port of Montreal, from whose decision there is no appeal. The section held that in the interests of all concerned the standards should be set annually as heretofore.

The Dominion Millers' Association have also passed a resolution urging the Government to immediately fix the flour standards. In the past the flour standards have been fixed in October, and the delay has seriously incommoded those engaged in the export of flour, and also the Ontario mills shipping flour to Quebec and the Maritime Provinces.

WEST INDIAN TRADE.

Advices from British Guiana speak of the favor in which Mr. Chamberlain's preferential scheme is looked upon in that colony. An agent of the Canadian Manufacturers' Association, in a recent letter, said that reciprocity having now been arranged between the United States and Cuba, it would mean the loss of former as a market to the British colonies. This, he says, has thrown a gloom over the whole colony, and the planters must look for markets elsewhere, or shut down. Canada may in time take all our sugar, but we must have a price that will pay not less than $2 per 100 lbs. A Demerara paper, speaking of reciprocity, says: "If the oft-threatened happens and the American market is closed, the ships that bring the West Indian staple to Canada and the United Kingdom will not return empty. In this manner the Washington authorities may discover when too late that they have sacrificed a valuable market largely through their own selfishness." Mr. George Henderson, president of the Nova Scotia branch of the Canadian Manufacturers' Association, who has just returned from British Guiana, says: "The present time is opportune for introduction of Canadian products on a larger scale, in view of the preference given by the Dominion to Great Britain and her other colonies. A closer reunion and wider commercial relations are what we earnestly desire. Take, for instance, our importation of sugar. During the first six months of this year we purchased from British Guiana 40,000 tons of sugar, as against about 800 tons the whole of the previous year."

—It has been calculated by the Dry Goods Economist, that the cost of doing business in New York, which seems to be increasing all the time, has now reached in the average departmental store of that city, something like 28 per cent. of the gross receipts. Our contemporary adds that in the competition for business this ratio is likely to become higher rather than to diminish. In this country, what with distant delivery systems, better accommodation for customers, and so forth, the expenses of retail store-keeping must be largely increasing also, though probably to no such marked extent as has been foreshadowed above.

PLANET WHIST TRAYS

"If you play whist use our trays that are enclosed in neat boxes at the following prices:

No. 16	containing 16 Trays	$5.00.

Reduced Cost of Production

is the goal all are striving for.

One of our Band Mill customers in comparing the **Band** with the **Gang** said:

"It's quality, not quantity, I'm after. I have stood over my men this year and insisted on quality. In selling my cut I arranged for an advance of 25c. per M for every 1% advance in quantity of the cutup and better grades By the use of the Band I have secured 8% advance, which means $15,000 extra profit this season."

Several gangs have been discarded for the Pony Band double cutting, adding much to quality while only slightly reducing quantity. Many hundred single and double cutting bands running in Canada. Simple—easily managed—it's worthy of investigation.

WATEROUS - BRANTFORD - CANADA

For Catalogue of Canada's Greatest School of Business and Shorthand Training. D. McLachlan & Co. Canada Business College, Chatham, Ont.

360 Bookkeepers and Stenographers supplied to some of the Best Business Houses in Canada and the United States during the past year. **None but the Competent recommended.** Do YOU need such help? If so, write us. Perhaps you may have a son or daughter needing our training. If so, write for Catalogue B. Address,

D. McLACHLAN & CO., CHATHAM, Ont.

WINTER TERM

Opens January 4th in all Departments of the

Central Business College

TORONTO.

The finest catalogue issued will be sent to you on request if you are interested in practical education. - Business firms supplied with competent office trained help Free of Charge.

A CHRISTMAS RESUME.

Another Christmas arrives to find Canada enjoying a period of prosperity almost unexampled. Elsewhere we have dealt with facts and figures indicating this increase. The day of Canada certainly appears to have come at last. Never before has this country, regarded either as a component part of the British Empire or as an individual entity, been the centre of so much respectful regard from the world at large.

At home, too, her people are possessed of a new spirit. Compare the Canada even of eight or ten years ago with the Canada of to-day. It is a comparison of the spirit of sober apathy with the spirit of buoyant hope and cheerfulness; and not only this, but instead of being as it were the centre of a stagnant pool, casting longing eyes occasionally to a more swiftly flowing current near by, we realize that we are even now on the up-whirl of the wave which is predestined to take us on to fame and fortune.

Our people are contented. Manufacturers have been busy as never before. Western farmers, while not quite able to catch up to the record yields of last year, have yet received better prices. Traders and merchants have been hard put to it to keep up with the increasing demands of their enthusiastic circles of customers. Belief in the present and hope for the future have been a large ingredient of the very atmosphere which Canadians have breathed, and such an admixture of that mental ozone has caused all their ideas, not merely those pertaining purely to material needs, but those having for their object the ultimate well-being of the race, to expand most graciously. Results will show themselves in due course; with regard to the latter, perhaps in fuller measure than now we fancy.

True, there is another side to the tale of progress and unsurpassed prosperity. The accursed spirit of speculation in stocks has spread amongst our people, and many are the cases of baffled hope, of heart-breaking loss, of even ruin and hardly-averted disgrace, which have resulted from it. And, across the line there have been of late ominous signs of coming depression, which sooner or later we ourselves can hardly hope altogether to weather. But Canada, from present prospects, should have gained sufficient momentum to carry her safely through at least another year. At any rate, at this time of writing, let us make up our minds not to worry until Christmas 1903, has become a part of history.

FINANCIAL REVIEW.

Canadian Bank Statement.

LIABILITIES.

	Nov. 1903	Oct. 1903.
Capital authorized	$97,046,666	$97,046,666

The financial statement just received and published in the Canada Gazette extends only up to the 30th of November; consequently, though so near the end of the year, a full comparison cannot be made between this year and the last. But a comparison can be made in respect of two important items, which are almost certain to be the same in December as they were in November. There has probably never been a year in which such important additions to capital and rest have been made by Canadian banks as have been during the present year. The capital of the banks as a whole has been increased from $71,900,000 to $78,300,000. The total rest has increased from $42,600,000 to $50,300,000. We quote the latter for a purpose. It is well known to be of great importance when additions are being made to capital to avoid a diminution of the ratio between the capital and the rest. It is always a temptation to a bank when increasing its capital to put out the additional stock at as large a premium as possible. In view of this the Banking Act prohibits the premium being greater than the ratio that the rest bears to the capital at the time of issue. This is a wholesome provision. But, on the other hand, it is important that the premium shall not be less than the ratio that rest bears to capital; for then the proportion would be undesirably lessened. Yet this is what some stockholders in the Bank of Montreal desired to have done when the proposal to increase its capital by two millions was put before them. The good sense of the meeting, however, under the guidance of the president rejected this proposal. It is certain that this care to preserve a right proportion has been generally observed, for the ratio of rest to capital is greater now than it was a year ago. The proportion of rest to capital in November, 1902, was 59 per cent. The proportion at present is 64 per cent. It is evident, therefore, that the large increase of capital has been more than equalled by the corresponding increase in the rest. This is quite satisfactory to the public, who are so much interested in the stability of the banks.

We are so near the end of the year that we can indulge in a vein of congratulation upon the continued wave of prosperity that is in our midst, and of which the bank returns are giving such unmistakable signs. When we look at such figures as those of the present return, say of deposits, which are now $441,000,000, with a $100,000,000 more in savings banks and loan companies, we may well feel almost astonished that such figures have become possible. Bank deposits have increased $28,000,000 since November, 1902, and circulation has increased also $3,000,000; and this, as we pointed out last month, in spite of the fact that the money value of the North-West crop is certainly no more than it was last year. But we may expect, unless some drawbacks intervene, a very much larger production next year than there has been this. The immense influx of settlers into the western districts of the northern country must undoubtedly by next year have begun to tell upon the total amount of the harvest. The enormous areas of land that have been taken up have been taken up almost wholly for settlement and cultivation. And we know very well that crops begin to reward the labor of the husbandman there within two years at the most of his taking up land. It would not be at all surprising that the newcomers should add to our total production ten or fifteen million bushels of grain at least next year; that is, under average conditions. If there is an unfavorable season, this large additional mass of cultivation will help to bring up the total of the North-West harvest to normal figures.

Looking back over the year it must be evident that the prosperity of the country is genuine, and not the result of an inflated boom. It is not very difficult to distinguish between a prosperity that arises from genuine conditions and that which is the mere result of speculation and inflation. Genuine prosperity is always based on genuine production of the time. A boom is based on nothing but hopes and expectations of what will be at some future time. Every boom that has afflicted the country has been distinguished by this feature of fanciful hopes and expectations based on nothing or next to nothing; and every collapse has simply been the result of bringing matters down to the solid realities of the present. But it is the solid realities of the present that our year's prosperity has been built on (of course, with exceptions in the stock market, etc.); and if the commercial and financial community continue to conduct their business in view of present actualities from time to time, there is no reason to fear a revulsion, though undoubtedly there may be a change.

ABSTRACT OF BANK RETURNS.

OPENING FOR PLOWS IN FRANCE.

A correspondent of Commercial Intelligence, stationed in Paris, France, writes very interestingly of the state of agriculture in France, and incidentally suggests the fine field presented by that country for the importation of agricultural implements. As is known to many people in this country, the land in France does not belong as a rule to great proprietors, but is cut up into an astonishingly large number of small farms, each owned by a peasant proprietor and his family. There are no less than 6,653,000 "exploitations," as they are

called, of not more than thirty acres each. It might be supposed under such conditions that the manufacture of agricultural implements would be a flourishing industry. This is not the case, however, for last year not only were there imported 50,000 large agricultural machines, such as mowers, drills and reapers, valued at about 20,000,000 francs, but it is stated that the small farmers have little use for any implement except the plow, and that even this has not been brought to a stage of anything like perfection, may be gathered from some remarks by a French agricultural expert.

"The implement indispensable to every cultivator is the plow," declared M. Plissonnier, "but the types are so varied that there exist nearly as many models as we have communes in France, that is to say, nearly 36,000 and on account of the infinite number of varieties of plows, the small manufacturers in France produce but a few implements, and these at a very high price." The same gentleman goes on to say that in France the plow is sold at about one franc the kilogramme (10d. for 2 lbs. in weight), whilst the same kind of implement, better made and more serviceable, costs far less in England, Germany, and America. Add to this, that our poor cultivators pay for the numerous spare pieces two or three times dearer than in those countries, and it will be seen that hundreds of millions of francs are lost without profit to anyone.

A good, cheap, serviceable plow is, therefore, wanted in France—a plow that can be sold at the rate of less than 20 cents for 2 lbs. weight. We would like to see the trade between France and the Dominion of Canada show a rapid increase, and, perhaps, here is an instance in which this end can be achieved. But to do this, as M. Plissonnier remarks with reference to British manufacturers, the article which we want to sell has to be shown and tested and worked with. The French peasant will never buy from a catalogue. What is needed is a course of practical, working experiments in the field.

BOILER INSPECTION.

We have had handed to us for perusal the report of the secretary of the English Board of Trade upon the working of "The Boiler Explosions Acts, 1882 and 1890," for the fiscal year of 1902, and a summary of this report may well follow our remarks in former issues of this paper upon these enactments, and as illustrative of the scope of the enquiries.

During twelve months sixty-eight cases of explosions were enquired into. The number of lives lost during that period was thirty, and the number of persons injured fifty-five. The majority of explosions were caused by deterioration or corrosion, defective design, defective workmanship, construction or material, undue working pressure, defective safety valves or mountings, improper management by owners, ignorance or neglect of attendants, and other causes. In nearly one-third of the cases dealt with the failures occurred in steam pipes and boiler mountings.

In seventeen cases the enquiries were followed by formal investigations. In every case but one the causes of the explosions were clearly ascertained, and in no case was an explosion attributable to unavoidable accident. In the one case referred to, which related to the bursting of a tube in the water tube boiler, the court found that the explosion was caused by overheating, and, though they were of opinion that the overheating was probably caused by grease, they were, in the face of expert evidence to the contrary, unable to find that that was the actual cause.

In seven cases there was no proper periodical examination by competent persons, and the owners were found to blame for their neglect, and had to pay part of the costs of the investigation. In six of the seven cases the boilers were purchased second-hand, and worked without any proper examination by a competent person with a view to determine the pressure at which they could safely be worked.

In four cases persons who had been employed to examine the boilers were found to have neglected to make proper examination, and in two cases the examiners were incompetent. In each case the examiner had to bear part of the costs of the investigation.

In one case the court found that the explosion was due to the neglect of the bricklayer who set the boiler up in brickwork without using firebrick tiles with fireclay between them and the boiler. In two cases the boiler-makers were found to blame for neglect of their employees, and in another case a boiler-maker was blamed for giving unsound advice. In only two cases were owners found to blame for negligence on the part of their servants.

In nine instances the owners were ordered to pay costs running from £10 to £75. In two cases the vendors, second-hand boiler dealers, had to pay £2 and £50. In one case a bricklayer had to pay £2. In each case the investigations were most thorough. The care and attention bestowed on the boilers, both by owners and attendants, as well as the history of the boilers, were minutely enquired into. In one case the history of the boiler went back twenty-nine years.

In subsequent issues of this paper we propose to deal with individual enquiries and investigations under the English Acts which will show even more clearly than the above how extensive is their operation. The same causes of explosion which exist in England undoubtedly exist in this country, and in proportion to the number of boilers used there and here, the loss of life is probably greater in Canada. Surely, then, it is incumbent upon steam users and those connected with the working of boiler plants to unite in calling to the attention of the Legislatures of our different Provinces the necessity of passing an enactment which will give the greatest protection against loss of life from boiler explosions.

COMPLAINTS ABOUT THE THREAD COMBINE.

The practical combine which was formed in Great Britain when the amalgamation took place of the J. & P. Coats, the Clark and the Kerr sewing thread companies is often given as a standing example of the fact that it is not only in highly protected countries that a trust can be powerful and have baneful effects; indeed, this is often placed on a par with the Standard Oil and United States Steel trusts. Every now and then the irritation caused by its workings in this country comes to a head, general complaint is in order, and dire threats are made to remove the cause. What galls many wholesalers and jobbers is the way in which they are tied up

in the matter of dealing with one of the most necessary articles of trade. That which the combine orders, that jobbers have to do. They have to debar themselves from dealing in any thread but that made by the combine upon pain of losing a fairly substantial discount at the end of each six months. They are not allowed to buy even from the combine itself more than enough to last for their hand-to-mouth requirements, a big order for speculative purposes being strictly tabooed. Indeed, we have heard of cases where an order for, say, five hundred gross of spools has been cut down, before being executed, to less than half of that quantity. Then the combine sells to the retail trade just as advantageously as it does to the wholesalers. Finally, at the prices it sees fit to charge there is no profit in the business to any one; that is, except to the members of the combine themselves, who lately, we are told, have been reaping dividends at the rate of 40 per cent. This is the substance of the argument from the Canadian dry goods merchants' point of view.

A Toronto newspaper, waxing wroth over these things, speaks in favor of the establishment of a Canadian sewing cotton industry, and, in order to enable such to have its birth and grow lustily, calls for Government interference in the shape of an increased duty.

From what we gather among the trade, however, we judge that such an industry would stand but a feeble chance of ever outgrowing the period of infancy. Some people ask why legislation cannot be used to restrict the all-powerfulness of such a combination as now certainly does exist. But the question occurs: How? We are aware that Parliament has a certain power to offset the action of illegal trusts in commodities by taking off the duty on such commodities. But such action would hardly help in this instance because, duty or no duty, there is no competition in sight from other countries. The manufacture of thread is carried on in the United States, but practically even there is in the hands of the Britishers. Some small quantities come in from Belgium and Germany, but even in these cases the consumer plays into the hands of the combine, for he (or more usually *she*)has used Coats', or Clark's, or Kerr's for years, and has a prejudice against other untried makes.

The other alternative, that of raising the Canadian tariff so as to admit of sewing thread being manufactured in this country, presents to the eyes of people capable of judging, an equally hopeless prospect. If the promoter of such an undertaking were in possession of millions of dollars capital and could afford to "buck up," as the phrase is, against a concern which not only does not believe in opposition, but has an ancient high-class reputation behind it, there might be some chance. But what would prevent the combine from establishing a rival factory here in Canada (it already has a winding establishment in Montreal, at which the hanks of yarn made in Great Britain are placed on the spools), and, with all its wealth and prestige and experience behind it, using all a trust's tactics to render the domestic concern's position untenable. Experience shows, too, that it is managed by remarkably clever men, who know well how to keep within the letter of the law. Another consideration which may be urged against the adoption of a high tariff is the fact that sewing cotton may be looked upon in some measure as raw material, any enhancement in the cost of which would act detrimentally to the interests of several classes of manufacturers.

As to the question of prices, it is true that they have been raised within a comparatively recent period from $3.50 to $5.40 per gross of spools, but we believe that before the amalgamation was effected they were almost as high as they are now. It should be remembered also that the cost of raw cotton is almost prohibitive, and might almost warrant the charging of even higher prices than exist to-day. Another point which may be touched upon is this: we think it a fact that the combine has not exercised the privileges of its monopoly very hardly upon this country individually. That is to say, the prices charged here are by no means high compared with what they are in Great Britain. It is claimed, indeed, that at certain periods the cost price of sewing cotton in Canada has been actually less than it was at the same time in England, plus freight, duty, and necessary charges.

These considerations, we are aware, do not remove the root of our merchants' trouble, nor give much encouragement toward the building up of a home industry. Frankly, however, admit though we may the actuality of the burden complained of, we do not discover any very promising course for its mitigation in sight. In some places, in Britain itself, we understand, some restrictions have been imposed at the instance of retailers upon the unhindered working of the designs of the combine; we are open to suggestion as to any that can be placed here.

THE LUMBER TRADE.

Lumbermen report very little change in the situation since last report. Prices for pine are steady to firm, a tendency which is likely to show some increase owing to the reported comparatively light cut in various parts of Ontario. As to hard woods, no actual advance has been made, so far as we are aware during the past month or so, but the feeling is and has long been in favor of still higher prices than those prevailing.

Speaking of the Liverpool, England, market, the Timber Trades Journal of a recent date made the following remarks: "The pine season is over, and it finds us with light stocks, upon which we must congratulate the happy holders. Buyers up the country, who have not yet realized what we have already pointed out in these columns, will feel themselves left. They have not realized the fact that the Canadian pine production does not depend upon this country alone, as many of them seem to believe. They have never realized the enormous wants, not of the Dominion alone, which are ever growing, but the demand from the United States, who are huge buyers of pine deals, etc. The prices of the present day may appear unduly high to the old-fashioned buyer, but he has not awakened to the changed condition, and the sooner he is aroused the better it will be for him." Referring to spruce, the same paper says that the market keeps upon a level bottom without any particular sway to either side. During the week ending 12th December, four steamers discharged timber at Manchester, the import being about 4,000 loads. One of these was the "Manchester City," from Montreal and Quebec, which discharged about 500 standards, the principal parcels including 130 standards Quebec spruce, mainly 2½ by 7, 50 standards 1st, 2nd, and 3rd quality pine deals and ends, 30 standards 11 by 3 3rd pine deals, about 50 standards 2nd and 3rd pine deals, and parcels of pine sidings. The "Manchester Importer" discharged about 600 standards in all, including pine and spruce sidings and deals.

The following particulars are taken from Farnworth & Jardine's (Liverpool), wood circular, dated 1st December.

1903: The arrivals from Canada during the past month were 10,893 tons' register, against 11,734 tons' register during the corresponding month last year, and the aggregate tonnage to this date from all places during the years 1901, 1902, and 1903, has been 436,804, 453,344, and 464,464 tons, respectively. There has been a quiet trade during the past month. The arrivals show a considerable falling off, and the import season drawing to a close, but the deliveries have been disappointing, and stocks generally are ample. There is little change in values to report. New Brunswick and Nova Scotia Spruce and Pine Deals.—The arrivals during the past month have been considerably in excess of the corresponding month last year, viz.: 5,660 standards, against 2,320 standards in 1902; the deliveries have been rather disappointing, but prices are fairly steady; stocks here and in Manchester are quite ample. There is no improvement in the demand for pine deals to report. Of birch logs, the import has been small, there has been a fair consumption, and stocks are moderate; prices are firm. Planks have arrived more freely, the deliveries have been fair, and although stocks are in a moderate compass there is little improvement to report in values, which remain low. The importation of United States staves during the past month has again been on a moderate scale. There have been no arrivals of British Columbian and Oregon pine; the deliveries have been fairly satisfactory, but stocks are heavy. As to prices, birch planks were early this month quoted at from £6 10s. to £6 15s. per standard, ex-quay. Spruce deals fetched, St. John, £7 12s. 6d. to £7 15s. per standard c.o.f., according to specification; lower ports from £7 10s. to £7 12s. 6d. per standard.

OUR SAINT JOHN LETTER.

Announcement is made to-day that Russell Sage, Levi P. Morton, and the other New York capitalists who own the New Brunswick Southern Railway, running eighty miles along the Bay of Fundy shore from St. John west to St. Stephen, intend to put it in first-class condition for through business. Mr. Matthew Neilson, C.E., late manager of the St. John Street Railway Company, has been ordered to make a report at once on the work necessary to fit the road out. The proposed move is said to be in consequence of the acquisition by the Maine Central Railway of the Washington Counties line, which runs from Calais to a point on the Maine Central. By the construction of a bridge across the St. Croix river, the two lines can be connected at St. Stephen and Calais, and a new rail route from St. John to Portland and Boston secured, shorter by some fifty miles than that at present operated by the Canadian Pacific, Maine Central and Boston and Maine Railroads. The managers of the New Brunswick Southern and the Maine Central are said to have agreed on this connection, and it is further stated that instead of running to West St. John that a branch will be built so as to swing the line into Fairville, whence it can come into St. John proper over the tracks of the St. John Bridge and Railway Extension Company, now used by the C.P.R., and all three railroads to the city will use same station, that of the Intercolonial. The changes, if carried into effect, and Col. H. H. McLean, president of the company, says they have been determined on, will prove a great convenience. The New Brunswick Southern runs through a good country, and if put into proper shape and well operated should develop a splendid trade. Some of the finest fishing and hunting resorts in New Brunswick are along this line, and there are also sea beaches that cannot be excelled anywhere along the Atlantic coast.

The folly of merchants not insuring is shown to-day in the announcement of the failure of Mrs. E. McLean, of Bathurst. She carried on a successful general store there, but was one of those wiped out in last week's fire. Without insurance, she finds it impossible to meet her liabilities, and is offering to compromise at 20 cents on the dollar.

Miners are being imported into New Brunswick from Belgium to work at the Minto mine, in Queen's County. S.S. "Lake Champlain," which arrived on Saturday, brought fourteen, and others have come by different boats. The coal found in this mine is of a fine quality, and the operations are being slowly but steadily extended.

Messrs. T. McAvity & Sons, hardware merchants and brass founders, have purchased the J. A. Whelpley skate factory, at Greenwich, King's County, together with the stock on hand. This concern got into financial difficulties. The Messrs. McAvity have not yet made any announcement of their plans with reference to the factory, but it is likely that they will operate it or will bring the machinery to St. John and manufacture here. The stock of skates, which was purchased at a low figure, will enable them to place skates on the Maritime market at low prices.

The Bank of British North America building, in this city, is now in the hands of carpenters and builders, who have torn out the old-fashioned fittings and have made the interior into a modern bank office. An addition in the rear gives a new room for the manager, and his former quarters have been thrown into the clerks' rooms, giving much more space for the previously crowded staff. New furniture has been put in by the Canadian Office and School Furniture Company, of Preston, Ontario, and the bank quarters, when all improvements are completed, will compare favorably with any in the city.

St. John merchants report that they are doing a splendid Christmas business, better, perhaps, than in any previous year. It would have been better still had not the heavy rains of a few days ago taken away all the snow, making it almost impossible for country men to get to town.

The City of St. John to-day accepted and paid for a new and modern fire alarm service, which has been just installed by the Gamewell Company, of Boston. The new system cost about $8,000, and is thoroughly up-to-date.

The Young Men's Christian Association has commissioned G. Ernest Fairweather, a local architect, to prepare plans for the new $60,000 building, which the Association is to build next summer, and Mr. Fairweather is going to the United States to inspect some of the most modern Association buildings, so as to determine how St. John can get the best for its money.

Saint John, N.B., 21st Dec., 1903. * * *

THE UNITED STATES' TRADE WITH JAPAN.

By Walter J. Ballard.

Says Mr. Walter J. Ballard, of Schenectady, N.Y., in an article which we find in "Japan and America," a monthly published by Hajima Hoshi, 203 Broadway, New York:

We are better customers of Japan than Japan is of us. For the past three years the commerce between the United States and the "Chrysanthemum Empire" is represented by the following figures:

U.S. SALES TO JAPAN.

1901	$19,000,640
1902	21,485,883
1903	20,924,862

U.S. PURCHASES FROM JAPAN.

1901	$29,229,543
1902	37,552,778
1903	44,142,652

These totals prove that while our sales have remained practically stationary for three years, our purchases show an aggregate increase of $23,000,000 in 1902 and 1903, fiscal years over 1901. In the past five years we have bought more of the products of Japan than any other country, and more than all Europe; yet Great Britain and British India each sell more to Japan than do we. We have some encouragement, however, in the fact that our sales increased 13 per cent. last year, as compared with 1901, while those from most European countries fell off.

In the fiscal year just closed our chief sales were:

Books, maps, engravings, etc	$60,217
Wheat flour	2,247,190

(Increase over 1902 of $667,317.)

Cycles and parts of	447,677
(Increase over 1902 of $176,947.)	
Cars, passenger and freight	134,052
(Increase over 1902 of $176,947.)	
Clocks and watches	148,641
Raw cotton	7,434,718
(Decrease from 1902 of $623,572.)	
Cotton cloths	23,685
Electrical appliances (not machinery)	263,940
Builders' hardware	138,444
Electrical machinery	428,427
(Increase over 1902 of $298,650.)	
Sewing machines	42,998
Locomotives, thirty-two in number	275,062
(Increase over 1902 of 18 for $145,690.)	
Typewriting machines	16,003
Sole leather	220,571
Naval stores	27,732
Refined mineral oils	3,472,708
(Decrease from 1902 of $1,910,722.)	
Paper, and manufactures of	339,721
Paraffin and paraffin wax	471,393
Butter	69,782
Cheese	8,939
Tobacco, unmanufactured	413,337
Cigars and cigarettes	116,454
(Increase over 1902 of $115,518.)	
Lumber	33,524
Furniture	27,306

The decrease of nearly $2,000,000 in refined oils raises the fear that Russian oil is supplanting ours in the Japanese market. As all but $926 of the $116,454 item for cigars and cigarettes is increase, it is evident that our makes have found favor. The sale of 32 instead of 14 locomotives is encouraging, but we ought not to have fallen off $1,623,572 in raw cotton, in view of the fact that our total export of that staple to all countries was $316,000,000, an increase of $26,000,000 over 1902. The increase of nearly $1,000,000 in wheat flour is particularly encouraging, especially to our Northwest and Pacific coast interests. Japan does not figure in our export of meat products.

[It is noticeable that the large items in Japan's purchases from the States are wheat flour, mineral oil, and raw cotton. But the above list confirms what Mr. Nosse told us in the interview in last week's issue.—Ed. M. T.]

Our chief purchases from Japan were:

Books, etc.,	$19,666
Coal	37,992
Cotton cloths	56,139
Other cotton manufactures	86,401
China and porcelain ware	519,392
Raw silk	24,618,212
(Increase over 1902 of $3,916,111.)	
Silk manufactures	3,961,379
(Decrease from 1902 of $758,471.)	
Tea	6,160,687
(Increase over 1902 of $1,976,914.)	

The increase of $3,916,111 in raw silk bought by us from Japan, together with the decrease of $758,471 in manufactured silks, shows what our protective policy is doing for our silk factories. The $2,000,000 increase in tea evidences the growing American fondness for the cups that cheer but not inebriate.

We lead all other countries in our sales to Japan of electrical appliances and electrical machinery; fire engines and pumps, flour, sole leather, kerosene oil, lubricating oil, paraffin wax, cardboard, leaf tobacco, timber, other than oak, bicycles and tricycles, and electric-light wire. In 1903 we took the lead, for the first time, in steam boilers, engines, and telephones, but we are losing ground in paper, spinning and weaving machinery, watches, iron nails, wire and small rod iron, telegraph wire, steel, other than mild steel, and glazed or fancy paper.

There are some articles which Japan imports largely, and which we ought to compete more strongly in selling. These are lifting machines, drilling and boring machines, turning lathes, machine tools, rails and fittings, iron pipes, tubes, belting, and hose for machinery, railway freight and passenger cars, and condensed milk.

Canada's sales to Japan at present are only 1 per cent. of the value of ours, but the fine showing made by Canada at the Osaka Exhibition (which we so lamentably neglected), may do us greater damage later on. Canada's chief export is flour. So far the United States has been furnishing about 96 per cent. of Japan's flour importations. As Mr. James J. Hill recently and appropriately said, it is only the want of American ships which prevents our entire surplus wheat crop being shipped to and sold in the Orient, mainly in the form of flour. Will Congress please note that point? The winners, in the order named, in our last year's sales to Japan, were raw cotton, kerosene oil, and wheat flour.

THE TORONTO CLEARING HOUSE.

The Toronto Clearing House occupies the first floor in the handsome new building of the Bank of British North America, and was formally opened on the 9th inst., in the presence of several bank managers, other financiers, and some members of the press. The "House" is admirably fitted up with receiving and delivery wickets and counters, arranged in horse-shoe shape, for the officials, and in a central position is the manager's dais, occupied by Mr. G. W. Yarker. Light, space, quiet and solidity are the marked features of the very fine room.

There are nineteen banks in Toronto, with twenty-nine branches, making in all nearly fifty offices in the city, and as an evidence of the work and importance of the Clearing House, as well as a striking illustration of how thoroughly commercial business is served in this city, it may be stated that the paid-up capital and reserve of the nineteen banks is nearly $110,000,000; and this immense sum does not include deposits and circulation. Of course, the capital and reserve mentioned is not all limited to Toronto, yet there are eight head offices of banks in the city.

As a fair illustration of the utility and saving of time through the working of the Clearing House, it is only necessary to say that the nineteen banks can exchange all their parcels in this room with each other in about the same time that it would take, for instance, two officials of the Molsons Bank to deliver its one parcel to the Bank of Toronto. Then, besides, the interest and continuity of important statistics are kept up by a Clearing House.

To make the daily exchanges thirty-eight bank officials —two from each bank—and the manager of the Clearing House meet at the "House" at 10 a.m. Nineteen of these gentlemen are settling clerks; the other nineteen are delivering and receiving officials. The clerical work commences and closes at a signal from the manager, and takes a little over half an hour to complete, including the time taken up by the manager in summing up and certifying vouchers for the Clearing House Bank to pay to, or receive from, each bank. The manager, however, remains for some time to tabulate certain statements and round off the final work of the clearings.

The suggestion has been made that it would be interesting to compare the clearings and finances of Toronto with United States cities of a similar size. At the same time it would be difficult, because of the different character and basis of the United States banking system. The capital of the United States banks is comparatively small and they have a small secured circulation, but are compensated by very large deposits; whereas, on the other hand, Canadian banks are largely capitalized and have a great circulation.

A despatch of Monday last from Trenton, New Jersey, states that James H. Edge, the bank teller who embezzled about $110,000 of the funds of the First National Bank of Paterson, N.J., was on that day sentenced to imprisonment of seven years in the penitentiary.

HOLIDAY READING

MUNICIPAL TREASURERS: THEIR WORKS AND THEIR WAYS.

An unexpected reward sometimes does come—though it is but rarely—to a writer who has to delve in blue books. A reward, I mean, over and above the satisfaction he obtains from finding facts and figures and opinions where he expected to find them. Great is the delight of a man who is something besides a Dry-as-dust or a machine, to learn that a public official, who is often dreaded as a Rhadamanthus, can show in his reports to superior officers a spark of humor or a real literary flavor—sometimes ability of grasp which reaches far beyond the four walls of his office and beyond the limits of his particular *metier*. Such a man we have in the compiler of the bulletins of the British Columbia Bureau of Information—such a man we have discovered among the subordinate officials of the Province of Quebec—such a man, too, we have in the Deputy Minister of Agriculture for Ontario. But this threatens to become a lengthy digression, so I close the paragraph by saying that the municipal auditor of the last-named province has dared to admit, even in his printed report to the Attorney-General, a glint of humor among his criticisms and his occasional severe judgments.

For years the book-keeping of Canadian municipalities had been faulty. So troublesome was it to the authorities of the Province that they resolved a few years ago upon an attempt to correct the evil. A provincial auditor of municipal accounts was appointed in the person of Mr. J. B. Laing, and he was given power to investigate the books and accounts of treasurers. their methods, and their securities. How he found things in township or village or county offices we have occasionally told in these pages in previous years. Taking up now the report of this official for 1903:

A very common expression, among the details given of the auditor's visits to 162 township, town and village treasurers in Ontario, is that the books are "fairly well kept." This is a somewhat lukewarm phrase—we are sure it is not, in the mouth of Mr. Laing, an attempt to "damn with faint praise" any of these officials. But he gives praise where it is especially deserved, as for instance, of the treasurer of the town of Perth, (assessment value, $1,250,000), who gets a salary of only $75. "His books and balances were quite correct: and I would consider double the present figure nearer the proper figure than what he now gets." Of the village of Thamesville, we find the books described as "correct and well kept," though all they pay their treasurer is $35 a year; the town of Bothwell and the township of Zone, both of which are in the same county, and both have about the same amount of taxes to look after, give their treasurer $50 and $85, respectively. As to Wallaceburg, the treasurer of that place is described as experienced and able.

Mentioning the township of Percy, Mr. Laing says: "The treasurer of this municipality has been in office for twenty-five years, so it is evident his fellow-ratepayers find no fault with him. I have gone over his books and accounts and found them correct, and I am not going to find any fault with him either, but the reverse. I would be inclined to raise the standard salary in his case a little higher."

Things are not always found at ease in the financial Zion of a country treasurer's office, however, and Mr. Laing has of course to say so. He or his assistants have found out defalcations, and have been the means of getting defaulters punished or outlawed. There was the treasurer of Essex, Shambleau by name. He was himself a skilled accountant, and had manipulated the county finances in the most rascally manner, until his whole game was exposed by a Government audit in the township of Romney. It was the sidelight thrown on his nefarious schemes by this audit that led to the exposure of his villainy. He appears to have spent the money almost entirely in dissipation. Races, women, gambling, etc., etc. He was supposed to be dying in Chatham Hospital, when the compromise settlement was made with the County Council, but we are told that in May last he was then living in Wallaceburg in good health. His shortage was first placed at $14,000 or $16,000, but further investigation disclosed the fact that the proper figure was $23,000. The County Council appears to have settled the matter for $8,000, not without being warned by the accountant in charge of the audit (Mr. McPherson, of Windsor), that the audit was not completed and that there was more to come. But it is understood that $8,000 was all that Shambleau's relatives and friends could raise and that in any event nothing more could be had than the amount accepted.

Sometimes this officer has to condole with treasurers instead of complimenting them; sometimes he is able to do both. Here is what his report says about the treasurer's office of the County of York, which has been so long in the gloomy building on Adelaide Street, near Church Street, in Toronto, which is being, as we write, modernized and added to:

County of York.—Treasurer in office 37 years—affairs administered by a deputy. "Everything in the office appears to be up-to-date, with the exception of the office itself, which, being in the old county buildings, is badly ventilated and as a matter of fact not fit to work in."

Village of Millbrook has a good accountant; his books and accounts all right for 1901. For some reason the cash book for 1902 was not produced. While the auditor says he has "no reason to believe that there was anything wrong, still it is always better to have books written up to date: in fact, this should be insisted on in all cases."

Township of Dalton, Victoria Co.—$60 salary. His books are poorly kept: the year 1902, when I was there in October, had not been written up at all.

Other instances which are fitted to attract attention are the remarks of the auditor on pages 33 and 34 relating to the affairs of Sault Ste. Marie, Shuniah Township and Fort William. From the last-named we quote two sentences: "The auditors' statement for the year was an elaborate production. I notice those gentlemen receive $100 each as their fee, which is gratifying to see, when in not a few cases of wealthy corporations the auditors' fees are almost nominal."

The good folk of South Elmsley Township, in the County of Leeds, may be supposed to be thrifty and intelligent, since they live so near prosperous towns like Perth and Smith's Falls. Yet one finds the following memorandum in the auditor's report concerning this place, with nearly half a million assessment: "The treasurer keeps his books fairly well, but does not get much encouragement to do better. His salary is $15 per annum, and he has been in office for four years."

Up in the largely German County of Waterloo,

where is to be found so much intelligence combined with economy, is the village of New Hamburg, whose collector's roll is $0,140, and the salary of whose treasurer is $25. In the neighboring village of Elmira "one of the solid men of the village" is the treasurer, for all he gets is $25 per annum. But down at Newboro, on the Rideau canal, is a treasurer who must like his work, since he has done it for six years for $10 a year. "Evidently a labor of love," says Mr. Laing.

The remark ought not to be omitted that the system of uniform book-keeping introduced by the Treasurer's Department of Ontario in recent years is doing much to improve the systematizing of municipal offices.

SOME THOUGHTS ON ADVERTISING.

Many of our readers may have heard of the enterprising tradesman who put a card in his window bearing the following inscription, "Don't go across the street to be cheated—come in here." That man meant well enough—had something to say, but did not know how to say it.

The advertising spirit permeates our business life of to-day. Someone long ago declared that "Competition is the soul of commerce"; we go further and say "Advertising is the soul of competition." There is no longer any room for question that, other things being equal, the man who uses printer's ink judiciously will do a larger volume of business than the man who does not.

The magnitude, too, of some of the modern advertising campaigns is remarkable. There are many departmental stores on this continent which spend from $500,000 to $1,000,000 a year in advertising. Some baking powder makers in the United States spend each enough every season to start a dozen small banks. Patent medicine manufacturers exhaust dictionaries in trying to find words with which to suitably exploit the virtues of their drugs, expending millions of dollars in order to keep their names before the great reading public. Then there are those who make, and are determined to sell, breakfast foods, soaps, cosmetics, etc. It is estimated that the money spent for advertising purposes alone in the country to the south of us is about $600,000,000 per annum.

The great insurance companies, trust companies and banks are not slow to the merits of advertising as a lever to success. The insurance companies are in front in this respect. It may be pertinent to say something about the growth of financial advertising. This class of advertising has received its share of attention in the past, but it has been more or less of an infant compared with other lines until the last year or two, during which time bank and trust company advertising have increased vastly in the United States. Canadian bankers are, as a rule, less disposed to ordinary advertising. The time, however, is coming when it will develop rapidly over here, too. Canada is entering upon a period of prosperity; the country is growing; it is safe to assume that the people will in the future have more money than ever they had before; institutions that hold it and use it must prosper accordingly, and the live advertising bank or trust company will get the greater share of the business. New methods of attracting business must be evolved just as new channels of investment must be found. More and more the advertising department of our financial institutions will become recognized as a very necessary part of this equipment.

Large accounts of business houses and wealthy people are like kisses—they go by favor, but the accounts of the average man and woman are likely to be secured and held by the bank which reaches them through its advertising.

The wise advertiser knows the value of repetition. One sees the same phrases used over and over again regarding certain commodities that they become a very part of us: "A food, not a fad," "It floats," "A perfect food," are all phrases which by the laws of association of ideas at once suggest the different articles with which they are connected. We are also familiar with "The Rock of Gibraltar" in life advertisements in the United States, and with "Prosperous and Progressive," as well as "Solid as the Continent," in Canada.

That all advertising is not apt is shown by the following. It is stated that of late the Salvation Army has been responsible for a great deal of perturbation among patrons of the railroad running from King's Cross, London, to the north. Facing the railway line north from Hatfield the Army have erected a huge board with the following inscription thereon:

PREPARE TO MEET THY DEATH, FOR IT IS COMING.

This does not read pleasantly at the commencement of a long railway journey, and we wonder that the railway people allow it.

However, the fact remains that the individual or firm which hopes to get a slice of the business that is going must take into consideration the matter of advertising. The whole subject may be summed up in the following trite verse:

> The man who has a thing to sell,
> And goes and whispers it down a well,
> Is not so likely to collar the dollars,
> As he who climbs a tree and hollers!
> (But he must holler wisely.)

Behind all advertising, no matter what form it may take, there must be honest goods and right business methods. Artemus Ward once said, "I like a rooster for tew things: first, for the krow that is in him; second, for the spurs he has to back that krow up with." So is it with him who would do advertising with permanent success. He must have behind it all the right goods.

AN UNACCUSTOMED GUEST.

Among the incidents of the first Riel uprising in Manitoba—far more exciting at the time to us, the dwellers in the East, than young people of to-day can understand—was one which some friends to whom I one night rehearsed it thought worth the telling in print. Doctor Schultz, whose then recent death as Sir John Schultz, K.C.M.G., ex-M.P., ex-Senator, ex-Governor of the province, drew much popular attention to the great work he did for Canada in his life time, had, at the date of my story, just reached Montreal after his escape from the clutches of Louis Riel. The stalwart doctor had broken the bars of his prison at Fort Garry, and in the attempt to let himself down from a window by strips of Buffalo hide, fell to the ground, injuring his thigh. Lame as he was he climbed the wall of the Fort, and walked backward half a mile in a circuit through a blinding snowstorm in order to deceive possible searchers, and then struck northeast, finding some miles away among the Scotch settlers

of Kildonan shelter from the emissaries which Riel soon sent out to find him. His secret was well kept, however, and he was never again captured by the arch rebel. I have heard him narrate how in that Scotch settlement he lay for hours in a huge grain bin in a settler's premises with half a dozen bags of oats on top of him, while the patrol of armed men scoured the house to find him.

By the assistance of sympathizers, word of the doctor's plight was conveyed to a Scotch halfbreed guide named Joseph Monkman, who had traversed the plains with Schultz on some trading trips in former years and knew the country thoroughly. Upon being asked to accompany the doctor on a snowshoe tramp to Lake Superior and thence eastward to let the people of Ontario know the true state of affairs in the Red River Settlement, Joseph loyally assented. Having been provided with all the pemmican they could carry, in addition to their arms, etc., the two started for the southern end of Lake Winnipeg about the middle of February, making a detour eastward through Lake of the Woods and Rainy River, then southward, and finally westward, tramping on their snowshoes day after day, through swamp and forest, over lake and hill, eating the flesh of rabbits or birds, often feeding on berries, until near the close of March they reached the western end of Lake Superior. A strange pair, stranger than Crusoe and his man Friday, they must have seemed to the people of Duluth when, gaunt and ragged, snowblind and crippled, they told their story in that town. Schultz had lost thirty-six pounds in weight on the trip, and suffered tortures from frost-bite and from the pain of his wounded thigh.

But to the story I set out to tell, which has nothing to do with either history or suffering. Joseph and the doctor after a sort of triumphal procession through Ontario cities, reached Montreal in the spring and put up at the St. Lawrence Hall. After dark one day they were called upon by a deputation of French-Canadians, prominent among whom was M. Provencher, who had spent some time in the Red River Territory, and knew Schultz. These invited the two heroes of the snowshoe tramp to a convivial gathering that evening. Schultz replied that they had taken tickets for the theatre, and had invited me to accompany them. With winning grace Provencher suggested that the *seance* should take place after the theatre, and begged that I would be of the party. It was so arranged, and about half past ten behold us, a dozen in number, seated in a private room at Freeman's restaurant on St. James street. Provencher sat at the head of the table, Schultz on his right, and then Joseph, who was attired in the Hudson's Bay overcoat, without which he never appeared. He was a tall man, this guide, with swarthy skin and high cheek bones. Indian-like as to eyes and hair—both black; Indian-like, too, in the erect carriage and turned-in feet, but with a large and smiling mouth which gave his face an aspect of confiding sweetness and simplicity. Simple he was, too, in matters of city life and custom, but he had excellent sense, the manners of one naturally a gentleman, while of woodcraft he was a past master. His confidence in Schultz was absolute.

The first course of the supper was oysters on the shell. Monkman had never seen oysters before, and watched with smiling but dignified *aplomb* to see how they were to be disposed of, asking the doctor, in his low tones, the name of these curious things, and being told to his amazement that they were fish. Following the custom of the other guests he made away with the bivalves, and while he was so engaged, Schultz leaned over and whispered to him:

"Preserve the shells, Joseph. They are valuable. The proprietor keeps them and grinds them up to feed them to his French-Canadian ponies. They make excellent horsefeed."

Joseph, nothing doubting, made a little pile of shells on his plate, bowing an acknowledgment to Schultz of the suggestion. As the other courses followed he partook sparingly and in sedate silence of the soup and fish, lightly of the *hors d'oeuvres* (which were as much a puzzle to him as Chinese dishes are to us), and "laid himself out" on the joint. Pastry had no charms for him; and as for the wines, which succeeded one another in the order prescribed by the excellent taste of the repast, a glass of good old Hudson's Bay rum would have done him more good than the whole of them. When not gazing straight in front of him this child of the prairies, swart of face, impassive in demeanor, sat between courses, on this convivial occasion, erect, with his hands clasped before him on the table in attendant silence, replying to the sallies of his right-hand or opposite neighbor with a French or English monosyllable, a broad smile or an occasional grunt—I do not use the term offensively, but I do not know any other word to describe the curious expression of assent that he was accustomed to make from his throat

The *petit souper* went on. The talk was charming, the badinage incessant. I was learning for the first time how delightful a half dozen of cultivated Frenchmen could be when bent upon entertaining their guests and themselves around the social board. And the scene laid the foundation in my mind of a respect which has continued ever since, for the educated class of French-Canadians. Reminiscences of Manitoba from Schultz and Provencher, songs and recitations in French and English from some bright young members of the press or bar, anecdotes, quotations, allusions and the playfully intimate rallying of one another, that is only possible to good fellowship. There is a French proverb which says: "Confidence does more for conversation than wit," and so it seemed on that evening, though wit was not wanting.

The convivial surroundings, the accompaniments of the little supper, from the colored wax lights on the table to the flaring gas jets of the room, were all strange to our untutored guest, whose eyes wandered like a boy's from the dainty jellies and "tiny kickshaws" on the table to the loud-popping and creaming champagne, beakers of whose "blushful hippocrene" came to surprise his vision and his palate. The cigarettes, too, seemed to amuse him, and the curiously-twisted Mexican cigars. But he was too warily watchful to commit the solecism of drinking out of his finger-bowl, as a Washington senator is alleged to have done, or taking both hands to lift a champagne glass to his lips, as we have seen done by a legislator much nearer home.

Coffee was brought, and most of the party made a *gloria* by pouring into spoon or cup the little glass of brandy which accompanied the cup and saucer and then setting fire to it. This operation was novel to Monkman, who, when his right hand neighbor started with a wax match the blue flame that presently wavered over the top of his own cup, and then politely offered to do the same for Monkman, the latter pushed back his chair with a muttered "Oogh!" and said something in French about there being the devil in the thing. Turning to Schultz as he always did when an explanation of anything was wanted, the doctor calmed him by saying:

"It is all right, Joseph; no danger. There is no magic in the thing; it is only a queer custom of some of these old-country Frenchmen. Take your coffee without the fire if you want to, but don't offend your young neighbor, who only wanted to be polite. See how distressed he looks!"

Instantly reassured, and only anxious to repair what had seemed an alarmed incivility—so instinctively courteous was this child of Nature—the quaint figure in the long capoted overcoat rose from his chair and with an entreating gesture of both hands, graceful and indescribably naive, asked pardon of the young Frenchman, and then bowing to the chairman, and casting a questioning glance at Schultz, like a timid boy resumed his seat. Tickled as these bon vivants were at the evidences of delighted surprise given from time to time by their prairie-reared guest, they were yet civilly careful not to offend his composure by any brutal practical jokes; leaving it to Schultz to mystify Joseph by such harmless fables as the story of the uses of oyster shells or the mysterious origin of ice-cream, which, he was assured, was a most rare dish fabricated especially for this occasion, in honor of the deliverance of the two snow-shoe travellers from the clutches of Kabibonokka, the North Wind.

Monkman returned to the Red River Settlement, after having been made much of in the East. Through the influence of Schultz, who was elected to Parliament and after-

wards became Senator and Governor of Manitoba, Joseph was made a fishery inspector or supervisor on Lake Winnipeg. He lived to a good old age, and doubtless often regaled his simple-minded listeners with stories of the sights he had seen and the queer adventures he had had among those crazy city folks in the East.

Toronto, December, 1903. J. H.

A LESSON FOR PRICE-CUTTERS.

The following story is told of the fate which overtook a certain business firm in Dusseldorf, Germany, which persisted in cutting its prices for a certain brand of soap powder. The soap powder manufacturers informed this firm, upon representations being made to them by competing stores, that, as the stuff was being sold at 37 pfennigs for three packets, the minimum selling price, according to the terms of the manufacturer, being 45, no more powder could be delivered. Whereupon the proprietor got his supply indirectly, and went on selling as before, but not for long, since five oil and color warehousemen, who were being badly hit, brought an action against him on the strength of a paragraph in the Code of Civil Law, which says that "whoever wilfully does another an injury in a way offending against good manners, is bound to compensate the other for the damage," and, what is more, got the verdict. The court sentenced the seller to pay the plaintiffs £60, together with four per cent. interest, calculated from the time when the action was begun, mulcted him in all legal costs, and made it known that he would be fined £75 for each future case of selling below the minimum price. Commercial Intelligence, of London, commenting on the case, remarks what a thumping compensation some foreign firms would get if only this section of the German Civil Code could be invoked in their favor.

ANSWERS TO ENQUIRIES.

Apologies are due to a number of enquirers or other correspondents, replies to whom are, for various reasons, belated. Some replies are weeks, others are months, overdue. But where such correspondents do not find answers to their queries, they may conclude either that we are unable to furnish the information desired or that the questions are too trivial for notice. There are some questions sent to this office so often, from different quarters, that one smiles a little in answering. Such a stock question is: "What is the meaning of a fiscal year?" and we answer for the sixteenth time that it is a financial or Government year, which begins and ends at a different date from the calendar year. For example, the fiscal year of Canada begins on 1st July one year, and ends on 30th June the next year. The United States fiscal year is the same. Another stock question is: "What is the amount of the savings of Canadians deposited in banks and elsewhere?" This is answered every time we summarize the monthly Bank Statement. At the close of October last they totalled $539,484,000; namely, $435,738,000 in the banks, and $103,746,000 in loan companies, Government and other savings banks.

W. E. H., Vancouver.—(1) You will find the figures in your Provincial Government publications: see No. 6, no need to refer to Ottawa. (2) Thank you for the hint. The little pamphlet you speak so kindly of, "Little Memories of a Great Jaunt," was for private circulation only, and but a few hundred were printed by Mr. Hedley. Get the connected story of that trip in "Industrial Canada:" it is very well done: or see the McLean commercial weeklies or the Monetary Times in October and November.

W. T., St. John, N.B.—Much interest was taken in peat fuel in this province last year. Will send you a pamphlet on the subject prepared by the Ontario Bureau of Mines. Marl is found in various parts of this province, overlain by peat.

E. H. A., Annapolis Royal.—Papers received with thanks. Shall have occasion to refer to the subject.

J. T., City.—Impossible to say where the story originated. We found it in a Boston paper. It may have been the same school to which little Freddy went. An old-fashioned aunt asked him one day what he knew about Achilles, the hero of Homer's Iliad. His reply was: "His mother grabbed him by the heel and ducked him in the river Stinks, and he became intolerable."

Reader, Galt.—We have no figures on the subject later than 1900, in which year the quantity of wood-pulp exported from Norway and Sweden was 675,870 tons, valued at $13,616,561.

A. M., Stratford.—A dictionary definition of communism is that it is "a theory of social order according to which property is held as a common trust, and the profits arising from all labor devoted to the general good." A wit put his opinion of communism into the following rhyme, some 60 years ago in England:

What is a communist? One who hath yearnings
For equal division of unequal earnings.
What is a communist? One who is willing
To put down his penny, and take up your shilling.

R. R., Peterboro.—Yours is a fair-to-middling pleasantry, if there were any means of expressing it in type. But therein lies the difficulty. It reminds one of the earnest, but unliterary, youngster in a book-shop to whom was confided the making of a catalogue. He got things mixed in a ludicrous way. For example, to take books, pamphlets and music sheets indiscriminately, he labored on and not being imaginative could not see what a hash he was making of things. His spelling was poor, but he used "ditto" very freely, as thus, under the letter L:

Lead, Kindly Light——Newman.
" Pipe——McGregor.
" Manfacture——Standard.
Patti Oyster——Pamphlet 8 vo.
" Adelina——with portrait, 2s.
Morgan Pierpont——Life of
" attic, Marriages in Europe.

PEACE ON EARTH, 1903.

Now comes the Yuletide of the year
Ordained to friendship and good cheer—

Though Russia, on the Manchu plain
Is drilling troops with might and main;

The while the Jap just aches to have
A deadly tussle with the Slav;

While frightened Mongols in Manchu
Observe their exit P. D. Q.

While England's streaking overland
To enter Thibet, sword in hand;

While angry Colon yells, "Ha, Ha!
Just let me get at Panama!"

The while the Turk perfects a plan
To slay the Macedonian;

While Uncle Sammy stuffs his jeans
With bullets for the Philippines—

Poor Santa Claus will bring, I fear,
A stocking full of guns this year,

Unless the Angel comes again
With "Peace on earth, good will to men."

—Wallace Irwin in New York Commercial.

THE INSTITUTE OF ACTUARIES' EXAMINATION.

Announcement is made that the annual examinations of the Institute of Actuaries will be held in the Colonial centres —Melbourne, Sydney, Adelaide, Brisbane, Wellington, Montreal, Toronto, Ottawa, and Cape Town, on the 15th, 16th, 18th, and 19th of April, 1904. The local examiners at the points mentioned will fix the hours of the examinations and inform the candidates thereof, and of the address at which they will be held. Candidates must give notice in writing to the honorary secretaries in London, England, specifying the particular examination for which they desire to enter, and the centre at which they propose to present themselves, and pay the prescribed fee of one guinea not later than 31st January, 1904. The local examiners for the three Canadian centres are as named below:

Montreal—T. B. Macaulay, F.I.A., Sun Life Assurance Company.

Toronto—T. Bradshaw, F.I.A., Imperial Life Assurance Company of Canada.

Ottawa—A. K. Blackadar, F.I.A., Government Life Insurance Department.

Any information concerning the Institute's examinations will, we are assured, be gladly supplied by any of these three gentlemen.

NORTHWEST COMMERCIAL TRAVELLERS' ASSOCIATION.

The twenty-first annual meeting of the Northwest Commercial Travellers Association of Canada was held on the 19th inst. The retiring president, in his address, dwelt upon several satisfactory features of the year now closing. The association had prospered both numerically and financially, the total membership at the present time being 1,241, which means the large increase, compared with any previous year's work, of 267. The British Columbia branch had shown satisfactory progress. It was noted with gratification that steps had been taken by the Manitoba and Territorial Governments to improve the sanitation of hotels and other public houses. The gross income of the association for the year was $13,669, against $11,445 a year ago, and its available assets now amount to $51,713, of which $38,692 is credited to the Mortuary Benefit Fund.

FIRE INSURANCE MATTERS.

Insurance Manager, Montreal.—Your point is well taken. It would have been better to say at the foot of page 778, in our article last week on Acetylene Lighting—there are thirty or forty kinds of acetylene machines recognized by the underwriters; instead of, as we did say, "there are thirty or forty acetylene machines recognized."

The year 1903, so near its close, has been a fairly satisfactory one to fire underwriters in Canada, though not, of course ,so profitable as the quite abnormal twelve months of 1902. Still, if the Fire Fiend can be kept in his lair for seven days more, there will be a balance on the right side of the ledger. In the United States, the fire insurance managers are also rejoiced over the prospect of a year with a moderate profit. All are supposed to be praying that no conflagrations shall characterize this month.

The Toronto offices of the Guardian Assurance Company, Limited, of which Mr. H. D. P. Armstrong is the general agent, are to be removed in a few days from 56 King street East, to the Leader Lane, just opposite the Union offices, of which Mr. Badenach is the agent. Mr. Armstrong will have, in his new quarters, more room and better light. They have the advantage, too, of being only a stone's throw from his previous location.

The Investigator directs attention to the spread of the labor union movement among firemen in the United States. "The fact is that this much abused class of public servants is in the intolerable position of suffering from evils from which there is apparently no means of redress. If these men have a grievance they cannot meet to decide upon some plan of action without being accused of a breach of discipline. And they have grievances galore. In some towns they are subject to dismissal for no other cause than that they are political appointees. Even in Chicago, some of the best men in the department are debarred from promotion because they have not had the opportunity of acquiring the education necessary to pass a civil service examination. The consequence is that they are superseded by less competent men. What is needed is the adoption of a system of promotion by merit and the establishment of greater harmony between the chief and the rank and file."

In his report to Washington recently, the Consul for the United States at Turin, Italy, describes that city in a way to make fire underwriters' mouths water. There is no structure of wood in its whole area; 95 per cent. of the houses, whether dwellings or shops, are built of bricks. "These are burned exceedingly hard so that in handling they give forth a metallic sound. . . Their color is mostly bright red, and they are used in the inside of buildings, as well as the facing of walls." Tiles are used for floors. As a result of this construction, there have been no fires worth mentioning in Turin for thirty-five years. Reading this impels us to ask, why cannot we in Canada make a move towards less combustible dwellings and stores? Surely we have lots of material for fire-proof bricks. What are the brick-makers of Ontario doing to furnish non-combustible building material. Take Mr. Robert Davies, of the Don Valley Brick Works, as an example, has he nothing of the kind to propose to builders or householders? Surely it can be brought about that a sensible householder, a shrewd architect, and a competent brick-maker, can combine to produce an ideal house.

LIFE ASSURANCE PARAGRAPHS.

A graceful way of sending its Christmas greetings is adopted by the North American Life Company, whose officers send their good wishes in an envelope containing a pretty card, tied with purple ribbon.

We hear from Detroit that Mr. Thomas H. Bowles, who has long been with the Mutual Life of New York, as general agent for Wisconsin, Upper Michigan, Louisiana and Mississippi, has been made manager of the Equitable for Lower Michigan. Mr. Bowles will have headquarters at Detroit. The appointment dates from 1st January, 1904.

At the banquet of the National Association of Life Underwriters, held at the Hotel Rennert, Baltimore, the other day, a roll call was made to ascertain the amount of life insurance carried by members and guests present. It was found that there were 193 persons all told and that the total amount of life insurance carried amounted to $5,795,000, an average of $30,000 each.

Some of the big American life offices are adopting the branch system. The Chronicle says that the Mutual Life has put in at Chicago a branch office, under Manager Carlile, equipped with a medical director and an assistant actuary, from which all policies for amounts not exceeding $30,000, upon lives of persons within the district, are to be issued henceforth. It is said that the New York Life has the same thing under consideration.

We have received from Mr. W. Harvey, B.L., resident director and manager for Manitoba of the Excelsior Life Assurance Company, a copy of the large and striking calendar for 1904 issued by that company. The artist has represented the youth bearing the "banner with the strange device, Excelsior," as leaving a wide and smiling landscape below him and striding upward not "amid snow and ice," or impending avalanche, as in the poem, but doing some well-dressed and rather easy climbing over mossy rocks, with no tear whatever in his determined, bright blue eye.

A decision denying the request of members of fifteen lodges of the Ancient Order of United Workmen in Connecticut for a special meeting of the grand lodge to repeal

STATEMENT OF BANKS acting under Dominion Gov't charter, for the month ending November 30 1903.

J. M. COURTNEY,
Deputy Minister of Finance

the laws relating to assessments, has been given by Hugh A. Keenan, of New Haven, grand master workman. In the decision, dated 18th inst., it is declared that the grand lodge of Connecticut, having adopted the new assessment rates, cannot now rescind its action without the consent of the Supreme Lodge.

The desk calendar of the Crown Life Insurance Company, head office, Toronto, is a little gem of harmonious color. It bears the patriotic motto: "Keep your money in Canada."

The London Review has received word of the intended retirement, on the 31st inst., of one of the veterans of the insurance profession in the person of Mr. J. J. P. Anderson, so long known as secretary of the Scottish Widows' Fund and Life Assurance Society. In April, 1844, about sixty years ago, Mr. Anderson entered the office of the Scottish National Fire and Life Insurance Company, as an apprentice under its manager, the late Mr. Holmes Ivory, who was also professional accountant and actuary. He went to London in 1854.

Who that has met them at the actuarial gathering in New York, or in Toronto as they were hurriedly passing through, but was charmed with the bright and suave intelligence of the continental members of the Actuarial Congress this year? We have seen in two United States insurance journals extracts from a translation of Mr. Loewenberg's remarks about his trip to America in the Oesterreichische Revue. Speaking of Canada, he says: "I can give only a few details, as there is not much new to say." This Austrian gentleman asserts that "the great British fire insurance companies predominate there as in the United States," and adds, that with them "few local companies come into competition." The Hotel Metropole, "on the Hudson Bay" and the Sun Life Company are both spoken of in terms of praise. Now can any one tell us what hotel he means? Was it the Chateau in Quebec, or the Windsor in Montreal, or the King Edward in Toronto? True, there is a hotel Metropole in Toronto, but we do not think the Herr stopped at it.

—The Manitoba Government has chosen and purchased a site for the proposed new agricultural college and experimental farm on the outskirts of Winnipeg. It consists of about 117 acres, and its purchase price was $15,000. The provincial estimates provide for a further expenditure of about $100,000 in buildings, etc.

—Arrangements have now been completed, we understand, for the construction of the proposed floating dry dock in Vancouver harbor, B.C. The Dominion Government's subsidy will be 3 per cent. on the total cost of the dock for a period of twenty years on an amount not exceeding $1,000,000. The dock is to be 500 feet long and its lifting capacity in the neighborhood of 11,000 tons. Work is to be started on May 1st next, and to be completed within two years from that time.

Action has been taken by the Ontario Government in the matter of the People's Loan and Deposit Company. The registry in Ontario of this company has been under date 15th inst., cancelled by the Registrar of Loan Companies. The company was really an amalgamation of two companies, whose managers were convicted of carrying on an illegal business. It formerly carried on an independent business, but became insolvent, and its assets were disposed of at 40¼ cents on the dollar.

—The final report of the Toronto Works Department, issued by the City Engineer, shows a total expenditure for the year just passed of $1,212,444, or an increase, compared with last year, of about 10 per cent. The items are approximately as follows: General and special works, $367,807; local improvements, $592,275; street railway track allowance, pavements, $37,251; Island, $7,136; Property Department, $7,357; waterworks, $200,615. Some of the larger expenditures were: Street cleaning, $40,274; asphalt cleaning, $21,439; scavenging, $86,096; street watering, $34,879; asphalt repairs, $16,863; snow cleaning $4,584. The cost of local improvement was divided as follows: Pavements, $393,796; sewers, $2,091; concrete walks, $159,500; wooden walks, $17,887.

It is not to be wondered at that companies transacting this kind of business (the insurance of debts), do not take a cheerful view of it. The tradesman, shopkeeper, or wholesale dealer knows his customers, and he is not in the least likely to insure against loss from those who he knows thoroughly well can and will pay. But the company is under the painful necessity of taking what is left, and we all know what the result of that is likely to be.—London Review.

—The following, Grace Before Meat, is from one of the delightful Essays of Elia, by Charles Lamb: "I own I am disposed to say, grace upon twenty other occasions in the course of the day besides my dinner. I want a form of invocation for setting out upon a pleasant walk, for a moonlight ramble, of thanks for a friendly meeting, or a solved problem. Why have we none for books—those spiritual repasts—a grace before Milton, a grace before Shakespeare, a devotional exercise proper to be said before reading the Fairy Queen?"

THE COUNTRY STORE.

Far out beyond the city's lights,
Away from din and roar,
The cricket chirps of summer nights
Beneath the country store.
The dry goods boxes ricked around
Afford a welcome seat
For weary tillers of the ground
Who here of evenings meet.

A swinging sign of ancient make
And one above the door
Proclaim that William Henry Blake
Is owner of the store.
Here everything, from jeans to tweed,
From silks to ginghams bright,
Is spread before the folk who need
From early morn till night.

Tea, sugar, coffee (browned or green)
Molasses, grindstones, tar,
Suspenders, peanuts, navy beans
And homemade vinegar;
Fine combs, wash wringers, rakes, false hair,
Paints, rice and looking-glasses,
Sidesaddles, hominy, crockery ware
And seeds for garden grasses.

Lawn mowers, candles, books to read,
Corn planter, household goods,
Tobacco seed, salt, clover seed,
Horsewhips and knitted hoods,
Canned goods, shoeblacking, lime and nails,
Straw hats and carpet slippers,
Prunes, buttons, codfish, bridal veils,
Cranberries, clocks and clippers.

Umbrellas, candies, scythes and hats,
Caps, boots and shoes and bacon,
Thread, nutmegs, pins and rough-on-rats
For cash or produce taken.
Bird seed, face powder, matches, files,
Ink, onion sets and more
Are found in heaps and stacks and piles
Within the country store.

The Enormous sale of

OLD CHUM

Cut Plug

Smoking Tobacco

Proves its Superior Quality.

Sold by all leading wholesale houses.

UNITED STATES FINANCIAL CONDITIONS.

Henry Clews & Co., New York, in their special circular dated December 19th, 1903, say: The upward movement in stocks received somewhat of a check this week from free realizing sales and from unsettled conditions in the steel trade. No change, however, could be detected in the undertone of the market, which has plainly improved owing to the conviction that the worst of liquidation is over and that prices must recover from the abnormally low level induced by that liquidation. A very fair recovery had already taken place, but the pace seemed too rapid to last and was confined to only a few stocks. There has been in consequence a good deal of profit-taking, also a disposition to invest in stocks which thus far have not proportionately shared in the advance. Affairs in the steel trade have been an important factor, not merely because of United States Steel securities, but largely because of the great importance of that material in the industrial situation. Iron and steel are still the best business barometer, this industry more than any other being influenced by new enterprise and growth. As the country develops the demand for iron and steel expands also; and fortunately there are no indications of this growth being arrested; on the contrary, there is every indication that that growth is to continue for some time to come: The chief obstacle has been that in 1903 we were going ahead too fast. Nothing could check that record-breaking pace except prohibitive prices; hence the extraordinary high levels of prices, profits and wages. There is still a large demand for iron and steel products at a price, but not at recent figures. General business is fairly active for the season Clearing house returns and railroad earnings show only slight reactionary tendencies, generally explained in the first case by lessened speculation and in the latter by smaller iron shipments. The West seems to be enjoying uninterrupted prosperity, and the South is particularly exuberant over the high price of cotton and the consequent prosperity of planters. The burden of dear cotton falls with special severity upon the mills, some of which may be forced into temporary curtailment, but the South as a whole is likely to have more money to spend in 1904 than ever before.

THE CANADIAN CASUALTY AND BOILER INSURANCE COMPANY

Full Government Deposit Paid.

President:
ALEXANDER SUTHERLAND, D.D., Toronto.
Vice-Presidents:
H. N. BATE, Ottawa, Director Bank of Ottawa.
W. S. DINNICK, Toronto, Vice-Pres. and Mng.-Dir. Standard Loan Co.
A. G. C. DINNICK, - Managing Director.

This Company having deposited $30,000 with the Treasury of the Ontario Government, has been duly licensed to transact the following classes of Insurance

Boiler Inspection — Personal Accident Insurance
Boiler Insurance — Sprinkler Insurance
Consulting Engineers — Elevator Insurance

The patronage of the public is respectfully requested. Correspondence with Insurance Agents and those wishing to engage in the business is invited, and will receive prompt and courteous consideration.

Chief Engineer, - - - A. M. WICKENS.
Superintendent of Agencies, - J. G. BEAM.

HEAD OFFICES:
N. E. Cor. Adelaide and Victoria Sts., TORONTO, - Ont.

BRANCH OFFICES:
Temple Building, - - MONTREAL, Que.
43½ King Street W., - - HAMILTON, Ont.

MONTREAL MARKETS.

Montreal, 22nd December, 1903.

Ashes.—With no stock in store, and little or nothing coming forward, the potash market is a strong one, though the present demand is limited. Local dealers are quite disposed to pay $6.10 for No. 1 pots, while seconds are figured at about $5.50. Owing to the low prices of late years, many of the old makers have gone out of business, and closed their asheries, but if the present high prices continue, as local dealers claim that they will for some time to come, it would probably pay some persons to resume operations.

Cements and Firebricks.—Business is now very quiet in these directions, and there will practically be nothing doing for the next several weeks. Quotations are steady as follows: Belgian cement, $1.80 to $2.05; English, $2.15 to $2.25; German, $2.15 to $2.35. Firebricks, $18 to $24 per M.

Dairy Products.—In cheese there is no movement of any consequence, only a light business being reported in Novembers at 9¼ to 9⅜c., and Octobers at 10 to 10⅜c. There is no English demand. For butter also there is no export enquiry, and the local demand is just moderate at the moment. Finest late makes quote at 20 to 20½c. per pound.

Dry Goods.—The wholesale warehouses are now comparatively quiet, as most travellers are off their routes. Retailers continue to report active holiday trade, and general remittances are favorably spoken of. On Saturday last the Canadian Colored Cotton Co., gave notice of a withdrawal of all quotations, in view of the continued advance in raw

Insist on Valves Bearing the J. M. T. Trade Mark.

The very fact that over a million and one half of "J. M. T." Valves are giving the highest satisfaction in daily use throughout the Dominion stamps them as superior. They have won their way to this general acceptance because they represent the best in Valve Construction. We are headquarters for everything in Steam Fitting Appliances and Specialties.

cottons. The Dominion Cotton Co., and the Colonial Bleaching & Printing Co. have made a further advance on some lines of prints, etc.

Furs.—We note nothing specially new since last report on this subject. At the Hudson Bay sales opening in London on the 25th of January, it is expected the offerings will probably be smaller than usual, owing to the recent loss of one of the company's vessels on her way to London, with a cargo of raw furs. We quote prices here for prime skins as follows: Beaver, $5 to $6.50 for large; medium ditto, $4 to $4.75; No. 1 choice bear, $15 for large, $10 for medium, and $6 for small; badger, 30 to 50c.; fisher, No. 1, dark, $5 to $6; ditto, brown, $4 to $5; pale ditto, $3 to $4; red fox, $2.25 to $4; cross fox, $5 to $10 for No. 1, as to color; wolverine, $2.50 to $5; lynx, $4 to $8 for No. 1; marten, $2 to $3 for Ontario and Quebec skins; fine B.C. and Northwest pelts bring higher prices; mink, $2 to $4 for No. 1; fall rats, 8 to 17c.; winter ditto, 15 to 20c.; otter, $8 to $12; fine Labradors and Northeastern would bring $12 to $20; coon, $1.50 to $2.50 for No. 1 black, and from $1 to $1.75 for No. 1 dark; prime skunk, $1.50 for No. 1, all black; short stripe, $1.10; long stripe, 60c.; and broad stripe, 20c.

Groceries.—About the only noteworthy feature in this line since last writing is a decline of 5c. a cental in hard sugars, standard granulated being now quoted at $4 at the factory; yellows are unaltered. Molasses is firmly held at 40 to 42c. in a jobbing way. The auction sale of dates to have taken place on the 21st has been postponed, owing to delay in arrival of the goods. The currant market rules easy. Stocks of Valencia raisins are exhausted in Spain, but considerable supplies are available in London at reasonable prices. Loose Muscatel Malaga raisins are in good demand. Nuts of all kinds are very firm, notably almonds both whole and shelled, and walnuts.

Hides.—A further decline of half a cent per pound is noted in beef hides, dealers now quoting 8c. for No. 1. The kill is said to be unusually large this winter, and as tanners in this Province continue to be very light buyers, stocks in store show further accumulation. Calfskins and lambskins are unaltered in price.

Leather.—The month has been a quiet one in so far as the local demand for sole is concerned, but the export movement in that line is described as very fair for the season of the year. Now that the Quebec boot and shoe factories are getting to work again after a long series of strikes, some respectable sized orders are reported for dongola and fancy leather, findings, etc. Black leathers are very quiet, but fairly steady in price.

Metals and Hardware.—There is little news of an interesting character to be noted in these lines. The Dominion Hardware Association had a full session here last week, but the business trans-

The Manufacturers Life Succeeds.

The Manufacturers Life has succeeded in putting on the market one of the best insurance policies ever issued by any company.

It is remarkable for the guarantees it contains.

Drop a post-card, giving your age next birthday, to the Head Office, Toronto, and get a copy of the pamphlet regarding their "Guaranteed Investment Plan."

JAMES H. MILNES & COMPANY,

Head Office, 86 King St. E. | TORONTO. | Docks, Foot of Yonge St.

J. J. W. Deuchar, F.F.A., F.I.A., General Manager and Actuary of the Norwich Union Life Assurance Company, speaking of investments says:

"It may serve to indicate the great importance of obtaining a good return on the investments, if it is realized that one per cent. of increased interest on the funds of a company will, on the average, have as great an effect as a saving in expenditure equal to 10 per cent. on the premium income, while, if an office could count on realizing 5 per cent. interest in place of 3, it might reduce its premiums some 30 per cent., or double its bonuses."

Mr. Deuchar does not name THE GREAT-WEST LIFE; but the above statement exactly describes the happy position of its policy-holders.

acted was altogether of a routine character. With regard to prices, the only changes reported are a slight decline in iron pipe, inch being reduced from $4.81 to $4.75, and ingot tin as rather firmer at 31c. for Straits.

Oils, Paints and Glass.—A holiday quiet pervades the wholesale warehouses in these departments, and little will be done for the next two or three weeks. The only change in prices we hear of is a slight advance in turpentine, which is now generally quoted at 84c. per gal. We quote: Single barrels, raw linseed oil, 47 to 48c.; boiled, 50 to 51c., net 30 days, or 3 per cent. for four months' terms. Turpentine, 84c., single barrels. Olive oil, machinery, 90c. to $1; cod oil, 35 to 40c. per gal.; steam refined seal, 50 to 55c. per gal.; tinged and brown ditto, down to 35c.; castor oil, 8 cents, for machinery; pharmaceutical ditto, 8½ to 9c.; lead (chemi-

As applied to the gain in net amount of life insurance in force in Canada for the FIVE YEARS ending December 31st, 1902.

Head Office Waterloo, Ont.

The Mutual Life OF CANADA

has once more established its right to the above claim. It stands to-day

At the Head Of All

life companies doing business in Canada in the NET AMOUNT IN FORCE GAINED OVER all its competitors during the past five years, as shown by the Government Reports.

cally pure and first-class brands), $4.50 to $4.60; No. 1, $4.25 to $4.35; No. 2, $4 to $4.50; No. 3, $3.80 to $3.90; No. 4, $3.60 to $3.75; dry white lead, 4¼ to 4½c. for pure; No. 1 ditto, 4 to 4¼c.; genuine red ditto, 4 to 4¼c.; No. 1 red lead, 4c.; putty in bulk, bbls., $1.80; bladder putty in barrels, $1.90; ditto, in kegs or tins, $2.65; London washed whiting, 45c.; Paris white, 75 cents; Venetian boxes, $2.40; 23-lb. tins, $2.55; 12½-lb. red, $1.50 to $1.75; yellow ochre, $1.25 to $1.50; spruce ochre, $1.75 to $2; Paris green, 14c. in bulk, and 15c. in 1-lb. packages; window glass, per 100 ft., $3.25 for first break; $3.45 for second break, and $4.20 for third break; per 50 feet, $1.70 for first break, and $1.80 for second break.

TORONTO MARKETS.

Toronto, December 24th, 1903.

Chemicals, Drugs, etc.—Trade has been normally active for this season of the year, but no special features have developed. Prices keep steady. Quinine and opium keep in about the same position, English advices speak of trade being on the dull side for home consumers, but some lines in pretty brisk demand for export.

Dry Goods.—As is natural, the wholesalers have had a less busy week, so far as the Christmas trade is concerned. It is believed to have been in more than usually large volume this year. Travellers have been out on spring samples lately, and report everything moving out well with bright prospects for the coming season. The Canadian Colored Cotton Mills Company, which advanced prices only a few days ago, have now issued a circular which withdraws all quotations until further notice. Additional advances are looked for by the trade, to whom it looks as if the upward movement will never stop. The demand for all kinds of staple goods, both cotton and woolen continues active.

Flour and Grain.—A steady market prevails for ninety per cent. patents, which sell at $3.05 in buyers' bags, middle or east freights. Manitoba flour is steady. Bran and shorts keep steady. Ontario wheat continues at about the same figure as last week. Oats are a cent higher. Buckwheat has gone up a fraction. Other grains remain unchanged. Not very much business is being done.

Fruits and Vegetables.—A long week has been experienced by the fruit dealers, as is usually the case the last few days before Christmas holidays. Oranges are plentiful, and fetch reasonable prices. Apples are in steady demand. Quotations follow: Cocoanuts, $4 per sack; oranges, Floridas, $3 to $4 per case, $2.75 to $3 per box; Jamaica, $5 per case for 200's, $3 to $3.50 for 360's; California, $4 to $6; Valencia, $3 to $4; bananas, 8's, $1.25 to $1.50 per bunch; 1st, $2 to $2.50; sweet potatoes, $3 to $3.50 per barrel; celery, 20c. to 40c. per dozen; cranberries, $9.50 to $10 per barrel, $1.25 per basket; Spanish onions, $2.75 to $3 per large case, and $1 for small; Malaga grapes, $5 to $6 per barrel.

Hardware.—The condition of trade remains very much as it was last week. We have heard of no price changes, and values may be described as fairly firm. The trade is quite active, especially in articles of a particularly seasonable character, such as skates, sleighbells, snow-shovels, etc. Metals continue in normally active demand. The following clipping should prove of interest as showing the way in which our manufacturers are regarded on the other side of the ocean. It is taken from the London Economist: "In 1901 Canada sent 53,000 tons of iron to this side of the water, the whole of it being landed in the Clyde, and in the early part of last year they shipped, on old contracts, 50,500 tons (46,000 tons to the Clyde). From now onwards it is admitted that the shipments will be regular, for the makers get a bounty of over $2 a ton on all they export; and as the bounty declines year by year, it is to their interest to force the pace, and dump as much as possible. How does the new Imperial fiscal policy stand to this proposition? The Canadian iron will enter into direct competition with Cleveland, of which large quantities are now sent into Scotland, and is lower in price, the lowness being regulated by the exigencies of the home sellers."

SEVEN TO ONE

That is about the ratio. About seven times as many persons are injured as die from all causes yearly.

Accidents are a more prolific cause of death than any disease except lung diseases.

Twice as many people are accidently killed as die of old age.

Does it not seem reasonable to you as a business man that it would be to your interest to carry an accident policy?

ASSURANCE CORPORATION
MONTREAL —— TORONTO

GRIFFIN & WOODLAND
MANAGERS.

Groceries.—Trade in general groceries may be described as having been very active, but probably not much more so than is usually the case at this season. Dried fruits have naturally been in good request. Sugars have displayed no striking points, but have been characterized by a fair movement. Teas are still firm in prices, but the movement cannot be said to be particularly large.

Provisions.—Really choice butter is scarce and wanted, while for inferior grades the market drags. Cheese is a little on the dull side. The strong position of eggs continues unabated, but new-laid are very scarce. Poultry has been coming into the local market more freely, but much of it is poor stock. Chickens are quoted at 9½ to 10c. per pound; geese, 9½ to 10½c.; turkeys, 14 to 15c.; ducks at 9 to 10c. The market for hog products continues very good, at firm prices.

Wool.—Nothing new has developed under this heading. Pulled wools are in fair demand from the domestic mills, but for fleece there is practically no call for export, with the result that the trade is very dull.

A prominent Montreal business man recently gave an agent of another company a proposal for a large policy, with the condition that it would be given to the Sun Life of Canada. This is unusual. It shows that business men have a knowledge of the merits of life companies

Continued Progress

During the last few years the North American has made marvellous strides in all Departments tending to its upbuilding, which can readily be seen by the following figures, showing a comparison of

Three SEPTENNIAL Periods

Year	Cash income	Assets	Policies in force
1881	$ 39,613	$ 88,763	$ 1,221,712
1888	263,691	666,919	7,927,564
1895	581,478	2,300,[illegible]	15,779,385
1902	1,270,840	5,010,813	30,927,961

A strong progressive Canadian Company giving excellent returns to its policy-holders, therefore making it a desirable Company for agents to represent. Three active agents wanted.

Word comes from New York that the highest skyscraper in the world is to be erected on Lower Broadway. With five storys below the level of the street, forty storys from the entrance to the top floor, and surmounted by a sixty-foot tower, the gigantic new building will have a total of 615 feet, making it over twice as high as the "Flat-iron" building, and almost as tall again as the Park Row building, which at present holds the record. Its cost, including the site, is estimated to reach $10,000,000.

THE

Mercantile Summary

MR. P. G. GOSSLER, heretofore with the Montreal Light, Heat and Power Company, has resigned to become connected with the Mexican Light, Heat and Power Company.

THE Consolidated Rubber Tile Co., of Canada, Limited, has been incorporated under Dominion charter with a capital stock of $50,000 to make and deal in interlocking rubber tiling for floors and other rubber goods.

THE Northern Industrial Company, Limited, Montreal, has just received a charter from Ottawa authorizing it to manufacture charcoal and other products of the earth; also to acquire flour mills and generate electrical and other power.

THE Dominion Government has granted a charter to the Laferriere Lumber Company, Limited, of Montreal; capital stock, $120,000. It will carry on a lumber and pulp wood business, and manage sawmills, factories, etc. Among the charter members are P. Laferriere and S. P. Stearns, of Montreal.

A LARGE boiler used in connection with the hot water heating system at the Wolseley Barracks in London, Ont., exploded on Sunday morning with the result of killing one man and seriously wounding five others. The disaster is supposed to have been caused by the clogging of a pipe, and the boiler had been giving trouble all day.

THE Farmers' Advocate, published at London, Ont., and Winnipeg, Man., is such a uniformly good paper and presents such excellent matter to its many readers, both in illustrations and varied letterpress, that we are pleased to see that, beginning with the new year, it will appear each week at the subscription price of $1.50 per year. It was started some thirty-eight years ago as a monthly, but since 1893 has been issued twice a month. It will continue as heretofore to pay attention to the best interests of the country, the home and the art of agriculture. Those wishing to subscribe should begin now so as to include the excellent Christmas number which has just been published.

LEGISLATION is to be applied for at Ottawa in order to confirm a lease from the Canada Southern Railway Company to the Michigan Central Railway Company, dated 15th August, 1903, to confirm a trackage agreement between the C.S.R., the M.C.R. and the Pere Marquette Railway Company; to declare that the Leamington and St. Clair Co. and the Sarnia, Chatham and Erie Co. are works for the general advantage of Canada; to empower the C.S.R. to acquire the railway franchises and undertakings of the Sarnia, Chatham and Erie Co., or to amalgamate with that company, to confer on the Leamington and St. Clair Railway Co. powers similar to those it possesses under the Acts of Ontario relating to the company to sell its railway or make agreements with the C.S.R.

SHIPMENTS from the Rossland, B.C., mining districts for the week ending Dec. 26th, were as follows: Le Roi, 3,836 tons; Centre Star, 1,680 tons; War Eagle, 1,080 tons; Le Roi No. 2, 410 tons, crushed, 250 tons; Jumbo, 280 tons; Kootenay, 319 tons; Spitzee, 30 tons; I. X. L. (milled), 100 tons. Total for week, 7,985 tons; for the year up to date, 403,260 tons, which is about 30 per cent. better than the previous record in this camp's annals. The Le Roi has been shipping pay ore from its 1,350 feet level for a month or more, and the favorable showing referred to at the beginning has been continued. This depth is said to be the greatest from which ore has ever been hoisted by vertical workings in the province.

Mercantile Summary.

M. DREYFUS, a civil engineer of Paris, France, who represents a large French firm, which holds the patents for making a special kind of steel for tools, has been visiting Sydney, Cape Breton, looking into the prospects offered for the building of a factory there. The firm already has works in the United States, South Africa, Mexico, etc.

THE Great Northern Railway this week began a through regular service between Montreal and Quebec. The contract has been closed for the construction of seventy miles of railway from Garneau Junction into Quebec, the estimated cost of the line being $1,200,000, towards which there is a provincial subsidy of $3,200 per mile. The line is to be completed before the end of 1904.

AT a meeting of the board of the Canadian Pacific Railway Company, Mr. David McNicoll, the general manager, was elected first vice-president of the company, and Mr. William Whyte was elected second vice-president, with headquarters at Winnipeg. He will be in charge of the maintenance and operation and general administration of the company's affairs in the territory between Lake Superior and the Pacific coast.

THE Nova Scotia Steel and Coal Company's output from its mines at Sydney was last year about 80 per cent. larger than in the year previous, and at the Marsh mine, near New Glasgow, 75 per cent. larger. During the year two new collieries were opened at Sydney mines, and produced 100,000 tons. It is estimated that 700,000 tons of coal will be raised next year. There was last year also a very considerable increase in the production of ingots and finished steel. The question of dividends will not be considered until February.

THE Dominion Government has appointed a commission to go to Europe to inspect the various plants that use the thermo-electric process for the smelting of iron ores and the making of steel. The commission consists of Dr. Haanel, Superintendent of Mines, and Mr. C. E. Brown, assistant and works engineer for the Canadian General Electric Co., Peterborough. A steel expert and a draughtsman will be selected to join the commission in Europe. There are, we are told, five establishments in Europe where pig-iron and steel are commercially produced by electricity.

BRITISH Columbia mining circles are interested in the deal which has just been completed by the American Smelting and Refining Company for the purchase of the Everett smelter from the Federal Mining Company. This is supposed to indicate that the American mine owners and the smelter trust have settled all their differences, and that, as a consequence, unless the ore supply on the United States side drops considerably below the demand, the American Smelting and Refining Company will probably not become a purchaser to any large extent of Canadian ore.

THE Sydney Manufacturing Company proposes to enlarge its works at Sydney, Cape Breton, and to establish a factory for making cars.

THAT was a pleasing thing done by the Winnipeg Electric Street Railway Company, when they, as a Christmas gift, made a present to all employees of 5 per cent. bonus on their salaries.

JOHN MCPHERSON & Co., boot and shoe manufacturers, of Hamilton, Ont., are adding considerably to their factory. They have been so crowded with orders this year past that they were compelled to increase their space for manufacturing purposes.

AT Washington, up to Saturday last, more specifications for patents and trade marks were printed in the Patent Office Gazette this year than in any previous year. A report of the work of this division shows 31,165 patents; 1,886 trade marks; 536 designs and specifications.

A DEMAND of assignment has been made upon L. P. Lebel & Co., haberdashers, Montreal. Lebel failed in 1901, when he owed $11,000, and he has since done business under cover of his wife's name. — Philias Sicard, a plumber in Montreal, has assigned, and files a list of liabilities amounting to $4,800.

A DEMAND of assignment has been made upon Pauline Bouffard, trading under the style of L. O. David & Co., general storekeepers at Buckingham, Que. Mr. David, her husband, was previously unsuccessful in business, and has made use of her name for some years past on account of old judgments against him.—J. E. Guimond, doing a small business at Grande Mere, Que., as a restaurant keeper and bottler, has made assignment of his estate.

AMONG the many well-wishers of The Monetary Times in Hamilton, Ont., is Mr. John Lennox, who does a large wholesale trade in boots and shoes. Our travelling representative tells us that one of the most pleasant calls he makes on any of his trips is his annual chat with Mr. Lennox, who, upon the last visit declared that, in his opinion, The Monetary Times is the best journal published in Canada to-day. The high estimation in which he holds our journal entitles us to wish him, as we do, a happy and prosperous New Year.

A DEMONSTRATION of the unemployed has been held at Toronto under circumstances which rather detract from its usefulness as an evidence of distress There are always in a large city a considerable number of workless men, if not of workless workers. It is not at all hard for one who knows the ropes to get a crowd of these together to demonstrate. There can usually be found about the corridors of Montreal's city hall a man who arranges demonstrations on a day or two's notice. Until there is an assurance that Toronto does not have a double of this individual, and that he has not been used by some one with a selfish purpose to serve, it will be well to discount the importance of this latest "unemployed" business.—Montreal Gazette.

Mercantile Summary.

As the result of a recent fire Mrs. E. M. McLean, doing a general business at Bathurst, N.B., is seeking a settlement from her creditors at 20 cents on the dollar.

WORK is now going on in the final surveys of about twenty miles of the Quebec, Western and Atlantic Railway in the neighborhood of Gaspe Basin, and it is likely that contracts will be given out shortly.

MR. THOMAS WILSON, of Vancouver, acting, some say, for a Scotch syndicate, and others say for the J. J. Hill transportation interests, has purchased a controlling interest in the Slave Lake Power Company for about $32,500, with a view to furnishing power and light in Vancouver, in competition with the Vancouver Power and British Columbia Electric Railway Companies' new system.

IN a report from Mr. J. S. Larke, Canadian Commissioner in Australia, he states that the company formed for the purpose of placing Canadian furniture on the Australian market has gone into liquidation. The manager is making arrangements to carry on the business, but manufacturers in Canada must, says Mr. Larke, study economical methods of knocking down, packing and freights to obtain the full market.

IT is announced that about 3,000 horse-power is now available at the North Arm works of Lake Beautiful for transmission to Vancouver, the British Columbia Electric Railway Company having almost completed its works for this purpose. Some of the machinery, however, for the Vancouver Power Co., a subsidiary company, has yet to be put in place, and when this is done some 10,000 horse-power will be available. In another year it is expected that connection with Lake Coquillam will also have been made, when the full supply of 30,000 horse-power will become available for industrial and illuminating purposes in Vancouver and New Westminster.

From Fox River, away down on the Gaspe coast, it is learned that Levine Bros., dealing in general merchandise and fish, are in embarrassed shape, and have approached their creditors with the view of arranging a 30 per cent. compromise. The business is an old established one, and their father, the late R. M. Levine, is understood to have left a moderate competence when he died some few years ago, but the cod fishery, on which their trade largely depends, has proved a comparative failure of late years.—P. Bourassa, of Yamachiche, Que., representing several agricultural implement manufacturers, and also dealing in hay and grain, is reported insolvent, and is said to owe $18,000. He was formerly a general storekeeper, but relinquished that line in 1890. His capital has become spread out in slow book debts in the country, and has been found irregular in payments for some time past.—The general store firm of L. O. Couture & Co., at St. Gedeon, Que., recently insolvent, have arranged to pay 30 cents on liabilities of $2,500

Mercantile Summary.

THE Dominion Paper Box Company, Limited, capital stock $395,000, has been authorized under Dominion charter to take over the machinery, stock and assets of the business being carried on under that name in Toronto. It will make and deal in paper, pails, calendars and other products of paper and print and lithograph in connection with the same.

THE Alexandria Realty Company, Limited, has been granted a charter by the Manitoba Government for the object of acquiring land and property in the town of Emerson and elseyhere in Manitoba. The company's headquarters will be at Emerson, the capital stock $60,000, and among the charter members are the Hon. D. H. McFadden and Mr. H. P. Pennock, of Emerson.

INVESTIGATIONS undertaken by the Nova Scotian Department of Mines confirm the reports of large deposits of nickel-copper ore at Cheticamp, in Cape Breton. The ore is said to be in a ledge about 275 feet in width, carrying gold and silver, and with high values in copper and gold. The lateness of the season will probably prevent any extensive development work on the property for some time to come.

THE Hally & Boyd Shoe Co., Limited, of Toronto, which was incorporated in July, 1900, succeeding to the old firm of Hally & Boyd and Hally Bros. It had an authorized capital of $40,000. A statement of November, 1902, showed them to have a surplus of $9,000 over liabilities of $7,500. Latterly they have been very slow pay, and several writs have been issued against them. They now assign to Osler Wade, with liabilities of about $14,000.

SEVERAL suits have of late appeared against W. J. Allen, who is a watchmaker and jeweller at Glace Bay, N.S., and he is now making an offer of 35 cents on the dollar.—In the spring of 1902 J. A. Newell began storekeeping at Cape Islands, N.S. He had had some experience of merchandising as a clerk, but is said to have bought goods very liberally, and to have been not careful in the matter of expenses. He has now assigned.

OVER-PRODUCTION OR UNDER-CONSUMPTION?

A despatch from an interior village stated that a certain mill there has been shut down on account of "over-production." There is danger of this term "over-production" being over-worked. Much of the so-called over-production of the present moment is not over-production at all, but under-consumption, due largely to the fact that an army of workingmen, through strikes, have deliberately deprived both themselves and others of the means of obtaining things to consume. Their needs and desires are as great as ever, but they have cut themselves off from the power to satisfy them. The distinction is important.—N. Y. Commercial.

TRADE WITH NEW ZEALAND.

Several signs at the present day serve to indicate that the recently enacted preferential legislation in New Zealand has conduced to a very general interest on the part of the commercial circles of that colony in Canada. One large firm, with offices in England, and doing a wholesale business in New Zealand, writes as follows:

"On account of the preferential tariff we would like to have quotations from you on the following: Canadian axles, half patent; common nut, Hughes' patent, and Richards' long distance, the same as we have been getting from the company; Bidwell's axle grease; sewing machine oil in 4 oz. bottles; wrought step treads and shaft couplings, whip sockets, dash rails, bevel edge carriage bolts, felloe plates; 36-inch white cotton duck, No. 5 (for the last year we bought about 22,000 yards of this); 36-inch, No. 6 ditto, 54, 60 and 62-inch No. 6 ditto; blue cut Swede iron upholsterers' tacks; buggy harness. Please let us know what saddlers' tools are made in Canada. Also let us know if you make sweat pads with three hooks, No. 22 KIO. Quote us also for reaper slats for putting on the aprons of reapers and binders, 60x¾x⅜."

UNDIGESTED SECURITIES.

When Opie Reid the veteran humorist, lived at Little Rock, Ark., he had a love for fine raiment, which his resources never allowed him to gratify with more than one gorgeous garment at a time. One summer he had a beautiful white waistcoat with red rosebuds on it, which was his pride and delight. The rest of his clothes were indifferent, but the waistcoat was a joy.

One day a man came in and handed him a ten-dollar bill on an advertising contract. Mr. Reid immediately sought the local bank and got it changed into one-dollar bills, which, with four he already had, he rolled up and tucked into the pocket of his precious vest. He then walked about town, stopping and talking to every friend he met. Casually during the conversation he would draw the money from his pocket, and, without looking at it, unroll it abstractedly, and then carelessly stuff it back in the pocket. Before he had gone far, a friend asked him to go on a little hunting trip. He hurried home, hung the waistcoat in a closet and joined his friend.

"It was over two days before I got back," says Mr. Reid in telling of the occurrence. "My wife met me at the door. I saw something was wrong 'What has happened?' I asked anxiously.

"'Your vest I put it in the wash The laundress hung it out on the line an hour ago, and a stray cow came along and ate it up.'

"'Merciful stars,' I cried, "what about the money in the pocket?'

"'It must have gone, too I didn't know there was any there.'

"'But why didn't you look?'

"'My dear, I've been looking in your pockets for money for five years, and have never found a cent. I gave up six months ago.'

"'I hunted up the owner of the cow, and demanded that the beast be killed and my property secured. He refused on the ground that he was a poor man, that he had just bought the cow, and that all his money was in her. My obvious reply was that all of my money was in her, too, but it failed to move him.

"I went over and abused the cow roundly, she gazing mildly at me. I searched her ribs, and even thought I could detect a slight hump, but that was all the satisfaction I ever got. My beautiful vest and my hard-earned roll were gone.

"It happened too soon It it had been now, I could have told the cow to cough up, but the expression hadn't been invented then"—Saturday Evening Post

COMMERCIAL TRAVELLERS' ASSOCIATION.

The Commercial Travellers' Association held its annual meeting in Toronto on Wednesday of last week. The subject which raised most discussion was on the question of reorganizing the mortuary bonus system, it having been alleged that in past years the association has been paying benefits in excess of the premiums paid. It was finally decided to postpone any action on the matter. The financial statement showed a balance of $31,277.24 in the profit and loss account, and $6,654.44 clear profit. The relief fund was increased during the year from $989.90 to $1,785.20. The total membership of the association is 6,401, an increase of 544.

The election of officers resulted as follows: Toronto Branch—President, Thos. McQuillan; vice-presidents, H. Goodman and L. A. Howard; treasurer, J. C. Black; directors, L. Duncan, John Gibson, A. F. Hatch, R. Keyes, M. Lamont, J. H. Lumbers, C. Ryan, S. M. Sterling, and Joseph Taylor. Hamilton Branch—President, F. T. Snaye; vice-president, J. H. Herring; directors, E. J. Fenwick, James Hooper, E. E. W. Moore, G. N. McGregor, W. G. Reid, and H. G. Wright.

THE NEW YEAR.

Let us walk softly, friend;
For strange paths lie before us, all untrod;
The new year, spotless from the hand of God,
Is thine and mine, O friend!

Let us walk straightly, friend;
Forget the crooked paths behind us now,
Press on with steadier purpose on our brow,
To better deeds, O friend!

Let us walk gladly, friend;
Perchance some greater good than we have known
Is waiting for us, or some fair hope flown
Shall yet return, O friend!

Let us walk humbly, friend;
Slight not the heartease blooming round our feet;
The laurel blossoms are not half so sweet,
Or lightly gathered, friend.

Let us walk kindly, friend;
We cannot tell how long this life shall last,
How soon these precious years be overpast;
Let love walk with us, friend.

Let us walk quickly, friend;
Work with our might while lasts our little stay,
And help some halting comrade on the way;
And may God guide us, friend!

TORONTO STOCK TRANSACTIONS.

A glance at our stock and board report will show that prices for most of the commonly quoted stocks remain fairly well up, though the upward movement in any given period is but a slow one. The volume of business, however, is very small, and the past week has been especially slack.

UNITED STATES FINANCES.

Henry Clews & Co., New York, in their weekly letter, dated December 24, say:

No special activity can be expected on the Stock Exchange until after the holidays, or until the plans and changes incidental to the new year go into effect. The old year, however, closes in better and sounder condition than it opened, values being upon a much more stable basis than a year ago; while the enormous losses during the year, unfortunate as they have been to many, have had the very desirable effect of stopping reckless promotions and speculation. Propositions that would have been eagerly taken up in bank parlors twelve months ago could not to-day secure even a respectful hearing, and there is little prospect, if any, of a renewal of the daring operations which culminated in the rich man's panic of 1903. We are now undergoing the process of recovery from a sharp attack of syndicaitis, one of the modern maladies. Improvement is not likely to continue without interruption; but drastic remedies have been applied, and as the patient's constitutional vigor has not been impaired, the return to normal health ought not to be far distant. The money market is no longer a subject of anxiety, and the much-feared stringency did not appear during the crop-moving season. Like nearly all foreseen disturbances, it was averted by anticipation. Funds are now returning more freely from the interior; so that, barring any flurry incidental to dividend and other disbursements January 1st, bank averages ought to rise for the next two or three months. Gold imports have also been on a fairly liberal scale, and international trade conditions indicate that this movement has not ended, although easier money rates here would quickly stop the influx. Our bank loans continue at a high figure, this being one of the least satisfactory features of the situation. Bankers, however, show no uneasiness over the loan situation, being amply protected by good collateral. The speculative situation is certainly brighter, and a very fair rise has been established, but the short interest considerably diminished, so that while the outlook is promising buyers will soon begin to require fresh stimulus in the form of new favorable developments. Stocks are now concentrated in strong hands, and evidently held for higher figures, standard railroad shares being a purchase on all recessions of importance. Rumors of

war between Russia and Japan attract attention, but the effect upon this market has hitherto been slight.

—Hon. Mr. Blair has resigned his seat in Parliament with a view, it is said, to being appointed chairman of the Dominion Railway Commission.

—Department Store Ribbon Clerk—"I simply cannot mesmerize people into buying this ribbon at six cents a yard." Floor Walker—"Well, cut it up into two and three-yard lengths and mark it 'Remnants—only 11 cents a yard.'"—Judge.

—The election of officers for the North-West Commercial Travellers' Association, the annual meeting of which body was referred to last week resulted as follows: President, F. H. Agnew; vice-president, F. C. Fahey; treasurer, L. C. Macintyre; secretary, Fred J. C. Cox; directors, R. M. McGowan, F. M. McGowan, T. A. Anderson, F. W. Drewry, G. F. Bryan, John Horne, W. W. Bole, J. N. McTaggart, D. J. Dyson; British Columbia, Vancouver, vice-president, James Beveridge; directors, Thomas Parkinson, A. H. Walbridge; Victoria, vice-president, H. G. Wilson; director, J. C. Devlin. New Westminster, J. C. Cunningham. Kootenay, James Lawrence; secretaries, C. W. Low, F. H. Nesbitt and A. C. Foster.

—The National Trust Company, prior to the recent failure of the two St. Thomas loan companies, agreed to hold certain shares of Dominion Coal and Dominion Iron and Steel stock on behalf of the Elgin Loan Co. Subsequent to the appointment of the Trust Company as liquidators of the Atlas Loan Co., a demand was made upon them for the stock certificates, but they refused to deliver them, on the ground that the Atlas Loan Co. was interested in them. The liquidators of the Elgin Loan have now been awarded in the courts the sum of $7,100 damages from the National Trust Co. for this detention, because whereas the latter had been instructed to sell the Coal stock when it went above par, and though the stock had actually gone up as high as 108, it had had actually to be sold at 93. The Iron and Steel had also been treated in a similar way. The sum awarded by the judge represents the difference between the amount actually realized and that which would have been realized had the alleged instructions been carried out.

In an English newspaper we see that the initial steps have been taken by an American syndicate to capture the retail grocery and provision trades in the provincial sections of Great Britain. A start has been made in Lancashire, where some fifty shops in various towns have been acquired by the trust. They are all established businesses, and the Americans, having retained the names of the late owners, and in several cases appointed the latter as managers, the townspeople are in ignorance of the change of proprietorship. The principal members of the trust are said to be a Chicago firm which exports to this country enormous quantities of American beef, bacon, ham, lard, and canned goods. In several large cities, including London, distributing centres for the wholesale supply of these commodities have been established. By the new scheme they will retail their own provisions in combination with groceries. The English grocery interests are considering some plan for retaliation.

—It is rumored in Washington that the United States Government will recommend the passage of the Tawney bill, which was introduced some time ago, and the object of which was to empower the President to conclude negotiations with Great Britain for a review of the condition of affairs relating to the protection of fur-bearing animals in the Behring Sea country, to determine what further regulations shall be ordered to restore the industry, and pending the investigation and review, to authorize the President to conclude a modus vivendi with Great Britain, whereby the killing of any or all fur-bearing seals in the land or in the sea by the subjects of the respective Governments should be entirely prohibited, except the few hundred young male seals needed by the natives of the islands of the St. Paul and St. George for food. In the event that effectual regulations for preserving the Alaskan seal herd could not be agreed on, the Secretary of the United States Treasury was authorized to collect every fur seal of the Pribilof Islands except 10,000 females and 10,000 males.

Economy in Lumber Cutting.

A prominent lumberman stated recently that, in his opinion: **Every gauge saved** on your saw meant **twenty cents per thousand** added to the value of your entire cut.

The ordinary **circular** cutting forty thousand per day is **6 gauge**. The **Band** never over **14 gauge**.

Its use therefore adds $1.60 per thousand to value of lumber produced.

Double Cutting-steam Feed Steam Niggers, Loaders, Kickers and Steam Setters — add larger percentage to daily cut reducing cost per thousand.

This Pony Band—Single or Double Cutting—using **15** or **16 gauge short saws** is within the reach of all. You should get into line—get posted —make the change—it's simple. Many hundred Bands running in Canada.

MR. CHARLTON'S RECIPROCITY TALK.

Various Boston, New York, and Chicago papers have comments upon Hon. John Charlton's recent address to the Boston Chamber of Commerce on the subject of Reciprocity with Canada. Himself an influential Canadian, and well informed upon United States affairs, Mr. Charlton is yet more favorable towards reciprocity between the two countries than the majority of Canadians. While he sees that free trade between the two countries is impracticable, he urges that some steps towards a greater interchange of products free of duty, must be taken by the States if they would not see the Canadian tariff made higher than it is. He quotes figures, too, which show that Canada was a greater purchaser from the United States last year by $30,814,000 than Mexico, Central America, and all the South American republics put together, a fact which the Northern States people see and understand, but to which the Washington politicians seem to close their minds. Protectionist feeling in this country, as well as the feeling of those who are in favor of an Imperial preference, *pro* and *con*, with Great Britain, and her other colonies combine to lessen the chances of reciprocity with the States. Canadians do not greatly care, but the New York Evening Post seems to care, for it says, commenting upon the busybodies at Washington trying to get gold out of rainbows at Panama, in Manchuria, or elsewhere: "Compared with the trade that might be easily at hand [on our Northern border], Abyssinia, China, and riches in transit over the Isthmus are vague unrealities. How shall this nation be led to that kind of wisdom which recognizes and values the good within its control? Certainly not by lending the colors of romance to the possibilities of distant exploitation, but rather by studying a market whose needs we perfectly understand, whose natural products we can use advantageously in exchange, and whose willingness to purchase has been thoroughly proved. A merchant who should let such an opportunity slip would be branded as an imbecile. So harsh a word would be only too appropriate for an Administration that should let the present opportunity for increasing our trade with Canada slip through its inert hands."

BOYCOTTS AND SYMPATHETIC STRIKES.

The outlook in the labor world is far from being settled. The spirit shown by labor leaders is very far from that which breathes peace on earth; good-will towards men. We have the emissaries of labor unions in Canada telling broadcast untruths about the "unemployed thousands" in Toronto; and at the same time accusing manufacturers of all sorts of bad faith in their efforts to get from other countries workmen who do an honest and untrammelled day's work for a reasonable wage. But we know of cases where the bullying of labor leaders has prevented capable and willing men from working at their trades for months. And if such men have no work and no money now, the fault lies at the door of the union men who coerced them.

It has been well said that the responsibility for such hostile displays in the name of labor as have recently disgraced various cities in the United States, lies with the organizers and leaders rather than with the workmen, who are largely misled. These teach doctrines that lead directly to the subversion of liberty and law. They include the "union shop," the sympathetic strike and the boycott among what they call "union principles."

In a recent article, the significant title of which is "The Menace to Liberty and Law," the New York Journal of Commerce says, with much point: "The very essence of the sympathetic strike is injustice to one under the pretext of securing justice for another, and it involves bad faith, the breach of contracts and damage to the business of those who are not responsible for the alleged wrongs that they are intended to correct. The boycott is nothing but a lawless and barbarous method of enforcing the decrees of labor unionism by coercing the whole community into a scheme for ruining the business of those who have refused to submit."

As to the claim sometimes heard that the working man does not get a fair show from the law, our contemporary says: "There is in this country no longer

any question of oppression by those in places of official power. There is hardly a question of oppression of the people by owners of capital and managers of industry and trade. They are not sufficiently numerous or sufficiently united and they have not the power of government on their side. The worst form of oppression and the greatest danger to the rights and liberties of the people come from these bands of men affiliated together in combinations of labor unions as they have of late been conducted."

SHOE AND LEATHER NOTES.

The feature of greatest current interest in the trade is the resumption of work in the Quebec shoe factories. Some matters still remain to be arbitrated upon between employers and employed down there, but so far as one can see, the fact that the decision to resume work has been arrived at, means a practical settlement of the trouble. This is a great relief, not only to those who wish well for the prosperity of the ancient city, but for those whose interests were bound up in the boot and shoe industry. In one way no little harm has been done already. The jobbers, who deal in Quebec products (and most of them do), and who are generally able to deliver the goods to points in the North-West, for example, early in January, will this year not be in a position to do so much before March 1st; and this will cause serious inconvenience to merchants in that region. The latter will see no doubt that the delay has been unavoidable, but this will hardly atone for the partial dislocation of their trade.

Apart from this untoward feature, the condition of the boot and shoe trade may be described as good. The spring trade promises to be highly satisfactory. Prices are steady, though even yet they are hardly on a parity with the cost of labor and materials. As to styles, the most striking point, perhaps, is the almost total disappearance of the patent kid, except for dancing shoes. Consumers now see that except for a really high-cost shoe, patent leather is practically impossible, and the many cheap grades put on the market were the main thoroughfare to its practical extinction. The most popular widths of both boots and shoes, for men and women, will be medium, neither the old razor-blade toe, nor the more recent square, heavy-set shape. Tans are certainly regaining some of their old-time vogue, and with reason. Dealers report a heavy demand for rubbers during the last few weeks, because though in the immediate vicinity of Lake Ontario there has been but little snow, yet in other parts of the Dominion the winter has been a "seasonable" one. One wholesale house reports that so far its sales of rubbers have exceeded by several thousands of dollars a similar period of last season.

Leather merchants report that during the past autumn business has been a little on the dull side, but that now the holidays are almost over and with seasonable weather their sales may be expected to increase. Prices of leather continue steady to firm. It may be worth noting that tanners in the United States are trying to bring about a reform in the methods of buying and selling hides and skins. These chiefly refer to keeping the hides free from dirt, tail-bones, manure, etc., and suggest the allowance for additional tare when such substances are present; and also make certain revisions in the grading.

MARINE LOSSES AND INSURANCE.

Reading statistics given elsewhere of disasters on the high seas has suggested further enquiry into the conditions of the year which has just drawn to a close as far as regards marine losses and insurance thereon. According to the London "Fair Play," the marine losses of 1903 have been heavy in every part of the world. The "Coast Review" declares the losses on the Pacific Coast to have amounted to 84 per cent. As to our inland waters, in the opinion of the "Buffalo Courier," the season just closed has been the worst since 1898. Speaking of disasters on the Great Lakes, a letter from Amherstburg, on Detroit River, describes the conditions on that wonderfully busy strait. We quote a sentence or two:

"Thus far this month the weather has been very wintry, and it has been interesting to watch the contest on the river between the ice and steam forces. This contest has been wonderfully in favor of the latter during this fall and winter. As you will have seen by the papers, the past season of navigation on the inland seas has been a stormy, dangerous season; and everybody connected with shipping, everybody in especial who has relatives among sea-faring (is it proper to say lake-faring?), men, is relieved that it is over."

Parts of the letter refer to the extraordinary and perilous journey through the lakes of the steel steamer "Hutcheson," which, with a cargo of flax seed, having stoved a huge hole in her bottom by striking a rock in Lake Superior during a fog, was heaved off the jagged rock by the storm of a week later, and was successfully taken through conditions of ice and snow and storm as uncanny as anything the Ancient Mariner had to tell, through lakes Huron and Erie to Buffalo, in the month of December. The men who brought her through were nothing short of heroes. If we wonder at the risk taken on such a journey, we may remember that the hull of the ship was insured for $210,000 and the cargo for $180,000, and that the underwriters were therefore heavily interested in getting her through, ice-coated and battered as she was.

The past season of navigation was not one to be looked back upon with pleasure by vessel owners. It was generally unsatisfactory; the two main reasons being, first, unremunerative rates of freight and second, the delays and harassments caused by strikes of various classes of employees on ship-board, and by coal handlers and other union men ashore. The wrecks of the year were numerous. One Chicago paper states that 52 wooden lake vessels valued at $924,600, passed out of existence last year, but no steel ship was lost.

Marine underwriters have had a discouraging season on the lakes. Burnings of vessels have been numerous, and the losses on grain cargoes have, it is said, exceeded the premiums for the first time in many years. Among the instances which come most readily to the memory may be cited the schooner "Emerald," total loss; the "White Star," burned, say $25,000; the Georgian Bay steamer "Atlantic," a total loss; the "Myles," on fire, the "Pittsburg," a total loss, the "Empire State," burned, the "Advance," probably a

$20,000 loss. It is declared by a writer in the Detroit press that the aggregate of insurance losses on the Canadian and American lakes this season have amounted to $2,100,000, which is probably enough to swallow up all the premiums. It is generally admitted that Lake Erie, though shallow and narrow, is a dangerous lake for mariners; this reputation has been maintained this season, for out of the 522 marine disasters tabulated last season, she is charged with 119, while Lake Michigan had only 93 and the vast and tempestuous Lake Superior claims only 60. The causes of most of these disasters and losses were getting aground or ashore—which is not to be wondered at, for there still exists a perfect craze to build steamers longer and longer and of deeper draft, while such passages as the Sainte Marie river and the limestone crossing at Detroit river still remain adapted only for steamers of lesser draft and length. There were 101 cases of collision reported; 13 ships were waterlogged and 15 foundered.

THE DANGERS OF THE SEA.

It has been stated in a recent compilation that no fewer than 6,621 wrecks and casualties have happened to ships belonging to the United Kingdom during the last five and twenty years. These were attended with fatal results to 41,267 persons. Nearly seven persons out of every eight whose lives were lost were members of the ships' crews, and only 6,312 were passengers or pilots. The average annual loss of life by accident or shipwreck in that period was 1,651 persons, say 1,450 crew and 250 passengers.

Last year, that is 1902, there were reported to the British Board of Trade accidents to 1,483 vessels, of which 348 became total wrecks. The number of lives lost by sailors was 959, and of passengers 698, making the total loss of life in the twelve months 1,657. Sailors to the number of 380 lost their lives on sailing vessels and 579 on steamships; while of the passengers, 676 lost their lives by steamship disasters and only 22 by sailing ships.

Commenting on these figures, and on some others derived from the same source, the Insurance Spectator, of London, asks, what is the outlook? The answer is that for one thing the need for marine insurance in a greater variety of forms will steadily increase, "simply because it is certain that the traffic on the ocean will now enormously develop; and that ere many years have passed by, the floating population on the high seas, to say nothing about the property there, will attain dimensions never even dreamed of by the pioneers of steam navigation." It seems as if we are at only the beginning of a new era in ocean transit, and the fresh start just made in building very big ships again, in spite of the unfortunate experiences of the "Great Eastern," shows that a further attempt will be made to reproduce something in the nature of veritable floating towns. Therefore, argues our contemporary, it is absolutely essential that they carry adequate insurances, for if such ships do go down the loss is appalling. "This, however, will again introduce new features into marine insurance, as obviously the colossal risks of the future will have to be specially dealt with. In our opinion, we are now only at the threshold of very important changes in ocean traffic."

If this is true of the ocean, it is measurably true, also, on the Great Lakes and rivers of the United States and Canada, where, and especially between lakes Superior and Erie, steamers 400 and 500 feet long, and carrying 5,000 to 8,000 tons are becoming common..

SOME NEW YEAR'S FABLES.

HARD-TIMES VICTIMS.

The tale goes that once upon a time a traveller passing from Cairo to Alexandria in Egypt met the shrouded figure of Cholera going in the contrary direction.

"Oho, Cholera," said he, "where are you going?" "To Cairo," was the reply, "where I am going to slay 10,000 people."

The traveller felt saddened at such terrible tidings, but went on his way.

A year later he retraced his path and again met Cholera.

"Alas, Cholera,," was his greeting, "I hear that a hundred thousand people have died in Cairo; yet you told me you were only going to kill ten thousand."

"Sir," returned Cholera, "I have kept my word; I slew only ten thousand—fear did the rest."

Moral.—Hard Times is a ruthless destroyer, yet the fear of coming depression is a very potent factor in bringing the Hard Times here.

THE PERFECT BUSINESS MAN.

He had read somewhere of the remark reported to have been made by a successful financier in the United States to the effect that whether or no a young aspirant to worldly success were busy or not, he should always pretend to be full up to the eyes of work, because "busy-ness makes business." One of his first employers, too, had once in a rush of confidence and reproof, ensuing upon finding the young man engaged, perhaps, in thinking but certainly not in any particular task, told him how when he (the employer), had been a young employee in an office, it had always been his ambition never to let the "old man" find him without something in his hand even though he should only be pretending to be working on it. Under these great and inspiring influences, our would-be Pierrepont Morgan speedily came to the conclusion that sham toil lengthened out on nothing counted for more than a real task quickly accomplished with all a man's might, in order to get it out of the way and begin on the next, or if there was no next, for the merely human reason of enjoying the ensuing moments of leisure.

He took another step forward and made himself see that the appearance was most of everything. He read interviews with prominent men of the day, giving recipes (more or less patent), for the achievement of Success (with a capital S); and finally came to the conclusion that character was the main thing. He was a progressive, up-to-date young man, however, and could not afford the time required for slow old Nature to furnish him with such a commodity. So he carefully studied systems, and the American journals, which now-a-days tell how characters may be made

by machinery while you wait, just as any science may be acquired by mail in so many weeks or months; and noted the postures and modulated accents of certain business men who vary the form of their address according to the supposed importance of him or her with whom they may be speaking. He was very cold and calm and systematic, and was always very busy.

In the commercial institution which he adorned with his early services, and where he could have given the managers so many pointers on business deportment, they being merely ordinary human beings who sometimes in slack seasons broke office decorum with a hearty laugh or kindly, unbusinesslike sentiment, our coming Rockefeller or Pierrepont Morgan (for this was one point upon which he was not yet quite sure), rose quite rapidly, for he was possessed of ability and had studied the mysteries of personal magnetism by mail. He, however, now thought the time had arrived to branch out in business for himself, and accordingly launched his high-tonnage warranted-correct Character on the sea of life.

His offices in the down-town district were roomy and perfectly equipped with all the latest labor-saving devices; his methods honest (for that was the policy which paid), and his clerks talked in subdued tones, except when their master took his ten-minute, quick-lunch at a nearby restaurant. And he was always busy; so very busy that among his first clients one said it was a pity to disturb such a very occupied man with so small a matter; another (who was a woman), remarked to a bosom friend that there was something about Mr. So-and-So she did not altogether like, though what it was she did not know; while a third, who knew a few things, gave it as an opinion expressed silently to himself, that a man who, with only two hours of work daily, pretended it was twelve, was a bit of a hypocrite, and therefore to be shunned. For some reason or other, the first cases of his clients generally proved the last.

Moral.—Business methods are good, but men are human, social beings even in business.

ENGLAND WAKING UP.

It is said, and truly said, the English dearly love a lord, and it has been evident they hearken to a prince—always provided the prince is not a foreign one. The "hearkening" we refer to was the message of the sum-total of the Duke of York's impressions after his tour of the self-governing colonies, in three words: "Wake up, England!" Those crisp words were uttered not long since, yet we find to-day evidences of awakening in all quarters of the Old Country, which even the solemnity of the noble Earl Rosebery's advice of "Commercial repose" cannot coax back to slumber.

The sixty-year-old theories of Cobdenite inspiration—"free imports"—are crumbling to atoms; obsolete and clumsy hand labor is replaced by labor-saving devices; ancient and grimy London is being gradually "electrified," and, stranger than all, Britain's archaic currency has been banned. The last seems to good to be true, but, if it is ever reformed, the Americans and Canadians, who have wrestled with the "haggis" of farthings to guineas, will be devoutly thankful, while the gain to Anglo-Canadian-American finance and commerce will be beyond computation.

We gain our inspiration for this eulogy from the literature of the Decimal Association of England, and the records of its growing success. From the latest mails and trade journals to hand, we note, among others, the resolution of an influential body, the Paper Makers' Association, favoring decimal currency; while the weighty opinion of the council of the Incorporated Accountants has been made public that the adoption of the metric system of weights and measures, and the decimal system of coinage for the United Kingdom is advisable.

Why the United Kingdom has clung thus long to its methods, in the face of American and European successful economies, passes the wit of a Canadian? But, better late than never. Provided they have not previously done so, we advise the British institutes of engineers, surveyors, secretaries, and bankers to study the simplicity and economy of a decimal currency, and to adopt it; leaving the more difficult reform of the weights and measures to be occomplished later. We in Canada, who up to forty or fifty years ago transacted our business in pounds, shillings and pence, never knew what a comfort the decimal system was till we tried it. Having tried dollars and cents as a currency, no inducement would ever take us back to L. S. D.

EVERY-DAY ENGLISH.

Some time ago, a correspondent was kind enough to compliment the editor of the Monetary Times upon evidences which the paper bore of watchful editing, not only in respect of excluding libellous or unseemly matter from its pages, but "in maintaining an apparent censorship over contributors in excluding such slang phrases or corruptions of English as are often to be found in our journals." While not accepting this compliment in its entirety, it may be said that we do take pains to have reasonably good English used in these columns—difficult though it sometimes is to determine what *is* "Good English" in the maze of recent changes or innovations in language.

In a series of papers recently contributed to the University of Toronto Monthly, there are some Notes on Every-Day English, by Thomas Langton, M.A., K.C., which are of interest. Correct English, he tells us "is that which is used in speaking and writing by cultivated people." But "all cultivated people consider their English to be correct, however much they differ in their usage." "Americanisms" are contemned by the British, just as the United States people insist on censuring certain forms of English expression as "Briticisms;" and then there are to-day Canadian, Australian, and New Zealand usages of language to be considered. "Colloquial speech is not easily to be forced to conform to any standard; the colloquial and literary forms of the language will have to accommodate themselves to one another." Mr. Langton goes so far as to say that familiar, every-day English in Ontario resembles that in use in the United States more than what is used in any other English-speaking country. And many of our ways of life and speech "are, like many American usages, merely examples of the retention of forms which the Motherland has outgrown," or of the acquisition of new forms by natural growth to suit new conditions.

Among the first instances of what may be called un-

natural English, and certainly the most striking ones, are those of "the multitudes of newspaperese words" which our daily journalists have got into the habit of using. The cause of this extravagance of verb and noun appears to be borrowed from American writers, who are notorious offenders in using "highfalutin" English. For example:

A thing is not "begun," but is "inaugurated." A house is not "situated," but "located" in a "section." Events "transpire," or even "eventuate," when they take place; they are not "expected," but are "anticipated." Individuals," when they are "interviewed," "state" their opinions. The great or notorious "reside" in "mansions;" the benevolent, generous or politic "donate" money. Admirers "tender," and the admired are made the "recipients" of "ovations," receptions, and even lunches.

No one need find fault with the employment of commercial or financial terms to express commercial or financial transactions; though some do complain of the addition to the language of terms originating in the fields of manufacturing, commerce or mining. Some curious expressions which have come into use in North America of late years occur to one. Among these are: "It's up to you," the meaning being, it is now your turn to explain or to respond. Did this originate in a certain game of cards? Again, "Jim's up against it good and hard," meaning presumably the luck is against Jim, or else Jim has a hard task. Still another of these curious slangy phrases is, "He turned me down," implying that some one had refused his application, or decided against him. Is this a modern application of the decision of the populace in a Roman arena when, a gladiator being disarmed or wounded in combat, his opponent turns to the spectators to know whether the wounded man shall be killed or spared, the usual reply being the brutal one, "pollice verso"—the thumbs turned down, meaning death to the vanquished?

Some words, Mr. Langton properly says, may be called Canadianisms, because peculiar to businesses or pursuits in this counrty. Of such are "portage," or "lacrosse," and such expressions used in the lumber trade, as "boom," "slide," "crib," "shanty." It is quite common for even others than business men to use the word "balance" instead of remainder as, for instance, "the balance of the Canada Company's land was otherwise disposed of." "Bogus" is in ordinary use to express a counterfeit or worthless thing. Persons who deal in or manage land are usually called "real estate agents," rarely "land agents." And a mortgage or a note is "lifted" by a farmer when he takes it up. "Posted" or "well posted up" is common instead of saying that a man is versed or well-read in a subject. The use of "store" to express "shop" is one of the commonest phrasings amongst us, though Mr. Langton sees its use declining, since of late we "do shopping" or else "go shopping." Americans and Canadians alike say "fall," meaning the fall of the leaf, instead of autumn, to express the third season of the year. And a man "quits" work, instead of leaving off; while "conclude" is often used instead of decide or determine, as, "He concluded to go."

In reference to slang, Mr. Langton's paper says: "Waves of fashion in slang pass over us . . . a catchy word or phrase takes the fancy of the day. He gives examples: A young friend of mine will refer to his teacher. "Jimsey is a decent old chump," quite naturally, as if that were the ordinary mode of expressing the idea. A maturer friend, enquiring about the condition of a typhoid patient, asks: "Is he batty?" I somewhat pedantically enquire: "By 'batty' I suppose you mean delirious?" "Yes," he replies, "I mean looney." So "gall" and "cheek," and other such words, are part of the ordinary vocabulary of many persons . . "Bally" and "swagger" would appear to be well on their way to the same position in England. I do not suppose that "chump" has yet become a dictionary word, but who can say what may happen in the commercial contest for the dictionary which can boast of the greatest number of words.

Such words as "Jolly," "awfully," and "beastly" have a pretty firm foothold in colloquial English. Who among us have not heard what are termed society people indulge in the absurd expressions, "she is awfully pretty;" "I have such a beastly cold;" "the Montreal team were jolly well licked," when their meaning was, in the last case, thoroughly beaten.

Another curiosity of current literature, though not exactly covered by the heading chosen for this paper, the mistakes of authors or type-setters, is one that shows how mistaken or even slip-shod the writers of modern good English, or the compilers of modern books may be. At one of the annual lectures before the Royal Victoria College, in Montreal, Professor Colby, of McGill University, whose subject was "The Diversions of a Reviewer," gave some very amusing incidents of ridiculous language in some of the many books it has been his lot to review.

He told of the slips which occur in book-making when it would seem as though the printer's devil amused himself by twisting sentences just enough to caricature them. A few days ago that excellent daily, the Boston Transcript, in alluding to a famous scene in Canadian history, said that General Wolfe recited "Grey's eulogy to his troops just as they were about to scale the heights of Alabama." And again, in the second act of "As You Like It," a compositor took it upon himself to modify certain lines. What greeted his eye in the volume of Shakespeare was "Sermons in stones, books in the running brooks." "Nonsense," he cried, "Sermons in books, stones in the running brooks, that's sense," and so he made it read. Slips which occur in weighty books of reference are almost incredible, says Mr. Colby. Thus in Harper's Book of Facts, Mont Blanc is placed in the Swiss Alps; Montreal, under its own heading, is styled the second city in Lower Canada, and under the heading of the American Association of the Advancement of Science, Montreal, is twice placed in Ontario; the French river Marne is said to be a tributary of the Rhine; and Hannibal and Napoleon are both said to have crossed the Alps by the Little St. Bernard Pass.

—There are always anomalies in commerce, especially in a country as big as Canada, with a frontier bordering on the United States for 3,000 miles and with sea-board on both the Pacific and Atlantic oceans. But there are certain kinds of anomalies that can be, and ought to be, cured. To-day we have Old Country public speakers and newspapers objecting to our "bounty-fed" pig iron and steel being "dumped" on their shores. And at the same time we Canadians are importing hundreds and thousands of tons of structural iron and steel from Germany, Belgium, and the United States, some, too, from Great Britain. While Canada cannot yet profitably produce all the numerous higher forms of delicate iron and steel manufactures that these older countries do, she might produce iron and steel plates and girders if the tariff, which is formed to protect pig iron and steel billets, were adjusted so as to place an equivalent rate on structural iron and steel. Here is a specific instance in which, it seems to us, a readjustment of the tariff is immediately justifiable.

JAPANESE TRADE.

Seeing that the portion which we last week published of Mr. Ballard's article on Japanese trade with the United States has attracted some attention, we give to-day the remainder of it. The facts and figures are mostly to be found in a report from Mr. E. C. Bellows, the United States Consul at Yokohama, and the June summary of the Washington Bureau of Statistics has also furnished part. The broad statement is made that the United States bought one-third of the total exports of Japan during the year 1902, after which the article goes on: "Nearly one-half her exports of silk came to us, silk in its various forms, raw, tissue, embroideries etc., accounts for eleven-sixteenths of Japan's total sales to us. The next item is tea, of which we took four-fifths of her total export. Tea and silk make up four-fifths of Japan's sales to us, the other one-fifth being *spread over 150 articles.* Among these are porcelain, straw plaits, camphor, floor matting, sulphur, tooth brushes, fans, and refined copper.

Japan also trades indirectly with us in sales to, and purchases from, the Philippines and Hawaii Territory, particularly the former. To this "branch establishment of ours" she sells a wide range of articles, with coal and potatoes leading. Sugar is Japan's chief import from the Philippines, but we also send her from there flax, hemp, jute and china grass. In 1902 the total trade between the islands and Japan was:

Exports to Japan	$743,944
Imports from Japan	862,406

With Hawaii the trade was—

Exports to Japan	11,316
Imports from Japan	912,980

Japan's ledger for 1902 shows, as chief items:

	Exports to	Imports from
British India	$ 6,641,773	$25,386,629
Great Britain	8,638,382	75,081,786
The United States	39,955,396	24,229,106
China	23,325,595	20,214,247
France	13,587,162	3,363,396
Germany	12,359,040	12,854,834
Korea	5,255,982	3,963,057

This item shows the necessity of Japan's resistance to Russian encroachments in Korea. Since 1896, and under Republican policies, American sales to Japan have grown from 9.64 per cent. to 17.9 per cent. in 1902 of her total imports, while Great Britain's share has fallen from 34.88 per cent. to 18.52 per cent. . . Says Mr. Ballard: "We ought not to rest exploiting the needs of growing markets until our sales to that Empire equal our purchases from it."

OUR HALIFAX LETTER.

After a canvass of the wholesale houses of this city, your correspondent has come to the conclusion that more goods both in volume and value have been passed on to the retail trade than in any former year. In wholesale dry goods, several firms report an increase of 10 to 12 per cent. over the business done in 1902, which is all the more gratifying from the fact that sales were very good during that year also. A couple of the oldest and most reliable firms make a more conservative estimate of the year's business, and content themselves with saying that "business was as good as last year, and we are very well content." The Halifax police captured a very enterprising swindler last week. He goes by the name of C. McMichael, and hails from Kamloops, and while here he was very lavish with express money orders which it appears were stolen from the branch office at Orangeville, Ont. He arrived by the steamer from Boston on Sunday, and on board made the acquaintance of a number of young ladies returning to spend the holiday season. He made them a number of expensive Christmas presents, and was such a polished, gentlemanly fellow that the young ladies were very much surprised when Detective Power called upon them for the return of the goods. The police have succeeded in tracing ten of the express orders which had been cashed.

The employees of His Majesty's dockyard have been notified that the Admiralty has voted $23,000 in order to keep all hands at work at the Halifax dockyard during the winter months. There are between 400 and 500 men employed, and all were delighted to hear the good news. This is the first time for many years that the entire staff has been retained during the winter. The extra vote means that probably $23,000 will be spent in Halifax by the men during the months of January, February, and March.

The outlook for the iron and steel industry in Nova Scotia is better than it has been for months. Our young industry naturally feels the effect of depression very readily. With a new manager and a few more strong men on the board of directors, the works at Sydney are likely to be carried on to success. Hundreds of men who had been laid off during the autumn are now re-employed and things generally have assumed a better tone. The Nova Scotia Steel and Coal Company Ltd. continues to develop its properties wonderfully and is in such a strong position now that provincial people may well be proud of it. During the present year it has developed its iron and steel properties and has so increased its production of coal that its output is now the second largest in the province. These are our largest industrial concerns, but the smaller ones have also done well, and are in a very substantial condition with an enlarged outlook for business. Throughout the province there has been the greatest activity in manufacturing circles, and I cannot recall a single department which has not enjoyed a marked degree of prosperity. There are few manufacturers in Nova Scotia, who, during 1903, have not added in some way to their plant, machinery, or factory premises.

Had Kipling been here on Christmas Day, he would have been convinced of the incongruity of his caption, "Our Lady of the Snows." On that day two local oarsmen took their sculls on the harbor for a practice spin, and found the air so balmy that they spent the afternoon on the water. I may add that the Halifax retail stores had the best Christmas trade for many years.

Halifax, 28th December, 1903.

IMPORTS OF PORTLAND CEMENT.

In a reply, through these columns some weeks ago, to an enquirer in Ottawa, we quoted some figures respecting the imports of foreign cement into Canada, which we regret to find have proved a stumbling-block to others. They were only partial figures, and we should have so explained. It was a mistake to allow imports of 196,582 bbls., 132,985 bbls., and 150,721 bbls., in 1900, 1901, and 1902, respectively, to appear as the total imports instead of the partial imports, which they were. We have now derived from the Government returns, Department of Agriculture, specific figures showing the quantity and value of Portland cement imported into Canada for each of ten past fiscal years:

Fiscal Years.	Quantity.	Values.
1893 bbls.,	229,492	$316,179
1894 bbls.,	224,150	280,841
1895, bbls.,	196,281	242,813
1896, bbls.,	204,407	242,409
1897, bbls.,	210,871	252,587
1898, cwt.,	1,073,058	355,264
1899, cwt.,	1,300,424	467,994
1900, cwt.,	1,301,361	498,607
1901, cwt.,	1,612,432	654,595
1902, cwt,.	1,971,616	833,657
1903, cwt.,	2,316,853	868,131
Four months ending Oct. 30th, 1903	1,330,972	547,843

The growth in the import of cement in the Dominion is shown by these figures to have been remarkable. If we take the imports above stated for the fiscal year, 1903, namely, 2,316,853 hundredweights, equal to 661,958 bar-

rels, and add to them the imports for the four months ending October, 1903, which were 1,330,972 hundred weights, equal to 380,277 barrels, we have a total import in those sixteen months of 1,042,235 barrels. We are informed, upon as good an authority on the subject as we have been able to find, that during the calendar year 1903 a fair estimate of the total production by Canadian mills would be 600,000 or 650,000 barrels, though some would place it higher. Thus, then, a year's product and import added together will come to 1,642,000 or 1,692,000 barrels in 16 months. From these figures and estimates it may not unreasonably be concluded that the consumption of cement will still further grow in this country, since its use is being recommended for a greater variety of constructive purposes all the time.

A BANK WRECKER PARDONED.

The news that comes from Detroit of the pardoning by the Governor of Michigan of Frank C. Andrews, the wrecker of the City Savings Bank of Detroit, is amazing. That smiling rascal, Andrews, has caused enough suffering by his dishonesty to make it reasonable to keep him in durance till his hair was white. But after a short year and a half of jail, Governor Bliss lets him loose to prey, if he chooses, upon the community again. The pretext of this precious Governor is that if free, Andrews will have a better chance to make money in order that he may make up to widows and dependent ones what they have lost by him. In what kind of fool's paradise has Mr. Bliss been living, to expect such a thing as that Andrews will give a thought to his victims. Has he not learned that reckless, soulless gamblers of this sort, who would peril their immortal principle, sacrifice friend or foe alike, to "make a million by a *coup*," have no time for sympathy, no liking for restitution. It helps to restore our shaken belief in the sense of rectitude in a community to hear from Mr. Hunt, the prosecuting attorney of the State, that the people of Michigan are almost unanimous in condemning the action of Governor Bliss in paroling Andrews. "The comments in the State press show that the spirit of justice still moves the people. When United States senators, judges, preachers, university professors, merchants and the rank and file of the people so freely express their indignation, it must be evident that the people fully appreciate their governor."

A horrid feature of the case is the dishonest means taken to influence the Governor to pardon this dangerous man. The Detroit News, which has investigated the matter, gives names of man after man, woman after woman, mostly small depositors, whose names appear on the petition for the release of Andrews, who declare that they never signed the petition nor authorized any one to sign it for them. Other depositors declare that they were induced by the promise or the payment, cash down, of fifty cents in the dollar of their small claims, to petition for Andrews' release. The main author of these promises or payments was one W. Louis Graulich, who is "known as a professional bondsman," *and who was one of Andrews' bondsmen.* Some of the people thus gulled were poor and ignorant foreigners, having from $50 to $360 of their savings each in the wrecked bank. One woman, of gentle breeding but small means, who denied that she had signed or that her husband had signed the petition, said indignantly: "No one would dare ask us to do anything like that after we had saved $10 a year for our little girl to take music lessons. I wish there were some way of making Bliss vacate his office. He is a disgrace to the State." Another woman told the reporter that Graulich had promised her a present when Andrews was got out of prison. What sort of ghoulish speculator in poor folks' misfortunes must this man Graulich be? As to the paroling of Andrews by the Governor, the News understands that Attorney this, State Senator that, Tom Navin, and others of "the ticket" were among the men in the Bliss cabinet who "worked" for Andrews' parole. Dirty politics, to be sure! There is a gleam of hope in the announcement that the State Attorney is examining documents and court decisions with a view to determining whether Andrews can be proceeded against on other charges pending against him, notwithstanding his parole.

ACKNOWLEDGMENT.

To all those who have sent to this office during the past ten days evidences of their interest and good-will by a letter or Christmas card, we desire to extend our hearty thanks. To acknowledge separately each one of the many would be, however agreeable, a lengthy and exacting task. We take, therefore, this method of acknowledgment. And we share with these and all other of our subscribers good wishes for a Happy New Year.

FINANCIAL MATTERS.

The Bank of Ottawa is making good progress with their new ten-story office building on St. James St., Montreal. It will be probably the tallest building in that city, and makes a creditable addition to the numerous fine structures on what has been called the "Wall Street" of Montreal.

It may not be known to many readers of this journal that there is one lady manager of a chartered bank in Canada. Miss A. J. Skelly, of Montreal, enjoys that unique distinction. She is manager of the "Carsley" branch of the Banque Provinciale du Canada. This branch does only a savings business, and is situate in Carsley's department store, in Montreal. The idea is to make it easy for the lady patrons of the store to put their savings in this bank, and then when they run short of ready cash, while making purchases in the store, they have their savings account to fall back upon. The plan is said to be a successful one, and the lady manager quite popular with the shoppers who have opened accounts with her.

Is Chicago considered in the United States a normal or an exceptional place? Are the medical men of Chicago more than usually speculative or wealthy? Or, is the American nation running by day after the almighty dollar, and thinking at night what to do with that dollar, when we find such an item as this in the Bankers' Monthly of that city, describing a dinner of physicians. Out of the six speeches, four are on subjects of finance, namely, stocks, bonds, speculation, and investments. Here is the paragraph: The monthly dinner of the Physicians' Club, of Chicago, was followed by discussion of "The Doctor as an Investor." David R. Forgan, of the First National Bank, spoke on "Investments in General;" James P. Houghteling, of Peabody & Houghteling, spoke on "Bonds and Mortgages;" Granger Farwell spoke on "Stocks;" Robert Lindblom spoke of "Speculation In and Out of the Commercial Exchange." Dr. Alexander H. Ferguson closed the evening with a talk on "The Doctor as an Easy Mark." Dr. Fernand Henrotin was the chairman of the evening. Shade of Doctor Oliver Wendell Holmes! Can doctors find nothing to spend an evening talking and arguing about but money-making—speculation—investment? Verily they do things differently in Boston, or they used to. But then Chicago people are—Chicago people. Their Mecca is different.

The year now closing has been a satisfactory one in financial circles in this province, says our Halifax correspondent, writing on Tuesday. The stringency which assailed the money market in the United States has been slower in manifesting itself in Halifax than in any other part of Canada; in fact, they have only recently commenced to feel it. At the present time the banks find it necessary to refuse many good calls for loans, yet, taking the year all through the probabilities are that it has been the best year in the history of our financial institutions and notwithstanding the recent depression they have not suffered much. The year has been fairly free of serious failures in commercial circles which has been favorable to banking progress. Only of late have any very serious failures occurred. The local banks have widened their business during the year, three of them having increased their capital and all of them having opened new branches. The absorption of a Halifax bank by an Upper Canadian institution occurred during the

year and while some have expressed a feeling that the result will not eventually be good for the business community, a statement to that effect has yet to be proved. It is true that the Canadian Bank of Commerce has not been as free with its credits as the institution it replaced, but all the local banks have shown more conservatism in this regard than in former years.

INSURANCE MATTERS.

We have a letter from the actuary of the Nordisk Livsforsikrings (Northern Life Company), dated Kjobenhavn, December 10th, saying that the writer had seen in a German newspaper a translation of part of our article of last August on the decline of assessment assurance companies, and requesting us to send him the complete set, with whatever more we had on the subject.

It is perhaps the need of light-houses along the coast of Maine—as raggedly indented by harbors and headlands, as our own Atlantic Coast—which makes the light-house so prominent an object that the good old Union Mutual Life of Maine has chosen it for illustration in a calendar for 1904. It is a good, plain, sensible calendar, and the Union of Maine is a good, plain, sensible company.

At a meeting last month of the Detroit Underwriters' Club, a story illustrating modern methods of using electricity was told by W. T. Benallack. It was of Martin Hennessy's first experience with an electric fan. Before he arose to the dignity of a local agent he went by the name of "Spike." He started to work for the Michigan Inspection Bureau about fifteen years ago, and one sultry day he went into Sanders' for a vanilla ice cream soda. Down on the end of the counter an electric fan was in operation. "Spike" gazed in that direction a few times, and calling the proprietor, said: "Mr. Sanders, I don't like to interfere, but, be jabers, if ye don't take that bloody squirrel out of that cage, he'll run himself to death."

In the Norwich Union Bulletin for January are quoted some stanzas, of which we copy one. Mr. Laidlaw may have intended them to apply to fire insurance agents; we think, however, they may well suit for clerks, mechanics, or anybody else, who is lazily looking for his "luck" to turn, or for a promotion, which he has done but little to earn. The lines remind us that:

Luck never turns of its own free will,
You must help it to swing around;
In the army of Nothing, that's growing fast
No leaders of men are found;
But go where you will in the walks of life,
An' you'll find it, as found have I,
There is plenty to do 'neath these skies of blue,
If a feller's inclined to try.

TRADE OPPORTUNITIES.

Imperial Institute, London, 11th December.—A box-making company, at Cardiff, would communicate with makers of box shooks, who could ship direct. A firm in Brussels, Belgium, wishes to represent packers of canned salmon and lobsters. A London house would be pleased to hear from Canadian makers of vinegar. The makers of a special damp course wish to place some of this on the Canadian market; and would like to reach some good firms in touch with architects and builders.

Imperial Institute, London, 18th December.—An engineering company wishes some good Canadian manufacturers to take up the agency of their brick and tile machinery. A timber firm in North England asks to hear from shippers of box shooks. An English firm asks for the addresses of Canadian manufacturers of carpets. A maker of fire bricks (for furnaces), at Bristol, who can ship from Avonmouth, would like to hear from Canadian buyers.

Canadian Government Offices, London, 11th December.—A fruit importer, at Sheffield, is in a position to import 300 barrels of apples per week, and requires fresh sources of supply in Canada. A London firm using quantities of pig iron in their business ask respecting Canadian supplies thereof. A maker of dog food and poultry foods asks the names of Canadian tallow merchants, soap-makers, and canned-meat packers, interested in the by-product known as greaves. A firm of last makers would purchase quantities of hard maple wood blocks. An English maker of black lead and laundry blue wants names of wholesale grocers and dry salters in the Dominion. The same house would grind and pack in tins or packets such goods shipped to England from Canada.

Canadian Government Offices, London, 18th December.—Liverpool firm, general merchants, want Canadian agent. Hints are offered that some London capitalists would erect a factory to make "a staple article," if any Canadian municipality would offer "encouragement." An Irish dairy society wish to be supplied with small cut-up boards, suitable for nailing into butter-boxes. Provision broker in North of England would communicate with a large packer of provisions in Canada. Application is made for the addresses of steel works and blast furnaces out here. The utilization of slag is in view. A Vienna commission agent, with English experience, looks for Canadian exporters starting a continental trade. Agents in Canada wanted for a large maker of sauces and grocers' sundries. English firm asks name of Canadian canning house wishing to be represented in Britain. The names of the above-mentioned persons can be had from the Monetary Times by enclosing a stamp to this office.

FOR GROCERS AND PROVISION DEALERS.

The Canadian Minister of Agriculture has ordered another distribution of samples of the most productive sorts of grain to Canadian farmers for the improvement of seed. The stock selected, we are told, is of the very best and has been secured mainly from the excellent crops recently had at the branch Experimental Farm, at Indian Head, N.W.T., consisting of samples of oats, spring wheat, barley, Indian corn and potatoes. Every farmer may apply, but only one sample can be sent to each applicant. These samples will be sent free of charge through the mail. Applications should be addressed to the Director of Experimental Farms, Ottawa, any time before the 1st of March, so that all the samples asked for may be sent out in good time for sowing. Mr. Saunders says that parties writing should mention the sort of variety they would prefer, and should the available stock of the kind asked for be exhausted, some other good sort will be sent in its place.

A writer in India Planting asks why no serious attempt has yet been made to send some of the delicious Indian mangoes to Great Britain? He suggests that a few experiments at a trifling cost would show whether their transport is feasible. Madeira mangoes fetch 1s. 3d. each in London, and there should be a good market, or one could readily be created, for the Indian fruit. Similar remarks may be made regarding the feasibility of shipping mangoes from the British West Indies to Canada. Mangoes, to those who get over the first shock of unfamiliarity, are a most delicious fruit, and so is the famous avocado or alligator pear of the tropics. The United States Agricultural Department is devoting some attention, we note, to the encouragement of shipping these articles from Cuba and Puerto Rico, and it is a fact that already in Washington and New York the few that have been received have realized almost fabulous prices. Jamaica and other colonies should be encouraged to send trial shipments to the Dominion, for, with great care taken in packing, etc., there is no intrinsic reason why some of the tropical fruits, at present practically unknown in the north, would not ultimately reach a position almost rivalling that of the succulent banana.

Some weeks ago we referred to the receipt, at his residence, by the Editor of this journal, of the circular of a fish dealer in the New England States offering various kinds of salt-water fish and fish products to Canadians, duty paid and delivered by express at their very doors. This we

instanced as a specimen of Yankee enterprise, but we doubted its success because the prices charged were so high compared with prices of Canadian fish products in Halifax Montreal, or Toronto; but still the methods of preparing and packing the goods were attractive. We are glad to observe that something of a novelty in the fish line is being introduced by one of the long-established firms in Halifax, Black Bros., Limited, who have fitted up a factory at La Have, west of Halifax, and are putting on the market codfish under different brands, such as the "Acadia," the "Blue Nose," the "Halifax." These are presented in a form, we are told, much more attractive than the packages of codfish, cheap and not over clean, we have been accustomed for years to see "corded up" (and one might almost say handled like cordwood, too). The neater the package, and the more attractively put up, the more likely will it be to sell. We are glad, therefore, to note this move of Black Bros. & Co., and hope they and other packers will not let their market be taken from them by Gloucester or Boston smart people.

FOR DRY GOODS DEALERS.

Among the charters recently granted by the Dominion Government to newly-organized companies interested in various branches of the dry goods business, are: The Novi-Modi Costume Co., Limited, Toronto, capital, $99,000, which will manufacture and deal in clothing; Mr. H. C. Boulter, of Toronto, is among the charter members; and the Imperial Button Works, Limited, Montreal, capital, $100,000, to make and deal in buttons, braids, boxes, and novelties, and take over. A. W. Belfry and R. H. Welden, of Montreal, are among those interested.

The tone of the Bradford wool market continues quiet, according to last reports, and the actual transactions in wool are not of great moment, partly because few consumers can afford to pay present rates for either fine or coarse wools, and partly because the remaining stocks of this raw material are now within a very limited compass. If there had been a sudden spurt in the price of fine merino wools, the hesitancy of users in paying the extreme demands of holders could be understood, remarks a correspondent of the Drapers' Record, but it must be remembered that there has been little real advance in the quotations of these wools since the early part of the year, and yet a diminishing consumption has had no effect on the firmness of these fine wools. This situation can only be explained by the reality of the shortage of supply of merino wools, and there cannot be full relief in this respect for some time to come, whilst the absolute necessities of the trade must cause increased consumption very soon, so that there appears to be no reason to expect any falling away of moment in the quotations of pure merino wools.

SOO CANAL TRAFFIC.

According to figures compiled by Mr. George Johnson, the Dominion statistician, the total number of vessels which passed through the Soo Canal during the season of 1903 was 18,596, a decrease of 4,063, or 18 per cent. compared with 1902. The tonnage was 27,736,444 net tons, a decrease of 13 per cent. Freight carried was 34,674,436 tons, as compared with 35,961,146 tons in 1902. Of these quantities, the Canadian canal carried during the season of 1903, 5,502,185 tons of freight, against 4,728,351 tons, an increase of 16.4 per cent., as compared with a decrease of 6.6 per cent, carried by the United States canal. The registered tonnage passed through the Canadian canal was 4,737,580 tons, an increase over the season of 1902 of 4 per cent., contrasted with a decrease of 16 per cent. in the case of the United States canal. The east-bound freight carried by the Canadian Soo during the season of 1903 was 4,247,295 tons, an increase of 7.7 per cent., which contrast with the figures of the United States Soo, showing a decrease of 14 per cent. The west-bound freight was 1,254,890 tons, an increase of 60 per cent., compared with the quantity carried in the season of 1902 by the Canadian Canal, and contrasting with the showing of the United States canal, which is an increase of only 34 per cent. The articles carried by the Canadian canal westward, which show an increase over the showing of the season of 1902, are coal, hard and soft, increase 431,478 tons, or nearly 86 per cent.; manufactured iron, increase 13,249 tons, or 31 per cent.; general merchandise, 24,915 tons, or 15 per cent. increase. Flour shows a slight falling off; grain, a decrease from 14,720 bushels to 1,760 bushels, and salt a decrease of 27,382 barrels. Of the east-bound freight copper shows an increase of 1,865 tons; wheat and other grain, an increase of 4,334,909 bushels; iron ore, an increase of 195,266 tons; pig iron, increase of 14,874 tons. The decreases are: Flour, 64,266 barrels; lumber, 17,281 thousand feet B.M., and general merchandise, 29,687 tons.

—As our citizens go to deposit their ballots to-day for the candidates who will best represent their interests in the Board of Education or the Board of Control, let them not forget to help a good cause by voting in favor of the Sanatorium for the cure of tuberculosis. An enormous economy in human life can be effected, and a great addition to the productive capacity of the community secured by the curative processes adopted in such an institution.

—It seems probable that the new system of submarine signal bells or electrical telephones, which have proved a success along the New England coast, will be established in the St. Lawrence. It is intended for preventing collisions, advising the approach of a vessel to a harbor, and also gives notification of the vicinity of the port. The device works somewhat like a telephone. A lightship is equipped with a bell below the water-line, and waves of sound travel through the water to the ship which is fitted with a receiver, and notify the approach of a similarly fitted vessel. It is understood that the proposal favored by the Dominion Minister of Marine is to instal a system at once at Chebucto Head, near Halifax, and equip the Allan line steamers with receivers, so that the plan may be thoroughly tested during the winter.

—We have just seen the new Canadian Almanac, namely, the one for 1904. It contains 440 pages, filled with valuable information and statistics about Canada—historical, commercial, legal, ecclesiastical; 440 pages, 35 cents, with map. It is this map we want to speak about. Why should not a few hundred thousand copies of just such a map as this, sixteen inches by ten, but containing statistics of Canada, instead of advertisements of firms, be printed by the Government and sent for distribution in England and Scotland to counteract the trash written and talked there about Canada by people who ought to know better. If any means could be adopted, too, of exemplifying to untravelled Old Country folk the distances between places in this great big country, it would be an enormous advantage.

—M. de Strure, the Russian Consul for Canada, at Montreal, in an interview recently stated that the chief lines in which his country expected to do business with Canada were raw sugar and furs. Arrangements are now being made in order that Russian raw sugar should be brought here under favorable conditions. If the question of duty can be satisfactorily arranged, he thinks there is not any reason why a market for quite a large amount should not be found in Canada. Then, again, there is the fur trade in which Russian merchants are steadily increasing their business in Canada. The largest fur dealers of Russia are now sending representatives to this country and they report a good demand. In addition to these lines there is not much possibility of any very large trade between the two countries, as they both produce pretty much the same things. It is interesting to note also that, in M. de Strure's opinion, there will never be any more Russian emigrants going into the North-West, as the Russian Government is strongly opposed to anything but immigration. As to the Doukhobors, there were special reasons for the Czar to give his permission, but such a case is hardly likely to happen again.

—It may not be generally known that two or three months ago a Manufacturers' Club was organized in Montreal, with headquarters at the old Cantin homestead, in Notre Dame St., where members can meet at noon and not only partake of a good lunch, but enjoy the advantages of social intercourse amongst themselves. The club is limited to fifty, and already has among its members many prominent Montreal business men.

Meetings.

NATIONAL BANK OF SCOTLAND, LIMITED.

The report of the board of directors of this bank has been sent us, which was to be submitted at the annual general meeting of proprietors, to be held within the bank's head office, in Edinburgh, on Monday, the 21st December, 1903.

REPORT.

Appended hereto are the certified balance sheet of the bank, as at 31st October last, and the profit and loss account for the year ending at that date. In submitting these, the directors have to report that:

After providing for all bad and doubtful debts, and writing down the cost of the heritable property owned by the bank, the net profit for the year amounts to	£232,692	13	2
To which there falls to be added the balance brought forward from last year	32,385	9	5
Making together	£265,078	2	7

This amount it has been resolved to apply as under, viz:

To the payment of an ordinary dividend at the rate of 15 per cent. per annum	£150,000	0	0		
And an extra dividend, or bonus, of 5 per cent. per annum	50,000	0	0		
Together	£200,000	0	0		
To writing down the cost price of consols to 85 per cent.	30,000	0	0		
And to carry forward to next year	35,078	2	7		
				£265,078	2 7

The dividend and bonus will be paid to the proprietors in equal parts on 12th January and 12th July next, free of Income-tax.

The bank's reserve fund stands at £1,030,000, exclusive of £200,000 set aside to meet the dividend and bonus payable in 1904, and £35,078, 2s. 7d. carried forward.

In accordance with the requirements of the bank's constitution, the two senior members of the board, Mr. Fletcher Norton Menzies, and Mr. W. Eliott Lockhart, retire at this time, and the directors have pleasure in recommending the proprietors to elect Mr. W. S. Davidson and Mr. A. D. M. Black, W.S., to fill the vacancies.

The directors have to report, with sincere regret, the death of Sir William R. Carmichael Anstruther, Bart., a member of the extraordinary board. To fill the vacancy thus caused, they recommend the election of Mr. Fletcher Norton Menzies, who now retires from the ordinary board.

It will be necessary for the proprietors to appoint auditors for the current year. Mr. J. M. Henderson, F.C.A., London, and Mr. Wm. Home Cook, C.A., Edinburgh, the present auditors, are eligible.

F. N. Menzies,
Chairman of the Board.

The National Bank of Scotland, Limited.
Edinburgh, 14th December, 1903.

BALANCE SHEET, AT 31ST OCT., 1903.

F. N. Menzies, Chairman,
W. Eliott Lockhart,
Geo Younger,
Directors.

T. H. Smith, General Manager.

Edinburgh, 2nd December, 1903.—In accordance with the provisions of the Companies Acts, we, the auditors appointed by the proprietors of The National Bank of Scotland, Limited, certify that all our requirements, as auditors, have been complied with, and we beg leave to report that in our opinion the above is a full and fair balance-sheet, properly drawn up, so as to exhibit a true and correct view of the state of the bank's affairs as at the 31st October, 1903, as shown by the books. We also report that we checked the gold and silver coin, and bank notes, then on hand at the head office in Edinburgh, and at the London office and the principal Glasgow office; as also the certificates and vouchers of the balances with London bankers, Government securities, and other investments of the bank, and found the same in order.

J. M. Henderson, F.C.A.
Wm. Home Cook, C.A.

The general manager of this important bank is Mr. Thomas Hector Smith; the secretary, Mr. George Birnie Hart. The manager of the London office of the bank, 37 Nicholas Lane, E.C., is Mr. James Robertson.

FIRES OF THE WEEK.

During the past week there were several conflagrations which caused more or less serious losses. Briefly stated, they took place as follows: The National Table Factory at Owen Sound, Ont., almost totally destroyed, though the sawmill and most of the lumber mills were saved after a hard fight. Loss over $50,000; insured. It will be rebuilt. The McQuay tannery adjoining had a narrow escape.—The dry kiln of the Canada Cabinet Company at Gananoque, Ont., destroyed, together with a large quantity of valuable lumber. Loss, nearly $10,000.—D. Aitchison & Co.'s premises in Hamilton, where the planing mill, a three-story stone structure, which housed some valuable machinery and a quantity of finished doors, etc., was gutted. The box works were saved, though the damage from water was large. There were several large lumber piles in the near vicinity of the conflagration which were fortunately mostly saved. The insurance is placed at about $18,000, with the total loss considerably higher than this amount.—Moose Jaw, Assa., Machine Works completely destroyed at a loss of $5,000; partly insured.—The pattern store and offices of the John Inglis Company, Limited, gutted, and the main portion of the factory was saved probably only in consequence of the continuance of a strong westerly wind, which helped the firemen to hold the fire in check. The men were handicapped in their fight by the low water pressure, though the chief of the fire brigade had recommended some time ago the increasing of the present six-inch main to double that capacity, a recommendation which was not carried out. The loss, which is mainly in old patterns, is calculated at $40,000, fully covered by insurance.—At a fire at the premises of the Canadian Produce Company in Toronto, which, however, caused a small pecuniary loss, six firemen were obliged to jump from a ladder in order to save themselves from being engulfed under falling debris, and several of them sustained severe cuts, bruises and other minor injuries.—Daniel Sullivan's livery stable in Hamilton destroyed, with several buggies, cutters and other vehicles. Loss, about $12,000; partially covered by insurance.—The Anderson Hotel at Petrolea, Ont., gutted. Loss, heavy; covered by insurance.

A VERY old-established firm of fish and general merchants at Lockeport, N.S., L. P. Churchill & Co., are reported assigned. Their troubles are attributed to the very poor fishing on the south coast of late years, during which they have had recourse to frequent renewals. Liabilities are estimated at about $30,000. L. P. Churchill died in 1898, and his son, Enoch Churchill, has since continued the business.

MONTREAL MARKETS.

Montreal, Dec. 29, 1903.

Ashes.—The offers being made by dealers of $6.10 for No. 1 pots have not as yet brought out much response from makers, though most of the old makers have been communicated with. The stock of pots in store at present is practically nil. Second pots would readily bring $5.50 to $5.60.

THE SOVEREIGN LIFE ASSURANCE COMPANY OF CANADA

Cements and Firebricks.—There is an entire absence of business at the moment, but some fair demand for firebricks is looked for after the New Year. We quote: Belgian cement, $1.80 to $2.05; English, $2.15 to $2.25; German, $2.15 to $2.35. Firebricks, $18 to $24 per M.

Dairy Products.—More enquiry for cheese has been reported from England the past week or so, but offers from that quarter are below the ideas of local holders of finest fall goods, for which they ask 10¾c., and such trading as has been done is in medium goods at about 10c. In butter a fair local trade is reported at from 19 to 20½c. for winter-made creamery, as to quality. Dairy makers are quoted at about 16 to 16½c.

Dry Goods.—The week has been a quiet one in wholesale circles as regards sales, but spring goods are coming in freely and are being put into stock, and the shipment of spring orders will be general after the first of the year. Retailers continue to report excellent trade. The Dominion Wadding Co. has given notice of a further 10 per cent. advance in waddings.

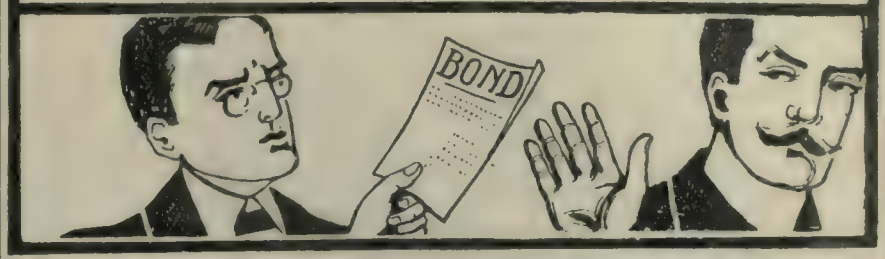
Furs.—Receipts continue quite moderate, and exporters both here and in New York appear to be cautious buyers. We quote prices here for prime skins as follows: Beaver, $5 to $6.50 for large; medium ditto, $4 to $4.75; No. 1 choice bear, $15 for large, $10 for medium, and $6 for small; badger, 30 to 50c.; fisher, No. 1, dark, $5 to $6; ditto, brown, $4 to $5; pale ditto, $3 to $4; red fox, $2.25 to $4; cross fox, $5 to $10 for No. 1, as to color; wolverine, $2.50 to $5; lynx, $4 to $8 for No. 1; marten, $2 to $3 for Ontario and Quebec skins; fine B.C. and Northwest pelts bring higher prices; mink, $2 to $4 for No. 1; fall rats, 8 to 17c.; winter ditto, 15 to 20c.; otter, $8 to $12; fine Labradors and Northeastern would bring $12 to $20; coon, $1.50 to $2.50 for No. 1 black, and from $1 to $1.75 for No. 1 dark; prime skunk, $1.50 for No. 1, all black; short stripe, $1.10; long stripe, 60c.; and broad stripe, 20c.

Groceries.—Among the English houses business is now comparatively quiet, but with the French Canadian houses trade has continued very active in holiday goods, liquors, etc., our French-speaking citizens making their holiday celebration extend from New Year's to Epiphany, or Old Christmas, in the country especially a whole week being devoted to visiting and merry-making. With regard to values little change is noted. Granulated sugar is fairly steady at the last week's decline of 5c., the factory quotation being now $4; yellows range from $3.25 to $4.80. The tea market is a dull one, but the London market, which is practically closed for the holiday season, is expected to reopen strong. Canned corn and tomatoes continue to grow scarcer, and very high prices are likely to be reached before new crop comes in.

Hides.—Beef hides are about steady at the half a cent decline noted last week. Receipts are still large, but hardly so much so as a fortnight ago. In the United States both green and dry hides are reported firmer. Calfskins are still quoted at 10c. for No. 1, and 8c. for No. 2. Lambskins bring 75c. each.

Leather.—While some moderate demand is reported from Quebec boot and shoe manufacturers, whose labor troubles now appear fully settled, the local shoe men are not in the market, and are not expected to do much buying until after the 10th prox. Prices rule steady; indeed, some profess to look for a general advance in sole leather, and it is reported one large tanning concern has already

An Unreasonable Request



SMITH—You will oblige me if you will go on my bond, merely a matter of form you know.
JONES—Oh no thanks! cost me three hundred last time.
SMITH—Well, what will I do?
JONES—Write to THE UNITED STATES FIDELITY & GUARANTY COMPANY,

J. J. W. Deuchar, F.F.A., F.I.A., General Manager and Actuary of the Norwich Union Life Assurance Company, speaking of investments says:

"It may serve to indicate the great importance of obtaining a good return on the investments, if it is realized that one per cent. of increased interest on the funds of a company will, on the average, have as great an effect as a saving in expenditure equal to 10 per cent. on the premium income, while, if an office could count on realizing 5 per cent. interest in place of 3, it might reduce its premiums some 30 per cent., or double its bonuses."

Mr. Deuchar does not name THE GREAT-WEST LIFE; but the above statement exactly describes the happy position of its policy-holders.

put up prices on medium grades of sole, but no general move in this direction has yet been made.

Metals and Hardware.—As is natural at this season, wholesale trade is quiet. Most of the foundries are closed down for the usual yearly repairs, and there is little enquiry for pig iron, but holders are steady in their quotation of $22 for No. 1 Summerlee and $21 for No. 2 Summerlee, which are about the only kinds available. Bars rule easy at $1.85. Reports are heard of further business being done in American tinplates, and it is said one order of 40,000 boxes has been booked from one large western can manufacturing concern. Canada plates and black sheets are steady at $2.45 and $2.40 respectively; galvanized Canadas, $4.25; galvanized sheets, $4.25 to $4.35; boiler plate, $2.10. Ingot tin is again quite notably higher, a sale of a round lot being reported at 31c., and in an ordinary way 32c. is quoted for Straits

As applied to the gain in net amount of life insurance in force in Canada for the FIVE YEARS ending December 31st, 1902.

Head Office - WATERLOO, ONT.

The Mutual Life

OF CANADA

has once more established its right to the above claim. It stands to-day

At the Head Of All

life companies doing business in Canada in the NET AMOUNT IN FORCE GAINED OVER all its competitors during the past five years, as shown by the Government Reports.

and 33c. for L. and F. Lead is steady at $3.20; spelter, $5.75; antimony, 7c., and copper, 13½c.

Oils, Paints and Glass. There is practically nothing doing in these lines at the moment, nor has the week developed a change of any kind. We quote: Single barrels, raw linseed oil, 47 to 48c.; boiled, 50 to 51c., net 30 days, or 3 per cent. for four months' terms. Turpentine, 84c., single barrels. Olive oil, machinery, 90c. to $1; cod oil, 35 to 40c. per gal.; steam refined seal, 50 to 55c. per gal.; tinged and brown ditto, down to 35c.; castor oil, 8 cents, for machinery; pharmaceutical ditto, 8½ to 9c.; lead (chemically pure and first-class brands), $4.50 to $4.60; No. 1, $4.25 to $4.35; No. 2, $4 to $4.50; No. 3, $3.80 to $3.90; No. 4, $3.60 to $3.75; dry white lead, 4¼ to 4½c. for pure; No. 1 ditto, 4 to 4½c.; genuine red ditto, 4 to 4¼c.; No. 1 red lead, 4c.; putty in bulk, bbls., $1.80; bladder putty in barels, $1.90; ditto, in kegs or tins, $2.65; London washed whiting, 45c.; Paris white, 75c.; Venetian boxes, $2.40; 23-lb. tins, $2.55; 12½-lb. red, $1.50 to $1.75; yellow ochre, $1.25 to $1.50; spruce ochre, $1.75 to $2; Paris green, 14c. in bulk, and 15c. in 1-lb. packages; window glass, per 100 ft., $3.25 for first break; $3.45 for second break, and $4.20 for third break; per 50 feet, $1.70 for first break, and $1.80 for second break.

TORONTO MARKETS.

Toronto, Dec. 30, 1903.

Chemicals, Drugs, etc.—Quinine and opium are in somewhat dull demand, though prices continue practically unchanged. There is no special feature worth recording.

Dry Goods. — Trade has been of a more or less holiday character this week. All kinds of cotton staples retain their strength, and, indeed, retailers seem to be almost panic-stricken at the constant advances. Articles of a kind suitable for presentation have been particularly in request this Christmas season, and the qualities asked for were as a rule above the average.

Flour and Grain.—Cars of 90 per cent. patents are quoted as a general rule at $3.05, in buyers' bags, east or middle freights, with extra quality brands a little higher. Manitoba flour is steady. Millfeed and oatmeal continue without appreciable change. Wheat is steady and unchanged. Barley, oats, rye and peas are about a cent higher all round, and keep in good demand at the advance. Corn and buckwheat are dull and unchanged.

Fruits and Vegetables.—Not much change has taken place in the local fruit market since last report. Oranges and the usual Christmas commodities sold very well, indeed. Apples have been a little on the dull side, as is often the case at this time of the year when other fruits are in such brisk request. We quote: Cocoanuts, $4 per sack; oranges, Floridas, $3 to $4 per case, $2.75 to $3 per box; Jamaica, $5 per case for 200's, $3 to $4 for 360's; California, $4 to $6; Valencia, $3 to $4; bananas, 8's, $1.25 to $1.50 per bunch; first, $2 to $2.50; sweet potatoes, $3 to $3.50 per barrel; celery, 20 to 40c. per dozen; cranberries, $9.50 to $10 per barrel, $1.25 per basket; Spanish onions, $2.75 to $3 per large case, and $1 for small; Malaga grapes, $4.50 to $6 per barrel.

Groceries.—Cut loaf and granulated sugars have been dropped 5c. per cental in sympathy with the feeling in New York. A good deal of interest has been manifested in the passing by the United States Congress of the Cuban Reciprocity bill, which means a bonus of .37c. per pound on sugars coming from that island. Considerable strength prevails in the canned goods market and beans have gone up about 10c. Great fluctuations are occurring in the coffee market and it is still high. A good sorting demand has been experienced for nuts and dried fruits. Teas are without feature though prices continue high.

Hardware. — Business continues good, both in the shelf- hardware and metal departments. There has been a brisk demand especially for goods of a seasonable nature. The cold weather has given the movement in sleigh-bells, skates, etc., an extra impetus.

Provisions.—The enquiry for butter is but a quiet one just at present. For cheese there is a pretty good demand and the market keeps steady. Eggs continue very firm. Poultry is experiencing the after Christmas lull, but receipts are light, so that quotations remain steady. For hog products the market continues normally firm.

Wool. — Practically no business is being done in fleece wools, there being no export demand. Pulled wools are meeting with a moderate demand from the domestic manufacturers.

The Metropolitan Life INSURANCE CO. OF NEW YORK.

"The Leading Industrial Company of America."

Is represented in all the principal cities of the United States and Canada

THE METROPOLITAN is one of the oldest Life Insurance Companies in the United States. Has been doing business for over thirty-five years.

THE METROPOLITAN has Assets of over 89 Millions of Dollars Liabilities of 78 Millions, and a Surplus of over 10 Millions.

THE METROPOLITAN pays Death Claims, averaging one for every minute and a half of each business day of eight hours, and has nearly Seven Million Policy-holders.

THE METROPOLITAN offers remunerative employment to any honest, capable, industrious man, who is willing to begin at he bottom and acquire a knowledge of the details of the business. He can by diligent study and practical experience demonstrate his capacity and establish his claim to the highest position in the field in the gift of the Company. It is within his certain reach. The opportunities for merited advancement are unlimited. All needed explanations will be furnished upon application to the Company's Superintendents in any of the principal cities.

Continued Progress

During the last few years the North American has made marvellous strides in all Departments tending to its upbuilding, which can readily be seen by the following figures, showing a comparison of

Three SEPTENNIAL Periods

Year	Cash income	Assets	Policies in force
1881	$ 39,613	$ 88,763	$ 1,221,712
1888	263,691	620,919	7,927,564
1895	581,478	2,300,618	15,779,385
1902	1,270,840	5,010,813	30,927,961

A strong progressive Canadian Company giving excellent returns to its policy-holders, therefore making it a desirable Company for agents to represent. Three active agents wanted.

Must have a good knowledge of the territory, with successful experience in canvassing and in selecting and developing agents. A good opportunity for energetic young men.

DAVID BURKE,
General Manager, - Montreal.

RIGHT and FAIR

THE right plans of Life Insurance, honest in purpose, correct in principle; fair methods of dealing with policy-holders and agents, impartial in treatment, just in settlements—all cardinal aims of the management of the UNION MUTUAL

UNION MUTUAL LIFE INSURANCE Co.
Portland, Maine.

FRED E. RICHARDS, President. ARTHUR L. BATES, Vice-President.

Good Agents always welcome; satisfactory territory open for men of that stamp.

ADDRESS:
HENRI E. MORIN, Chief Agent for Canada, 151 St. James St., Montreal, Canada.

For Agencies in Western Division, Province of Quebec and Eastern Ontario, apply to WALTER I. JOSEPH, Manager, 151 St. James Street, - Montreal.

THE MONETARY TIMES
TRADE REVIEW
AND INSURANCE CHRONICLE.

37th Year.—No. 28. TORONTO, ONT., FRIDAY, JANUARY 8, 1904. $2 A YEAR 10c. PER SINGLE COPY

AN ENGINE

Possessing the qualities of Economy, Simplicity, Quick and Even Regulation, being Easy to Operate, needing Few Repairs, is the kind required by steam plant operators.

These essentials are embodied in the

WHEELOCK and IDEAL STEAM ENGINES.

MADE BY

The Goldie & McCulloch Co.
LIMITED,
GALT. — Ontario. — Canada.

We Make—Wheelock Engines, Ideal High Speed Engines, Gas and Gasoline Engines, Boilers, Pumps, Water Wheels, Flour Mill Machinery, Oatmeal Mill Machinery, Wolf Gyrators, Emery Choppers Wood Working Machinery, Shingle Machinery, Heading and Stave Machinery, Wood Rim Split Pulleys, Iron Pulleys, Shafting, Hangers, Friction Clutch Couplings, Friction Clutch Pulleys, Safes, Vaults and Vault Doors. . . . . .

The non-paying building is the big building without a modern elevator.

The dividend-paying block is the one in which has been installed elevators that do their work steadily, safely, and economically all the time. . . . . .

Fensom's High Grade Elevators never run wild, are sure, and earn their cost. . . . . .

Works and Office—
50, 52, 54 and 56
Duke St., Toronto.

TO THE TRADE.

January 8th, 1904.

Inspection of Boilers

A man does a wise thing when he insures his life. He is also wise to keep his property insured against loss from fire.

Every user of Steam Boilers would be wise to insure against loss from Boiler Explosion and still wiser to use means to prevent explosion.

For these purposes insure in the only Canadian Company working under a Dominion Charter.

THE BOILER INSPECTION & INSURANCE CO. OF CANADA,
Canada Life Bldg., Toronto.

Protects from Loss.

A Trip to the British West Indies

is an inexpensive yet delightful way to spend a part of the coming winter. Steamers of our line sail from Halifax every other Monday for Bermuda Barbados Trinidad and a number of other Islands.

Write us for a Booklet telling all about the trip.

PICKFORD & BLACK,
HALIFAX

Mercantile Summary

THE shipments of coal from Nova Scotia last year were, roughly speaking, 4,700,000 tons, an increase of 350,000 tons.

THE receipts of customs duties at Halifax last year amounted to $1,640,638, an increase of $71,036 compared with the year previous.

MR. GRAHAM FRASER has now assumed entire control of the management of the Dominion Iron and Steel Works at Sydney. A contract for the construction of a wash plant will be let in a few days.

THE company which is now in process of formation for the erection of an uptown high-class hotel in Montreal, have now decided upon a suitable site. It will be on the ground now occupied by the Oxford Hotel and the old Natural History Museum.

IT is stated that Mr. H. M. Whitney and a group of Boston financiers contemplate the formation of a company for the development of coal and iron areas in Cape Breton, and the establishment in connection therewith of a large steel plant. It is supposed that they will purchase the areas of the Cape Breton Coal, Iron and Railway Company at Cochrane Lake.

THE contract for 6,000 tons of 80-pound steel rails for the Temiskaming and Northern Ontario Railway has been awarded to Chas. Cammell & Company, of Sheffield, Eng. The price is a material reduction, perhaps of $24,000 on the whole contract, compared with that asked when the Railway Commission was last in the market, but was a slight advance over the price quoted by the United States Steel Products Export Company, which is the name adopted by the United States Steel Corporation and their associates in the steel and wire pool. The quantity of rails now bought will be sufficient, it is said, to complete track-laying to the present northern terminus at New Liskeard, a distance of 112 miles from North Bay.

THE Pan-American Railway Company, with headquarters at Guthrie, Okla., has now, we see in a dispatch, received a charter authorizing it to carry out its very ambitious aims. These are no less than to build a railway from Port Nelson, on Hudson Bay, to the Argentine Republic. From Port Nelson the road is to run via Winnipeg, in Manitoba, through the States of North and South Dakota, Nebraska, Kansas, Oklahoma, Indian Territory and Texas, thence through Mexico, Central America, the Republic of Panama, Colombia, Ecuador and Peru into the Argentine Republic. A branch line is provided for, to run from Peru through Chili to Valparaiso. The total length is 10,000 miles. The incorporators as named in the charter are: W. B. and C. R. Davis, C. D. Fooper, H. C. Ees and Edward Hellman, of Arlington, Okla. The concern's authorized capital is given as $250,000,000. Will the present generation live to see this project made a reality?

Mercantile Summary.

SYDNEY, Cape Breton, is now a city, having assumed that dignity with the new year.

THE Canadian commercial agent stationed at Manchester, England, has written the Canadian Department of Agriculture for samples of Canadian-grown tobacco. The matter has been referred to M. K. Cowan, M.P., for South Essex, who will endeavor to establish an English market for the Canadian product.

THE annual meeting of the American Association for the Advancement of Science began at St. Louis on 28th ult., and was to last a whole week. There were between 700 and 1,000 members present, comprising some of the most notable men in the country.

ONE occasionally sees a copy of the Bible in so small a compass that it is a marvel of book-making. Not for years have we seen so tiny a specimen of a 120 page book as the waistcoat pocket diary of Lever Bros., Toronto. It contains a lot of information, too, about the metric system of weights and measures, for example.

APPLICATION is to be made at the next session of the Manitoba Legislature for an Act to incorporate the Winnipeg, Selkirk and Lake Winnipeg Railway Company. Its object will be to build a belt electric line around the entire city of Winnipeg, and it will also ask for authority to do an electric light and power business there or elsewhere in the Province of Manitoba; also to erect and operate cold storage buildings and plants.

GREAT interest has been manifested in Paris, France, in the highly successful trial of the Renard automobile railless train. The dispatches say that it crossed the Seine on the new Alexandre III. bridge, made evolutions in the presence of an immense crowd in Place de la Concorde, and proceeded next to the Elysee, where the inventor was complimented by the President. The train made five turns inside the small courtyard, around President Loubet and a small crowd of interested spectators, and returned without the slightest misadventure to the sheds. It carried sixty passengers in five waggons and several tons of ballast.

THE retiring vice-president and general manager of the Montreal Street Railway, Mr. F. L. Wanklyn, was last week made the recipient of a clock, the gift of the members of the Street Railway staff. Those present were the heads of the departments. Mr. W. G. Ross, the new managing director, and Mr. Duncan McDonald, the new general manager, were the speakers. Mr. Wanklyn goes to join the board of the Dominion Steel Co., of which he has been made vice-president. A plate of the time piece contains the following words: "Presented to Frederick Lumb Wanklyn, Esq., by the staff of the Montreal Street Railway on his retirement from the position of vice-president and general manager of the company. Montreal, December 23, 1903."

A PARTICULARLY watchful and savage-looking lion looks out from the large calendar of the Canada Permanent Mortgage Corporation. On one margin are the handsome figures of this great company's capital and assets, on the other the names of the officers.
SUM

ON the 31st December, at an hour before dawn, arrived at Sarnia under her own steam, from the "frozen north," the steamer Monarch of the Northern Navigation Co. She had been hemmed in by ice at Sailor's Encampment in Lake Huron, this side of the Sault Sainte Marie, since the 22nd, and had made a gallant and most uncommon fight in braving the perils of bleak Lake Huron to reach Sarnia before the New Year.

WHEN one reads upon a little box just delivered from the post-office: "Christmas Greeting, W. R. Calloway, Minneapolis," he instantly tries to fancy what out-of-the-way thing that kindly gentleman and practical joker has chosen for his friends. This time it is a bunch of resurrection plant from Texas, which, we are told, when properly moistened unrolls its leaves and becomes green. We have tried it, and find that this is true, and the plant becomes a thing of beauty. The essential point of Mr. Calloway's explanatory homily printed on his Christmas card is that "The plant drinks water."

THE Toronto Railway Company—and as a natural consequence Toronto citizens—have latterly been experiencing a good deal of trouble with the car service. Additional machinery has now been put in, however, and it is hoped that the trouble is at an end. This includes, besides a new 1,600 horse-power engine, the installation of four boilers of 520 horse-power instead of twelve of 160 horse-power in one of the boiler houses. A disabled generator has been repaired, and before long another battery of four boilers of 520 horse-power will be added. A storage battery system will also be used, by which something over 2,000 horse-power, not needed during the slack hours of the day, will be accumulated for use between 5 and 6 o'clock in the evening. When the present additions have been complete the company will have a capacity of 9,060 horse-power, as compared with 7,000 formerly. The company has also lately turned out of its shops a considerable number of new cars of the convertible pattern.

Mercantile Summary.

A COMPANY is being formed to build and operate an electric railroad between Windsor, Walkerville and Chatham, Ontario.

A BOOT and shoe dealer in St. John, N.B., Samuel Wood, is offering to compromise at forty cents in the dollar. He owes $1,900 or thereabout.

THE town of Orillia proposes to issue debentures for $100,000, in order to pay off a debt on its electric light works and to make additions to the same.

UPON demand an assignment has been made by N. M. Hinshelwood, of Montreal, a publisher of illustrated books descriptive of Canadian cities. He is said to show liabilities of $12,000.

HIGHLY favorable reports continue coming to hand with respect to the recent strike of mineral areas at White River, in the Yukon. Some say the field is one which will rival the Klondyke.

THE Leeming, Miles Company, Limited, Montreal, capital stock $100,000, has been incorporated by the Dominion Government. They will carry on a general business as manufacturing and importing chemists, wholesale druggists and manufacturers' agents.

THE Brantford & Erie Railway Company will ask to be incorporated for the purpose of building a railroad, to be operated by any power except steam, between Brantford, Simcoe and Port Dover, with a loop line from Waterford to Simcoe, through Windham, Middleton, Charlotteville, Delhi, and Lynedoch.

A VERY handsome December number is issued by Money and Risks. It contains portraits of Mr. Dexter, Mr. Roberts, Mr. Goldman, Mr. Milne, Mr. Woods, Mr. B. Hal Brown, Mr. McGregor, and other gentlemen prominent in Canadian insurance circles; while its editorial pages contain much matter likely to be read with interest by financial men and underwriters.

THE Sandwich, Windsor & Amherstburg Railway wants legislative sanction to the amending of its borrowing power, to validate the bond issue of $600,000 of December 1st, 1902, and the mortgage of the same date to the National Trust Company, and to take over the property rights, power and assets of the City Railway Company, of Windsor, Limited, and to take stock in any electric or street railway.

THE assignment is noted of G. B. Churchill, of Yarmouth, N.S., who is apparently a sort of Jack-of-all-trades. Originally he was a carpenter, but also takes roofing contracts, lays asphalt walks, runs a mackerel trap, and recently established a corn mill. His troubles are said to have originated from the heating of a large lot of corn shipped last fall from the Western States, on which he made a heavy loss, and frequent recent suits have appeared against him.

Manufacturing and Wholesale Stationers.

43 to 49 Bay Street, Toronto.

Mercantile Summary.

THE Regal Packing Co., of Port Perry, whose head office is in Montreal, opened this branch in September last. They claim to have lost considerable money and now make an assignment.

A PROPOSITION is on foot for the Shawinigan Power Company to supply power to Sherbrooke, Black Lake, Windsor Mills, Thedford, Richmond and other Eastern Townships centres.

A. LESSER, who conducted a general store at Webbwood, was burned out in December last, his loss being between twenty and twenty-five thousand dollars. He carried only $5,000 insurance. His assets are estimated at about $13,000 and liabilities $18,000. He assigns to Kent & Turcotte, of Montreal.

SPEAKING at the opening of the Colonial Products' Exhibition at Liverpool, on the 7th, the Duke of Marlborough said Liverpool had taken the first step in the direction of proving the value of a Colonial Products' Exhibition, designed to show that the empire could be self-sustaining.

J. B. E. FRENETTE, dealing in groceries and liquors at Fraserville, Que., who was recently reported as asking an extension of time, has now assigned. He was formerly in the stationery line, and failed in 1898, for a time thereafter making use of his wife's name.——P. Mercier, a baker in a small way at Windsor Mills, Que., has put his affairs into the hands of an assignee.

THE Great Bend, Kansas, Tribune tells of a mother who was instructing her little son about being generous, and how much more comfort there was in giving than in receiving. Giving him some candy, she told him to divide it honorably with his sister. He wanted to know what she meant by honorably. "Why, give sister the larger portion." After a moment's thought he handed the package to his mamma and said: "Give it to sister to divide honorably with me."

BUSINESS in the Cape Breton district does not appear to be in an altogether healthy condition, judging from the rather numerous failures reported of late from that section. Late cases of business trouble are noted as follows: W. N. McNeil, of North Sydney, dealing in bicycles, carriages, etc., has been obliged to assign, as the result of a suit taken against him by the Canada Motor & Cycle Co., for some $700, and he is said to owe in all $2,600——John O'Callaghan, in the millinery line at Sydney, who was reported as compromising at 25 cents in June last, has now assigned.——Mrs. Helen R. Robertson, of North Sydney, doing a moderate trade in general dry goods, offers her creditors 65 cents on the dollar.——A. L. Bates, general storekeeper at Louisburg, is offering 50 cents. He has been in business since 1897, and is estimated to owe $5,500, with apparent assets of about $3,500. His liabilities are largely to Montreal houses.

Position Wanted

By an A1 Experienced Business Manager, age 31 years. Of exceptional executive ability and talent, having held high positions of trust, such as general manager large manufacturing firm, head accountant financier and correspondent of large wholesale firm, etc., etc. Is a capable, expert accountant of strictly up-to-date methods, understanding thoroughly factory costing. Would prefer taking full charge of branch office or general managership of large manufacturing concern. Can furnish excellent references and will accept moderate salary to commence, but must have scope to prove executive power and ability. Address,

Mercantile Summary.

THE Ontario Traction Company will ask for power to build a system of railways to be run either by electricity or compressed air, between London, Stratford, Seaforth and Wingham, with branches.

THE amount to be raised by civic taxes in Halifax this year has been fixed at $416,486. This is an increase of $6,261 over the amount assessed last year, but, as there has been an increase for schools of $7,850, the city's expenses have been cut down by $1,500.

WM. WOOLEY, a Montreal confectioner, who fitted up new premises somewhat elaborately a year and a half ago, at a cost of from $4,000 to $5,000, an expenditure somewhat beyond his means, has been obliged to assign. His liabilities are estimated at $6,400.

A MONTREAL tailor, named W. Sicotte, for a short time interested in the Victoria Tailoring Parlors, in partnership with one Marin, and only in business about a year on his own account, has found it necessary to assign. His liabilities will reach about $3,500.

WORD comes from Halifax, N.S., of the somewhat unexpected suspension of Kenny & Co., wholesale dry goods merchants. The business is of very old establishment, and was formerly carried on under the style of T. & E. Kenny. The style was changed to Kenny & Co., in 1893, Mr. E. C. Kenny, the present chief partner, being a son of T. Kenny. The liabilities are figured at $140,000, with estimated assets of $115,000.

THE figure of Justice, with her sword and balance, relieved against the red glow of sunrise, the Canadian beaver at her feet and the arms of the Dominion in plain view. Such is the design of a handsome calendar received from the Mutual Life Assurance Company of Canada. Its figures indicating the day of the month are large and distinct, and the colors good. Among the good things said about life insurance on its various sheets we find the following:

It is condolence turned into cash.
It is glad news in a sorry season.
It is the ripened fruit of remembered duty.

THE Toronto & Suburban Railway Company will at the next session of the Ontario Legislature ask for power to extend its line to Hamilton, passing through the counties of Wentworth, Lincoln and Welland, and Niagara Falls, N.Y., or to some point on the Niagara frontier, also to extend to Woodbridge and Brampton and to construct branch lines in the counties and municipalities through which it is authorized to pass. If this company does not make such an enormous improvement in the manner of running cars and in its service generally, that it will hardly be able to recognize itself, we fail to see either where it will find the money for this proposed ambitious extension, or if completed, where it will find the passengers to keep its cars running.

Private Funds Wanted.
An Edmonton lawyer who could place out money on good security at 8% would like to communicate with private parties having money to loan. . . . . .
Box 175, - Monetary Times.

NORTH BAY proposes to raise $50,000 for the erection of a fire hall and town hall, and for the extension of its waterworks system.

THE Dominion Copper Company, Limited, of Greenwood, B.C., which owns several important mines in the Yale and Cariboo districts, has succeeded in raising a sum of $100,000 in order to pay off a certain existing debt and to make several needed improvements.

IN August of last year, Parks & Hodgins opened a dry goods and grocery store in Sutton West. Neither of the partners had had any previous business experience; one was formerly a school teacher, while the other was a farmer, rather a poor team for commerce. They have assigned to Osler Wade of this city.

400 Shares Cement Stock for Sale

This Stock Pays Large Dividends. — For particulars address, "A B C.," care of Monetary Times, Toronto.

Sale of Stock of Hardware Shop Supplies by Tender.

The extensive and old-established business of J. Henderson, in Town of Collingwood, owner retiring.

Collingwood is one of the most flourishing and progressive towns in Canada, and has brightest outlook for the future. It has largest and most up-to-date dry-dock and ship-building plant on upper lakes, where largest vessels are built and repaired. It has also large saw mills, export meat packing plant, flour mills, grain elevator, planing mills, tannery, foundry, etc., which give employment to a large number of hands. It has also near completion large steel plant and rolling mills, wire mills, nail factory, and furniture factory. It is headquarters of large line of steamboats, which give it connection with all points on lakes. Harbor is now crowded with steamboats, which will fit out there in spring.

It is a terminal of Grand Trunk Railray, and also an objective point of railways now building and protected.

Written tenders for above stock will be received by the undersigned up to the 15th day of January, 1904, from whom conditions and terms of tender and other information can be obtained on application. Building for sale or rent.

J. HENDERSON,
Hardware Merchant,
Collingwood.

IRRIGATION IN ALBERTA.

The Canadian Pacific Railway has decided to call for tenders at once for the construction of the main canal in connection with its irrigation work in Alberta. It will be thirty-five miles long, 60 feet wide at the bottom, and will have a depth of water of 10 feet. This canal, we are told, will carry the water to supply the secondary canal which will be, when ultimately completed, one hundred and fifteen miles long. To make the main canal 250,000,000 cubic feet of earth will have to be removed and the work will have to be done by power plants such as steam shovels, railways, etc. The project is designed to make useful for agriculture and grazing some 3,000,000 acres of land now lying waste, owing to the lack of moisture, the region being subject to cycles of extreme drought. Of the tract to be reclaimed, it is estimated that 1,500,000 will be rendered fit for growing cereals of all kinds, the balance to be devoted to grazing and cultivation of grasses. At present, however, the company's plans are to bring but 300,000 acres under irrigation and after colonizing that to extend the works gradually until the system covers the entire area.

THE TRUE SIBERIA.

The impression created by Kipling's poem, "Our Lady of the Snows," is not more false in the eyes of Canadians than, in many particulars, is the impression held by Canadians themselves with regard to Siberia. The prevailing idea is that it is a land of Cossacks and convicts and arctic cold and generally uninhabitable, whereas the truth is that a large portion of its western half, in itself perhaps as large as the whole of Canada, is becoming known as one of the finest, most productive agricultural regions in the world.

The colonization of Siberia on a larger scale by Russian peasants began some thirty years ago, but during the period between 1870-1886 there were, according to official reports, only 286,504 settlers who took up their abode in Siberia. However, during the famine years in Russia in the early 'nineties, the emigration movement greatly increased, and during 1892 a round number of 200,000 peasants passed the Siberian boundary. Every year since then the number has increased. Not only this, but the Government is making efforts to bring Siberia farm products to the front, in competition with the world.

Are the Standard of Purity and Excellence.

Agricultural colleges and experimental stations have been founded, and notable success has already been achieved in acclimating rye, wheat and oats to cultivation north of the 60th parallel. In 1898 it was discovered that the milk from the Siberian cow was unusually rich in butter fat, the average of several tests being over six per cent. The government established several experimental dairies, which at once met with singular success. Danish butter had obtained splendid reputation on the London market, and the Danes were unable to supply the demand. Some of the butter merchants of Copenhagen hit upon the idea of sending their representatives out to Siberia to buy butter, ship it to Copenhagen and stamp it "Select Danish Butter," under which title it went on the London market. This device did not last long, as London dealers speedily learned the butter, but it serves to show what are the capabilities of this great unknown Siberia, which year by year is bound to compete more with our own country.

In 1900 there was one train a week of refrigerator cars loaded with butter that went from Siberia through Russia on the Baltic Sea, and from there to England by steamer. That year there were seven firms in Omsk, the principal business centre for the butter trade, who were buying butter for exportation. The next year there were sixteen firms buying butter in Omsk and new firms were established all over Siberia, and there were five trains per week of refrigerator cars loaded with nothing but butter, which was shipped to England principally. An idea of what the business amounted to can be obtained when it is learned that one morning a single bank in Omsk paid out 106,000 rubles (one ruble 51c) for butter alone. From the reports of the present season it is learned that over three million poods (one pood equals 45 pounds) of butter have been exported from Siberia this year.

Up to the present, but little grain has been shipped out of the country, on account of its large bulk, and the long distance it would have to be transported. Now, however, since the Trans-Siberian railroad was completed to Vladivostock and Port Arthur, there will soon be a larger traffic in grain with the Chinese and Japanese ports. The people of those countries are learning how to eat bread made out of wheat flour, and when the demand is created, Siberia will supply the wheat. It will take some time yet before Siberia will be able to do this, owing to the primitive facilities for storing and so forth, but the day is likely to come when Siberia will be counted as a strong factor in the world's grain market, as she already is in the butter market.

—The bill which the city of Toronto intends to present at the coming session of the legislature will ask for power to prevent, or at any rate regulate the erection and use of buildings for stores, factories or similar purposes in the residential districts. Permission also is sought to pay $11,000 towards the cost of constructing a sewerage system east of the Woodbine. Authority will be sought to issue by-laws for an amount not exceeding $330,000, to be used for cattle market improvements, harbor cribwork, waterworks, new house extensions, Berkeley street fire hall, police station alterations, etc., etc.

Every PLANET blank book is perfectly flat opening—none others are made.

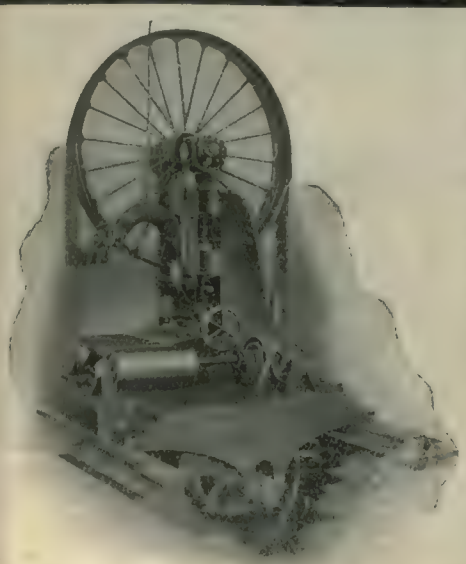
LETTER ORDERS Promptly Attended To.



Reduced Cost of Production

is the goal all are striving for.

One of our Band Mill customers in comparing the **Band** with the **Gang** said:

"It's quality, not quantity, I'm after. I have stood over my men this year and insisted on quality. In selling my cut I arranged for an advance of 25c. per M for every 1% advance in quantity of the outup and better grades By the use of the Band I have secured 8% advance, which means $15,000 extra profit this season."

Several gangs have been discarded for the Pony Band double cutting, adding much to quality while only slightly reducing quantity. Many hundred single and double cutting bands running in Canada. Simple—easily managed—it's worthy of investigation.

FIREPROOF CONSTRUCTION OF BUILDINGS.

It gives us pleasure to discover that the hint thrown out in these columns a fortnight ago respecting the desirability of new and more intelligent conditions in house-building has attracted attention in several quarters. An insurance manager writes: "Referring to your item on page 817 of fire insurance items, where you say: 'Why cannot we in Canada make a move towards less combustible dwellings and stores?' This is a very good text, for Canadians build too cheaply and flimsily to-day. Of course, we can hardly, at this stage, expect to have such a city as Turin is described to be; for the Canadian climate differs from that of Italy, and it would be unreasonable to say that a man in Toronto or London should not have a cottage of wood if he wanted one. Still there is much to be said in favor of safer construction of houses, especially interior construction, and I hope you will keep agitating on this line."

Another letter we have received, too long to quote in this column, but which will be found elsewhere in to-day's issue. In it the writer touches an important point emphasized by our insurance correspondent, that of interior construction of houses. Speaking of cheap houses he says: "One great weakness in construction, and a prime conductor of fire, is to be found in the studding of dividing walls and partitions. The hollow spaces between the upright studding behind the lath and plaster being generally open from one floor to all others above it is easily seen how rapidly fire may be communicated through the building—for these spaces simply act as so many flues." It is now well known that the communication of fire from one room of a house to another may be prevented by the use of porous tiles instead of solid bricks.

Architects and builders in Canada are by this time familiar enough with what has become so common in the United States under the name of steel-frame fireproof construction of buildings. For want of proper care, however, in surrounding steel or iron joists and uprights with porous clay tiles many a steel frame has "buckled" and collapsed. Well may Mr. Davies say, therefore, that a building having iron in its framework not covered with terra cotta or some such tiles to prevent the expansion of the metal is not fire-proof at all.

PRICES OF STOCKS IN 1903.

On another page will be found a table of quotations of highest and lowest securities on the Toronto Stock Exchange for the year just closed. We have also a similar table from Montreal, for which we cannot make room, but which tells pretty much the same story, that the era of high prices during the year was confined to the earlier months, while towards the close prices ruled extremely low.

A memorable year 1903 has been, if the investing public have any cultivable memory, and if brokerage and banking firms can ever be taught by adversity to moderate their visionary operations. In the years 1901 and 1902, what were considered clever people in the United States and Canada launched upon a series of promotions by syndicate and otherwise of hitherto unknown or little known stocks. Scores and hundreds of industrial or commercial concerns in the United States were organized into trusts, many of them egregiously watered; and fancy values being placed upon these they were offered upon the market, and sometimes were heavily underwritten. Led away by the enormous commercial and industrial activity and good crops in the United States, and assuming that the good times would last for an indefinite time, thousands of persons in this country and in that poured their savings or their profits into the laps of Wall Street operators to be staked on margin in over-capitalized ventures. The market became glutted; and in 1903 the meaning of the Morganite phrase "undigested securities" became plain to the minds and the pockets of the sanguine thousands. As the New York Journal of Commerce states the case: "A permanent check has been administered to the business of bolstering up with reputable names artificial creations of capital under the prompting of enormous prospective profits; and the promoting syndicate, however strongly backed, has been hope-

lessly discredited. The 'new finance' has had a reign as brief as its pretensions were shallow." That its operations did not lead to grave disaster may be placed to the credit of the really prosperous condition of trade, and, as a Wall Street financier puts it, to that of the farmers, who once more, aided by bounteous crops, prove themselves to be the backbone of the country.

It was a feature of the year just past that the dead weight of unmarketable novel or foreign stocks caused good dividend-paying Canadian shares to be in many cases sacrificed. The low prices of these led to their being quietly bought up by shrewd and well-to-do people. The same tendency has prevailed in the United States, where sound securities were sacrificed (by those who were loaded up with swollen industrials) for the benefit of persons who were able to purchase a solid thing at a low price. Where early in the year the United States had a heavy indebtedness in Europe, by reason of excessive speculation, the close of 1903 found the balance all the other way. Labor troubles are playing a large part in the industrial and financial situation. And it is being found out by workingmen, or their leaders, that, as Mr. Gompers puts it, "a reduction in wages to tide over or to offset industrial reaction is as inevitable as the reaction itself." The growing disposition to combat trades-union joint action by means of combination of employers in self-defence is beginning to bring labor to realize that it cannot longer have things its own way.

The shrinkage in value in twelve months of a list of securities, numbering some thirty, on the Montreal Stock Exchange was from $363,000,000 at the highest market point to $272,000,000, representing a difference of $91,000,000, or more than 25 per cent. True, there has been a recovery in aggregate value to $290,000,000, equal to some 6 per cent.

Happily, the general conditions in Canada to-day, after a good crop and with continued activity in manufacturing and transportation circles, are likely to enable our people to maintain a fair measure of prosperity notwithstanding the undoubted fact that many men, hitherto well-to-do, have been reduced to genteel poverty, and many more, less pecunious, have lost the savings of years in the accursed race of stock speculation.

THE WOOLLEN INDUSTRY.

One of our subscribers takes exception to a sentence in our Christmas Resume, page 807, where it is said: "Our people are contented. Manufacturers have been busy as never before." This gentleman, who is a woollen manufacturer, is not contented, and declares that the year 1903 has been one of the worst he has known in his line. We must admit that our phrase was too sweeping: for while it is true that manufacturers have as a rule been extremely busy, and that some lines of manufacture have been busier than ever before, the Canadian woollen manufacturing industry has been a noteworthy exception to the general rule. It suffers, and suffers seriously, there is no doubt, from the preference given by our tariff to British woollens, which preference deprives our woollen mills of one-third the protection they would otherwise have in the full duty. This is a disability which has been already brought to the notice of the Government, and ought to be again. It is precisely one of the difficulties that a revision of the tariff, which we have repeatedly suggested, would abate.

THE FUTURE FOR CANADIAN WOOL.

The report of the Imperial Commissioners who have been looking into the natural and commercial conditions of the Orange River colony has some interesting features for Canadians. Textile manufacturers in this country have heretofore made considerable use of South African wool. Before the war there were estimated to be some 7,000,000 sheep in the Orange River Colony, whereas now the number is not much greater than 1,000,000, and it will probably take at least half a dozen years for the old standard to be reached. In Australia, too, the herds were largely cut down owing to the drouth, and not only this, but the mutton industry has become of vastly greater importance at the expense of the woollen. In other words, the object of pastoralists has turned wholly or in part from the raising of animals valued primarily for the quality of their wool to that of sheep making good carcases. Canadian textile manufacturers have found that wool raised in the North-West, more particularly in Alberta, is very similar to the coarser grades grown in Australia and South Africa. Both these sources of supply have, as noted above, become largely curtailed, so that there should be a good field for western sheep ranchers, if they will take the opportunity offered.

FARM PRODUCE TRADE.

The butter market may be described as easy, owing to the large arrivals which are coming forward, especially of creamery. Prices are consequently lower. Dairy tubs are quoted at 16 to 17c.; prints, 17 to 18c.; creamery, boxes, 18 to 19c.; prints, 20 to 21c. Another thing which has helped to bring about this condition is that the export demand for winter creamery is slow this season, as a result of which the greater portion of the butter made has to be taken care of in the local markets, which means not only larger receipts here, but less firm price quotations. The receipts of dairy butter are not large, though quite sufficient to supply current requirements. Cheese is dull at the moment, though prices would appear for the present, at least, to have touched bottom. Quotations at present range around 11 1-4c. per lb.

The market for eggs continues very strong. There are practically no receipts of new laid, and stocks in hand are very small. Any stocks now held are in very few hands, and with continued cold weather for a few weeks record prices may be looked for. At present pickled are sold at 22 to 23c., while strictly new laid fetch almost anything.

Very little trade is being done in pork products, but prices may be said to be steady. The movement is seldom large at this period of the year. Dressed hogs remain steady at $6.30 or $6.40 for running weights as bought from the farmers.

The cattle trade of the country during the past year seems to have increased considerably in importance, and to have become placed on a firmer, more stable basis. The discrepancy of prices between Canadian and

United States live stock, which was quite a striking feature a year or so ago, has now largely disappeared, a fact which may be attributed not only to the better organization of the markets here, but to the gradual yet quite marked improvement in the Canadian breeds, through education of the farmers and the good example set by the various exhibitions. In the Toronto market lately an active business has been carried on at firm prices. The enquiries for export cattle on market day this week were particularly brisk, and more could have been sold than those offered. They sold at from $4.75 to $4.87½ per hundred, a price which is slightly higher than that obtainable in Chicago. The steady trade is, however, hardly conformable with the state of the English market, for cables came to hand two or three days ago announcing a drop there of at least 1c. per pound. Cattle are quoted in London at 10 to 11½c. (dressed); sheep, 11 to 12c.; lambs, 13c. Most of the butchers' cattle fetched $4 to $4.30 per cwt., though some lots fetched 40 to 50c. higher. Buyers were plentiful, and everything sold freely. A few feeders and stockers sold at $3.50 to $4; they were chiefly of a weight about 1,000 lbs. or a little higher, and were bought for shipment into various parts of the country. Sheep and lambs are in decidedly brisk demand, and at the market this week there were not enough to go round. Prices ranged about $3.50 to $3.75 for export ewes, $2.50 to $3 for butchers', $4.50 to $5 for lambs. Calves, which were in fair demand, realized $4.50 to $5.50 per hundred. Export cows and heavy bulls were also wanted. Milch cows of good quality were enquired for, but few offered. The prices realized for such would probably be from $40 to $60, though those sold on Tuesday only fetched from $30 to $45.

PREFERENCE IN NEW ZEALAND.

Eight years ago both Canada and South Australia tried to make a reciprocal agreement with New Zealand, and both failed. Two years later the Canadian Commissioner made a tour through the islands, addressing a number of meetings, and returned making the statement that New Zealand would yet follow the example of Canada in a preferential policy. It has now done so; after a lively but short discussion of only two days the Assembly passed the measure by a vote of fifty to sixteen. It is entitled a "Reciprocal Trade Bill," and proposes to admit British goods at the present rate of duty, but to charge a higher rate on certain foreign lines. A Sydney newspaper gives a statement of such articles with the paragraphs numbered.

On cement the preference is equal, we understand, to 2s. per barrel, which should give Canada a chance.

On the articles in List No. 2 the preference is 10 per cent., save on boots and shoes, furniture and paperhangings, which are 11 1-4, 12 1-2 and 7 1-2 respectively.

In List No. 3 the advantage is 20 per cent. Here is an opening that should stir up the Canadian exporters and give a good deal of the trade that falls now to the United States.

Our correspondent in Australia informs us that the Canadian Commissioner proposes to go to New Zealand early next year, and would like to hear from Canadian manufacturers who wish to avail themselves of this opportunity. Below is the summary of the bill as alluded to above:

THE ARTICLES AFFECTED.

1. On cement the additional duty will be an amount equal to the amount payable under the tariff.

2. On the following articles will be levied an extra amount equal to one-half of the amount payable under the tariff: Basket and wicker ware, n.o.e., not being furniture. Bicycles, tricycles, and the like vehicles; also finished or partly finished or machined parts of same, n.o.e., including weldless steel tubing cut to short lengths. Boots, shoes, and slippers, n.o.e.; goloshes, clogs, pattens, vamps, uppers, and laces. Candles. Carriages, carts, drays, wagons, and perambulators, and wheels for the same. Carriage shafts, spokes, and felloes, dressed; bent carriage timber, n.o.e. China, porcelain, and parian ware. Clocks. Cordage and rope, n.o.e. Cream of tartar. Earthenware, stoneware, and brownware. Fancy goods and toys. Firearms, all kinds. Fish, potted and preserved. Furniture and cabinetware, n.o.e., and other than iron. Glass, crown, sheet, and common window. Glassware; also plate glass, and glass polished, colored, and other kinds, n.o.e.; globes and chimneys for lamps. Hardware, ironmongery, and holloware. Hops. Iron nails. Iron pipes and fittings for same, including maincocks. Lamps, lanterns, and lamp-wick. Musical instruments—viz., pianos. Paperhangings. Paper, wrapping—viz., blue candle, glazed cap, glazed casings, small, hand, lumberhand, and tissue. Paper, wrapping, other kinds, including brown, cartridge, and sugar papers. Plate and platedware. Pumps and other apparatus for raising water.

3. On the following articles, not being the produce or manufacture of some part of the British dominions, and which are now admitted free, a duty of 20 per cent. ad valorem will be charged: Bicycles and tricycles, fittings for—viz., rubber tires, pneumatic tires, outside covers, and inner tubes; rubber and cork handles and pedal-rubbers; also dropforgings and stampings, ball-bearings, weldless steel tube in full lengths, rims, forks, and spokes in the rough. Gas-engines and hammers, and oil-engines. Gumboots. Iron and steel cordage. Iron, plain black sheet, rod, bolt, bar, and plate. Iron-wire netting. Printing-paper. Rails for railways and tramways. Sailcloth, canvas, and unbleached double-warped duck. Surgical and dental instruments and appliances.

After 30th June, 1904, the full duty will be payable on the above goods unless there is produced to the Collector of Customs an invoice of the goods having written or printed thereon a certificate signed by the sender or consignor, stating that the goods are bona fide the produce or manufacture of some part of the British dominions named in the certificate. Every importer or agent of an importer who produces any invoice or certificate under this section knowing the same to be false in any particular, is liable to a fine not exceeding £100, or, at the option of the Commissioner, to treble the value of the goods specified in such invoice.

FAIR TRADE.

The progress of Mr. Chamberlain's campaign in the Old Country brings into relief the fact that for years past, even among the vast body of people who would never dream of calling themselves out-and-out protectionists, a very respectable percentage might with accuracy have been styled fair-traders. Of these, while a few went so far as to say that something should be done to stop the inflow of foreign goods into the United Kingdom the majority had only an indistinct idea that, in spite of the general soundness of the theory of free trade, it did not work out fairly in the case of Great Britain. This idea, held somewhat hazily by a large number of people until the Chamberlain propaganda was begun, has now become crystalized into more definite shape, and may, perhaps, be described best as the policy of fair trade. That is to say, the opinion of this important section of the British electorate is that absolute free trade would be the proper policy for

Britain to follow, provided that other nations would adopt it also; or that one-sided free trade is no free trade at all. This practically is what Premier Balfour's doctrine of Retaliation comes to; the going against an abstract principle for the present in the hope of bringing about its general adoption later on.

This, too, may be looked upon as Sir Michael Hicks-Beach's position, as described by himself a short while ago. Sir Michael, so prominent in the past as a staunch free-trader, admitted that serious injuries had been done to British trade by the high tariff of foreign countries. In this connection, too, he made some noteworthy remarks upon the difference between natural and illegitimate cheapness. Natural cheapness may be described as the condition which exists in a country when, through a combination of favoring circumstances, such as easy access to large supplies of raw material, or particularly well adapted soil, climate and so forth, it can produce a certain article at a lower price than other countries, in which case the latter will do well to import that particular article, and, in order to pay for it, send some other product for the making or growing of which they in turn have special advantages. Illegitimate cheapness is a very different thing, being often the co-operating factor in the process of "dumping." The latter does an injustice to the people amongst whom it originates, because, being brought about by the fact that a high tariff renders foreign competition in the home market impossible, it makes them help pay for goods used by the country into which they are dumped. But it also plays havoc with the industrial conditions of the latter, dislocating its market, throwing its workmen out of employment at times of depression, and rendering the whole economic basis of trade unstable.

This is what Sir Michael Hicks-Beach and his school of fair traders are so anxious to guard against that they are even prepared to forsake for the time being their time-honored doctrines of Cobdenism. To do this they are calling upon their old foe, protection, but, as they are careful to explain, it is only in the endeavor to bring about real free trade. The pendulum of British opinion is swinging toward protection, but so long as it remains in the grip of such men as we have mentioned it is not likely to be allowed to swing too far in the direction of the very evils which, in high-tariff countries, are the things which the British fiscal reformers are trying to combat.

THE LABOR MAN'S PANACEA.

Mr. Gompers' remedy against hard times is this: Workingmen shall resist to the utmost any reduction in wages, so that the consuming power of the masses shall continue uncurtailed, the policy of decreasing wages as a means of tiding over a time of industrial depression being, according to him, not only injurious to the economic body, but perversive of the very purpose it is proposed to serve. If this be a fair sample of the reasoning of labor union leaders, which we presume it is, it will be seen, what many have suspected before, that it is somewhat crude, and also that cause and effect are mixed up in a most extraordinary manner.

It is gratifying to be able to note that, while Mr. Gompers admits, referring to the United States, that an industrial reaction is in progress, he does not place all the blame for this untoward condition on the benighted capitalist or employer; for, on the other hand, he contends that such setbacks have their beginnings outside all human agency or responsibility, and have their "cause and effect exactly as have the tides, attraction and repulsion, and the law of gravitation." In passing, we would observe that there are many people who would hardly like to go so far in the direction of human irresponsibility as the eminent labor leader. For example, the case of the building trades may be pointed out. How many million dollars' worth of property which would have been built this year under more auspicious circumstances has been postponed owing to strikes and generally unsettled conditions in the labor market? And as a further result of this cessation of building operations, how many employees have had to pay increased rents for their homes because of scarcity of dwellings, and, as a consequence of that, have been induced to ask for increased wages in order to pay for such increase in the cost of living? And higher wages for the employee mean increased cost of production for the manufacturer, which, in turn, means that the employees' wages will eventually go less far. And so on, ad infinitum.

Mr. Gompers says, let this one item of cost, higher wages, continue; that then the purchasing power of the masses will continue unabated. According to his theory, then, namely, that the higher the wages, the bigger the market, consumption of goods should have become larger and larger. But this is exactly what has not happened. The shoe has been on the other foot, for what is now actually causing a depression in the States is the serious diminution of consumption in many lines of goods. It is not to be disputed that the rate of wages and the purchasing power of the people do react on one another; nevertheless, we think that Mr. Gompers, in his proposed remedy, shows but a very superficial understanding of the trouble now looming on the horizon.

Which started first, the diminished consumption or the proposed reduction in wages? Emphatically, the former, for it was not until the manufacturers discovered their markets becoming limited, and as a result had to ease off in prices, that they felt obliged to curtail the expenses of carrying on their business by reducing wages. The unionist idea is to go on working at the fullest capacity and the highest wages, thus creating for the manufacturers the largest market and the largest power to buy at good prices. But under this reasoning why did buying begin to fall off simultaneously with the payment of the highest wages? And how can the manufacturers afford to carry on operations at the fullest capacity when there is no market to take the product of such operations? At that rate, the position of labor might be very pleasant for a little while, but capital would be speedily bankrupt, and what would be the position of labor then? We are afraid Mr. Gompers will have to abandon his highfalutin theories and descend to the lowlier policy of give-and-take.

THE CHICAGO DISASTER.

The mayor of Chicago, who on New Year's day ordered the closing of nineteen theatres in that city because they are not provided with the sort of fire-proof drop curtain that the by-laws require, has made some strong statements as to the condition of the interior which a personal visit disclosed to him. "The fact remains," he says, "that there would have been no panic if the apparatus in this theatre, which, judged by all ordinary standards, was the best-equipped play-house in the city, had been in proper working condition. There is no getting beyond that fact." Hundreds of lives would have been saved, he says, in the disaster at the Iroquois theatre if the asbestos curtain had been constructed as it should have been. He found disregard of city ordinances in the state of the exits and the gallery stairs, and an alderman who accompanied him in the inspection, declares indignantly, "This theatre should never have been allowed to open."

It is the old story of the easy-going neglect of precautions which the law ordered for the saving of life in case of fire. Possibly the responsibility for this neglect may yet be placed upon the proper shoulders, whether of the theatre owners or of the municipal officers, whose business it was to see that city by-laws were complied with. The chief electrician of the Iroquois theatre, where the disaster of Wednesday occurred which caused the death of 586 people, has been formally arrested, charged with manslaughter. Other arrests have been made; and it is possible that this dreadful calamity may result in arrangements that will minimize the chances of such another horror.

Monday's newspapers state that it is ordered by Mayor Harrison that every theatre in Chicago must hereafter comply with the following regulation before being allowed to re-open. They must have:

Steel roll curtains.

Wide exits.

No combustibles of any kind in the house furnishings.

Fireproofed scenery.

No calcium or "spot" lights to be used on the stage.

Skylights above the stage provided with automatic lids, to permit the egress of smoke, fire and gas.

Separate stairways, each exit having its own stairs to the street.

THE FIELDS OF QUEBEC.

It illustrates the great extent of Canada, and incidentally the proportion of it yet unoccupied, to be told that one of its Provinces, Quebec, contains 218,723,000 acres, and that only 14,444,000 acres, or 6½ per cent., is occupied as farm land. What the remainder is, what proportion of it forest, lake or wilderness, we are not yet exactly informed. But so much as we have stated is derived from Bulletin No. 18 of the Census of 1901. This document declares that there are 150,000 holders of land in Quebec, 20,000 of whom, in round numbers, have from half an acre to five acres each; 24,000 from five to fifty acres; 90,000 from fifty to two hundred acres, and 16,374 201 acres and over. We should have said that 135,625 are owners, 9,284 tenants, and 5,690 both owners and tenants. It is interesting, and not a little remarkable, that nine-tenths of the farm land (93.18 per cent.) is owned by those who work on it, and only 6.82 per cent. is under lease. This makes a contrast with Ontario, where close upon 15 per cent. is under lease, and a trifle over 85 per cent. owned by those who live on it.

Rather more than half the occupied land is described as improved. For example, there are 4,704,000 acres in field crops and 3,360,000 acres in pasture. There are orchards covering 34,096 acres; vineyards and nurseries 312 acres; while 28,809 acres are devoted to vegetables and small fruits. The proportion of the land devoted to hay and oats is astonishing to any one who does not know that these are the two principal crops of the Province; 2,548,450 acres were in the census year devoted to hay and 1,350,031 acres to oats; the yield being a ton of hay and 24 bushels of oats per acre. Only 139,000 acres were devoted to spring wheat and 104,000 acres to barley, which yielded 14 bushels and 24 bushels per acre respectively, but buckwheat, peas, corn and rye covered 228,000 acres in all. Potatoes were planted on 127,000 acres, and yielded an average of 134 bushels. Hops, flax and clover all appear in the list, but more prominent than all these is tobacco, of which no less than 7,655,000 pounds was grown on 8,661 acres. Most of this is consumed in the nabitants' pipes, but part of it is sold, as Essex and Kent leaf from Ontario is sold, to be manufactured in Quebec, Granby, or Montreal, into smoking or chewing tobacco.

It is estimated that the value of the agricultural lands and buildings in the Province is $350,550,154, of implements and machinery $27,038,205, and of live stock $58,488,457. Here is a total of $436,076,000. The crops and animal products were considered worth in the census year $85,034,401. The statistics of fruit are not without interest. The census says there were 2,256,000 apple trees, some lovely "fameuses" and others among them, no doubt, which yielded about a bushel apiece in 1901. Cherry trees and plum trees were in number 394,000 and 364,000 respectively. Pear trees numbered 11,823 and peach trees only 332. Grape vines, however, were numerous. For statistics of the produce of animals, from milch cows to bees, we find we have no room.

PATENT MEDICINE DISCOUNTS.

A little war is going on between the manufacturers of proprietary drugs or patent medicines and the wholesale druggists. The latter have for some time past contended that they were not getting large enough discounts from the manufacturers, and have made several efforts to have these adjusted on a basis more satisfactory to themselves. They succeeded in doing this in the case of several medicines which were just being placed on the market, but some of the larger and better known dealers have held out. Now, it is said, the wholesalers' association threaten to boycott the preparations of the latter unless the discount, which at present ranges from 10 to 15 per cent., is made larger. The manufacturers claim that the discount at present allowed is just as large as that which is accepted by jobbers on the other side of the line without demur. Against this, however, it may be stated that in a country like Canada, whose territory is equal in size with the United States, but

whose population is only one-twelfth as large, the expenses of doing business are, in proportion, very considerably larger. The manufacturers claim that any increased profit for the wholesale dealers would have to come out of the pockets of the retailers, a state of things which they believe should be fought against. Meanwhile, a great deal of vigorous discussion is being indulged in by those interested in the manufacture of patent medicines and by others; dire threats are made, indeed, as to what will happen, under the Canadian anti-combine laws, to those guilty of carrying on a boycott against any particular firm's make of goods. For our own part, so far as we can see, the whole matter hinges upon the right of any man to do business or to refuse to do business at the rate of profit which to him seems desirable. A business firm has the generally recognized privilege of refusing to deal in an article which is looked upon as not sufficiently unprofitable or upon which it is impossible to make sufficient to offset the expense and trouble.

THE UNITED STATES STEEL SHRINKAGE.

The directors of the United States Steel Corporation have passed the dividend on common stock, but have declared the regular quarterly dividend of 1¾ per cent. on the preferred stock, payable on February 15th. The net earnings of the company for the quarter ending December 31st were reported as follows: $14,845,042, against $31,985,759 for the same period in 1902. For the whole year, too, the shrinkage was very large. Net earnings for the year aggregated $108,979,012, as against $133,308,763 in 1902, and $105,947,160 in the first nine months after the corporation was organized. The net balance, after appropriations for sinking fund, bonds of subsidiary companies, depreciation, improvements and construction, and interest on the regular bonds, as well as sinking funds, have been deducted, is $60,824,380, as against $90,306,524 in 1902. The undivided profits, or surplus, for last year aggregate $11,962,645, which is less by $22,291,012 than in 1902. This is partly accounted for by the charging off for depreciation in inventory valuations and adjustment for sundry accounts of $5,750,000, which was not done before. On December 31st last the company's unfilled orders aggregated 3,215,123 tons, as against 5,347,253 on the same day in 1902.

CUSTOMS REVENUES.

There is no lack of encouragement to the Finance Minister in the yield of revenue, which the tariff has made to the Dominion coffers this year. The customs revenue of the Dominion or the six months ending Dec. 31 was $20,653,761, a large increase over same period last year. At the two principal ports, Montreal and Toronto, the customs revenues have been the largest ever collected. At Montreal the figures exceed those of 1902, by rather more than a million and a half of dollars. We present the Montreal figures by months:

January	$ 883,292 38
February	896,589 40
March	976,310 78
April	793,075 90
May	970,758 03
June	1,246,533 40
July	1,305,460 87
August	1,186,775 15
September	1,188,291 42
October	1,068,792 11
November	1,040,103 34
December	989,844 63
Total	$12,545,827 41

At Toronto, also, the year 1903 witnessed the largest collections ever made by the custom house. For the whole twelve months the collections total $7,675,000, as against $6,468,844 in 1902, an increase of more than a million. The entries for 1903 aggregate 120,209, and those for 1902, 109,516. Upwards of twenty millions of dollars has been added to the revenue of the Dominion Government by the custom houses of these two cities during 1903.

AFFAIRS IN MONTREAL.

To write a newsy or interesting letter at such a time as this, after a week of seasonable dissipation, is quite a task for a somewhat befogged brain, so if the matter furnished is not up to the mark, Mr. Editor, you yourself must be held partly responsible, since you were so insistent upon having a Montreal letter this week. Besides this, the cold weather we have been having of late is enough to chill all effort, and even hot Scotches do not suffice to thaw out the springs of imagination. Just imagine the thermometer hovering around 10 degrees below zero since Christmas night, and going down on Monday and Tuesday to 23 below, with a wind that cuts like a razor. Fortunate it is, indeed, that there is no coal famine, such as existed this time a year ago, but as it is, the suffering among the poor has been very great. The poor cabbies are finding few fares these days, for everybody prefers to abide as close as possible to his own fireside, and the women folks obliged to go even a block or two to do necessary household shopping, return with faces white and stiff as marble.

It is a cold time even for the politicians, and bold, indeed, would be the Premier who would fix a general election for such a season as this, judging from the remarks I have heard made by even the most enthusiastic political campaigners and stump orators. Election talk, however, has quieted down during the last week or two, though more or less work is being done in a quiet way towards the not-far-off struggle. The most notable event in this direction is the nomination of Mr. Herbert B. Ames as the Conservative candidate for St. Antoine division in this city, one of the wealthiest and most influential constituencies in the Dominion. Mr. Ames is a son of the late E. F. Ames, who, half a century ago, founded the leading wholesale boot and shoe business now conducted by the Ames-Holden Co., Limited, with branches at St. Hyacinthe, St. John, N.B., Toronto, Winnipeg, and Victoria, B.C. He served a business apprenticeship with the old firm of Ames-Holden & Co., but after the death of his father he withdrew from active business, and has since devoted his attention to studying the principles of good government, both municipal and parliamentary. A dozen years ago he was the principal mover in the organization of the Volunteer Electoral League, formed for the purpose of suppressing the reign of bribery and telegraphing votes, through which the boodling element controlled the City Council. A few years later he was induced to run as alderman for St. Antoine Ward, being returned by a majority of over 1,250 votes, and he has continued to hold the seat with great credit to himself, devoting all his energies to the introduction of clean, businesslike methods, and in following out this line he has met with a large measure of success. He has also been the means of inducing men of high personal and business standing to take a more active interest in municipal affairs, and in this has earned the gratitude of the tax-paying community. Mr. Ames has not hidden the fact that he has aspirations towards Parliamentary honors, but in his case this can only be regarded as a very laudable ambition. Possessed of independent means, an indefatigable spirit of work, and abilities beyond the average, which he is prepared to devote entirely to his country, he is regarded as an ideal candidate. His sympathies are Conservative, and the Liberals have nominated in opposition Mr. Peter Lyall, the well known contractor, who will prove a foeman worthy of his steel. Mr. Lyall is of the Alexander Mackenzie stamp. Like the late Hon. Alexander, he began life as a working stone mason, and by dogged Scotch perseverance, and the observance of honorable business methods, he has worked himself up to the very front rank of successful men in his line. The immense Montreal Cotton Mills, at Valleyfield, the great and picturesque pile of the Royal Victoria Hospital, the Canada Life building, on Bleury

street, and other notable edifices, are monuments to the thoroughness and honesty of his work. A contest between such men may truly be called a battle of Titans, and the great regret is that both of two such men cannot be returned to Parliament.

The approaching mayoralty contest promises to be of a more than usually exciting character. "Jimmy" Cochrane, as he is familiarly called, erstwhile knight of the telegraphic key, and more lately a successful contractor, who now fills the civic chair, has announced himself as a candidate for another term. He surprised a good many people by getting elected in the first place, and can hardly be called a model Mayor for such a city as Montreal, while his connection with the Sicily Asphaltum Paving Co., which had large contracts with the city, has been the occasion of uneasy comment. The candidate most acceptable to the business community is Alderman Hormisdas Laporte, head of the large wholesale grocery house of Laporte, Martin & Co., who, as an alderman, and latterly as chairman of the Finance Committee, has served the city faithfully and well. He has proved himself to be utterly opposed to all boodling schemes, and has the entire support of the reform element in the council. A third candidate, in the person of U. H. Dandurand, a real estate agent, is in the field, and is said to have a certain following, while in some quarters it is claimed that it is the turn of an Irish Catholic, and an effort is being made to have such a candidate nominated.

While on the subject of elections, it may not be amiss to note that the annual election of office-holders on the Board of Trade takes place on the 26th inst., and is already beginning to excite interest. Mr. Arthur J. Hodgson, the present president, whose enlarged duties, owing to the big convention of Boards of Trade delegates last summer, were so efficiently performed, has announced that he will not be a candidate for a second term, and the position would naturally go to Mr. George E. Drummond, of Drummond, McCall & Co., first vice-president, and a prominent shareholder in the Canada Iron Furnace Co., the Londonderry Iron and Mining Co,. and various other iron interests. There is little that Mr. Drummond does not know about the iron industry in Canada, and he has proved himself an enthusiastic and hardworking officer both on the Board of Trade and in the Canadian Manufacturers' Association, but there have been hints that opposition may be offered to his advancement. For the first vice-presidency, Mr. W. I. Gear, of the Robert Reford Co., seems to be the generally accepted candidate. Mr. James Davidson, of the Thomas Davidson Mfg. Co., is relinquishing the treasurership, and will likely be elected second vice-president, but there is no knowing what nominations may be made during the next fortnight or so.

A word now as to the progress of the city generally. You will have seen that the duties paid at the Custom House in 1903 are the largest ever known, and you also know, of course, how remarkable a total of business is represented in the bank clearings for the year. There were over a thousand building permits issued during the last twelve months in Montreal, and 859 houses, representing 1,227 dwellings and 123 stores, were built. The value of these was $4,105,000, which is almost a million more than 1902. The list includes 47 factories, including the largest railway shops in Canada, 17 warehouses, 147 stores, five hotels and 10 office buildings. As to new dwellings, they were much needed. The city has spread beyond its municipal boundaries, and the population has grown more in its suburbs than within its own limits.

Just a final word upon the weather—really, such bitterly cold weather as this gets on one's nerves. But this concluding story will have interest for those of your readers who are householders. All the journeymen plumbers agreed to knock off work this year from New Year's Day till after Epiphany, or Old Christmas, being the 6th inst., and the bosses had the busiest time of their lives during the arctic spell. They had to jump into their overalls and rush around responding to hurry calls to thaw out water pipes, etc., with smudges on their noses, same as any ordinary hand. It was a trying twelve days for housekeepers.

Montreal, 6th Jan., 1904. A. M.

CONDITIONS IN NEW BRUNSWICK.

On the first of January, Provincial Government issued a statement of receipts and expenditures for the year 1903. These showed that the receipts were $801,410.18, and that the expenditures were $816,294.99. The province of New Brunswick thus spent $14,884.81 more than it received, and there was an additional expenditure of $125,000, for which bonds were issued, the money going for permanent bridges. The chief items of revenue, aside from the Dominion subsidies of $491,360, are revenues from Crown lands, $210,089; taxes on incorporated companies, $29,340; succession duties, $22,083; liquor licenses, $22,383, and fees of provincial secretary's office, $11,420. The heaviest expenditure the province makes is $202,847 for education; public works come next with $194,350, while interest took $136,894. The lunatic asylum cost $53,087; agriculture, $26,834; executive government, $32,400; printing, $14,321. The sum of $25,978 was spent on matters of public health. The administration of justice took $18,242.06, and contingencies, $18,192.62. The Legislative Assembly cost $20,571.20. It cost $9,000 to collect the stumpage, $8,027 to protect game; over $10,000 was spent on a revision of the statutes. These are the main items in the expenditure account.

A high level of business activity throughout the province is shown by the fact that the bank clearings at St. John for the year just closed were the highest since the establishment of the clearing house, and exceeded the totals of 1902, the best previous year, by over $7,000,000. The figures for 1903 were $49,013,467, and for 1902, $41,924,176. Another evidence of the good times that have prevailed during the year just closed is seen in the customs figures which were $94,535.97 in excess of 1902. The total of the customs revenue at this port during 1903 was $1,182,836.31, against for 1902, $1,088,300.34. The year 1904 has started favorably. The merchants and business men of this section do not anticipate hard times. Instead, they consider the outlook just as good as at any time during the past four years, and these have been banner years at this East end, as well as all over Canada.

Lumber has always been considered the great staple of St. John trade, and so it is, but last year was an off year in the lumber business, and lumber shipments fell off. The export of New Brunswick woods to the European market was 25,500,000 feet less than in 1902. Valued at $10 per thousand, a low figure, this shows a decline of $255,000. The export to the United States fell off in value $411,603, so that between the two the value of the lumber shipments for the year is nearly $700,000 behind 1902. Despite this decline, St. John had the most successful year in its history. The lumber shippers look for better times during 1904, and with trade in other lines booming, the outlook is a cheerful one.

During the year 1903, there were only twenty-five failures in the whole province of New Brunswick with aggregate liabilities of about $275,000. Nearly one-half of this amount was in the indebtedness of John Kilburn, lumberman. In 1902 there were 48 failures with liabilities of about $231,000.

The Marysville Cotton Mill, operated by the Alex. Gibson Company, is closed down, and may not be able to resume operations for some days owing to the scarcity of raw cotton.

The Dominion Iron and Steel Company have, it is announced, secured possession of valuable deposits of magnetic iron ore found on Austin Brook, in Gloucester County, in the north of this province. They are said to have secured fifteen square miles, and it is understood will mine the ore and ship it to Sydney there to be manufactured.

Fredericton capitalists, who last year secured control of the Crawford coal mine, in Queen's County, have now disposed of it to Boston capitalists at a good advance. The Americans will, it is understood, work the property.

The seven miles of railway from Adamsville, on the Intercolonial Railway, to the coal mine, at Beersville, Kent County, have been completed. This line was built in three months, and the people in the vicinity expect to see a big development of the coal mining industry in their section.

Already there is talk of extending the road two or three miles to another coal mine.

Announcement is made to-day that people along the St. John river, between Fredericton and Woodstock, are moving for the construction of an electric tramway for the carriage of both freight and passengers. This fine section of the province has no railway connection, and the people have grown tired of waiting for promised and expected roads. There are splendid water falls, that, it is said, will generate ample power to operate the trolley line and there are big bark and lumber mills, as well as other industries. The principal merchants are behind the enterprise and one of them is now in Boston endeavoring to interest capitalists in the interprise.

The White Candy Company, of this city, is contemplating extensive additions to their plant. New capital has been secured, and a meeting called for the 12th instant will, I am told, authorize an increase in the capital from $35,000 to $75,000. The firm are doing a steadily growing business, particularly in the West, and these improvements have become necessary in order to hold the trade.

S.S. "Senlac," the new steamer for service between St. John and the south shore of Nova Scotia, was successfully launched on Monday. She had steam up when she took the water. A few fittings have yet to be put in but the "Senlac" will be on the route in a few days, and she will open up new markets for St. John merchants.

St. John, N.B., 5th Jan., 1904. * * *

OUR AUSTRALIAN LETTER.

The Australian Federal political campaign is more and more turning on the preferential trade question. The Government supporters are becoming more pronounced in its favor and extreme free-traders against it. The Right Hon. G. H. Reid, the leader of the Opposition, appears to be in favor of it in some form, but frames his utterances in terms for which he is famous and has gained for him the title of "Yes, No."

Two or three Canadian branch houses have had to appear in the police court under charge of presenting fraudulent invoices to the customs. They were acquitted of fraudulent intent, but were heavily fined nevertheless. I have frequently called attention to the importance of exporters following the instructions of their agents in making out their invoices. They have neglected it, and when they get their profit and loss returns will know what the carelessness costs them.

Harvest is on and while the crop has been somewhat injured by excessive rain, rust and caterpillars, it is likely to be a record one. Wool has dropped a little, but the prices are still good. The export of dairy produce and minerals is increasing so that better times are ahead. In the meantime trade is poor. The wheat and flour importers have yet to liquidate and already rumor is free with the names of one or two reckless firms, who are supposed to be in troubled waters. An old firm of contractors recently made a very bad, and to the general public, an unexpected failure.

The Governments of Australia want all the money they can wheedle out of the banks. Money is, therefore, tight and collections slow. No Canadian concern is yet or likely to be affected, and the clouds will soon roll by.

Sydney, New South Wales, F. W.
30th November, 1903.

FIREPROOF BUILDINGS.

Editor Monetary Times:

Sir,—In your issue of the 25th December you cite the case of Turin, in Italy, as a city of fireproof buildings, where fires are practically unknown or are of very rare occurrence owing to the absence of all destructible material in the buildings. This condition you say is one which must be very profitable to insurance underwriters, and you very naturally ask why our builders do not act on the same lines in this city and country as in the Italian city mentioned. You properly point out that a sensible householder, a shrewd architect, and a competent brickmaker might combine to produce an ideal fireproof house, store or office building. As you were kind enough to mention my name in connection with this subject, and invited a reply from me, I will endeavor to reply as briefly as possible compatibly with the importance of the subject.

People generally, I take it, are familiar with the fact that every new country passes through different periods of time in building construction, and all are governed in the first instance by the idea of securing the cheapest and most convenient material wherewith to erect houses. In this country lumber being so cheap and plentiful, it is quite to be expected that its first buildings would be constructed of wood. This age is the wooden age.

Then comes the roughcast, stucco, or plaster age; next, the brick age combined with cement and iron; and finally, stone and its accompaniments of tiles, terra cotta, etc.

As wealth accumulates and land becomes dearer, the character of buildings changes to a more permanent nature; they are constructed of the most durable material, and with modern improvements in fireproofing. There is no reason why this city should not become as absolutely fireproof as the aforesaid city of Turin.

In the combination of brick or stone walls with iron girders and tiled floors one would quite reasonably consider "fireproof" to have been reached; but unless the iron is securely covered from exposure to heat to prevent expansion, it is even more dangerous in case of fire than wooden beams would be.

Architects are well acquainted with this fact, and provision is now made, safeguarding against every contingency by building with hard burnt brick, almost metallic in nature, with iron girders to bind the walls together, and to carry the floors with iron columns to carry the intervening ceilings or floors; all iron to be covered with porous terra cotta tiles, which are non-conductors of heat or cold; these admit of being plastered upon without lathing, as is required on wooden walls. This method of construction, with tiled floors, makes a building absolutely fireproof. Of course, there is always the risk of fire destroying the perishable contents of the building, but without risk to the building itself.

The question of fire resistance is a very serious one, and should be well considered by every building householder. Although it may be rather costly to build fireproof structures in the beginning, yet the immunity such buildings possess in destructive conflagrations, the protection they afford to valuable lives and contents, and the saving of insurance rates by being fireproofed more than counterbalances the extra cost over that of the ordinary building.

In the majority of houses, where stability is sacrificed for economy, one great weakness in construction and a prime conductor of fire is to be found in the studding of the dividing walls and partitions. The hollow spaces between the upright studding behind the lath and plaster being generally open from one floor to all others above, it is easily seen how rapidly the fire may be communicated through the building, because these spaces simply act as so many flues. By the use of porous terra cotta tiles this great danger may be entirely obviated, and, though they are a little more costly, yet the end justifies the means, the result being absolute protection to life and property. Fire insurance makes reparation in dollars and cents, but can any estimate be put on the value of human life? The age of wooden buildings is past, or ought to be. Modern civilization calls for higher ideas and more permanent material in the construction of houses, stores and office buildings, whose exteriors should be of hard burnt brick or stone, the interiors of fireproof material. Exquisite in design and chaste in execution and color as such buildings may be, it is absolutely necessary, and should be enforced by law, that all erections of a public character, such as hospitals, colleges, theatres, etc., should be fireproofed as far as human agency can make that possible. A building that has the iron in its construction not covered with terra cotta tiles is not fireproof at all.

Given the sensible householder and the shrewd architect, we on our part are quite ready and competent to fill all and any demands of the day for any class of fireproof brick, pressed or plain, glazed and enamelled, terra cotta tiles, porous

or solid, vitrified clay in any size, shape or design that fancy may dictate. This the public may not be aware of, and we thank you for the opportunity of this letter and the timeliness of the suggestion; for nothing can be more important to the public than its safety from fire, which may at any time, as we all know to our cost, break out and destroy valuable property, as witness the late Ottawa fires and others, to which it is needless here to point. In the Don Valley brick works every preparation is made for this class of work, and the public are invited to call and inspect the various operations necessary for the production of all such building and fireproof material.

Yours respectfully, ROBT. DAVIES.

Toronto, 31st December, 1903.

PRESENTATION TO MR. G. F. C. SMITH.

The occasion has at last come for the retirement, which had already months ago been foreshadowed, of Mr. G. F. C. Smith from the position of chief officer in Canada of the Liverpool and London and Globe Insurance Company. At a complimentary dinner given to him by the company at the Windsor Hotel, Montreal, on the evening of the 31st ult., Sir Alexander Lacoste, one of the directors, presided, and all the directors, officers and staff, together with a number of agents, were present. Mr. Smith was presented with an illuminated address and a handsome silver service, and many tributes were paid by those present to the excellent business and social qualities of the guest, whose name has been a household word in fire underwriting circles of Canada for many a day. The following is the text of the address:

"We, the Canadian directors, officers, agents and employees of the Liverpool and London and Globe Insurance Company cannot permit you to retire from active service without placing on record our high appreciation of those qualities of head and heart which have endeared you to those with whom you have been so long associated. After over half a century spent in the company's service, during forty years of which you have with becoming dignity filled the position of chief Canadian officer, it is no light matter to sever the official tie which has so long bound us. We realize, however, that you have well earned the rest that the directors have kindly accorded you, and it must be no small satisfaction to you to know that you carry into your retirement the sincere good-will, affection and respect of all those with whom you have so long labored.. It is in no perfunctory sense that we assure you of how much we shall miss your considerate and courteous leadership, your wise counsel and ever ready assistance in our efforts to promote the interests of the great company we represent, and we shall ever cherish in happy memory our long and pleasant relationship. Your unswerving devotion to duty, your unfailing courtesy, and your kind consideration for the rights and privileges of both friends and rivals have not only endeared you to all, but have proved an uplifting influence, especially to those engaged in similar pursuits.

"Will you kindly accept the accompanying silver service as a slight testimony of sincere regard, and as a tribute to the integrity and high principle which have been such distinguishing marks of your successful business career.

"May the evening of your life be long and serene, and as the shadows lengthen may you experience still more of those lasting joys which are the crowning reward of faithful work."

The present officers of the Liverpool and London and Globe in this country are: J. Gardner Thompson, resident manager, and William Jackson, deputy manager.

METROPOLITAN BANK.

The statement of this bank for the year just passed has been published. It shows cash and readily available assets, $1,604,000, and current loans and discounts, $1,656,000, other items bringing the total up to $3,496,913, bank premises and furniture making the very considerable item of $233,000. There is $940,000 in deposits and the circulation stands at $[illegible]6,087. Net earnings for the twelve months were $26,535. This sum has been applied in writing $10,000 off bank premises and carrying the balance forward to the debit of profit and loss. We learn that Hon. W. Mortimer Clark, Lieut.-Governor of Ontario, has been elected to the seat at the board vacated by Mr. Thomas Bradshaw.

CROWN BANK OF CANADA.

Our announcement lately with respect to this bank has been verified. The organization of the bank is to proceed at once, under Mr. Gerald DeC. O'Grady, who has accepted the office of general manager, having resigned the position of manager of the Bank of Commerce at London. The temporary offices, which are in the Bank of Commerce building, 23 King street West, Toronto, being the offices lately occupied by Laidlaw & Co., are to be opened next week. Mr. Frank Arnoldi, K.C., has been appointed solicitor of the bank. It is intended, we are told, to confine the issue of capital to one million, that is to one-half of the capital authorized. The subscription of shares has gone on quite actively during recent weeks, and is fairly well distributed.

IMPERIAL LIFE ASSURANCE COMPANY.

Another year of successful business stands to the credit of this company. Looking at the comparative table, which gives the totals of income, assets, reserves, etc., for the past seven years, their steady growth is striking. The company's income for 1903 was $578,413, and the proportion of it derived from interest on securities held was $84,632. An addition of $326,000 is made to reserves, and the total assets are swelled from $1,660,700 a year ago to $2,014,293 to-day. We note also the growth of the aggregate assurance in force to $15,407,000, which represents additional assurance secured during the year of something over two millions. Payments for death claims, matured endowments, etc., were $70,737, which the report states was under the expected. The surplus on policy-holders' account, calculating reserves at 3½ per cent. interest, shows the handsome figure of $541,339. If calculated at the less exacting Government standard, the surplus would be $134,000 more.

After referring sympathetically to the death of Sir Oliver Mowat, the former president of the company, Sir Mackenzie Bowell, who was in the chair, drew attention among other things to the salutary provision made by the company for deferred mortality. Although the death loss of the year was light, he says, it may not be light in the next twelve months, and we have therefore provided $37,754 against a possible increase. He referred also to the liberal forms of contract, which have induced many to insure in the Imperial. The remarks of Hon. S. C. Wood at the meeting were confined in the main to analyzing the company's assets. It will be generally agreed that it was wise to reduce so large a holding as $300,000 in bank and other shares to the more reasonable $69,000 it stands at now. Of the assets, bonds and debentures constitute $662,717; mortgages on real estate, $558,119; and demand loans on bonds and stocks, $251,450. The statement is a creditable one, and the promptness with which it was prepared after the close of the year, speaks well for the methods of the company.

A HARD CASE AT CHRISTMAS TIME.

Two well-known clergymen of Montreal, Rev. Messrs. Edmund Wood and Arthur French, write to the Gazette of that city exposing a case of real hardship caused by the excessive costs imposed on debtors in the course of collecting small debts by process of law. An old soldier and his wife, keeping boarders, ran up a bill of $30.42 with a grocer in the course of three months, on which payments of $25.15 in all had been made, leaving a balance of $5.27 due. For this little sum the grocer's lawyer brought action in the Circuit Court, got judgment, and thereby added $21 costs to the amount of the debt. The old soldier was sold out by the bailiff just before Christmas, and the amount realized for his property was not sufficient to pay the costs. He is now without seizable property.

and owes more than when the legal proceedings began. This surely is a case of hardship. It is only one of a thousand, perhaps, but its circumstances and especially its date make it more than usually poignant. The machinery of the law is clumsy and unequal when four times the amount of a debt is incurred in its attempted collection. The suggestion of the reverend gentlemen that lawyers' as well as bailiffs' fees should be abolished in cases of small debts does not seem to us practical. Such functionaries are entitled to be paid for their services. But the limiting of costs to some reasonable proportion to the amount of a debt may well attract the efforts of Quebec legislators.

INSURANCE MATTERS.

The many friends of Mr. Horace W. Davison, nephew of Dr. J. L. Davison, of Toronto, and formerly of the Manufacturers' Life Insurance Co., will be pleased to hear of his progress with his actuarial studies. At the present time he is engaged in the office of the eminent actuary and author, Mr. George King, of London, Eng.

A New England journal prints the following terse approval of a benign business: "Clothes a man can do without —in some climates; body and soul he can make hang together on some few pence per day; knowledge he can leave to the professors and still get on if he is industrious and has common sense; but 'accident insurance' he cannot do without—that is, if he cares for his own welfare and loves his family."

To say "God Bless our Home" is something of a mockery if there are no life insurance policies among its furniture. This we find on one of the pages of the pocket diary presented by the North American Life Company, and a very suggestive remark it is. Another striking passage we select from the same source: "Money is said to be all-powerful, but it cannot buy life insurance when some insidious disease creeps in."

An Austrian actuary, Herr Loewenberg, refers to industrial life insurance as he found it being done in "America" and Canada. On this subject he says: "Life insurance among the middle classes is already an institution of great social value, and much more so is the bequest of a policy to the lower classes, who live from hand to mouth. In such a case life insurance works a veritable salvation. It is a power of human and ethical significance. Mankind should not build monuments to politicians and poets alone."

The Knights of the Maccabees of the World (beautiful title) thought they had guaranteed themselves against the payment of accident claims when they inserted in their beneficiary certificates a clause providing that if the insured, while either sane or insane, committed suicide, the insurance should be forfeited. But they forgot to reckon with juries. Paul Steinsland was a Maccabee. He hanged himself on the knob of his kitchen door. The Maccabees refused to pay the insurance. But a jury promptly found that Steinsland did not commit suicide!

Because his father was sick and the tenement was fireless and fuelless, and he saw other boys hooking coal from a railroad car, little Dick Jackson, of East St. Louis, hooked a few lumps, too—and was caught at it. Judge Beach fined him $5, and then—with tears in his eyes—paid the fine himself. That was a good-hearted judge, comments the Insurance Age, and we will bet a silver dollar against a plugged nickel that his life is insured for the benefit of his children. Here's to the Beach family.

After much persuasion, a Leeds man was induced to assure his life for £500, says an exchange. The first premium was paid and the policy handed over. About an hour afterwards, he was passing close to some buildings in the course of erection, when a portion of the scaffolding fell upon him, causing fatal injuries. A doctor in attendance pronounced the case hopeless. "No chance for me, is there, doctor?" "None, I am sorry to say." To the astonishment of the medico, the dying man broke into a feeble chuckle. "I can't help laughing, doctor," he gasped. "It's the funniest thing on earth! Such a jolly sell—for the—assurance company!"

In the opinion of Hon. John F. Dryden all the business that is written by the industrial insurance companies and the ordinary insurance companies put together does not keep pace with the increase in population of the country. Therefore the field is not exhausted.

According to the report of Chief Benoit, of the Montreal Fire Department, the number of fires last year in Montreal was 858, as compared with 648 during 1902. The losses however, were not in proportion, for they were lighter than during any year since the department was organized. Five lives were lost, but none of the firemen suffered serious injury. The number of false alarms was 150, about the same as in 1902. The decrease in the losses bears out the Chief's contentions that improvements in the protective apparatus and equipment would bear good results. The Chief declares that the fire losses of Montreal in 1903 were the lightest for any year since the present brigade was organized.

Wheat sheaves and clover blossoms are the accompaniments, and properly the emblems, of a pastoral life. One hardly expects, therefore, to find things so dainty and so placid as these used in any way to illustrate so exciting a subject as fire waste or fire insurance. It must be because that excellent gentleman, the vice-president, lives in the country, amid such tranquil surroundings as field and orchard afford, that he has chosen the glories of the fields as his inspiration for a 1904 calendar for the Western. It is a very pretty calendar—well-colored, natural, unstrained, the effect much heightened by its being embossed. If one wished to be imaginative, he might contrast the fire red of the title with the delicate pink and maize color of the clover and the wheat against which it is relieved. But in anything connected with fire insurance there seems no room left for imagination, especially after the way fires have begun in Canada this present January.

Rebating by life insurance agents is not being practised on quite so extensive a scale as is usual at this time of the year or else the rebater is becoming more wary, perhaps both. The exposure at Detroit has had a certain influence on agents in other Michigan cities, for Commissioner Barry is known to be a man of his word, and though he does not object to the rebating of fire insurance premiums, he has expressed his intention of making things interesting for the life insurance rebater. In Wisconsin the commissioner is at present investigating charges made against rebaters and will prosecute if he is able to collect evidence sufficient to convict, while Commissioner Cutting, of Massachusetts, has caused the arrest of an agent on similar charges. The Massachusetts case is likely to settle the mooted point as to the constitutionality of anti-rebate laws, for it is understood that the case will be fought to a finish. In Chicago there is not so much talk of rebating as usual. A Chicago life insurance man, who is in the habit of taking a flier at this time of the year, had not had an offer up to a few days since. The Whayne case has also probably had some effect. Then the public is being informed that it is within the power of any one of a company's policy holders to bring suit to restrain it from paying a claim where the premium has been rebated. This also has had some effect. Altogether, the season for rebaters appears to be duller than usual.—Chicago Investigator.

INDICATORS OF TRADE.

It is well for the commercial observer to have his mind open to suggestions from any quarter. We may think, at first glance, that a playwright is hardly the person to advise as to matters of commerce. But a man in whatever business, who travels much and keeps eyes and ears open, may give pointers worth observing. The views, as expressed in the World of Saturday last, of Mr. W. A. Brady, who is manager of some ten theatrical companies in the United States and Canada, may have a lesson for merchants and manufacturers. He has evidently watched the effect of commercial and financial conditions in a country upon the social habits of the people. And he declares that the amusement business is the first barometer of trade. He describes it as being a public pulse that is as

unerring in predicting the approaching industrial storm as the most delicate compass on shipboard. The manner in which vicissitudes in production or manufacture are reflected by the attendance in theatres or other places of amusement is thus given. He hears every day from his various companies, and he finds that "business is bad in the States, dreadfully depressed. The South is better off than any other part of the Republic. That is due to a fine cotton crop. Of the big cities, Philadelphia and Pittsburg are dull because of the collapse of the steel trust and the discharge of many employees. New York is in troublesome shape (perhaps because of the stock slump and other things). So is St. Louis, and Chicago is none too good. On the Pacific coast business is good, due to the vast Asiatic trade that extends north on the coast to British Columbia." Apparently, whatever affects the earning power of a community, whether strikes, lock-outs, adverse speculation on the one hand, or steady production, profitable trade, satisfied workmen on the other, shows infallibly in the disposition of the people for amusement.

QUEBEC'S GREETING.

The civic greeting which follows, of Quebec to Ontario, was printed in the Globe of New Year's day. In it the Premier of the former Province expresses in a graceful and quaint way, which is peculiarly French, good will towards Ontario. In fact, he says to us all "A Happy New Year" in an unwonted but altogether courteous fashion. His message is as under:

"If the Province of Quebec has ever been happy to shake hands with her great sister across the narrow boundary line which links rather than separates them, it is on the threshold of a new year in this eventful progressive era, in which the two leading Provinces of the Dominion are marching on in great strides side by side, hand in hand. I am happy to testify in the name of Quebec as to the spirit of good neighborhood which animates its people towards their western friends beyond the Ottawa, and to send them a cordial greeting at the beginning of what I hope will be another year of wonderful development of a new Ontario as well as of a new Quebec. S. N. PARENT."

FINANCIAL MATTERS.

The New York Journal of Commerce and Commercial Bulletin says that the dividend and interest disbursement, payable this month by the leading railroad and industrial companies, local banks, trust companies, and traction corporations in the United States, also interest payable on the Government debt, will reach a total of $134,000,000. This sum is about $2,000,000 greater than the total payments of January, 1903.

The end of the troubles with regard to the Soo industries is by no means yet in sight. Several creditors have now served notice on the general officer in charge of the properties that a liquidator of the different subsidiary companies was being applied for and that Speyer & Company's control would be contested. It is declared that the stock held by the Philadelphia financiers was unpaid, and that therefore they are still liable as contributories, also that undue preference had been given to some of the creditors.

—It is satisfactory to observe that among the results, pleasing or otherwise, of the municipal campaign of Friday last in Toronto, the by-law to raise $50,000 for the erection of a sanitarium for consumptives, was carried, if only by a narrow vote. Another welcome feature is the election of Mr. B. E. Walker as one of the Board of Education. Such men as Mr. Walker are not common, and he will prove of great value to the board. Business men in Toronto know that he could have no personal end to serve in agreeing to be a candidate, but that his doing so was out of pure public spirit. That this was generally believed by his fellow-citizens accounts for the very large vote he polled.

We are advised from Montreal that Mr. George E. Drummond, of Messrs. Drummond, McCall & Co., president of the Manufacturers' Association of Canada, and Mr. Frederick W. Thompson, vice-president and general manager of the Ogilvie Milling Company, have been appointed directors of the Canada branch of the Liverpool and London and Globe Insurance Company. The Canadian board now consists of the following gentlemen: W. J. Buchanan, Esq., chairman; E. S. Clouston, Esq.; Hon. Sir Alexander Lacoste, George E. Drummond, Esq.; Frederick W. Thompson, Esq.

FOR GROCERS AND PROVISION DEALERS.

It is announced in Pittsburg that the Standard Oil Company has reduced the price of high grade petroleum by five cents per barrel and of the inferior grades by two cents.

The catch of bank cod by the Nova Scotia fleet last year amounted to 135,000 quintals, while the average is 240,000 quintals. The Newfoundland and St. Pierre catches being equally poor, prices have risen about $2 per quintal, a fact which is likely to curtail the foreign demand.

Mr. J. S. Larke reports to the Department of Trade and Commerce that Canadian breadstuffs appear to have obtained a strong footing in the Pacific Islands. During last month a steamer from Vancouver took about 175 tons direct to the Islands, while 100 tons of Manitoba flour were landed in Sydney for the Island trade.

The large packing house in Brantford, Ont., which was established by the Farmers' Co-operative Packing Company two or three years ago, and since met with disaster, has now been taken over and reopened by the Matthews Packing Company, of Peterboro and Hull, after a general overhauling.

The annual meeting of the Wholesale Grocers' Section of the Montreal Board of Trade was held on the 18th inst, Mr. Albert Hedert, the president, in the chair. The election of officers resulted as follows: President, L. E. Geoffrion, of L. Chaput, Fils & Cie.; vice-president, J. E. Quintal, of N. Quintal & Fils; treasurer, Alen Orsali, of Hudon & Orsali; directors, H. A. Archambault, of A. Robitaille & Cie; S. J. Carter, of Carter, Galbraith & Co.; L. O. Demers, of Demers, Fletcher & Cie.

CLEARING HOUSE FIGURES.

	Dec. 24, 1903.
Montreal	$19,060,206
Toronto	14,489,854
Winnipeg	5,839,721
Halifax	1,814,961
Hamilton	1,088,630
St. John	986,563
Vancouver	1,269,901
Victoria	537,243
Quebec	1,525,160
Ottawa	2,048,304
London	856,453
	$49,516,996

The following are the figures for Canadian Clearing House for the week ended with Thursday, January 7th, 1904, compared with those of the previous week:

Cities	Jan. 7th, 1904.	Dec. 31st, 1903.
Montreal	17,411,263	14,998,694
Toronto	18,784,809	11,721,520
Winnipeg	5,916,000	4,681,919
Halifax	1,814,190	1,475 928
Hamilton	1,279,066	940,441

Deposit with Dominion Government for security of note circulation.	6,036.66	
Notes and cheques of other banks.	100,517.38	
Balances due from other banks in Canada	297,610.20	
Balances due from agents in United Kingdom	20,731.28	
Balances due from agents in foreign countries	44,018.94	
Railway and other bonds, debentures and securities.....	316,226.66	
Call loans secured by bonds, debentures and stocks.....	647,833.74	
		$1,604,316.22
Current loans and discounts..	1,656,977.77	
Notes and bills overdue.....	1,139.05	
Bank premises, safes and office furniture.....	233,032.72	
Stationery, etc.	1,447.49	
		1,892,597.03
		$3,496,913.25

PROFIT AND LOSS ACCOUNT.

Dec. 31, 1903.	Written off Bank Premises..	$10,000.00	
	Balance carried forward.....	18,232.31	
			$28,232.31
Dec. 31, 1902.	Balance at credit of account.		$ 1,696.66
" 31, 1903.	Profits for the year, after deducting charges of management, interest due depositors, rebate on unmatured bills, and after making full provision for all bad and doubtful debts.....		26,535.65
			$28,232.31

W. D. ROSS, - - General Manager.

DRY GOODS ITEMS.

The Dominion Wadding Co. gives notice of a further advance of 10 per cent. in waddings.

The Victoria (B.C.) Sealing Company has declared a dividend of 50 per cent. on last year's operations. The company's schooners took 17,423 skins, 11,714 off the British Columbia coast and in Behring Sea and 5,079 off Cape Horn. The wage bill amounted to $140,000 for the season. The profits were $28,000. It was decided to send out about twenty schooners this spring off the British Columbia coast, and two vessels will be sent to Japan.

Extraordinary scenes have again been enacted on the New York Cotton Exchange. On Tuesday last, after a series of sharp declines and still sharper rises, it opened weak, and at noon prices showed a net decline of about 25 points. Suddenly there was an overwhelming rush to sell, and May cotton went from 14c. to 13.56c. almost at one drop. Five minutes after there was another terrific change, and the price had gone up 40 points. Again a drop, and active options went down 75 points, or something like $4 per bale. Then came another fierce bull rally. It is impossible to foretell anything.

Lockerby Brothers, Limited, is the name of a company which was recently granted a Dominion charter for the purpose of acquiring the assets of Lockerby Brothers, Montreal, wholesale grocers, and carrying on the business, also doing a general business as manufacturers, merchants, packers and agents.

TORONTO STOCK TRANSACTIONS.

There has been a fair under-tone to the market since the beginning of the year, though the volume of business has not been large, nor have prices made very much change. The following is a summary of the transactions in the more widely known stocks: Bank of Montreal, 6 at 248¾-9; Toronto, 20 at 227; Commerce, 205 at 152½-3; Imperial, 5 at 214; Dominion, 43 at 225¾-6; Standard, 9 at 225; Traders', 4 at 133; West Assurance, 111 at 97; C.P.R., 3,447 at 116½-119; Tor. Elect. Light, 15 at 133-4; Can. Gen. Elect., 262 at 139-140½; Com. Cable, 375 at 163-5; Rich. & Ont. Nav., 15 at 79½; Tor. Rail., 819 at 99-¾; Twin City, 485 at 88¾-90⅛; Can. Per Loan, 367 at 120; Dom. Steel, 225 at 9¾-10⅜; Dom. Coal, 244 at 69-73; N.S. Steel, 195 at 79¼-81⅝; Sao Paulo, 272 at 88½-89¼; and Northern Nav., 10 at 73.

RECENT FIRES.

Possibly the intensely cold weather has had something to do with it, but the first week of the New Year certainly seems to have been characterized by a number of burnings of more or less importance, in different parts of the Dominion. Among the more important may be mentioned the following: Ottawa City Post Office, destroyed at a loss of $80,000, not insured; Morin & Co.'s wholesale drug warehouse, and McCall, Shehyn & Co.'s wholesale dry goods store, in Quebec, total loss about $100,000, insured; the Mount Royal Club, Montreal's finest club house, loss over $100,000, insurance, $83,000; Col. Liardet, the secretary, and one member of the Fire Brigade were killed, besides which several were injured; Stirling Brothers' boot and shoe warehouse, at London, Ont., at which Fire Chief Roe was killed and four other firemen injured; loss $20,000 on building and $50,000 on contents, Gorman & Eckert, dealers in spices, next door, stock damaged by water, as also are the O. J. Bucke Company of Chicago, dealers in chewing gum material; the Hamilton street Public School, in Toronto, burned at a loss of about $25,000, at which the most striking feature was the high value of the fire drill system, by means of which, in this case, some 500 or 600 children made their exit from the burning building within a space of two minutes, without the slightest injury to any one of them; McLeod & Hawthorne's dry goods store, in Montreal, loss, $10,000, mostly insured. Brinkworth's general store, and Frank Williamson's implement warehouse at Belmont, Man., totally destroyed at a loss of $9,000, partially insured; Clyde Forks Lumber Company's new mill at Clyde Forks, Ont., loss $10,000, with very small insurance; Laurier Engine Company's patent storage building at Montreal, gutted, loss $15,000.

Continued Progress

During the last few years the North American has made marvellous strides in all Departments tending to its upbuilding, which can readily be seen by the following figures, showing a comparison of

Three SEPTENNIAL Periods

Year	Cash income	Assets	Policies in force
1881	$ 39,013	$ 88,763	$ 1,221,712
1888	263,691	666,919	7,927,564
1895	581,478	2,300,718	15,770,385
1902	1,270,840	5,010,813	30,927,961

A strong progressive Canadian Company giving excellent returns to its policy-holders, therefore making it a desirable Company for agents to represent. Three active agents wanted.

North American Life Assurance Co., Home Office, TORONTO, Ont.

Agency Organizers Wanted.

The Royal Victoria Life Insurance Company wants January 1st, 1904, Two Agency Organizers, one for their Maritime Province Division and the other for their Northwest Division. Must have a good knowledge of the territory, with successful experience in canvassing and in selecting and developing agents. A good opportunity for energetic young men.

DAVID BURKE,
General Manager, - Montreal.

Sometimes a revision of policy forms means little. It stands for

THOROUGHNESS

in every detail in the changes that have been made by the Union Mutual—re-arrangement of features, reduction of rates, liberalizing of rights, a contract modern to the highest notch. A policy that looks well, sells easily and pleases long.

UNION MUTUAL LIFE INSURANCE Co.
Portland, Maine.

FRED E. RICHARDS, President. ARTHUR L. BATES, Vice-President.

Agents always desired—the kind who write policies and hold them.

ADDRESS:
HENRI E. MORIN, Chief Agent for Canada, 151 St. James St., Montreal, Canada.
For Agencies in Western Division, Province of Quebec and Eastern Ontario, apply to
WALTER I. JOSEPH, Manager, 151 St. James Street, - Montreal.

PHENIX....
Insurance Company Of Brooklyn, N.Y.

WOOD & KIRKPATRICK, Agents,
TORONTO

UNITED STATES FINANCES.

Messrs. Clews & Co., New York, in their weekly circular, dated January 2nd, say: On the Stock Exchange 1904 promises better than 1903. We are now on a much lower and more substantial basis than a year ago; stocks have passed from weak into strong hands, and liquidation has run its painful but beneficial course. This fact seems to have had an important bearing in governing the policy of the big leaders, who permitted, if not encouraged, the excessive declines of 1903. After a depreciation of something like $3,500,000,000 in securities a very considerable recovery is inevitable once the important weak spots have been practically eliminated. Anxiety concerning the money market has disappeared, and leading bankers display much more confidence regarding the future. Loans continue at very high figures, probably on account of syndicate extensions,, but as these are well backed they excite no concern. Crop demands for money are now safely passed, and as soon as the January disbursements, estimated at nearly $150,000,000, are over, we are likely to witness easier money rates and rising bank averages. Many standard railroad properties have been selling much below intrinsic merit, not infrequently on a 5 per cent. basis, and these are likely to first feel the stimulus of easier money. The offerings of new bond issues on a larger scale than for many months are practical evidence of the greater confidence amongst bankers regarding the financial situation. Railroad earnings for eleven months of the calendar year showed an increase of nearly 11 per cent. above the big returns of 1902; and all reports from good sources indicate that another year of heavy traffic is in prospect. Whatever the drawbacks in the industrial situation, it must be remembered that the agricultural classes of the United States are still unusually prosperous. Crops have not been large, but farmers have been getting good prices, and the South is enjoying a prosperity never before equalled. It has been estimated that the South will receive fully $300,000,000 more for this year's crop than it did for the big crop of 1898.

But prosperity is not confined to the agricultural classes. Consumption of merchandise is still going on at an unprecedented rate. There are few signs of overproduction, except where high prices or speculation have arrested the natural flow of business, as in case of the steel and cotton trades. Elsewhere labor is well employed at good wages, and the only signs of reaction are where the level has been too high. The coming year is likely to see some readjustments in these lines and temporary loss of employment, but this does not mean business depression; there will be plenty of work at reasonable wages.

MONTREAL MARKETS.

Montreal, 6th Jan., 1904.

Ashes.—Business continues very dull, and no transactions are reported for the holiday weeks. There is a great scarcity of stock, however, there being practically nothing in the Inspector's stores, and nothing coming forward. For No. 1 pots, $6.10 would be readily paid, and probably a shade more for extra tares; seconds are quoted at $5.50 to $5.55 per cental.

Dairy Products.—The cheese market is still a quiet one, but a little more English enquiry is reported, with the result that holders are rather firmer in their ideas. It is a question if there is anything of consequence available in late made goods under 10c. per lb., while finest goods are held at about 10¾c. For butter there is a fair local consumptive demand, which about absorbs offerings, and about 20½c. is the figure for fine winter creameries; dairy makes, 16 to 17c. per pound.

Cements and Firebricks.—The extreme cold weather effectually kills business in cements, but there is a moderate demand for firebricks for the usual seasonable repairs in foundries, etc. We quote: Belgian cement, $1.80 to $2.05; English, $2.15 to $2.25; German, $2.15 to $2.35. Firebricks, $18 to $24 per M.

Dry Goods.—Matters are compara-

Let Us Show You

that we carry the best and most comprehensive line of gas and electric lighting fixtures in Canada and that we can give you better goods for the same money or the same goods for less money than are offered elsewhere.

tively quiet among the wholesale warehouses, and not many orders are coming in just now, but preparations are being made for the active shipping out of spring goods beginning about the 15th inst. Money is coming in from the country very fairly, and there are as yet no indications of any run of January failures, such as used to mark some past years. Under date January 4th, the Colonial Bleaching and Printing Co. advises a further advance in one or two lines of prints of 10 per cent. The Trent Valley Woolen Mills give notice of an advance of a cent a yard on all their output of flannels.

Furs.—For the season, receipts of raw pelts are comparatively small. It is said that collectors in the country have not taken into consideration the decline shown at the October sales in their late purchases, and as local shippers are buying carefully, in view of a further possible decline in some lines at the London sales three weeks hence, there is an apparent disposition, it is said, to hold back country shipments. We quote prices here for prime skins as follows: Beaver, $5 to $6.50 for large; medium ditto, $4 to $4.75; No. 1 choice bear, $15 for large, $10 for medium, and $6 for small; badger, 30 to 50c.; fisher, No. 1, dark, $5 to $6; ditto, brown, $4 to $5; pale ditto, $3 to $4; red fox, $2.25 to $4; cross fox, $5 to $10 for No. 1, as to color; wolverine, $2.50 to $5; lynx, $4 to $8 for No. 1; marten, $2 to $3 for Ontario and Quebec skins; fine B.C. and Northwest pelts bring higher prices; mink, $2 to $4 for No. 1; fall rats, 8 to 17c.; winter ditto, 15 to 20c.; otter, $8 to $12; fine Labradors and Northeastern would bring $12 to $20; coon, $1.50 to $2.50 for No. 1 black, and from $1 to $1.75 for No. 1 dark; prime skunk, $1.50 for No. 1, all black; short stripe, $1.10; long stripe, 60c.; and broad stripe, 20c.

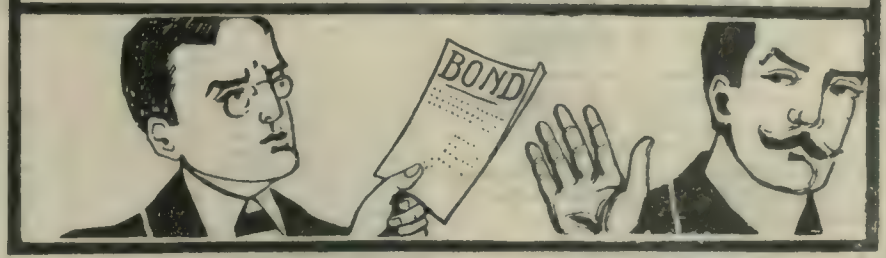
Groceries.—Now that New Year's Day is past and gone, trade in this line is very quiet indeed, and there is really little to write about. Immediately after last writing, refined sugars declined 5c. a cental, but they have since been restored to the old basis, and $4 is again the factory figure for standard granulated. There has been no recovery of activity in teas, and the present demand is very sluggish.

Hides.—Receipts have not been so large since the holiday season set in, and stocks in warehouse do not now show any great accumulation, though there has not been any very active buying lately on the part of tanners. We quote dealers as paying 8c. per lb. for No. 1 beef hides, 75 cents each for lambskins, and 10 cents per lb. for No. 1 calfskins.

Leather.—The demand has not yet opened up briskly, though some moderate sales are reported in dongolas, patent colt and other fancy leathers. Prices of sole are very steady, and some tanners have put up figures for custom sole about half a cent; for manufacturers' sorts there has been no change. Black leathers are dull, and no variation in quotations is noted.

Metals and Hardware.—Some hardware travellers are again "on the wing;" but the holiday quiet among the wholesale houses is not much broken. In heavy metals and plumbers' supplies it is not expected much will be done during the next few weeks. In prices there are no very marked changes. Ingot tin continues to advance, and cable advices are to hand advising an advance of 1½d. a box on tinplates. Canada plates are also said to be rather firmer in Britain. The result of the recent consideration of

An Unreasonable Request



An antiquated custom that of asking one's friends to go on your bond. Would you ask him to insure your house?

When required to furnish a bond of any nature, write to THE UNITED STATES FIDELITY & GUARANTY CO.

Head Office, 86 King St. E. | TORONTO. | Docks, Foot of Yonge St.

J. J. W. Deuchar, F.F.A., F.I.A., General Manager and Actuary of the Norwich Union Life Assurance Company, speaking of investments says:

"It may serve to indicate the great importance of obtaining a good return, on the investments, if it is realized that one per cent. of increased interest on the funds of a company will, on the average, have as great an effect as a saving in expenditure equal to 10 per cent. on the premium income, while, if an office could count on realizing 5 per cent. interest in place of 3, it might reduce its premiums some 30 per cent., or double its bonuses."

Mr. Deuchar does not name THE GREAT-WEST LIFE; but the above statement exactly describes the happy position of its policy-holders.

SCOTT & WALMSLEY,

ESTABLISHED 1858

Managers and Underwriters.

barb wire prices has been a slight reduction, the quotation in lots to the trade being now $2.40, f.o.b., Cleveland, instead of $2.45. The local quotation is now $2.75, f.o.b., Montreal.

Oils, Paints and Glass.—Business is still quiet in these lines. Travellers started out on their routes again this week, but it is yet too early to note much in the way of results. Quotations have not undergone any recent revision, but there is still much cutting being done in leads, with sales reported at figures below our quotations. We quote: Single barrels, raw linseed oil, 47 to 48c.; boiled. 50 to 51c., net 30 days, or 3 per cent. for four months' terms. Turpentine, 84c., single barrels. Olive oil, machinery, 90c. to $1; cod oil, 35 to 40c. per gal.; steam refined seal, 50 to 55c. per gal.; tinged and brown ditto, down to 35c.; castor oil, 8 cents, for machinery; pharmaceutical ditto, 8½ to 9c.; lead (chemically pure and first-class brands), $4.50; No. 1, $4.25; No. 2, $4; No. 3, $3.80 to $3.90; No. 4, $3.60; dry white lead, 4¼ to 4½c. for pure; No. 1 do, 4 to 4½c.; genuine red ditto, 4 to 4¼c.; No. 1 red lead, 4c.; putty in bulk, bbls., $1.80; bladder putty in barrels, $1.90; do., in kegs or tins, $2.65; London washed whiting, 45c.; Paris white, 75c.; Venetian boxes, $2.40; 23-lb. tins, $2.55; 12½-lb. red, $1.50 to $1.75; yellow ochre, $1.25

It Leads Them All.

As applied to the gain in net amount of life insurance in force in Canada for the FIVE YEARS ending December 31st, 1902.

Head Office—Waterloo, Ont.

The Mutual Life OF CANADA

has once more established its right to the above claim. It stands to-day

At the Head Of All

life companies doing business in Canada in the NET AMOUNT IN FORCE GAINED OVER all its competitors during the past five years, as shown by the Government Reports.

The Manufacturers' Life

The Manufacturers' Life Insurance Company has during 1903 once more proved to its many policyholders and friends that it is one of the most progressive and successful life insurance companies doing business in Canada. It has, during the year just passed, surpassed all its previous records by large amounts. The policies applied for reached the grand total of $7,764,542. This is an increase of $1,221,973 over the amount applied for in 1902. The premiums received on this new business amounted to $368,833, or an increase of $62,983 over the previous year. The total premium income showed an increase of over $174,000, reaching altogether the magnificent sum of $1,240,000.

Certainly the policyholders of the Manufacturers' Life have reason to congratulate themselves on the excellent showing made by the company in the year just closed. It is evident, moreover, that there is no better company in which those desiring insurance could place a policy.

to $1.50; spruce ochre, $1.75 to $2; Paris green, 14c. in bulk, and 15c. in 1-lb. packages; window glass, per 100 ft., $3.25 for first break; $3.45 for second break, and $4.20 for third break; per 50 feet, $1.70 for first break, and $1.80 for second break.

TORONTO MARKETS.

Toronto, January 7th, 1904.

Chemicals, Drugs, Etc.—In the local market a normally good trade is being carried on, and prices keep about steady. Practically, the only changes in our Prices Current, under the heading of drugs, is in morphine, which now stands at 75 to 80c., and shellac, which is quoted at 60 to 65c. In New York, trade has improved with the turn of the year, though it is by no means as good as it should be. Dealers, however, are said to look for a good winter season. Blue vitriol has made a sharp advance, owing to increased cost of manufacture. Menthol is quite firm. Quinine is steady, and opium dull. According to reports from Baltimore, the ammoniate market has been fairly active, while considerable business is reported in blood and tankage

Dry Goods.—Good business conditions continue to be reported not only by the wholesale houses, but by travellers on the road. The sorting demand from retailers for all seasonable goods has been intensified by the extremely cold weather. Spring trade is opening up well, and domestic dress goods are especially enquired for. Payments are fully up to average.

Flour and Grain.—The prices for both flour and wheat have been strengthened by reports of the imminence of war between Japan and Russia, and the price of all grades of wheat has already advanced about 2c. Owing to the bad state of the roads in many districts, and the desire on the part of the farmers to hold back for higher values, receipts have been very scanty. This growing strength may be said to be monopolized on this side of the water, for cables from Britain show no such encouraging belief in enhancing values. The local export price for ninety per cent. patents continues at $3.05. Bran and shorts are steady, and oatmeal has a tendency upward. All grains have advanced a cent or two during the week, except corn, which remains stationary.

Fruits and Vegetables.—No new feature has come up for comment. A good trade continues to be done in oranges, though there is the usual after-Christmas lull. We quote: Oranges, California navels, $2.75 per box; Florida, $3; Jamaica, $4.25 per barrel; Mexican, $2; Valencia, $3.75 per case; Jap. tangerines, 65c. per small box; Florida grape fruit, $5 per case; lemons, extra choice, Messina, $2.50 to $2.75 per box; Almeria grapes, ex-fancy, $5 to $6; bananas, Port Limon, large bunches, $1.50 to $2; California celery, $3.50 per case; cranberries, Jersey, $7 per barrel; $2.75 per case.

Groceries.—Sugars have both dropped and risen during the week, but the net result makes the prices just the same as quoted last week. There is a fair movement. There is practically no other feature worth mentioning. Trade is opening up very well after the holidays, the two or three weeks' slackness of years ago being now hardly noticeable.

Hides and Skins.—The state of the hide market at the present moment is very unsettled, in sympathy with Chicago. There the price has gone down ¼c., and though prices here just now are steady, nobody knows how long this will prove the case. Leather is quiet, the demand not being very brisk, owing to the bad state of the roads.

Seeds.—Alsike is not being called for at all, but for red clover there is some little demand at $5 to $6. Alsike sells at $4 to $5, or more for extra good grades. Timothy fetches about $2 to $3, in a quiet market.

Workman's Rights

In Canada a workman may proceed against his employer under the Workman's Compensation for Injuries Act, and at common law. That means untold annoyance and inconvenience to an employer. An employer is even liable for damages to an employee for injury resulting from the negligence of a fellow employee. Oft-times a workman will get back at an employer in this way. The employee may or may not win. Whether he does or not it means a great deal of anxiety to you as an employer. Let us relieve you of all this. Our liability policies are designed to do this very thing.

Will be glad to explain our plan.

EMPLOYERS' LIABILITY ASSURANCE CORPORATION
MONTREAL —— TORONTO
GRIFFIN & WOODLAND, MANAGERS.

A prominent Montreal business man recently gave an agent of another company a proposal for a large policy, with the condition that it would be given to the Sun Life of Canada. This is unusual. It shows that business men have a knowledge of the merits of life companies.

General Manager for Canada
B. HAL. BROWN.

THE IMPERIAL LIFE ASSURANCE COMPANY OF CANADA.

The Annual Meeting of the Company was held at the Head Office in Toronto, on Wednesday, January 6th, 1904, a large number of members and others being present.

The President, the Hon. Sir Mackenzie Bowell, took the chair, when the following report was presented :—

In submitting their report for the year ending 31st December, 1903, the Directors have to record their sincere regret at the death, since their last report, of the Hon. Sir Oliver Mowat, the much honored and esteemed President of the Company from its commencement. During his whole association with the Company he evinced a deep interest in its affairs, and in the substantial yearly progress made, resulting in its present prosperity.

1.—**The Directors** have pleasure in stating that the Company's operations for the past 12 months have been highly satisfactory

2.—**The New Assurances** applied for aggregated $4,450,000. The policies issued and revived were 2,566 in number, and in amount $4,044,113, being the second largest volume of new business ever transacted by the Company.

3. **The Receipts** from premiums, after deducting re-assurance premiums, were $493,781.37, and from interest, etc , $85,958 08, being an increase in cash receipts, compared with those for the year 1902 of $89,284,16.

4.—**The Accumulated Funds** now stand at $2,014,293.43, being $353,900.16 greater than at the close of 1902. A summary of the Company's securities is contained in the Balance Sheet.

5.—**The Reserves** for assurances and annuities have been augmented by $326,166, and now aggregate $1,428,637 Continuing the practice introduced by this Company, and afterwards adopted by the Government, for the valuation of new assurances, all the policies have been valued upon the bases of the Institute of Actuaries Healthy Males Table of Mortality and 3½% interest. The special reserve set apart for the immediate payment of death claims, and for deferred mortality, etc, now amounts to $37,754.

6.—**The Total Assurances** current on the 31st December, 1903, amounted to $15,407,658, a net addition for the year of $2,023,539.

7.—**The Payments** under policies for death claims, matured endowments, profits, etc., amounted to $70,737.45. The death losses again compare favorably with the expected mortality.

8.—**The Directors** remind the members that nine-tenths of the profits from participating policies belong to the policyholders, and that policyholders will, therefore, be studying their own interests, as well as those of the Company generally, in bringing to the notice of their friends its advantages, its sound financial position, and the substantial progress made, as evidenced by the following table, which sets forth the Company's record since 1897 :—

At Dec. 31st.	Net Prem. Income.	Interest Income.	Total Prem. and Interest Income.	Reserves.	Assets.	Assurance In Force.
1897	$ 32,060	$ 5,356	$ 37,416	$ 38,426	$ 336,248	$1,185,725
1898	154,947	12,464	167,411	180,761	677,062	4,169,125
1899	296,617	24,906	321,523	434,112	930,443	7,134,625
1900	258,883	36,273	295,156	597,488	1,102,092	9 226 350
1901	308,030	53,502	361,532	798,785	1,344,128	10,524,731
1902	409.277	71,952	481,229	1,102,531	1,660,777	13,384,119
1903	493,781	84,632	578,413	1,428,637	2,014,293	15,407,658

9.—**The Company's Representatives** have materially assisted in bringing about the existing favorable conditions, and the Directors desire to again express their appreciation of the faithful and zealous services rendered by these gentlemen.

MACKENZIE BOWELL, President.

BALANCE SHEET—December 31st, 1903.

LIABILITIES		ASSETS	
To Policy and Annuity Reserves on basis of Hm. Table of Mortality of Institute of Actuaries, and latest table of British Government Annuitants, and 3½ per cent. interest, including additional reserves, $37,754 (1) for immediate payment of death claims, and (2) for deferred mortality	$1,428,637 00	By Government Inscribed Stock	$ 47,000 00
" All other liabilities	44,316 75	" Bonds and Debentures	662,717 43

DEPOSITS.

$1 and upwards received on deposit and interest thereon paid or compounded half-yearly at 3½%

DEBENTURES.

$100 and upwards are received and debentures for fixed terms issued therefor with interest half-yearly at 4%

WHY lock your money up in a bank to bear an insignificant rate of interest when you can purchase our Debentures, which are issued for one, two, three, four or five years, and bear interest at five per cent. per annum. Half-yearly interest coupons, made payable to bearer, are attached to these Debentures. . . . .

The Debentures are transferable. Remember your money is safe here. There is absolutely no chance for loss. Write us for further information. . . .

don't write anything off until we see what we can do with it.

R. G DUN & CO.,
Toronto and Principal Cities of Dominion

A London despatch of Wednesday declares that a firm of carpet manufacturers in the Midlands intends to manufacture in Canada. The firm will invest £10,000, and intends to employ 100 hands in manufacturing tapestry and velvet carpets. We submit that it will probably be found to need more than £10,000.

The Canadian Gazette, of London, Eng., has the good taste to print, in its issue of 24th December, Agnes Maule Machar's sonnet to Christmas and Charles Heavysege's "Winter Night." These are productions by Canadian authors that will bear comparison with any others on like subjects. This issue is otherwise attractive, containing as it does a Canadian story by Clara Hicks, a lonesome letter from Andrew Hamilton at Agassiz, and several narratives from various parts of the Dominion.

Don't Delay Making Your Will.

The greater the efforts the longer the time spent by an individual in accumulating property for his family or other purposes, the more important becomes the duty of making a will. It is a duty that is sometimes put off until too late to be performed. We will forward free, for the asking, to any address in Canada, the various forms of wills. 3
